Cancer Disparities-Holly Matto, PhD 2011-10-25 “The volume sheds new light on reducing disparities by complementing currently available monographs, through the provision of solutions that are not only theoretically innovative but also empirically effective. Indeed, Cancer Disparities: Causes and Evidence-Based Solutions admirably achieves two key objectives that are crucial forforadvances in the field: (a) providing an up-to-date overview of cancer-related disparities and(b) describing evidence-based interventional approaches to close the cancer-related disparities gap. The implicit promise is that these approaches will enable public health practitioners, cancer control workers, and community members to use or adapt them in their own communities. This volume is essential to help make that promise a reality.”--PsycCRITIQUES Cancer is not randomly distributed in the United States. Its incidence varies by race, ethnicity, socioeconomic status, and other geographic and demographic factors. This volume, co-published with the American Cancer Society, is the first to examine the biological, racial, and socioeconomic factors that influence cancer incidence and survival. In addition, it presents 15 previously unpublished, evidence-based interventions to reduce and eliminate cancer disparities. The book explains the nature, scope, and causes of cancer disparities across different populations and then presents unique programs proven to reduce such inequalities in the areas of cancer prevention, screening and early detection, treatment, and survivorship. They represent a variety of cancers, populations, and communities across the U.S. Descriptions of each intervention include tests of effectiveness and are written in sufficient detail for readers to replicate them within their own communities. Approaches to Teaching the Writings of Emilia Pardo Bazán-Margot Versteeg 2017-12-01 "Emilia Pardo Bazán (1851-1921) was the most prolific and influential woman writer of late nineteenth-century Spain," write the editors of this volume in the MLA's Approaches to Teaching World Literature series. Contending with the critical literary, cultural, and social issues of the period, Pardo Bazán's novels, novellas, short stories, essays, plays, travel writing, and cookbooks offer instructors countless opportunities to engage with a variety of critical frameworks. The wide range of topics in the author's works, from fashion to science and technology to gender equality, and the brilliance of her literary style make Pardo Bazán a compelling figure in the classroom. Part 1, "Materials," provides biographical and critical resources, an overview of Pardo Bazán's vast and diverse oeuvre, and a literary-historical time line. It also reviews secondary sources, editions and translations, and digital resources. The twenty-three essays in part 2, "Approaches," explore various issues that are central to teaching Pardo Bazán's works, including the author's engagement with contemporary literary movements, feminism and gender, nation and the late Spanish empire, Spanish and Galician identities, and nineteenth-century scientific and medical discourses. Film adaptations and translations of Pardo Bazán's works are also addressed. Highlighting the artistic, social, and intellectual currents of Pardo Bazán's writings, this volume will assist instructors who wish to teach the author's works in courses on world literature, nineteenth-century literature, and gender studies as well as in Spanish-language courses.

Puberty from Bench to Clinic-J.-P. Bourguignon 2015-12-17 Puberty is a unique paradigm for the understanding of gene-environment interaction and developmental programming. Therefore, normal and abnormal pubertal development can be divided and examined in three sections: the role of genetic factors, the role of environmental factors (including nutrition) and therapeutic issues in disorders of puberty. Dealing with all of these sections and framed along current key concepts in pediatric endocrinology, experts share their view on critical issues such as weighting of genetic versus environmental factors or the impact of environmental factors in relation to critical periods in development. Not only showing the consensus and controversial issues in the various areas, each chapter presents lessons for clinical management in an attempt to link basic research, physiology and pathophysiology with the clinical management of pubertal disorders. Puberty from Bench to Clinic bridges up-to-date concepts from animal and human physiology and pathology towards a better understanding and management of pubertal disorders, making it a unique resource for researchers in the field of development and reproduction, clinical scientists and practitioners in neuro-, pediatric and
adolescent endocrinology as well as gynecology.
