Read Online Accessing Human Services: International Perspectives

**Accessing Human Services**-Risha W. Levinson

Accessing Human Services- Risha W. Levinson 1985-01-01 Accessing Human Services aims to familiarize the reader with the organized access systems that provide linkages to social and human services in selected countries. The book offers a general description of access systems and presents a comparative analysis of two basic models – the British CAB (Citizens Advice Bureau) and the American I&R (Information and Referral). A report is included on countries that employ the CAB or the I&R models, and on countries where aspects of both models are used, together with variations that are unique to that particular country. This cross-national report of access systems reveals both the common elements and the diversities of such systems.

Accessing Human Services- Risha W. Levinson 1984 Accessing Human Services aims to familiarize the reader with the organized access systems that provide linkages to social and human services in selected countries. The book offers a general description of access systems and presents a comparative analysis of two basic models – the British CAB (Citizens Advice Bureau) and the American I&R (Information and Referral). A report is included on countries that employ the CAB or the I&R models, and on countries where aspects of both models are used, together with variations that are unique to that particular country. This cross-national report of access systems reveals both the common elements and the diversities of such systems.

**New Routes to Human Services**-Risha W Levinson, DSW 2002-02-08 "A state of the art compendium of the I&R of the new millennium. Emphasizing technology, it also addresses operational issues, staffing, training, standards, organizational contexts of operation, and the proliferation of I&R services over time and geography." – Susan Sarnoff, DSW, Assistant Professor and Graduate Chair, Ohio University Department of Social Work "This book updates the vast social, demographic, political and organizational patterns in the web of human services. From the organizational structure of this book, it should have utility and appeal across a fairly broad array of professionals—certainly I&R providers, but as importantly for human service planners and evaluators, and policy makers.” –Karen S. Haynes, PhD, President, University of Houston-Victoria "Levinson is one of the founding mothers of the Alliance of Information and Referral Systems...through this new book, she continues to lend her depth of knowledge toward the advancement of the field." –Leta K. Weintraub, President, New York State Alliance for Information Referral Systems; Preface Acknowledgments List of Tables and Figures Acronyms Part I: Introduction and Background Historical Perspective on I&R Coming of Age in an Information Revolution Part II: Provision of I&R Services in a Digital Age The Basics of I&R Service Delivery The Organizational Context of I&R: Diversities & Partnerships New I&R Challenges in an Expanding Aging Society Part III: I&R On-Line Automating I&R Systems: Some Nuts/Some Bolts, L.I. Zimmerman Staffing & Training for "High Touch/High Tech" Part IV: Epilogue Viewing I&R in a New Millennium Appendices Index

**Information and Referral in Reference Services**-Marcia Stucklen Middleton 1988 This book investigates a wide variety of situations and models which fall under the umbrella of information and referral. It examines traditional views in public libraries and library systems as well as descriptions of programs in nontraditional settings, such as academic libraries. A human services perspective is explored and research models are presented.

International Encyclopedia of Information and Library Science- John Feather 2003-09-02 The International Encyclopedia of Information and Library Science was published to widespread acclaim in 1996, and has become the major reference work in the field. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. With nearly 600 entries, written by a global team of over 150 contributors, the subject matter ranges from mobile library services provided by camel and donkey transport to search engines, portals and the World Wide Web. The new edition retains the successful structure of the first with an alphabetical organization providing the basic framework of a coherent collection of connected entries. Conceptual entries explore and explicate all the major issues, theories and activities in information and library science, such as the economics of information and information management. A wholly new entry on information systems, and enhanced entries on the information professions and the information society, are key features of this new edition. Topical entries deal with more specific subjects, such as collections management and information services for ethnic minorities. New or completely revised entries include a group of entries on information law, and a collection of entries on the Internet and the World Wide Web.

The Ombudsman Journal- 1986

The Risha Levinson Story-Risha W. Levinson 2013-03-08 Can a Woman Have it All? No one can have it all. But I have had a lot: to wit, a long-lasting marriage of sixty-two years, four children and six grandchildren, a highly satisfying family life, and an engaging and productive career. How did this all happen? Read my book to find out. What Guidelines Did I Follow for Such a Fulfilling Life? Here are a few. “Who refreshes others will be refreshed.” The Book of Proverbs “Yesterday is history, tomorrow is a mystery, today is the present, that’s why it’s a gift.” Anonymous “If I am not for myself who will be for me? And if I am only for myself, what am I? And if not now, when?” Hillel

International Perspectives on Mental Health-Hamid Ghodse 2011-06 ... is a unique collection of authoritative briefings from over 90 countries around the world. Each chapter covers a particular country's demographics, mental health resources, undergraduate education, postgraduate training in psychiatry, research activities, mental health legislation, and policy and development strategies.

