Analysis of Textual Variants of the Book of Mormon: Mosiah 17-Alma 20-Royal Skousen 2004
Analysis of Textual Variants of the Book of Mormon,Royal Skousen 2009-01-01 Analysis of Textual Variants of the Book of Mormon, the fourth volume in Professor Royal Skousen's ongoing Book of Mormon Critical Text Project, represents the central task of the project: the attempt to recover the original English-language text of the Book of Mormon. Volume 4 considers every significant textual change that has occurred in the English Book of Mormon over the 175 years since Joseph Smith first dictated it to his scribes; it also considers a number of conjectured revisions for specific passages. Professor Skousen draws on the original manuscript of the Book of Mormon, the printer's manuscript prepared by Oliver Cowdery and two other scribes, and 20 significant printed versions ranging from the 1830 edition to the current standard editions published by the Church of Jesus Christ of Latter-day Saints and the Community of Christ (formerly known as the Reorganized Church of Jesus Christ of Latter Day Saints). Where applicable, he marshals additional evidence of language usage from dialectal and earlier English, as well as data from the King James Bible and the original biblical languages, Hebrew and Greek. Like its predecessors, part 6 attempts to recover the original text of the Book of Mormon by identifying variations in the text that have been introduced through scribal, typesetting, and editing errors and inconsistencies. This last part of volume 4 of the critical text completes the basic textual analysis of the Book of Mormon. There is also an addenda section at the end of this part (covering almost 100 pages) that treats a number of additional conjectures to the text and, in a few cases, revises the analysis for several items already discussed in volume 4. With the completion of part 6, it is possible to reconstruct the “historical text of the Book of Mormon”—that is, the earliest text, including conjectural changes based on
evidence from usage and scribal practice elsewhere in the text. Each massive volume in the critical text averages nearly 670 oversize pages of research and analysis that reward careful examination with expanded views of the founding text of Mormonism. In seeking to recover the original English-language text, this ambitious project has identified many variant readings and yielded new insights into the translation process and the systematic nature of the text. These findings will keep serious students of the Book of Mormon profitably engaged in assessing the ramifications for many years to come. As an essential scholarly tool, the critical text promises to boost the professional rigor and overall quality of Book of Mormon scholarship to a new level.

Foundational Texts of Mormonism-Mark Ashurst-McGee 2018 Joseph Smith, founding prophet and martyr of
the Church of Jesus Christ of Latter-day Saints, personally wrote, dictated, or commissioned thousands of documents. Among these are several highly significant sources that scholars have used over and over again in their attempts to reconstruct the founding era of Mormonism, usually by focusing solely on content, without a deep appreciation for how and why a document was produced. This book offers case studies of the sources most often used by historians of the early Mormon experience. Each chapter takes a particular document as its primary subject, considering the production of a document as an historical event in itself, with its own background, purpose, circumstances, and consequences. The documents are examined not merely as sources of information but as artifacts that reflect aspects of the general culture and particular circumstances in which they were created. This book will help historians working in the founding era of Mormonism gain a more solid grounding in the period's documentary record by supplying important information on major primary sources.

The Theological Tendency of Codex Bezae Cantebrigiensis in Acts-Eldon Jay Epp 2005-10-06 An investigation into to what extent textual variants in the New Testament were caused by dogmatic interference with the text.

Textual and Literary Criticism of the Books of Kings-Julio Trebolle Barrera 2020-06-08 This volume contains a collection of Julio Trebolle’s papers on textual and compositional history of 1-2 Kings, via Septuagint, Old Latin. His research is a key contribution to the landscape of textual plurality in the history of the Bible.

Analysing Muslim Traditions-Nicolet Boekhoff- van der Voort 2010 Since its inception, the study of ad th conducted by scholars trained in the Western academic tradition has been marked by sharp methodological debates. A focal issue is the origin and development of traditions on the advent of Islam. Scholars' verdicts on these traditions have ranged from late fabrications without any historical value for the time concerning which the narrations purport to give information to early, accurately transmitted texts that allow one to reconstruct Islamic origins. Starting from previous contributions to the debate, the studies collected in this volume show
that, by careful analysis of their texts and chains of transmission, the history of Muslim traditions can be reconstructed with a high degree of probability and their historicity assessed afresh.

