A Passion for Nature-Donald Worster 2011-05-01 Donald Worster’s A Passion for Nature is the most complete account of the great conservationist and founder of the Sierra Club ever written. It is the first to be based on Muir’s full private correspondence and to meet modern scholarly standards, yet it is also full of rich detail and personal anecdote, uncovering the complex inner life behind the legend of the solitary mountain man. It traces Muir from his boyhood in Scotland and frontier Wisconsin to his adult life in California right after the Civil War up to his death on the eve of World War I. It explores his marriage and family life, his relationship with his abusive father, his many friendships with the humble and famous (including Theodore Roosevelt and Ralph Waldo Emerson), and his role in founding the modern American conservation movement. Inspired by Muir’s passion for the wilderness, Americans created a long and stunning list of national parks and wilderness areas, Yosemite most prominent among them. Yet the book also describes a Muir who was a successful fruit-grower, a talented scientist and world-traveler, a doting father and husband, and a self-made man of wealth and political influence. The winner of numerous book awards, A Passion for Nature was also named a Best Book of 2008 by Washington Post Book World. It is the first comprehensive biography of Muir to appear in six decades.

John Muir-John Muir 1996 "The Life and Letters of John Muir (originally published in 1923), the biography of the world’s most celebrated and influential conservationist, forms the principal book in this omnibus of Muir’s writings. The Life and Letters, compiled posthumously by Muir’s literary executor, William Frederic Bade, was originally published in 1924 in two volumes. It combines elements of John Muir’s unfinished autobiography with letters selected from the voluminous correspondence between Muir and his many collaborators and admirers, all linked by Bade’s restrained but perceptive commentary. The result is a vivid portrayal of John Muir the explorer, naturalist, correspondent, polemicist, writer, lobbyist, geographer, and family man. It shows clearly how his crusading passion for the outdoors projected him to the forefront of the American conservation movement and formed a critical element that led to the establishment of the first National Parks."--Pub. desc.

Son of the Wilderness-Linnie Marsh Wolfe 2003 This Pulitzer Prize-winning biography is available in an updated paperback edition. Working closely with Muir’s family and with his papers, Wolfe was able to create a full portrait of her subject, not only as America’s firebrand conservationist and founder of the national park system, but also as husband, father, and friend. John of the Mountains-John Muir 1979 John Muir, America’s pioneer conservationist and father of the national park system, was a man of considerable literary talent. As he explored the wilderness of the western part of the United States for decades, he carried notebooks with him, narrating his wanderings, describing what he saw, and recording his scientific researches. This reprint of his journals, edited by Linnie Marsh Wolfe in 1938 and long out of print, offers an intimate picture of Muir and his activities during a long and productive period of his life. The sixty extant journals and numerous notes in this volume were written from 1867 to 1911. They start seven years after the time covered in The Story of My Boyhood and Youth, Muir’s uncompleted autobiography. The earlier journals capture the essence of the Sierra Nevada and Alaska landscapes. The changing appearance of the Sierras from Sequoia north and beyond the Yosemite enthralled Muir, and the first four years of the journals reveal his dominating concern with glacial action. The later notebooks reflect his changes over the years, showing a mellowing of spirit and a deep concern for human rights. Like all his writings, the journals concentrate on his observations in the wilderness. His devotion to his family, his many warm friendships, and his many-sided public life are hardly mentioned. Very little is said about the quarter-century battle for national parks and forest reserves. The notebooks record, in language fuller and freer than his more formal writings, the depth of his love and transcendental feeling for the wilderness. The rich heritage of his native Scotland and the unconscious music of the poetry of Burns, Milton, and the King James Bible permeate the language of his poetic fancy. In his later life, Muir attempted to sort out these journals and, at the request of friends, published a few extracts. A year after his death in 1914, his literary executor and biographer, William Frederick Bad , also published episodes from the journals. Linnie Marsh Wolfe set out to salvage the best of his writings still left unpublished in 1938 and has thus added to our understanding of the life and thought of a complex and fascinating American figure.

The Wisdom of John Muir-Anne Rowthorn 2012-04-10 The Wisdom of John Muir marries the best aspects of a Muir anthology with the best aspects of a Muir biography. The fact that it is neither, and yet it is both, distinguishes this book from the many extant books on John Muir. Building on her lifelong passion for the work and philosophy of John Muir, author Anne Rowthorn has created this entirely new treatment for showcasing the great naturalist’s philosophy and writings. By pairing carefully selected material from various stages of Muir’s life, Rowthorn’s book provides a view into the experiences, places, and people that inspired and informed Muir’s words and beliefs. The reader feels able to join in with Muir’s own discoveries and transformations over the arc of his life. Rowthorn is careful not to overstep her role: she stands back and lets Muir’s words speak for themselves.

