Citizenship Critical Concepts In Sociology

Citizenship-Bryan S. Turner 1994 SECTION 2: THE CLASSICS

Globalization: Global membership and participation-Roland Robertson 2003 Containing articles on approaches to and theories of globalization, this collection addresses the making of the modern world from different disciplinary perspectives. This set investigates the major components of globalization in its most comprehensive sense: the nation-state and the system of international relations; the question of self-identity and the individual in the globalization process; human rights, citizenship and the environment; institutional questions including matters of media communication, education, tourism, multinational corporations, migration and intercultural communication. New introductions and a thorough index make this work an indispensable research tool.

Crime-Philip Bean 2003

The Information Society-Robin Mansell 2009 "'The information society' refers to a constellation of developments arising from the growing use of communication technologies in the acquisition, storage, and processing of information, and the role of information in supporting the creation and exchange of knowledge. Research on information societies really began to take off in the 1970s when Daniel Bell wrote about 'the information age'. While there were earlier works that focused on the growing importance of information in the economy, it was not until the mid-1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond. A critical mass of scholarship has now accumulated, establishing 'the information society' and 'information societies' as a terrain of substance and
complexity, the exploration and understanding of which requires increasingly sophisticated navigation skills. As research in and around the area continues to flourish as never before, this new title in Routledge's Major Works series, Critical Concepts in Sociology, meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature, and to provide a map of the area as it has emerged and developed over the last thirty years or so. The Information Society is fully indexed and has a comprehensive introduction, newly written by the editor, which places the material in its historical and intellectual context. It is an essential work of reference and is destined to be valued by scholars and students - as well as policy-makers and practitioners in the field - as a vital one-stop research resource."--Publisher's website.

Muslim Diasporas in the West: Citizenship and political identity- Tahir Abbas 2017

Childhood-Chris Jenks 2020-10-29 In this book Chris Jenks looks at what the ways in which we construct our image of childhood can tell us about ourselves. After a general discussion of the social construction of childhood, the book is structured around three examples of the way the image of the child is played out in society: the history of childhood from medieval times through the
enlightenment 'discovery' of childhood to the present the mythology and reality of child abuse and society's response to it the 'death' of childhood in cases such as the James Bulger murder in which the child itself becomes the perpetrator of evil. Part of the highly successful Key Ideas series, this book gives students a concise, provocative insight into some of the controlling concepts of our culture.

Sexualities: Sexualities and their futures-Kenneth Plummer 2002 Volume 3: Difference and Diversity of Sexualities. This section examines the politics, power and critique of sexual categories - including bisexuality, sex addiction, prostitution and sadomasochism.

Essential Concepts in Sociology-Anthony Giddens 2017-05-11 Social life is in a constant process of change, and sociology can never stand still. As a result, sociology today is a theoretically diverse enterprise, covering a huge range of subjects and drawing on a broad array of research methods. Central to this endeavour is the use of core concepts and ideas which allow sociologists to make sense of societies, though our understanding of these concepts necessarily evolves and changes. This clear and jargon-free book introduces a careful selection of essential concepts that have helped to shape sociology and others that continue to do so.
Going beyond brief, dictionary-style definitions, Anthony Giddens and Philip W. Sutton provide an extended discussion of each concept which sets it in historical and theoretical context, explores its main meanings in use, introduces relevant criticisms, and points readers to its ongoing development in contemporary research and theorizing. Organized in ten thematic sections, the book offers a portrait of sociology through its essential concepts, ranging from capitalism, identity and deviance to globalization, the environment and intersectionality. It will be essential reading for all those new to sociology as well as anyone seeking a reliable route map for a rapidly changing world.

Mapping Arab Women's Movements-Pernille Arenfeldt 2012 This pioneering collection of analyses focuses on the ideologies and activities of formal women's organizations and informal women's groups across a range of Arab countries. With contributions on Syria, Jordan, Lebanon, Palestine, Iraq, Egypt, Kuwait, the United Arab Emirates, Yemen, and the Arab diaspora in the United States, Mapping Arab Women's Movements contributes to delineating similarities and differences between historical and contemporary efforts toward greater gender justice. The authors explore the origins of women's movements, trace their development during the past century, and address the impact of counter-movements, alliances, and international collaborations within the region and beyond, providing accessible accounts for scholars and others interested in the Middle East and in women's movements in other settings.

