

Journal Of Herbal Medicine Empowering Knowledge

Herbal Homestead Journal-Brittany Nickerson 2015-07-07 Herbs and self-care practices shift with the seasons and therefore offer a tremendous opportunity to learn from nature. Our bodies go through the same cycles as the earth, daily, monthly, and yearly. The herbal homestead is a place to practice this art of living that we have become so disconnected from and to consequently reconnect with the cycles around and within us. Connecting and reconnecting with these processes is empowering, enlivening, energizing, and it builds confidence and trust in yourself and your body. Confidence and trust are major markers of health, so this way of life can put us right on our path to health. Herbal homesteading is a call to connect with ourselves, with our own healthcare, and with nature and plants. This connection can make us feel at home— at home within ourselves, at home in nature, and at home in the spaces where we make medicine, heal, and connect with others. You can create an herbal homestead to any extent and be successful, you do not have to have land, a garden, a plethora of herbs, an education in herbal medicine. You can embrace this worldview one day or month at a time, plant by plant, one act of self care to the next. You can create your herbal homestead from your urban apartment, you can learn about nature's processes and the life cycle of plants from the weeds growing through the cracks in the sidewalk—all of these cycles are created equally.

Fundamentals of Feminist Gerontology-J Dianne Garner 2014-01-21 Explore feminist ideals and advocacy for aging women in health care, home life, work, and retirement! Fundamentals of Feminist Gerontology strives to increase women's self-esteem and their overall quality of life by encouraging education and by putting a stop to age, sex, and race discrimination. As a student or professional in psychology, social work, or gerontology, you will learn about feminist conceptions of retirement, economic issues, psychological issues, and social issues and will explore studies on old age discrimination and devaluation and sexism toward women in Western societies to gain an understanding of the experiences of these women. This book also shows how some women are experiencing empowerment through alternative health care, such as mind-body therapies, homeopathy, aromatherapy, and herbal medicine and examines older women in the family context. Fundamentals of Feminist Gerontology will provide you with the tools to offer effective therapy to women to help them improve their own lives. For a complete list of contents, please visit our Web site at www.haworthpressinc.com. Using feminist practice approaches, Fundamentals of Feminist Gerontology gives you real-life situations and examples that will raise awareness of the issues that rob older women of the quality of life they deserve. Some of the vital issues and theories you will read about in Fundamentals of Feminist Gerontology include: women regaining control over their health care retirement and the economic issues that older women face when they retire the role of children and grandchildren in the older woman's life unpaid work after retirement in the home and as a care provider older women battling domestic violence financial and psychological issues of widowhood special concerns of minority women and lesbians as they grow older Fundamentals of Feminist Gerontology presents new feminist knowledge and strategies to assist aging women in fully developing, enhancing, and enjoying their later years. You will discover a rich variety of theories and frameworks from a multitude of intellectual paradigms and political positions to enhance your professional practice with older women.

Herbalism For Beginners-Jolanny Lopez 2020-07 Do you want to heal your body naturally? Are you fed up with conventional, chemically produced medicine that only makes you feel worst and never heals you? "In my opinion, no one in the medical profession has reached infinity of thought. No one can claim authority over another's right to heal. By using herbs to heal, the very plants we walk alongside on the earth, we not only create empowerment within ourselves but also identify and connect with dis-ease, allow it a swifter passage for greater healing to be made". - Niki Senior -

Master Herbalist. Excerpt from Journal Two, 2005 In today's world where diseases are only becoming more common, natural alternatives to medicine are becoming more popular. This book will allow you to become knowledgeable about what our ancestors used to heal their bodies naturally. You will be able to grow your herbs at home and take things to the next level by making your tinctures! In this book you will discover: How to aid certain parts of your body with different herbs 20 of the most popular herbs A list of teas blends that you should be making to improve your health A step-by-step on how you can grow your own herbs at home! How to use make oils from herbs and make your own tinctures! Help your body return to its natural state You can begin healing your body and growing your own herbs even if you don't have any knowledge of herbalism! If you want to reap the benefits of naturally grown herbs, then scroll up and click the "Add to Cart" button.

Handbook of Asian American Health-Grace J. Yoo 2012-10-11 Asian Americans encounter a range of health issues often unknown to the American public, policy makers, researchers and even clinicians. National research often combines Asian Americans into a single category, not taking into account the differences and complexity among Asian ethnic subgroups. The definition of Asian American derives from the U.S. Census Bureau's definition of Asian, which includes peoples from all the vast territories of the Far East, Southeast Asia and the South Asian Subcontinent. While Census classifications determine demographic measurements that affect equal opportunity programs, the broad rubric "Asian-American" can never describe accurately the more than 50 distinct Asian American subgroups, who together comprise multifaceted diversity across cultural ethnicities, socio-economic status, languages, religions and generations. This volume rectifies that situation by exploring the unique needs and health concerns of particular subgroups within the Asian American community. It consolidates a wide range of knowledge on various health issues impacting Asian Americans while also providing a discussion into the cultural, social, and structural forces impacting morbidity, mortality and quality of life. The volume is designed to advance the understanding of Asian American health by explaining key challenges and identifying emerging trends faced in specific ethnic groups and diseases/illnesses, innovative community-based interventions and the future needed areas of research.