The Writings of John Muir-John Muir 2012-04-11 In a lifetime of exploration, writing, and passionate political activism, John Muir made himself America’s most eloquent spokesman for the mystery and majesty of the wilderness, a master of natural description who evoked and celebrated with unique power and intimacy the untrammled landscapes of Alaska and the American West. John Muir-Kathryn Lasky 2014-03-01 Depicts the life of John Muir--writer, scholar, inventor, shepherd, farmer, explorer, and naturalist-who devoted his life to the land, influenced the first national park in America--Yosemite--and founded the Sierra Club in 1892.

John Muir-Mary Colwell 2014 An in-depth portrait of John Muir, the founder of the U.S. National Parks and the founder and first president of the Sierra Club John Muir was the founder of the U.S. National Parks and a towering figure in the history of that country’s involvement with ecology. Born into a harsh home in Dunbar, Scotland, he would often escape to revel in the birds and wildlife of the area. When his father suddenly uprooted the family and moved to the United States, the oppression he associated with his childhood continued—and so did his involvement with the natural world. Despite the difficulty of his formative years Muir grew up to be a man of great joy—first an inventor and then an explorer, he found his haven in the mountains of Sierra Nevada. He was a fascinating character: on the one hand a recluse, who sought solitude, and on the other a passionate activist, determined to save the places he loved. A strong believer in both God and the essential goodness of humanity, he was the founder and first president of the Sierra Club. This wonderful memoir pays tribute to a giant of ecology and is essential reading for lovers of natural history.

Selected Writings-John Muir 2017 "This volume of John Muir’s selected writings chronicles the key turning points in his life and study of the American wilderness. The Story of My Boyhood and Youth is Muir’s account of his childhood on a Wisconsin farm, where his interest in nature was first piqued; in The Mountains of California, The Yosemite, and Travels in Alaska, we follow him on long journeys into stunning mountain ranges and valleys, where he records native flora and fauna and finds proof of his theories of the effect of glaciers on landscape formation. These four full-length works--along with a selection of important essays--helped galvanize American naturalists, and led to the founding of the Sierra Club and several national parks."--Provided by publisher.

John Muir-Charles River Charles River Editors 2018-08-16 \*Includes pictures \*Includes contemporary accounts and quotes \*Includes online resources and a bibliography for further reading \*Keep close to Nature’s heart... and break clear away, once in awhile, and climb a mountain or spend a week in the woods. Wash your spirit clean." - John Muir The name of John Muir as one of the earliest conservationists, naturalists and natural philosophers is forever entwined with California - he is the man behind the creation of the Yosemite National Park and the namesake of the John Muir Trail in Sierra Nevada - but Muir was 30 years old before ever set foot in the state. In fact, Muir was a Scotsman, and despite the fact that he lived in the United States for almost his entire life, he never lost his accent, nor did he lose his fundamental identity with the wild East Lothian countryside and the rugged Scottish coast upon which he was born. The United States is full of natural wonders, but few remain unspoiled by man as much as Yosemite National Park, a 750,000 square acre park near the Sierra Nevada mountain range. Despite being inhabited by people for nearly 3,000 years, the relatively remote spot helped ensure that even as America expanded west, the Yosemite area avoided being settled or exploited like so many other areas on the frontier. Although it is a World Heritage Site and has been visited by millions of people, nearly the entire park remains wilderness, replete with features like waterfalls, giant sequoia groves, mountains, and some of America’s most impressive granite cliffs. Given its natural wonders, it should come as no surprise that the area attracted some of the 19th century’s most famous conservationists, including Muir and his good friend Theodore Roosevelt. Muir in particular was instrumental in having Yosemite declared a national park, and he would wage eloquently about the area and the fight to preserve it: "The making of gardens and parks goes on with civilization all over the world, and they increase both in size and number as their value is recognized. Everybody needs beauty as well as bread, places to play in and pray in, where Nature may heal and cheer and give strength to body and soul alike. This natural beauty-hunger is made manifest in the little windowsill gardens of the poor, though perhaps only a geranium slip in a broken cup, as well as in the carefully tended rose and lily gardens of the rich, the thousands of spacious city parks and botanical gardens, and in our magnificent National Parks-the Yellowstone, Yosemite, Sequoia, etc.-Nature’s sublime wonderlands, the admiration and joy of the world. Nevertheless, like anything else worth while, from the very beginning, however well guarded, they have always been subject to attack by despoiling gain-seekers and mischief-makers of every degree from Satan to Senators, eagerly trying to make everything immediately and selfishly commercial, with schemes disguised in smug-smiling philanthropy, industriously, sham-piously crying, 'Conservation, conservation, panutilization,' that man and beast may be fed and the dear Nation made great. Thus long ago a few enterprising merchants utilized the Jerusalem temple as a place of business instead of a place of prayer, changing money, buying and selling cattle and sheep and doves; and earlier still, the first forest reservation, including only one tree, was likewise despoiled. Ever since the establishment of the Yosemite National Park, strife has been going on around its borders and I suppose this will go on as part of the universal battle between right and wrong, however much of its boundaries may be shorn, or its wild beauty destroyed." John Muir: The Life and Legacy of America’s Most Famous Conservationist examines the legendary career of one of the country’s most influential figures. Along with pictures of important people, places, and events, you will learn about John Muir like never before.

