Taking on a Learning Disability-Erin McCloskey 2012-08-01 In the United States, approximately 2.5 million students are diagnosed as having a learning disability and the majority of those children are placed in special education because of an inability to read as expected. As a result of this diagnosis, these children may be placed in special education classrooms - classrooms that are separate from the 'mainstream' population. For children with learning disabilities, there is likely no place, other than in school, where a student's inability to read as expected leads to this separation from his/her peers. Once school is over, these children play alongside the kids in their neighborhoods, participate in sports teams, and attend community activities. This book looks at the impact of being labeled as learning disabled and separated from peers in school through the eyes of Samson, a middle school student described both as learning disabled and a non-reader. This qualitative case study explores how Samson, his family, his teachers and this researcher make sense of special education and the complexities of learning to read as an adolescent. Throughout this book, there is a contrasting of the laws and procedures designed to guide special education, with the actual experiences of those impacted by these laws and procedures. Through the three years that Samson was in middle school, this book investigates his perspective on his classes, his interpretation of what it means to 'be' a student in special education, and the process by which he learns to read. How disability gets created, contested, and discussed is highlighted through the many contexts that allow disability to be recognized and to fade into the background.

Advanced Solutions of Transport Systems for Growing Mobility-Grzegorz Sierpiński 2017-07-11 What are the parameters that should be taken into account in an advanced simulation model designed for a transport system that promotes green travelling policies? How can the goal of modal shift be pursued through ICT solutions? Is it enough to apply only a single criterion when planning transport systems? What is the importance of information acquisition and provision in Intelligent Transport Systems? Answers to these and many other questions can be found in this publication. It also contains numerous analyses based on relevant data sets, illustrating the close relationship between ITS and the changes observed in terms of how specific means of transport are used. What proves to be particularly important for advanced transport systems is the use of environmentally friendly solutions that reduce their negative environmental impacts; accordingly, the book also addresses this aspect. With regard to the research results discussed and the selected solutions applied, the book prim arily addresses the needs of three target groups: · Scientists and researchers (ITS field) · Local authorities (responsible for transport systems at the urban and regional level) · Representatives of business (traffic strategy management) and industry (manufacturers of ITS components) Advanced Solutions of Transport Systems for Growing Mobility gathers selected papers presented at the 14th "Transport Systems. Theory and Practice" Scientific and Technical Conference, organized by the Department of Transport Systems and Traffic Engineering at the Faculty of Transport of the Silesian University of Technology. The conference was held on 18-20 September 2017 in Katowice (Poland). More details at www.TSTP.polsl.pl

Education at the Intersection of Globalization and Technology-Sharon Waller 2021-04-07 Today's educators stand at the crossroads of globalization and technology. The world is rapidly shrinking. The workplace is being transformed before our very eyes. Technology is forever changing the way we perceive reality and the way we do business. Educators are required to equip students for a workplace that has yet to emerge. The skill sets of today's job market are often obsolete before students can enter the workplace. Now is the time for educators to rise to the challenges of our modern world. By embracing the vision of yesterday's practitioners and joining hands with tomorrow's practitioners, educators can transform our world and equip their students for the upward mobility and career flexibility required in tomorrow's workplace.