Integrating Complementary Medicine Into Health Systems-Nancy Faass 2001 Comprehensive and in-depth guide provides the expertise of more than 100 of the nation's top professionals.

Living the EnerQi Connection-Sheri Laine 2014-12-30 Everyone wants to feel healthy, strong, and alive. Sheri Laine, a 28-year practitioner of Oriental medicine, shows readers how to do just that through a unique concept using the L.A.I.N.E. method: Learn, Align, Inform, Natural, Energy. In Living the EnerQi Connection, acupuncturist Laine explains how Qi—the vital energy that circulates round the body in currents—works and how readers can benefit by cultivating and nurturing it.

Complementary, Alternative, and Traditional Medicine-Costanza Torri 2017-05-15 This edited collection is about the use of complementary and alternative medicine (CAM) and traditional medicine (TM) within the context of women's reproductive health. It adopts a perspective drawn from different social sciences (sociology, medical anthropology, history, and health studies) to discuss topics such as fertility, menopause, pregnancy, child birth practices, post-natal care, breastfeeding, and breast cancer. The contributors explore the uses and values attributed to CAM and TM for women's reproductive health across diverse cultures from the point of view of patients, CAM/TM practitioners, and other health care providers. This text provides insights into the wide spectrum of practices, approaches, and beliefs that define CAM and TM, and situates women's health issues within the local socio-cultural, geographic, economic, historical, and political contexts in which they exist. It also explores some challenges to the integration of TM and CAM with biomedicine.

Bridges Between Tradition and Innovation in Ethnomedicine-Maria Costanza Torri 2011-08-03 Community-based enterprises are the result of a

process in which the community acts entrepreneurially to create and operate a new enterprise embedded in its existing social structure and network. This book argues that community-based enterprise could represent a strategy for fostering sustainable local development while at the same time maintaining traditional knowledge in ethnomedicine and conserving the local ecosystems.

Low-Cost Approaches to Promote Physical and Mental Health-Luciano L'Abate 2007-06-06 Most health professionals would agree that time and funds are in short supply, even under optimal conditions. Patients, too, would admit similar shortfalls, even with optimal motivation. This book offers self-administered and easily administered interventions designed to promote positive health behaviors while requiring little or no outside funding. Editor Luciano L'Abate continues his long tradition of prolific innovations by identifying major changes in today's health care systems and explaining how targeted, prescriptive promotion/prevention strategies can enhance traditional primary, secondary, and tertiary interventions in key behavioral and relational areas.

Brooks/Cole Empowerment Series: Psychopathology: A Competency-Based Assessment Model for Social Workers-Susan W. Gray 2012-02-15 Written by social workers, PSYCHOPATHOLOGY views mental disorders through the strengths-perspective. It is unique in its ability to summarize the current state of knowledge about mental disorders and applies a competency-based assessment model for understanding psychopathology. Complete with detailed and realistic vignettes that are unavailable in other texts for the course, PSYCHOPATHOLOGY presents strategies for building on clients' strengths and resilience and offers insights to social workers regarding their role in working with the mentally ill. Additional resources available to package with the text, including a DVD and CourseMate, further enhance the text with such helpful material as video illustrating clinician/client interaction, and study tools that reinforce learning. Part of the Brooks/Cole Empowerment Series, the third edition is completely up to date and thoroughly integrates the core competencies and recommended practice behaviors outlined in the 2008 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Professional Perspectives in Health Care-Carol Wilkinson 2007-09-27 Professional Perspectives in Health Care covers a broad range of healthcare issues such as confidentiality, the patient as consumer and interprofessional working. It examines the latest developments and international perspectives on working in healthcare, and encourages a critical appreciation of current debates on the professional agenda.