Son of the Wilderness: The Life of John Muir-Linnie Marsh Wolfe 2019-07-31 First published in 1945, this biography won the Pulitzer Prize in 1946. Its author worked for twenty-two years on John Muir, including as secretary of the John Muir Association and as editor of Muir’s unpublished papers. She interviewed many family members and people who knew and worked with John Muir to produce this account of Muir’s life. She recounts Muir’s Scottish origins, his early years in the harsh Wisconsin wilderness, his remarkable mechanical aptitude and interest in botany and geology at the University of Wisconsin in Madison where he spent two and a half years before traveling to the Canadian wilderness, and then to California where he spent most of his life. "[A] well-balanced, informative and rewarding biography." — Kirkus Reviews "Into this biography of John Muir, Mrs. Wolfe has packed an amazing amount of factual information which she has illuminated with a sober critical judgment that gives us a convincing portrait of the whole man." — Francis P. Farquhar, Pacific Historical Review "Linnie Marsh Wolfe almost singlehandedly restored John Muir to the respectability and stature he always deserved... [Son of the Wilderness] should be on the reference shelves of anyone seriously interested in American environmental history." — John Opie, Environmental History Review "[A]n interesting personal biography... [Wolfe] creates Muir as a living personality — mystical but athletic, enthusiastic about nature but socially abrupt — a sort of middle-aged Thoreau." — Alexander Kern, Journal of American History "By immersing herself in Muir’s life, for example, by soaking in his correspondence and journals, [Wolfe] was able to craft what amounts to a first-person narrative, the autobiography he never wrote for himself." — Char Miller, John Muir Newsletter

JOHN MUIR: The Story of My Boyhood and Youth & Letters to a Friend (Illustrated Edition)-John Muir 2017-07-04 The Story of My Boyhood and Youthreveals the beginnings of the forming of Muir’s special relation towards nature. He considered the encounters with nature as quite an adventure and at first, paid special attention to bird life. John Muir understood that to discover truth, he must turn to what he believed were the most accurate sources. In his autobiographical account, The Story of My Boyhood and Youth, he writes that during his childhood, his father made him read the Bible every day. Muir eventually memorized three-quarters of the Old Testament and all of the New Testament. In his autobiography, written near the end of his life, he described his life from childhood years in Scotland and moving to America to student years in Wisconsin. When he was a student in the University of Wisconsin he was a frequent caller at the house of Dr. Ezra S. Carr. The kindness shown him there, and especially the sympathy which Mrs. Carr, as a botanist and a lover of nature, felt in the young manes interests and aims, led to the formation of a lasting friendship. He regarded Mrs. Carr, indeed, as his "spiritual mother," and his letters to her in later years are the outpourings of a sensitive spirit to one who he felt thoroughly understood and sympathized with him. John Muir (1838-1914) was a Scottish-American naturalist, author, environmental philosopher and early advocate of preservation of wilderness in the United States. His letters, essays, and books telling of his adventures in nature, especially in the Sierra Nevada mountains of California, have been read by millions. His activism helped to preserve the Yosemite Valley, Sequoia National Park and other wilderness areas. The Sierra Club, which he founded, is a prominent American conservation organization.