Handbook of Local Government Administration-Gargan 1996-10-11 This theoretically and experientially grounded reference provides a complete overview of the principles and applications of government administration and management practices in the local public sector. Written by over 25 distinguished academics and professionals with substantial experience as practitioners and consultants of administrative operations to local governments, the book covers the effects of environmental conditions on local administrators and management techniques to administration in different types of local government. It helps readers reduce research time by presenting advanced materials on local government administration and management in a single source.
International Perspectives and Empirical Findings on Child Participation—Tali Gal 2015 “The overall goal of the book is to identify processes that allow children to engage in meaningful dialogue with others toward the achievement of optimal decisions. The book chapters provide a kaleidoscope of empirical findings regarding child-inclusive mechanisms practiced in different countries, cultures, and arenas, such as child-participation in school-related decisions, child-protection processes, restorative justice mechanisms, family disputes and courts. The various chapters consider both the ways children are included in dialogues and the levels of success of these processes. How do children experience various fora of decision-making? To what extent do children feel that they are able to express their views freely and that their viewpoints are given due weight, in accordance with their age and maturity? What kind of representation do they regard as empowering and effective? How important do children consider their ability to influence the outcome of the process? Who do they want to partake in decision-making mechanisms? These are some examples of child-centered investigations toward effective child participation that the various chapters of this book aim at describing. Other chapters consider outcome variables focusing on the opinions of parents, professionals and family members regarding the way decision-making processes involve children.”—

A London Bibliography of the Social Sciences—1931

International Perspectives on Mental Health—Barbara Favcett 2011-11-22 Mental distress is not exclusive to any particular group but touches the lives of people in all societies and walks of life; one in four of us will be affected by it in our lifetime. Yet the field of mental health is complex—fraught with differences in understanding and experience, variations in service provision, political agendas and professional discourses. This wide-ranging book explores a range of themes in the development of mental health policy and practice, in order to promote critical reflection and enhance understanding. Drawing on an international evidence base, it explores the historical, legal and socio-cultural dimensions of mental health, including: Anti-discriminatory practice and the ethical tensions posed by legislation, particularly in relation to safeguarding and human rights Trends and concerns in the field of child and adolescent mental health The gender, ethnicity and age-related dimensions of mental ill-health The challenges posed by dual diagnosis and faced by families and carers. International Perspectives on Mental Health offers a multi-dimensional view of mental health and wellbeing, with the aim of opening up debate and inviting a more holistic conception of the field. It is required reading for students of mental health on professional and academic courses, as well as for practitioners in the health and social care field.

International Perspectives on Elder Abuse—Amanda Phelan 2013-03-07 “Opening with an examination of what elder abuse is, Amanda Phelan sets it in a theoretical context and looks at assessment and approaches to the issue in residential and community care environments. The book then presents a range of country studies, which provide an overview of the context of elder abuse in the country and a discussion of related policy, legislation, research and practice. Countries covered include Ireland, United Kingdom, Spain, China, Australia, Kenya, Israel, Canada and the United States, whilst a regional chapter looks at South America. A concluding chapter draws together cross-cultural comparisons and provides some guidance as to best practice”—Publisher's website.

The SAGE Handbook of International Social Work—Karen H Lyons 2012-05-18 Social work is a profession that is increasingly involved with issues which have a global dimension. This Handbook tackles the global/local aspect of social work in its various forms and interrogates the key concerns that societies are facing through an international lens. The contributors show that, with an appreciation of commonalities and differences, local practices and appropriate forms of international activity can be better developed. Areas covered include: - Analysis of ‘International social work’ - Globalisation and indigenisation - Social justice and human rights - Poverty and livelihoods - Ecological issues - Migration - Education, theory, research and practice - Social work in different settings - Religion and spirituality - Responses to disasters and conflicts - Life course perspectives - Regional perspectives - Future directions With a truly international range of contributions, the Handbook incorporates perspectives from Asia, Africa, Europe, Australasia, the Middle East and the Americas. It will be an invaluable resource for undergraduates, postgraduates, researchers and academics working in the fields of social work, social welfare, human services, and community development worldwide, as well as service providers and policy makers in the international arena.