Greening Citizenship-A. Scerri 2012-08-21 The greening of citizenship, the state and ideology has created both opportunities and bottlenecks for progressive political movements. Scerri argues that these are pursuing justice by making holistic demands for: fair distribution and status recognition, adequate representation and effective participation.

North African Women after the Arab Spring-Larbi Touaf 2017-06-21 This book looks with hindsight at the Arab Spring and
sheds light on the debates it triggered within North African societies and the alarming developments in women’s rights. Although women played a key role in the success of the uprisings that wiped out long ruling oligarchies across the region, they remain excluded from decision-making circles and the formal political and electoral apparatus. Women's rights are written off constitution drafts, and issues of gender equality are hardly addressed. The chapters that compose this volume present research and reflections from different perspectives to help the reader get a better picture of the profound turmoil that beset this part of the so-called “Arab” World. Adopting an interdisciplinary perspective, the contributors discuss a host of questions related to women and gender in the Arab world and address the broader question of why women's efforts and momentum during the revolution did not seem to pay off the same way they did for men. This book provides an assessment of the situation from the inside. It is intended to help the general public as well as the academic world comprehend the significance of what is going on in this key part of the Islamic World.

Toward an Ethic of Citizenship-William K. Dustin 2000-01-11 The idea for this book arose out of a little known political scandal, known as "phonegate", that occurred in Minnesota in the early 1990's in which a number of legislators were found to have been abusing their phone privileges. The hubris of the legislature in response to the discovery of this abuse not only made me rather angry, but, since I had been called for jury duty the year before, gave me the idea that service in the legislature ought to be a duty of citizenship like jury duty. Although the idea of the citizen legislature goes back to Aristotle, serious consideration of it raises the question of what is meant by citizenship and representation. This book addresses that question. It is an attempt to develop a model of citizenship in which representation is simultaneously a fundamental right and the highest obligation. After developing these ideas at a rather high level of abstraction,
the book concludes with a proposed constitutional amendment for the State of Minnesota to illustrate how the model will work in practice.

Intimate Citizenships-Elzbieta H. Oleksy 2009-03-23 This volume responds to the need to extend the theory of citizenship, in order to bridge the gap between the public and the private sphere. Through the application of intersectional methodology, the authors document how people’s most private decisions and practices are intertwined with public institutions and state policies. The stories of intimate citizenship included in this volume make the theoretical discussion more palpable. Situated perspectives, as well as application of theoretical concepts to lived experience, extend citizenship’s territory beyond the conventional public sphere and locate it at the intersection of many axes of social, political, and cultural stratification.

Fair Trade and the Citizen-Consumer-Kathryn Wheeler
2012-10-23 Drawing on international perspectives, this book explores the growing fair-trade consumer movement and why it has become a global phenomenon.

Gender History in Practice-Kathleen Canning 2006
The eight essays collected in this volume examine the practice of gender history and its impact on our understanding of European history. Each essay takes up a major methodological or theoretical issue in feminist history and illustrates the necessity of critiquing and redefining the concepts of body, citizenship, class, and experience through historical case studies. Kathleen Canning opens the book with a new overview of the state of the art in European gender history. She considers how gender history has revised the master narratives in some fields within modern European history (such as the French Revolution) but has had a lesser impact in others (Weimar and Nazi Germany). Gender History in Practice includes two essays now regarded as classics—"Feminist History after the 'Linguistic Turn'" and "The Body as Method"—as well as new chapters on experience, citizenship, and subjectivity. Other essays in the book draw on Canning's work at the intersection of labor history, the history of the welfare state, and the history of the body, showing how the gendered "social body" was shaped in Imperial Germany. The book concludes with a pair of essays on the concepts of class and citizenship in German history, offering critical perspectives on feminist understandings of citizenship. Featuring an extensive thematic bibliography of influential works.
in gender history and theory that will prove invaluable to students and scholars, Gender History in Practice offers new insights into the history of Germany and Central Europe as well as a timely assessment of gender history's accomplishments and challenges. Health Education-Katie Fitzpatrick 2014-02-05 Health Education: Critical perspectives provides a socio-cultural and critical approach to health education. The book draws together international experts in the fields of health and education who deconstruct contemporary discourses and practices, and re-imagine a health education that both connects with young people and offers a way forward in addressing issues of health and wellbeing. Chapters within specifically link academic work on neoliberalism, healthism, risk and the body to wider discourses of health and health education. They challenge current practices and call for a re-thinking of current health programs in education settings. A unique feature of this book is the analyses of health education from both political and applied levels across a range of international contexts. The book is divided into three sections: the social and political contexts informing health education how individual health issues (sexuality, alcohol, mental health, the body and obesity, nutrition) articulate in education in complex ways alternative ways to think about health and health education pedagogy. The overall theme of the book offers a perspective that the current approach to health education – promoting a fear of ill health, self-surveillance and individual responsibility – can become a form of health fascism, and we need to be cognisant of this potential and its consequences for young people. The book will be of key interest to academics and researchers exploring the political context of health education.