Fundamentals of Midwifery-Louise Lewis 2015-03-02 Fundamentals of Midwifery: A Textbook for Students makes the subject of midwifery accessible, informative and motivating, ensuring that it is an essential text for the aspiring midwife! This resource brings together knowledge from a collection of clinical experts and experienced academics to support your learning and prepare you for the challenges faced in contemporary midwifery healthcare. It presents you with the 'must-have' information that you need concerning both the theoretical and practical aspects of what it means to be a midwife. With extensive full colour illustrations throughout, as well as activities and scenarios, this user-friendly textbook will support you throughout your entire education programme. Fundamentals of Midwifery is essential reading for all pre-registration student midwives, as well as newly qualified midwives. KEY FEATURES: • Broad and comprehensive in scope, with chapters on: team working; antenatal care, intrapartum and postnatal care; infant feeding; public health and health promotion; perinatal mental health; complementary therapies; pharmacology and medicines management; and emergencies. • Interactive and student-friendly in approach, with activities throughout. • Brings together professional and clinical topics in one user-friendly book. • Ties in with the latest NMC Standards for pre-registration midwifery education. • Supported by an online resource centre featuring interactive multiple-choice questions, additional scenarios and activities, and links to further reading.

Traditional, Complementary and Integrative Medicine-Jon Adams 2012-05-22 This authoritative collection is the first wide-ranging overview dedicated to traditional, complementary and integrative medicine (TCIM) and its scientific study. Compiled by an expert editorial team, it is an essential guide to the vast and ever-growing international literature on TCIM. Contributions come from practitioners and academics drawn from a diverse range of disciplines and professions across the globe. From perspectives on the significance of TCIM within public health policy to discourses on its influence in fields such as psychiatry and sociology, discrete chapters come together to provide an international map of the contemporary research, key debates and core issues which shape the field. Carefully structured to ensure easy navigation, the reader is divided into three parts: Part A focuses on the consumption of TCIM, including chapters on its use through the life-cycle and within the context of disease and health management; Part B covers considerations for practitioners across the world, taking in issues over ethics, communication and education; Part C features chapters on the role of evidence, research and knowledge production in TCIM and looks at what lies ahead for the field. With its thought-provoking insights and suggestions for further reading, this comprehensive resource provides guidance and inspiration for anyone embarking on study, practice or research within health, nursing or medicine.

Herbal Antibiotics-Stephen Harrod Buhner 1999-01-08 Current information about antibiotic resistant microbes and the herbs that are effective in fighting them.

Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America-David A. Schwartz 2018-05-31 This ambitious sourcebook surveys both the traditional basis for and the present state of indigenous women's reproductive health in Mexico and Central America. Noted practitioners, specialists, and researchers take an interdisciplinary approach to analyze the multiple barriers for access and care to indigenous women that had been complicated by longstanding gender inequities, poverty, stigmatization, lack of education, war, obstetrical violence, and differences in language and customs, all of which contribute to unnecessary maternal morbidity and mortality. Emphasis is placed on indigenous cultures and folkways—from traditional midwives and birth attendants to indigenous botanical medication and traditional healing and spiritual practices—and how they may effectively coexist with modern biomedical care. Throughout these chapters, the main theme is clear: the rights of indigenous women to culturally respectful reproductive health care and a successful pregnancy leading to the birth of healthy children. A sampling of the topics: Motherhood and modernization in a Yucatec village Maternal morbidity and mortality in Honduran Miskito communities Solitary birth and maternal mortality among the Rarámuri of Northern Mexico Maternal morbidity and mortality in the rural Trifino region of Guatemala The traditional Ngäbe-Buglé midwives of Panama Characterizations of maternal death among Mayan women in Yucatan, Mexico Unintended pregnancy, unsafe abortion, and unmet need in Guatemala Maternal Death and Pregnancy-Related Morbidity Among Indigenous Women of Mexico and Central America is designed for anthropologists and other social scientists, physicians, nurses and midwives, public health specialists, epidemiologists, global health workers, international aid organizations and NGOs, governmental agencies, administrators, policy-makers, and others involved in the planning and implementation of maternal and reproductive health care of indigenous women in Mexico and Central America, and possibly other geographical areas.

2002

New Age Journal- 1996

Veterinary Herbal Medicine E-Book-Susan G. Wynn 2006-12-06 This full-color reference offers practical, evidence-based guidance on using more than 120 medicinal plants, including how to formulate herbal remedies to treat common disease conditions. A body-systems based review explores herbal

medicine in context, offering information on toxicology, drug interactions, quality control, and other key topics. More than 120 herbal monographs provide quick access to information on the historical use of the herb in humans and animals, supporting studies, and dosing information. Includes special dosing, pharmacokinetics, and regulatory considerations when using herbs for horses and farm animals. Expanded pharmacology and toxicology chapters provide thorough information on the chemical basis of herbal medicine. Explores the evolutionary relationship between plants and mammals, which is the basis for understanding the unique physiologic effects of herbs. Includes a body systems review of herbal remedies for common disease conditions in both large and small animals. Discusses special considerations for the scientific research of herbs, including complex and individualized interventions that may require special design and nontraditional outcome goals.