Paperbound Books in Print—1991

International Perspectives on Community Care for Older People—Thomas Scharf 1995 International Perspectives on Community Care for Older People draws together acknowledged international experts in the field of community care in order to address some of the common issues which are associated with transitions in health and social care provision.

International Perspectives on Spinal Cord Injury—World Health Organization 2013 “Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrolment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: —assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; —make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

Women Managers in Human Services—Karen S. Haynes 1989

International Perspectives on Social Work in Health Care—Gail K Auslander 2014-02-04 In the new health care environment, social workers are being called upon to act as case managers, coordinators, evaluators, therapists, and researchers. International Perspectives on Social Work in Health Care brings together academics and practitioners to discuss what managed care, cost containment, corporatization, and pre-payment portend for social work’s survival. Its explanatory pages will help you understand the need for skills in networking, mediation, and advocacy, how to link communities and institutions, and how to conceptualize, quantify, and measure the outcomes of social work interventions. In an effort to transcend traditional organizational and intellectual boundaries, International Perspectives on Social Work in Health Care explores conflicts inherent to social work, the need for new theoretical and practice models, social work administration in changing health care organizations, and developments in health social work research. Seeking to unite policy and practice, this guidebook addresses key issues, trends, and innovations in social work, including: services that enhance community health the transformation of health care in the U.S. into a market commodity a global dimension. This Handbook tackles the global/local aspect of social work in its various forms and interrogates the key concerns that societies are facing through an international lens. The contributors show that, with an appreciation of commonalities and differences, local practices and appropriate forms of international activity can be better developed. Areas covered include: - Analysis of ‘International social work’ - Globalisation and indigenisation - Social justice and human rights - Poverty and livelihoods - Ecological issues - Migration - Education, theory, research and practice - Social work in different settings - Religion and spirituality - Responses to disasters and conflicts - Life course perspectives - Regional perspectives - Future directions With a truly international range of contributions, the Handbook incorporates perspectives from Asia, Africa, Europe, Australasia, the Middle East and the Americas. It will be an invaluable resource for undergraduates, postgraduates, researchers and academics working in the fields of social work, social welfare, human services, and community development worldwide, as well as service providers and policy makers in the international arena.
Special Education International Perspectives - Anthony F. Rotatori 2014-08-26 This volume provides an international perspective on special education issues. There is limited literature examining issues in special education from an international perspective, as such this volume will add considerably to the knowledge base across the globe.

International Perspectives on Social Work - Karen Hamilton Lyons 2006-01-01 Globalization is widely discussed in the social sciences, but has only recently permeated social work thinking and literature. This book argues that social professionals working locally need an understanding of global mechanisms and cross-cultural issues. Local level examples include the increase in victims of trafficking or the effects of HIV/AIDS on some immigrant groups. International examples include the risk to children moving across borders, the growth of international paedophiles networks and the proliferation of terrorism. Social work is fundamentally being altered by the ‘Internationalization’ of social problems and this text discusses the implications for students and practitioners.

Social and Solidarity Economy - Peter Utting 2015-04-09 As economic crises, growing inequality and climate change prompt a global debate on the meaning and trajectory of development, increasing attention is focusing on ‘social and solidarity economy’ as a distinctive approach to sustainable and rights-based development. While we are beginning to understand what social and solidarity economy is, what it promises and how it differs from ‘business as usual’, we know far less about whether it can really move beyond its fringe status in many countries and regions. Under what conditions can social and solidarity economy scale up and scale out - that is, expand in terms of the growth of social and solidarity economy organizations and enterprises, or spread horizontally within given territories? Bringing together leading researchers, blending theoretical and empirical analysis, and drawing on experiences and case studies from multiple countries and regions, this volume addresses these questions. In so doing, it aims to inform a broad constituency of development actors, including scholars, practitioners, activists and policy makers.

Sanctuary Practices in International Perspectives - Randy K. Lippert 2013 Edited by Randy K. Lippert and Sean Rehaag.