Citizenship: A Very Short Introduction-Richard Bellamy 2008-09-25 Interest in citizenship has never been higher. But what does it mean to be a citizen in a modern, complex community? Richard Bellamy approaches the subject of citizenship from a political perspective and, in clear and
accessible language, addresses the complexities behind this highly topical issue.

Liberalism, Constitutional Nationalism, and Minorities—Constantin Iordachi 2019-06-17 The book explores the making of Romanian nation-state citizenship (1750-1918) as a series of acts of emancipation of subordinated groups (Greeks, Gypsies/Roma, Armenians, Jews, Muslims, peasants, women, and Dobrudjans). Its innovative interdisciplinary approach to citizenship in the Ottoman and post-Ottoman Balkans appeals to a diverse readership.

Overcoming Global Inequalities—Immanuel Wallerstein 2015-11-17 This book examines the changing nature of global inequalities and efforts that are being made to move toward a more egalitarian world society. The contributors are world historical sociologists and geographers who place the contemporary issues of unequal power, wealth and income in a global historical perspective. The geographers examine the roles of geopolitics and patterns of warfare in the historical development of the modern world-system, and the sociologists examine endeavours to improve the situations of poor peoples and nations and to engage the challenges of sustainability that are linked with global inequalities. Overcoming Global Inequalities contains cutting-edge research from engaged social scientists intended to help humanity deal with the challenges of global inequality in the 21st century.

The SAGE Handbook of Qualitative Research—Denzin & Lincoln 2005 The SAGE Handbook of Qualitative Research, Third Edition, represents the state of art for the theory and practice of qualitative inquiry. Built on the foundations of the landmark First and Second Editions (1994, 2000), the Third Edition moves qualitative research boldly into the 21st century. The editors and authors ask how the practices of qualitative inquiry can be used to address issues of social justice in this new century.

Fiscal Sociology at the Centenary—Ann Mumford 2019-09-27 This
book discusses the socio-legal tax state and its relationship to
development, inequality and the transnational. 'Fiscal Sociology'
commenced in 1918 when Joseph A. Schumpeter examined the
links between capitalism and taxation, arguing that fiscal
pressures on governments led directly to the development of tax
collection, and the burgeoning growth of capitalist economies.
The identification of taxation as an important component of
capitalism has continued to change the way that theoretical
sociologists conceptualise tax. This book documents the history of
this literature to provide a summary of the topic for scholars
seeking a bridge between taxation law and contextual, historical,
and anthropological analyses of the development of the state,
more generally. Whilst Schumpeter’s insights have been
celebrated over the past one hundred years, taxation has slipped
from the agenda of many scholarly disciplines, in relation to
analyses of poverty, globalisation, and equality. Fiscal Sociology
at the Centenary fills this gap. The implications of this literature
for taxation law in the United Kingdom, in particular, are
considered.
The Visual in Social Theory-Anthony Woodiwiss 2005-10-20 The
distinction between understanding sight as a natural faculty -
vision - and understanding it as an historical and social construct
- visuality - has had significant impact in the visual arts. Not so in
social theory where, notwithstanding the efforts of the classical
theorists, the practical scientific necessity of privileging visuality
over vision has been lost. The Visual in Social Theory argues that,
because of its uncritical use of terms like modernity,
postmodernity, globalisation and the Third Way, contemporary
social theory has become a participant in rather than a critic of
'promotional culture'. In short, in forgetting its past social theory
has effectively forsaken its future. The Visual in Social Theory
aims to restore the self-discipline and critical edge intrinsic to any
analytical work on visuality. The book will be essential reading
not only for those interested in contemporary debates around
vision but for a broader readership concerned for the critical relevance of contemporary social theory.