Though very incomplete, it was found so important that it seemed best to in corporate it in the present work, whose form of presentation and selection of materials had to be accommodated somewhat to make this possible. It is chiefly in the letters, however, that the reader will find revealed the charm of Muir’s personality and the spontaneity of his nature enthusiasms. He climbed a number of mountains, including Cathedral Peak and Mount Dana, and hiked the old Indian trail down Bloody Canyon to Mono Lake. He lived in the cabin for two years and wrote about this period in his book First Summer in the Sierra. John Muir’s Last Journey-John Muir 2013-04-10 "I am now writing up some notes, but when they will be ready for publication I do not know... It will be a long time before anything is arranged in book form." These words of John Muir, written in June 1912 to a friend, proved prophetic. The journals and notes to which the great naturalist and environmental figure was referring have languished, unpublished and virtually untouched, for nearly a century. Until now. Here edited and published for the first time, John Muir’s travel journals from 1911-12, along with his associated correspondence, finally allow us to read in his own words the remarkable story of John Muir’s last great journey. Leaving from Brooklyn, New York, in August 1911, John Muir, at the age of seventy-three and traveling alone, embarked on an eight-month, 40,000-mile voyage to South America and Africa. The 1911-12 journals and correspondence reproduced in this volume allow us to travel with him up the great Amazon, into the jungles of southern Brazil, to snowline in the Andes, through southern and central Africa to the headwaters of the Nile, and across six oceans and seas in order to reach the rare forests he had so long wished to study. Although this epic journey has received almost no attention from the many commentators on Muir’s work, Muir himself considered it among the most important of his life and the fulfillment of a decades-long dream. John Muir’s Last Journey provides a rare glimpse of a Muir whose interests as a naturalist, traveler, and conservationist extended well beyond the mountains of California. It also helps us to see John Muir as a different kind of hero, one whose endurance and intellectual curiosity carried him into far fields of adventure even as he aged, and as a private person and family man with genuine affections, ambitions, and fears, not just an iconic representative of American wilderness. With an introduction that sets Muir’s trip in the context of his life and work, along with chapter introductions and a wealth of explanatory notes, the book adds important dimensions to our appreciation of one of America’s greatest environmentalists. John Muir’s Last Journey is a must reading for students and scholars of environmental history, American literature, natural history, and related fields, as well as for naturalists and armchair travelers everywhere.

Essential Muir-John Muir 2006 "Like Muir himself, Essential Muir packs an astounding range of experience into a lithe frame: ecstasic yet scientific descriptions of Yosemite; the heartrending tale of that "wee, hairy, sleekit beastie," Stickeen; reflections on the society of Eskimos;Muir’s touching tribute, after a lifetime of wonder, to the mighty baobob trees of Africa; and more. Fred D. White’s selection from Muir’s writings, and his illuminating commentary, reveal the coherence and drama of a remarkable life: new readers will understand why Muir has become an American icon, and readers who are familiar with his work will be delighted with this fresh look. Muir’s fierce love of all of nature, from squirrels to glaciers (but perhaps not sheep), continues to inspire us nearly a century after his death."--Book jacket.

The Mountains of California-John Muir 2008-03-25 A stirring tribute to one of America’s most remote and beautiful places by one of the first modern preservationists This Penguin Classic-Muir’s first book-puts a pioneering conservationist’s passion for nature in high relief. With a poet’s sensitivity and a naturalist’s eye, Muir celebrates the Sierra Nevada, which he dedicated his life to saving, and recounts his breathtaking visits to Yosemite Valley, Kings Canyon, Sequoia Groves, and Mount Whiskey. The Mountains of California is an affecting celebration of raw nature by one of its most ardent defenders.

Muir and More-Ronald Turnbull 2016-07-01 John Muir – a life, but also a hike. Muir is 200 miles of high-level granite and pine, but also the inventor of a clockwork self-awakening bed and the American national park system. Muir is East Lothian’s Man of the Millennium – this despite the fact that he left Scotland for ever at the age of eleven – and one of the best long paths in the world. Award-winning outdoor writer Ronald Turnbull follows John Muir from his birthplace in Dunbar to the Californian trail that bears his name. A perceptive, humorous companion over 210 miles of the Sierra Nevada (and 45 miles of East Lothian coast), Turnbull shares remote camps with some eccentric trail types, pokes fun at Thoreau and explores the paradoxes inherent in the preservation of wilderness. Most of all, he reflects on the life and ideas of John Muir himself: pioneering conservationist, writer and walker, inspired visionary and tiresome tree-hugger – the exiled Scot who invented the American outdoors.
