Here's what the BMA reviewers said: "I would unreservedly recommend this book to any medical student and indeed anyone else who wanted to learn more about internal medicine including junior doctors, nurses, physicians' assistants. I would have loved a book like this when I was a medical student." Medicine in a Minute is a new full-colour text covering the fundamentals of undergraduate medicine in one book. Medical students no longer have the time or inclination to read the huge texts that used to dominate this market - they need a concise book that covers the core information they have to know, and in a user-friendly format: Medicine in a Minute is this book! The book is edited and written by two of the authors behind the bestselling Cardiology in a Heartbeat and features several common design elements and features. It has quickly found favour with medical students and is consistently one of the bestselling medical student texts. The book is divided into body systems and then each section within the particular body system follows a consistent pattern: Definition Epidemiology Risk factors Differential diagnosis Aetiology Pathophysiology Clinical features Investigations Management Medicine in a Minute is a student-friendly, concise text that you will want close to hand throughout your studies.

2013-02-08 Barbara J. Cohen Medical Terminology: An Illustrated Guide, 7e by Barbara Janson Cohen uses a stepwise approach to learning medical terminology. Part 1 describes how medical terms are built from word parts; Part 2 introduces body structures, diseases, and treatments; and Part 3 describes each body system. Individual chapters also build on knowledge in stages: the Key Terms sections list the terms most commonly used; more specialized terms are included in a later section entitled "Supplementary Terms." The current edition includes a robust student ancillary package delivered under the PASSport to Success brand, with assessment exercises, chapter quizzes, and searchable text online, and a complete suite of instructor resources. The addition of PrepU as a packaging option provides a powerful value to students - the online study experience helps them to understand and retain course information and helps instructors to better assess what their students may be struggling with.