International Perspectives on Disability Services - Francis K.O. Yuen 2012-10-12 Learn how to include multiculturalism in disability-related social work! International Perspectives on Disability Services: The Same but Different presents different cultural and societal contexts on services for people with disabilities. This book covers a range of topics on disabilities related to physical status, emotional conditions, and community settings. This useful introductory reference will help you develop culturally sensitive disability services both locally and overseas, and it will promote better understanding of people with disabilities. This book is a unique examination of services for people with disabilities as they exist in several countries. Until recently, cultural context was used to describe race or ethnicity, but this innovative text recognizes people with disabilities as a worldwide community that is advocating for equality and respect. International Perspectives on Disability Services focuses on the need for human and social services that endorse capability and empowerment—promoting the person rather than the disability. In International Perspectives on Disability Services, you’ll learn about: using the term “culture” to describe the community of people with disabilities—how cultural sensitivity and competency can be applied to the disability culture the dynamics of a transcultural relationship between psychotherapist and deaf or hard-of-hearing individuals the recent development in aphasia treatment—Life Participation Approach to Aphasia (LPAA)—and the international perspective of communication therapy a comparison of attitudes among social work students in the United States and Japan toward people with disabilities—people with disabilities are not yet integrated into Japanese society, but both groups showed room for needed improvement a comparison of disability-related services and experiences in the United States and in Germany—child-raising leave, child-raising money, and Kinder geld (child money) helps support parents financially for the first few years, but the United States has more options for integrated schooling later in life Hong Kong’s 25-year-old objective to encourage community integration and normalization for people with disabilities to live in the community the primary support network of family, community leaders, and shaman for people with disabilities among Hmong Americans in Northern California The informative reports, research findings, case studies, and international comparisons offer new directions for human service professionals and students to help them better meet the social, psychological, and cultural needs of people with disabilities. International Perspectives on Disability Services provides clear-cut evidence that disability-oriented social workers need to improve their perspectives as the disability culture gains momentum as a social entity. This book is a must-read for anyone who works or provides disability-related services, as well as for people with disabilities who need more information on other countries’ services.

Participation in Community Work - Anne Karin Larsen 2013-09-11 Participation is a key community work method and this text, written by an international selection of authors, covers innovative approaches in community based education and practice. Including real-life case studies of participatory practice, it offers new definitions of community work, organisation and development and will challenge and inspire all those involved in community work practice and research. Divided into four parts, Participation in Community Work begins by exploring theoretical aspects of participation and the co-construction of knowledge, including the ethics of participation. The second part focuses on the potential of participatory learning and action research, with chapters presenting key techniques followed by case studies. The third part looks at power and participation, addressing issues of inclusivity, capacity and democracy-building and giving examples from a range of research and field projects. Finally, the fourth part begins the discussion of new and emerging challenges for community work globally. This unique book is suitable for students, researchers and practitioners interested in participation and community development from a range of disciplines, including community work itself through social work and youth work to health promotion.

Economic Stress, Human Capital, and Families in Asia - Wei-Jun Jean Yeung 2013-11-26 This book presents recent findings about the consequences and policy implications of economic stress for human capital development and family well-being in Asia. The scope of the chapters goes beyond the impact of current financial crisis to include the effect of economic deprivation families in Asia experience as a result of job loss, low-wage employment, and catastrophic natural calamities. The studies show how macro-level economic stress can filter down through households to affect individuals’ economic and socio-psychological well-being. The chapters reveal a wide spectrum of economic stresses experienced by families in Asia that is linked to poor human capital development, emotional distress, health problems, changing fertility patterns, more frequent geographic movement, and less supportive parenting behavior. The elderly, women, children, low-skilled workers are particularly vulnerable. The economic shocks in the past several decades have exposed the vulnerability of the family institution and the weaknesses in this region’s social protection system that can lead to detrimental long-term effects on human capital development. This book is relevant for researchers and students in fields such as Family Studies, Globalization, Development, Social Problems, Social Stratification, Social Inequalities, Poverty and Welfare, Education, and Social Policies.

