2007-11-01 Richard B. Freeman Private sector unionism is in decline in the United States. As a result, labor advocates, community groups, nongovernmental organizations, and individuals concerned with the well-being of workers have sought to develop alternative ways to represent workers' interests. *Emerging Labor Market Institutions for the Twenty-First Century* provides the first in-depth assessment of how effectively labor market institutions are responding to this drastically altered landscape. This important volume provides case studies of new labor market institutions and new directions for existing institutions. The contributors examine the behavior and impact of new organizations that have formed to solve workplace problems and to bolster the position of workers. They also document how unions employ new strategies to maintain their role in the economic system. While non-union institutions are unlikely to fill the gap left by the decline of unions, the findings suggest that emerging groups and unions might together improve some dimensions of worker well-being. *Emerging*

Labor Market Institutions is the story of workers and institutions in flux, searching for ways to represent labor in the new century.

2010-11 Christina Romer Presents a projection of potential developments in the U.S. labor market over the next five to ten years and discusses the preparations necessary to develop the 21st century workforce. Discusses the skills that will likely be most relevant in growing occupations, the value and limitations of our current post-high school educ. and training systems, and the characteristics of a more effective educ. and training structure. Examines the sectors that are expected to grow and develop over the next several years. The Amer. Recovery and Reinvest. Act will create new opportunities in already-expanding industries such as health care and educ., and also will create new opportunities in fledgling industries, such as renewable energy production and distribution.

2012-10-29 Laura W. Perna Education, long the key to opportunity in the United States, has become simply essential to earning a decent living. By 2018, 63 percent of all jobs will require at least some postsecondary education or training. Teachers and civic leaders stress the value of study through high school and beyond, but to an alarmingly large segment of America's population—including a disproportionate number of ethnic and racial minorities—higher education

seems neither obtainable nor relevant. *Preparing Today's Students for Tomorrow's Jobs in Metropolitan America*, edited by Laura W. Perna, offers useful insights into how to bridge these gaps and provide urban workers with the educational qualifications and skills they need for real-world jobs. *Preparing Today's Students for Tomorrow's Jobs in Metropolitan America* probes more deeply than recent reports on the misalignment between workers' training and employers' requirements. Written by researchers in education and urban policy, this volume takes a comprehensive approach. It informs our understanding of the measurement and definition of the learning required by employers. It examines the roles that different educational sectors and providers play in workforce readiness. It analyzes the institutional practices and public policies that promote the educational preparation of today's students for tomorrow's jobs. The volume also sheds light on several recurring questions, such as what is the "right" amount of education, and what should be the relative emphasis on "general" versus "specific" or "occupational" education and training? Ensuring that today's students have the education and training to meet future career demands is critical to the economic and social well-being of individuals, cities, and the nation as a whole. With recommendations for institutional leaders and public policymakers, as well as future

2006 Alfred J. López López examines the role of José Martí's writing on concepts of Cuban nationalism that fueled the 1895 colonial revolution against Spain and have since continued to inform conflicting and violently opposed visions of the Cuban nation. He examines how the same body of work has come to be equally championed by opposing sides in the ongoing battle between the Cuban nation-state, which under Castro has consistently claimed Martí as a crucial inspiration for its Marxist revolutionary government, and the diasporic communities in Miami and elsewhere who still honor Martí as a figure of hope for the Cuban nation in exile. He also shows how, more recently, Martí has become an international as well as national icon, as postcolonial and New Americanist scholars have appropriated parts of his writings and message for use in their own self-described "hemispheric" and even "planetary" critiques of Western imperialist projects in Latin America and beyond. As the first study to examine the impact of Martí's writings on both Cubans and Cuban Americans and to consider the ongoing polemic over Martí as part of the larger postcolonial problem of nation building, López's study also considers the more general issue of literature within nationalist projects. He illuminates the

common concepts and ideas that underlie the ongoing ideological chasm between the Cuban nation-state and the Cuban nation in exile and offers the possibility of a new way of reading and understanding notions of national identity that have historically both enabled and delimited the ways in which Latin Americans and U.S. Hispanics have understood and defined themselves.

2015-12-03 Donald Lazere This brief edition of a groundbreaking textbook addresses the need for college students to develop critical reading, writing, and thinking skills for self-defense in the contentious arena of American civic rhetoric. Designed for first-year or more advanced composition and critical thinking courses, it is one-third shorter than the original edition, more affordable for students, and easier for teachers to cover in a semester or quarter. It incorporates up-to-date new readings and analysis of controversies like the growing inequality of wealth in America and the debates in the 2008 presidential campaign, expressed in opposing viewpoints from the political left and right. Exercises help students understand the ideological positions and rhetorical patterns that underlie such opposing views. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are

foregrounded as topics for rhetorical analysis.

2002 José Martí José Martí (1853-1895) is the most renowned political and literary figure in the history of Cuba. A poet, essayist, orator, statesman, abolitionist, and the martyred revolutionary leader of Cuba's fight for independence from Spain, Martí lived in exile in New York for most of his adult life, earning his living as a foreign correspondent. Throughout the 1880s and early 1890s, Martí's were the eyes through which much of Latin America saw the United States. His impassioned, kaleidoscopic evocations of that period in

U.S. history, the assassination of James Garfield, the opening of the Brooklyn Bridge, the execution of the Chicago anarchists, the lynching of the Italians in New Orleans, and much more, bring it rushing back to life. Organized chronologically, this collection begins with his early writings, including a thundering account of his political imprisonment in Cuba at age sixteen. The middle section focuses on his journalism, which offers an image of the United States in the nineteenth century, its way of life and system of government, that rivals anything written by de Tocqueville, Dickens, Trollope, or any other European commentator. Including generous selections of his poetry and private notebooks, the book concludes with his astonishing, hallucinatory final masterpiece, "War Diaries", never before translated into English. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. 2008 Timothy J. Bartik In this book, which was the outgrowth of a conference sponsored by the Upjohn Institute in Washington, D.C., in June 2007, leading policy analysts frame the major challenges facing U.S. labor policy: Improving the skills of American workers so that they can better compete in a global economy; Addressing the crisis in our system of employer-sponsored health insurance; Minimizing the effects of dislocation due to immigration and trade; Removing barriers to employment for older workers; Improving the quality of jobs for low-wage workers without harming the competitiveness of American companies; Addressing the serious employment barriers of the disadvantaged. Each chapter in this volume tackles one of these policy challenges,

identifying the key problems, evaluating the effectiveness of current policy approaches, and offering innovative, forward-thinking, but pragmatic alternative policies. Collectively, the chapters in this volume offer a clear road map for future labor market policy.
