educational theory and its classroom applications. Particular attention is paid to the Vygotskian idea of child development as a consequence rather than premise of learning experiences. Such a reversal allows for new interpretations of the relationships between cognitive development and education at different junctures of the human life span. It also opens new perspectives on atypical development, learning disabilities, and assessment of children's learning potential. Classroom applications of Vygotskian theory are discussed in the book. Teacher training and the changing role of a teacher in a sociocultural classroom is discussed in addition to the issues of teaching and learning cultural diversity and intercultural education, and as translate research findings from the US, Western Europe, and Russia are brought together to clarify the possible new applications of Vygotskian ideas in different disciplinary areas.

Beyond Tourism-Kenneth Cushner 2004-09-10 If young people are to be adequately prepared for a complex and interdependent global society, educational experiences must consider the broader world in which teachers and their students live. Teachers can be central to the process of intercultural development, and must encourage and model an intercultural orientation for their young students as well as for their communities. A critical dimension of achieving intercultural understanding and competence is personal experience. In Beyond Tourism, Kenneth Cushner examines the development of intercultural competence through various dimensions of student travel and intercultural encounters, both for the classroom teacher conducting group travel as well as individuals embarking upon student exchange programs, intensive summer experiences, and international student teaching. The author examines: aspects of cross-cultural orientation, trip planning and preparation, intercultural adjustment, in-country experience and post-experience impact through his experiences of organizing and leading international and intercultural educational programs for children, pre-service, and in-service teachers on all seven continents. Cushner integrates current research on the intercultural experience and relates it to his personal travel experiences while providing guidelines to enable educators to integrate reflective travel as an active part of the educational experience of young people. Multicultural, social studies, and foreign language teachers, international educators and study abroad officers, and those interested in experiential education will find this book invaluable.

Proceedings of the National Association for Multicultural Education-Carl A. Grant 2012-12-06 The National Association for Multicultural Education (NAME) held its 7th Annual Conference in 1997 with a theme of Daring to Educate for Equity and Excellence: A Multicultural and Bilingual Mandate for the 21st Century. The conference generated scholarship in the form of keynote speeches and conference papers and stimulating discussions among the membership. The conference's southwest location of Albuquerque, New Mexico provided an excellent back drop to discuss the interconnections between multicultural education and bilingual education, as well as provide an opportunity for proponents of both of these important ideas to engage in useful and important discussions. The essays comprised in this book capture much of the written record of the conference. They convey ideas, beliefs, and research findings that were presented at the formal sessions at the conference. Just as with NAME's previous proceedings, it is expected that these proceedings will become not only a written record of the conference but a "live curriculum" to help pre/K through college educators to prepare themselves and those they teach for the 21st century.

Integrating Intercultural Communication-You Tsai 2014-04-11 As people move into the new era of the twenty-first century, they will have more and more opportunities to communicate and interact with others using foreign languages. While this will naturally generate wide-ranging intercultural experience, people may not be alert to it in everyday life, and teachers may not know how to address the issues that arise. This book starts by exploring what it means to be intercultural from different theoretical standpoints, before contrasting ways in which people do (or do not) become intercultural in both tutored and untutored ways, inside and outside the classroom. The main purpose of this book is to introduce the concept of interculturality, to examine how it can emerge in an unplanned way and to consider ways in which it can be more systematically addressed through education, particularly through foreign language education.
