2024-01-01 Brandon M. Butler It is clear that teacher educators have ongoing professional learning and development needs. Chief among these are continuing to learn about content developments and pedagogical practices useful for teaching a range of PK-12 students in varying contexts; developing reflective competencies and sets of practices useful for teaching teacher candidates about teaching; effectively balancing teaching commitments with institutional expectations for scholarship and service; and forging useful understandings of identity across the spectrum of teacher educator responsibility and development over time, including taking on managerial or administrative roles. Working in institutions largely devoid of formal support mechanisms, teacher educators are often left on their own to meet these needs and subsequently must create or seek out opportunities for their ongoing growth. This volume explores in greater depth how exactly teacher educators engage in professional learning and development across their career trajectories. University-based teacher educator learning occurs in a range of settings and across the career span. Contributors to this volume describe university-based teacher educator learning spaces focused on their ongoing professional learning. Such spaces include teacher educator communities of practice, critical friendships, self-study learning groups, faculty learning groups, co-mentoring, and institutionally sponsored professional learning spaces.

2014-01-09 Warren Combs Writing instruction expert Warren Combs presents a step-by-step plan for teaching writing workshops that are aligned to the Common Core State Standards. The book is filled with practical mini-lessons, strategies, and tools for every stage of the writing process, from prewriting through publication. Scripting is provided, to show teachers how to model each strategy for students. In addition, Dr. Combs shows how teachers can use the following elements: The concepts Voice, Pictures, and Flow, to help students understand the essential elements of writing; The words Invite, Model, Write, Look, and Learn, to model effective writing for students and have them learn from your example; Revision strategies such as Jot and Blend, Combining Sentences, Writing Leads, and Writing Closes; Peer revision using Peer-Assisted Learning Systems (PALS); Student self-assessment rubrics. The book also includes scoring guides and pacing guides, to help teachers implement writing workshops more easily. As Dr. Combs demonstrates, you can give workshops more structure while still making writing come alive for your students.

2017-08-07 Judith C. Hochman Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

their curricula to fulfill the promise of the Common Core and prepare students for success on the coming national assessments. Each chapter of Getting Started With Rigorous Curriculum Design will provide educators with “collective wisdom” — insights and ideas to enrich and expand understandings they may not have yet come to on their own.

2017-09-25 Heidi Hayes Jacobs Help students become more confident and successful readers, writers, and thinkers in today’s world. In this new edition of a bestseller, highly acclaimed author and speaker Heidi Hayes Jacobs offers practical ideas for closing the literacy gap by teaching classic literacies (reading, writing, speaking, and listening) along with essential new literacies (digital, media, and global). The expanded second edition features Heidi’s latest work on the new literacies and provides enhanced versions of strategies designed to help educators integrate critical language skills into their daily operational curriculum. These strategies include: Revising and expanding the role of all teachers so that they see themselves as classical language and contemporary literacy teachers; Separating vocabulary into three distinctive types with distinctive instructional approaches to sustain and extend independent language development; Building creative and visual notetaking and sketchnoting strategies; Designing media projects for every class level and employing a consistent editing and revision policy for writing assignments; Using a formal approach to develop speaking skills through four discussion types to increase civil public discourse; Employing direct technical instruction that promotes the use of the human voice and body as a speaking and communication instrument; Using Curriculum Mapping to develop formal benchmark assessments for active literacy and new literacy cultivation in every subject and on every level. Each chapter is focused on a specific strategy and includes practical examples so you can easily implement the ideas, no matter what grade level or subject area you teach.
