Political Questions Judicial Answers-Thomas M. Franck 2012-05-05 Almost since the beginning of the republic, America's rigorous separation of powers among Executive, Legislative, and Judicial Branches has been umpired by the federal judiciary. It may seem surprising, then, that many otherwise ordinary cases are not decided in court even when they include allegations that the President, or Congress, has violated a law or the Constitution itself. Most of these orphan cases are shunned by the judiciary simply because they have foreign policy aspects. In refusing to address the issues involved, judges indicate that judicial review, like politics, should stop at the water's edge--and foreign policy managers find it convenient to agree! Thomas Franck, however, maintains that when courts invoke the "political question" doctrine to justify such reticence, they evade a constitutional duty. In his view, whether the government has acted constitutionally in sending men and women to die in foreign battles is just as appropriate an issue for a court to decide as whether property has been taken without due process. In this revisionist work, Franck proposes ways to subject the conduct of foreign policy to the rule of law without compromising either judicial integrity or the national interest. By examining the historical origins of the separation of powers in the American constitutional tradition, with comparative reference to the practices of judiciaries in other federal systems, he broadens and enriches discussions of an important national issue that has particular significance for critical debate about the "imperial presidency."

Perceptions of the Independence of Judges in Europe-Frans van Dijk 2021 "In his important book Frans van Dijk changes the usual focus on rules of independence in European countries to the perceptions of independence. This book is a very relevant and timely wake-up call for judges and judicial councils alike. Should be a mandatory read for them all. Highly recommended."--Kees Sterk, Endowed Professor of Administration of European Justice, Maastricht University, the Netherlands, and former President of the European network of Councils for the Judiciary "Frans van Dijk's book puts the focus on perception of judicial independence. The book is highly recommended and should be mandatory reading for all European judges, particularly in times when judicial independence is challenged in so many European countries." -Wiggo Storhaug Larsen, Appeal Court Judge and President of the Norwegian Judges Association This open access book is about the perception of the independence of the judiciary in Europe. Do citizens and judges see its independence in the same way? Do judges feel that their independence is respected by the users of the courts, by the leadership of the courts and by politicians? Does the population trust the judiciary more than other public institutions, or less? How does independence of the judiciary work at the national level and at the level of the European Union? These interrelated questions are particularly relevant in times when the independence of the judiciary is under political pressure in several countries in the European Union, giving way to illiberal democracy. Revealing surveys among judges, lay judges and lawyers - in addition to regular surveys of the European Commission - provide a wealth of information to answer these questions. While the answers will not please everyone, they are of interest to a wide audience, in particular court leaders, judges, lawyers, politicians and civil servants. Frans van Dijk is Professor of Empirical Analysis of Legal Systems at the Montaigne Centre for Rule of Law and Administration of Justice, Utrecht University, The Netherlands

Answers to Common Questions on the Function, Jurisdiction and Procedures of the Judicial Review Council-Connecticut. Judicial Review Council 2007 Courts and Congress-Robert A. Katzmann 2010-12-01 What role should the Senate play in the selection and confirmation of judges? What criteria are appropriate in evaluating nominees? What kinds of questions and answers are appropriate in confirmation hearings? How do judges interpret laws enacted by Congress, and what problems do they face? And what kinds of communications are proper between judges and legislators? These questions go to the heart of the relationship between the federal judiciary and Congress—a relationship that critically shapes the administration of justice. The judiciary needs an environment respectful of its mission; and the legislative branch seeks a judicial system that faithfully construes its laws and efficiently discharges justice. But the judicial-congressional relationship is hindered by an array of issues, including an ever-rising judicial

caseload, federalization of the law, resource constraints, concerns about the confirmation process, increasing legislative scrutiny of judicial decisionmaking and the administration of justice, and debates about how the courts should interpret legislation. Drawing on the world of scholarship and from personal experience, Robert A. Katzmann examines governance in judicial-congressional relations. After identifying problems, he offers ways to improve understanding between the two branches. Copublished with the Governance Institute

Political Questions/Judicial Answers-Professor Thomas M Franck 1992-01-01 Almost since the beginning of the republic, America's rigorous separation of powers among the executive, legislative, and judicial branches has been umpired by the federal judiciary. The Elements of Legal and Judicial Ethics and Practical Exercises-Rosa Maria T. Juan-Bautista 1998