Social Rights: a literature review-
Global Inequalities Beyond Occidentalism-Manuela Boatcă 2016-04-22 Based on theoretical developments in research on world-systems analysis, transnational migration, postcolonial and decolonial perspectives, whilst considering continuities of inequality patterns in the context of colonial and postcolonial realities, Global Inequalities Beyond Occidentalism proposes an original framework for the study of the long-term reproduction of inequalities under global capitalism. With attention to the critical assessment of both Marxist and Weberian perspectives, this book examines the wider implications of transferring classical approaches to inequality to a twenty-first-century context, calling for a reconceptualisation of inequality that is both theoretically informed and methodologically consistent, and able to cater for the implications of shifts from national and Western structures to global structures. Engaging with approaches to the study of class, gender, racial and ethnic inequalities at the global level, this innovative work adopts a relational perspective in the study of social inequalities that is able to reveal how historical interdependencies between world regions have translated as processes of inequality production and reproduction. As such, it will be of interest to scholars of sociology, political and social theory and anthropology concerned with questions of globalisation and inequality.

Islam and Modernity-Nasar Meer 2017-02-23 The relationship between Islam and modernity has generated and rich but complex literature. While competing accounts sometimes appear incommensurable, there is at least some convergence on the view that Islam and modernity reflect an unsettled encounter. For some this is self-evident because the relationship rests on contested foundational questions, not least: whose modernity and which Islam? For others it is a less a theoretical and more a
historical issue, in so far as there has been a process underway in which Islam has proved slow in catching up. This Major Work gives space to an evolving conversation between Islam and four component parts of modernity. It has a comprehensive introduction, newly written by the editor, which places the collected material in its historical and intellectual context. "
Race and Ethnicity: Solidarities and communities-Harry Goulbourne 2001
Cultural Theory: The Key Concepts-Andrew Edgar 2007-10-18
Now in its second edition, Cultural Theory: The Key Concepts is an up-to-date and comprehensive survey of over 350 of the key terms central to cultural theory today. This second edition includes new entries on: colonialism cybercultur globalisation terrorism visual studies. Providing clear and succinct introductions to a wide range of subjects, from feminism to postmodernism, Cultural Theory: The Key Concepts continues to be an essential resource for students of literature, sociology, philosophy and media and anyone wrestling with contemporary cultural theory.
Childhood-Chris Jenks 2005 Introducing the reader to the wide variety of interpretations placed on childhood both today and in the past, these volumes illustrate the interdisciplinary nature of contemporary study of the area.
Chinese Citizenship-Vanessa L. Fong 2006-05-30 Bringing a new dimension to the study of citizenship, Chinese Citizenship examines how individuals at the margins of Chinese society deal with state efforts to transform them into model citizens in the late 1990s and early 2000s. Based on extensive original research, the authors argue that social and cultural citizenship has a greater impact on people’s lives than legal, civil and political citizenship. The seven case studies present intimate portraits of the conflicted identities of peasants, criminals, ethnic minorities, the urban poor, rural migrant children in the cities, mainland migrants in Hong Kong and Chinese youth studying abroad, as they negotiate
the perilous dilemmas presented by globalization and neoliberalism. Drawing on a diverse array of theories and methods from anthropology, sociology, education, political science, cultural studies and development studies, the book presents fresh perspectives and highlights the often devastating consequences that citizenship distinctions can have on Chinese lives.

Globalization: The nation-state and international relations-Roland Robertson 2003 Containing articles on approaches to and theories of globalization, this collection addresses the making of the modern world from different disciplinary perspectives. This set investigates the major components of globalization in its most comprehensive sense: the nation-state and the system of international relations; the question of self-identity and the individual in the globalization process; human rights, citizenship and the environment; institutional questions including matters of media communication, education, tourism, multinational corporations, migration and intercultural communication. New introductions and a thorough index make this work an indispensable research tool.