Textual and Contextual Analysis in Empirical Translation Studies-Sara Laviosa 2016-07-28 This book presents the state-of-art research in ETS by illustrating useful corpus methodologies in the study of important translational genres such as political texts, literature and media translations. Empirical Translation Studies (ETS) represents one of the most exciting fields of research. It gives emphasis and priority to the exploration and identification of new textual and linguistic patterns in large amounts of translation data gathered in the form of translation data bases. A distinct feature of current ETS is the testing and development of useful quantitative methods in the study of translational corpora. In this book, Hannu Kemppanen explores the distribution of ideologically loaded keywords in early Finnish translation of Russian political genres which yielded insights into the complex political relation between Finland and Russia in the post-Soviet era. Adriana Pagano uses multivariate analysis in the study of a large-scale corpus of Brazilian fiction translations produced between 1930s-1950s which is known as the golden age of Latin American translation. The statistical analysis detected a number of translation strategies in Brazilian Portuguese fictional translations which point to deliberate efforts made by translators to re-frame original English texts within the Brazilian social and political context in the first three decades under investigation. Meng Ji uses exploratory statistical techniques in the study of recent Chinese media translation by focusing three important media genres, i.e. reportage, editorial and review. The statistical analysis effectively detected important variations among three news genres which are analysed in light of the social and communicative functions of these news genres in informing and mobilising the audience in specific periods of time in Mainland China.

Exploring Affective Language with Electronic Text Analysis Tools-Mattia Bilardello 2016-04-21 The manuscript poems of Sir Thomas Wyatt (1503-1542) supply the materials for a case study in the language of the emotions in the Tudor period of Early Modern English. Courtesan and ambassador for his king at a most critical time in
Europe, Thomas Wyatt was also the cultivated and enterprising reader and translator of poetry from the Continent who brought new inspiration and new forms to the English tradition. It is with a special focus on the means of expression of the emotions that this work approaches Wyatt’s compositions and explores a language and a body of poetry that not only set the standards for courtly conventions but is a paragon of dramatic intensity; that can in turn be overtly erotic and perhaps secretly political; and that, in its ultimate elusiveness, has both whetted and defeated the curiosity of Wyatt’s biographers. Text analysis software has made it possible to create a comprehensive dictionary from individual word occurrences in the poems and generate a map of words that name or relate to the emotions. The use of an electronic text, especially set up for the analysis, has also made it possible to examine the poetry in cross-section, extrapolating patterns of use for the language of the emotions across the manuscript, and leading to a core of four emotion states that are the cornerstones of Wyatt’s dramatic self-representation.

Archaeology of the Books of Samuel-Philippe Hugo 2010 Considering the literary dimension of the earliest text history of Samuel, this volume asks the question if the comparative analysis of the textual witnesses permit proving the existence of distinct literary editions and identifying the ideological motives that governed the possible modification of the text.

Góngora's Poetic Textual Tradition-Diane Chaffee-Sorace 1988 Described as one of Spain's foremost Golden-Age poets, Luis de Gongora generated a vast and complex poetic textual tradition through the creation, revision and dissemination of his verse. In later life, he authorized his friend Antonio Chacon to compile an anthology of his poetic works which had been in disarray for many years. Gongora's assistance in identifying the genuine versions of his poems and his participation in the compiling, editing and dating of these poems make the Chacon manuscript (1620) an authoritative collection of the poet's verse. Nevertheless, it includes defective poems and, moreover, the plethora of variants, versions and imitations of his poetry raises questions of authorship and authenticity.

Flores Florentino-Anthony Hilhorst 2007 This volume comprises forty-eight essays, presented by friends, colleagues and students in honour of Florentino Garcia Martinez. The articles are primarily in the field of the Dead Sea Scrolls, but also cover many other fields of Second Temple Judaism, from late biblical texts and Septuagint up to the pseudepigrapha and early rabbincic writings.

4QSamuela and the Text of Samuel-Jason Driesbach 2016-08-15 In 4QSamuela and the Text of Samuel, Jason Driesbach characterizes the scribal features and textual affiliation of 4QSamuela (4Q51) and the major witnesses to the books of Samuel (MT, GB, GL), with implications for textual and literary criticism.