Toxicology of Herbal Products-Olavi Pelkonen 2017-03-07 This volume provides a comprehensive overview of the hazards inherent in herbal medicinal products, with systematic coverage of major toxicities. Topics include composition and quality control, toxicokinetics, interactions, safety pharmacology, approaches to studying complex mixtures including metabolomics and systems network pharmacology, and long-term toxicity. The volume also discusses various organ toxicities with a special emphasis on basic mechanisms of actions and the multicomponent and multi-target nature of herbal products. It concludes with a look to future challenges and opportunities. With contributions from noted experts, Toxicology of Herbal Products is a necessary resource for physicians, pharmacists, and toxicologists interested in complex plant-derived products.

Nursing History Review, Volume 14, 2006-Patricia D'Antonio, RN, PhD, FAAN 2005-11-21 Nursing History Review, an annual peer-reviewed publication of the American Association for the History of Nursing, is a showcase for the most significant current research on nursing history. Regular sections include scholarly articles, over a dozen book reviews of the best publications on nursing and health care history that have appeared in the past year, and a section abstracting new doctoral dissertations on nursing history. Historians, researchers, and individuals fascinated with the rich field of nursing will find this an important resource.

Public Health And Health Services Research In Traditional, Complementary And Integrative Health Care: International Perspectives- 2019-05-03 The use and practice of traditional, complementary and/or integrative medicine (TCIM) raises significant questions, poses many challenges and holds much potential for the broad fields of public health and health services research. This book brings together leading international researchers with backgrounds and expertise across broad multi-disciplinary sub-fields including health social science, biostatistics, clinical pharmacology, implementation science, health geography and health economics. Contributors draw upon their research and experience to explain and review core research and practice issues on TCIM and its future development. The book offers a rounded understanding of the current and future possibilities associated with the TCIM-public health and health services research interface and provides an essential overview of the broad evidence-base emerging in this area of research, policy and practice. Individual chapters employ specific case studies, featuring particular medicines/therapies, and focusing upon a number of health care settings and environments including general practice, community pharmacy, hospital specialisms as well as community-based private practice and self-care.

Social Sources of Disparities in Health and Health Care and Linkages to Policy, Population Concerns and Providers of Care-Jennie Jacobs Kronenfeld 2009-08-07 Deals with Social Sources of Disparities in Health and Health Care. This title reviews basic material on the topic. It includes five articles, three focused on racial and ethnic factors in disparities and two on those factors and other social factors such as SES.

Empowerment- 2004

Que's Official Internet Yellow Pages-Joe Kraynak 2005 Alphabetically lists and describes Web sites on a variety of topics, including health, culture, business, travel, and education.

Herbal and Magical Medicine-James K. Kirkland 1992-01-30 Herbal and Magical Medicine draws on perspectives from folklore, anthropology, psychology, medicine, and botany to describe the traditional medical beliefs and practices among Native, Anglo- and African Americans in eastern North Carolina and Virginia. In documenting the vitality of such seemingly unusual healing traditions as talking the fire out of burns, wart-curing, blood-stopping, herbal healing, and rootwork, the contributors to this volume demonstrate how the region's folk medical systems operate in tandem with scientific biomedicine. The authors provide illuminating commentary on the major forms of naturopathic and magico-religious medicine practiced in the United States. Other essays explain the persistence of these traditions in our modern technological society and address the bases of folk medical concepts of illness and treatment and the efficacy of particular practices. The collection suggests a model for collaborative research on traditional medicine that can be replicated in other parts of the country. An extensive bibliography reveals the scope and variety of research in the field. Contributors. Karen Baldwin, Richard Blaustein, Linda Camino, Edward M. Croom Jr., David Hufford, James W. Kirkland, Peter Lichstein, Holly F. Mathews, Robert Sammons, C. W. Sullivan III

Living with HIV and Dying with AIDS-Lesley Doyal 2013 Doyal brings together findings from a wide range of empirical studies spanning the social sciences to explore experiences of HIV positive people across the world. This will illustrate how the disease is physically manifested and psychologically internalised by individuals in diverse ways depending on the biological, social, cultural and economic circumstances in which they find themselves. A proper understanding of these commonalities and differences will be essential if future strategies are to be effective in mitigating the effects of HIV and AIDS.

Complementary Therapies—Advances in Research and Application: 2013 Edition- 2013-06-21 Complementary Therapies—Advances in Research and Application: 2013 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Mind-Body Therapies in a concise format. The editors have built Complementary Therapies—Advances in Research and Application: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Mind-Body Therapies in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Complementary Therapies—Advances in Research and Application: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies.