Scoping The Social-Woodiwiss, Anthony 2005-12-01 Social theory is central to the disciplines of sociology, cultural studies, criminology and media studies. Many students, however, find it difficult to relate theory to their other courses, projects, dissertations and theses, let alone imagine themselves producing theory. In contrast to conventional social theory textbooks that restrict themselves to the description and analysis of theories and what other professionals have said about them, this innovative book shows students how to use, criticise and contribute to the development of theory. Treating theory as a variety of "visual work" that is intimately connected with the process of empirical investigation, and with the help of clear diagrams and carefully chosen quotations, Part 1 provides an exceptionally clear introduction to the different ways of practicing social
theory. Part 2 provides a practical example of how to theorise by producing and demonstrating the effectiveness of a new concept of reflexivity in the course of an outline of the history of the development of social theory since 1945. This is important reading for students and researchers in sociology and related fields.

Interpreting Human Rights-Rhiannon Morgan 2009-05-07 In recent decades, human rights have come to occupy an apparently unshakable position as a key and pervasive feature of contemporary global public culture. At the same time, human rights have become a central focus of research in the social sciences, embracing distinctive analytical and empirical agendas for the study of rights. This volume gathers together original social-scientific research on human rights, and in doing so
situates them in an open intellectual terrain, thereby responding to the complexity and scope of meanings, practices, and institutions associated with such rights. Chapters in the book examine diverse theoretical perspectives and examine such issues as the right to health, indigenous peoples' rights, cultural politics, the role of the United Nations, women and violence, the role of corporations and labour law. Written by leading scholars in the field and from a range of disciplines across the social sciences, this volume combines new empirical research with both established and innovative social theory.

Citizenship and the State in the Middle East-Nils A. Butenschon 2000-05-01 Citizenship and the State in the Middle East introduces a pioneering approach to politics in the Middle East by analyzing key factors in the constitution of political communities and collective identities in terms of citizenship. As a response to processes of globalization, regional integration and ethnic conflicts, the study of citizenship has regained new interest among social scientists and legal experts. This approach focuses on the relationship between the state and the people-as individuals and collectivities, citizens and non-citizens-both those living within or outside its borders. Citizenship defines the terms of rights and obligations in a society, regulates political participation and access to public goods and properties. Together, with its companion volume, Gender and Citizenship in the Middle East, this book represents the first systematic critical attempt to interpret the complex nature of Middle East politics from a citizenship perspective. In addition, the book provides both theoretical contributions and case studies, and includes a significant section on Israel and Palestine.

Integration and New Limits on Citizenship Rights-N. Stokes-DuPass 2015-01-08 Integration and New Limits on Citizenship Rights is a state-centered analysis of citizenship, immigration and social identity. It explores the increasing role of nation states as critical actors in using social policy to affect the social location of
immigrants and ethnics and also to redefine what it means to be a full citizen. 

Rethinking Australian Citizenship-Wayne Hudson 2000-06 In Australia, a traditional view of citizens belonging to a single nation made up of one people, with a special relationship to one land has been thrown open to challenge by a range of differing perspectives. This work considers the major debates. 

Citizenship on the Margins-Yonique Campbell 2019-09-26 This book critically explores the impact of national security, violence and state power on citizenship rights and experiences in Latin America and the Caribbean. Drawing on cross-country analyses and fieldwork conducted in two “garrisons,” a middle-class community and among policy elites in Jamaica—where high levels of violence, in(security) and transnational organized crime are transforming state power —the author argues that dominant responses to security have wider implications for citizenship. The security practices of the state often result in criminalization, police abuse, violation of the rights of the urban poor and increased securitization of garrison spaces. As the tension between national security and citizenship increases, there is a centrality of the local as a site where citizenship is (re)defined, mediated, interpreted, performed and given meaning. While there is a dominant security discourse which focuses on state security, individuals at the local level articulate their own narratives which reflect lived-experiences and the particularities of socio-political milieu.