Theory, Practice, and Trends in Human Services: An Introduction - Edward S. Neukrug 2016-01-01 Distinguished by its focus on the development of the helper, its experiential emphasis, and the unique use of personal vignettes, Neukrug's easy-to-understand and comprehensive text provides an overview of the field of human services. It begins with discussions of history and current issues, followed by a chapter on standards as they relate to skills, credentialing, ethics, and accreditation. The book later moves on to cover important content areas that human service professionals must know and understand to be effective, including counseling theory, helping skills, group and family counseling, consultation and supervision, community organizing, human development, cultural competence, how to work with varied client populations, and research, evaluation, and assessment. The last chapter focuses on career development, including guidance about further education and insight into how career development models can be applied to the student and the student's clients. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Pharmacy in Public Health - Jean Carter 2010 Pharmacy in Public Health: Basics and Beyond outlines what public health is and why it is so important for today's pharmacists to know. This practical book covers key areas like the foundations of public health, concepts and tools of policy, and models of public health programs run by pharmacists. It provides pharmacists and pharmacy students all of the tools they need to get started making an impact in their communities. Readers are

- **Education in Palliative Care** - Bee Wee 2007-02-22 Despite the fact that most palliative care educators are involved in teaching, there is little literature devoted to education specifically within palliative care. This book bridges that gap, giving a wide-ranging, global view of palliative care education. It offers theoretical and practical insights, along with specific suggestions for developing knowledge and skills for teaching. It also contains extensive accounts of important contextual matters which influence the range and quality of palliative care education, including: interprofessional learning; continuing professional development; evaluation; and educational leadership. The development of palliative care as a clinical speciality is increasingly conducted at an international level, and a special feature of this book is the inclusion of chapters reviewing palliative care education in each continent. This enables practitioners and teachers to share knowledge across diverse healthcare systems and cultures. There is also an acknowledgement of the multi-professional team involved in palliative care, as education and training are looked at from the perspectives of doctors, nurses, and allied health professionals. The book is split into three distinct parts: Part 1 - sets the scene for existing palliative care education, both in the UK and internationally: Part 2 - focuses on the theory underpinning each aspect of teaching, learning and assessment, and then examines the practicalities of delivering these in the clinical setting. Part 3 - explores ways of building and nurturing a culture of learning in palliative care, whether as an individual or as an organization.

- **International Perspectives on Public Health and Palliative Care** - Libby Sallnow 2013-07-03 Public health approaches to palliative care have been growing in policy importance and practice acceptance. This innovative volume explores the major concepts, practice examples, and practice guidelines for this new approach. The goal of 'comprehensive care' - seamless support for patients as they transition between home based care and inpatient services - relies on the principles of health promotion and community development both to ensure services are available and importantly appropriate for patients' needs. In developing contexts, where hospitals and hospices may be inaccessible, a public health approach provides not only continuity of care but greater access to good end of life care. This book provides both a historical and conceptual overview whilst offering practical case examples from affluent and developing contexts, in a range of clinical settings. Finally, it draws together research-based guidelines for future practice. Essential reading for public health researchers and practitioners with an interest in end of life care and global health as well as those involved in developing palliative care provision, International Perspectives on Public Health and Palliative Care is the first volume to present an overview of theory and practice in this emerging field.

- **The Urban & Social Change Review** - 1985

- **Interdisciplinary and International Perspectives on 3D Printing in Education** - Santos, Ieda M. 2018-11-23 Although 3D printing technologies are still a rarity in many classrooms and other educational settings, their far-reaching applications across a wide range of subjects make them a desirable instructional aid. Effective implementation of these technologies can engage learners through project-based learning and exploration of objects. Interdisciplinary and International Perspectives on 3D Printing in Education is a collection of advanced research that facilitates discussions on interdisciplinary fields and international perspectives, from kindergarten to higher education, to inform the uses of 3D printing in education from diverse and broad perspectives. Covering topics such as computer-aided software, learning theories, and educational policy, this book is ideally designed for educators, practitioners, instructional designers, and researchers.

- **FYI Resources on Local Government, 1983-87** - 1988

- **Providing Community-Based Services to the Rural Elderly** - John A. Krout 1994 This book brings together information from both researchers and practitioners on a wide range of community-based services that are available to and needed by the rural elderly in the United States. Specific topics examined include: senior centres; referral systems; housing and transportation; employment and retirement; and health promotion and health care. Krout provides section overviews as well as an informative, thorough introduction and epilogue that highlight common themes and issues.

- **International Perspectives On Early Childhood Education And Care** - Georgeson, Jan 2013-02-01 There is a growing interest in understanding how early years care and education is organised and experienced internationally and many early years courses - from foundation degree and beyond - include an 'International Perspectives' module.