Text Mining for Qualitative Data Analysis in the Social Sciences-Gregor Wiedemann 2016-08-23 Gregor Wiedemann evaluates text mining applications for social science studies with respect to conceptual integration of consciously selected methods, systematic optimization of algorithms and workflows, and methodological reflections relating to empirical research. In an exemplary study, he introduces workflows to analyze a corpus of around 600,000 newspaper articles on the subject of “democratic demarcation” in Germany. He provides a valuable resource for innovative measures to social scientists and computer scientists in the field of applied natural language processing.

The Transmission and Dynamics of the Textual Sources of Islam-Nicolet Boekhoff-van der Voort 2011-09-05
This volume provides new insights into the transmission of the textual sources of Islam and combines this with the dynamics of these scriptures by paying close attention to how believers interpret and apply them.

The Construction of the Assyrian Empire-Shigeo Yamada 2000-01-01 While systematically analyzing all accounts of the western campaigns of Shalmaneser III of Assyria, Shigeo Yamada not only discusses the historiographical problems encountered, but in his philological analysis offers new results, and an original historical reconstruction.

Myths and Mistakes in New Testament Textual Criticism-Elijah Hixson 2019-11-05 A renewed interest in textual criticism has created an unfortunate proliferation of myths, mistakes, and misinformation about this technical area of biblical studies. Elijah Hixson and Peter Gurry, along with a team of New Testament textual critics, offer up-to-date, accurate information on the history and current state of the New Testament text that will serve apologists and offer a self-corrective to evangelical excesses.

The Epistle to the Hebrews-Gareth Lee Cockerill 2012-04-12 This commentary by Gareth Lee Cockerill offers fresh insight into the Epistle to the Hebrews, a well-constructed sermon that encourages its hearers to persevere despite persecution and hardships in light of Christ's unique sufficiency as Savior. Cockerill analyzes the book's rhetorical, chiastic shape and interprets each passage in light of this overarching structure. He also offers a new analysis of the epistle's use of the Old Testament -- continuity and fulfillment rather than continuity and discontinuity -- and shows how this consistent usage is relevant for contemporary biblical interpretation. Written in a clear, engaging, and accessible style, this commentary will benefit pastors, laypeople, students, and scholars alike.

Methods of Text and Discourse Analysis-Stefan Titscher 2000-07-26 ‘This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistiv approaches to text and discourse. Its main merit, I think, is that it intorduces approaches which up to now have hardley been admitted into the universe of scientific discourse' - Discourse Studies Methods of Text and Discourse Analysis provides the most
comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis. Among the 10 linguistic and sociological models surveyed in this book some of the more important are Grounded Theory, Content Analysis, Conversation Analysis and Critical Discourse Analysis. The book presents each approach according to a standardised format, which allows for direct systematic comparisons. The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods. Interdisciplinary and international in its aims, Methods of Text and Discourse Analysis suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others' methods and procedures.

The Book of Mormon—Paul C. Gutjahr 2012-03-25 The surprising career of Joseph Smith's famous book Late one night in 1823 Joseph Smith, Jr., was reportedly visited in his family's farmhouse in upstate New York by an angel named Moroni. According to Smith, Moroni told him of a buried stack of gold plates that were inscribed with a history of the Americas' ancient peoples, and which would restore the pure Gospel message as Jesus had delivered it to them. Thus began the unlikely career of the Book of Mormon, the founding text of the Mormon religion, and perhaps the most important sacred text ever to originate in the United States. Here Paul Gutjahr traces the life of this book as it has formed and fractured different strains of Mormonism and transformed religious expression around the world. Gutjahr looks at how the Book of Mormon emerged from the burned-over district of upstate New York, where revivalist preachers, missionaries, and spiritual entrepreneurs of every stripe vied for the loyalty of settlers desperate to scratch a living from the land. He examines how a book that has long been the subject of ridicule—Mark Twain called it "chloroform in print"—has more than 150 million copies in print in more than a hundred languages worldwide. Gutjahr shows how Smith's influential book launched one of the fastest growing new religions on the planet, and has featured in everything from comic books and action figures to feature-length films and an award-winning Broadway musical.
