Anatomy Cadaver Lab
often ask themselves (or others) when learning the concepts and details of anatomy. Additionally, a number of personal stories are included in the introductory sections of several chapters. All of these personal stories are true; most were
written by the student who experienced the event described and generally put a personal spin on the disorders described. Each chapter has clearly written lab activities, including step by step instructions, diagrams, and background content needed to allow students to fully understand the concepts explored in lab. Activities encourage hands-on exploration and active learning. The book is loaded with full color art and each chapter includes integrated tear out pre-lab activities to help students prepare for lab, as well as review pages to be completed after lab. Many of these assignments require application of content to various clinical situations and are designed to stimulate critical thinking skills and creative problem solving skills.

Anatomy & Physiology Revealed is the ultimate online interactive cadaver dissection experience. Now fully customizable to fit any course or textbook, Anatomy & Physiology Revealed is the perfect partner for your course. The 3D dissection interface allows students to interact with the human body in a realistic way, providing a unique learning experience that is engaging and memorable. The program features a variety of dissection modes, including virtual dissection, real-time dissection, and animation.