Questioning Judicial Nominees-Congressional Research Service 2018-09-06 The U.S. Constitution vests the Senate with the role of providing "advice" and affording or withholding "consent" when a President nominates a candidate to be an Article III judge-that is, a federal judge entitled to life tenure, such as a Supreme Court Justice. To carry out this "advice and consent" role, the Senate typically holds a hearing at which Members question the nominee. After conducting this hearing, the Senate generally either "consents" to the nomination by voting to confirm the nominee or instead rejects the nominee. Notably, many prior judicial nominees have refrained from answering certain questions during their confirmation hearings on the ground that responding to those questions would contravene norms of judicial ethics or the Constitution. Various "canons" of judicial conduct-that is, self-enforcing aspirational norms intended to promote the independence and integrity of the judiciary-may potentially discourage nominees from fully answering certain questions that Senators may pose to them in the confirmation context. However, although these canons squarely prohibit some forms of conduct during the judicial confirmation process-such as pledging to reach specified results in future cases if confirmed-it is less clear whether or to what extent the canons constrain judges from providing Senators with more general information regarding their jurisprudential views. As a result, disagreement exists regarding the extent to which applicable ethical rules prohibit nominees from answering certain questions. Beyond the judicial ethics rules, broader constitutional values, such as due process and the separation of powers, have informed the Senate's questioning of judicial nominees. As a result, historical practice can help illuminate which questions a judicial nominee may or should refuse to answer during his or her confirmation. Recent Supreme Court nominees, for instance, have invoked the so-called "Ginsburg Rule" to decline to discuss any cases that are currently pending before the Court or any issues that are likely to come before the Court. Senators and nominees have disagreed about whether any given response would improperly prejudice an issue that is likely to be contested at the Supreme Court. Although nominees have reached varied conclusions regarding which responses are permissible or impermissible, nominees have commonly answered general questions regarding their judicial philosophy, their prior statements, and judicial procedure. Nominees have been more hesitant, however, to answer specific questions about prior Supreme Court precedent, especially cases presenting issues that are likely to recur in the future. Ultimately, however, there are few available remedies when a nominee refuses to answer a particular question. Although a Senator may vote against a nominee who is not sufficiently forthcoming, as a matter of historical practice the Senate has rarely viewed lack of candor during confirmation hearings as disqualifying, and it does not appear that the Senate has ever rejected a Supreme Court nominee solely on the basis of evasiveness.

The Circulation of Agency in E-Justice-Francesco Contini 2013-11-19 This book contributes to an understanding of the dynamic complexities involved in the design of e-justice applications that enable online trans-border judicial proceedings in Europe. It provides answers to critical questions with practical relevance: How should online trans-border judicial proceedings be designed in order to deliver effective and timely justice to European citizens, businesses and public agencies? How can the circulation of judicial agency across Europe be facilitated? Based on extensive research, the book explores and assesses the complex entanglements between law and technology, and between national and European jurisdictions that emerge when developing even relatively simple e-services such as those supporting the European small claims procedure and European payment orders. In addition to providing a strong theoretical framework and an innovative approach to e-justice design, this book includes case studies that are based on a common methodology and theoretical framework. It presents original empirical material on the development of e-government systems in the area of European justice. Finally, it introduces the design strategies of Maximum Feasible Simplicity and Maximum Manageable Complexity and, based on them, it proposes architectural and procedural solutions to enhance the circulation of judicial agency.

Gender and Judicial Education-Ulrike Schultz 2018-12-02 Judicial Education has greatly expanded in common law countries in the past 25 years.

More recently it has become a core component in judicial reform programs in developing countries with gender attentiveness as an element required by donor agencies. In civil law jurisdictions judges' schools have long played a role in the formation of the career judiciary with a focus on entry to the judicial profession, in some countries judges get an intensive in-service education at judicial academies. Gender questions, however, tend to be neglected in the curricula. These judicial education activities have generated a significant body of material and experience which it is timely to review and disseminate. Questions such as the following require answers. What is the current state of affairs? How is judicial education implemented in developed and developing countries all around the world? Who are the educators? Who is being educated? How is judicial education on gender regarded by judges? How effective are these programs? The chapters in this book deal with these questions. They provide a multiplicity of perspectives. Six countries are represented, of these four are civil law countries (Germany, Argentina, Japan, Bosnia and Herzegovina) and two are common law countries (Canada; Uganda). This book was previously published as a special issue of International Journal of the Legal Profession.

Rule of Law, Human Rights and Judicial Control of Power-Rainer Arnold 2017-05-16 Judicial control of public power ensures a guarantee of the rule of law. This book addresses the scope and limits of judicial control at the national level, i.e. the control of public authorities, and at the supranational level, i.e. the control of States. It explores the risk of judicial review leading to judicial activism that can threaten the principle of the separation of powers or the legitimate exercise of state powers. It analyzes how national and supranational legal systems have embodied certain mechanisms, such as the principles of reasonableness, proportionality, deference and margin of appreciation, as well as the horizontal effects of human rights that help to determine how far a judge can go. Taking a theoretical and comparative view, the book first examines the conceptual bases of the various control systems and then studies the models, structural elements, and functions of the control instruments in selected countries and regions. It uses country and regional reports as the basis for the comparison of the convergences and divergences of the implementation of control in certain countries of Europe, Latin America, and Africa. The book's theoretical reflections and comparative investigations provide answers to important questions, such as whether or not there are nascent universal principles concerning the control of public power, how strong the impact of particular legal traditions is, and to what extent international law concepts have had harmonizing and strengthening effects on internal public-power control.

Judges and Judging-Peter McCormick 1990 First published in 1990, this book is the first to examine in detail who Canada's judges are and how they make their decisions. During eight years of research, the authors gathered detailed biographical information on judges, including their backgrounds, political connections and previous work experience. They consider in detail the nature of judicial appointments in Canada, the background characteristics of judges, the process of judicial decision-making, the role of the Supreme Court of Canada, and the controversial position of judges as legislators. Judges and Judging is a pioneering work presenting a portrait of Canada's judiciary that remains relevant today.
