

Jump Starting America How Breakthrough Science Can Revive Economic Growth And The American Dream

Jumpstarting America-Jonathan Gruber 2019-04-09 The untold story of how America once created the most successful economy the world has ever seen and how we can do it again. The American economy glitters on the outside, but the reality is quite different. Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves. Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas--and destroying middle class jobs elsewhere. We can continue on this path, or we can look to a brilliant and all-but-forgotten American success story and embark on a plan that will create the industries of the future--and the jobs that go with them. Beginning in 1940, massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen. Private enterprise then built on government-financed scientific breakthroughs to create new industries--such as radar, jet engines, digital computers, mobile telecommunications, life-saving medicines, and the internet. These technologies were the catalyst for increasing productivity and broader economic growth that generated millions of good jobs. We lifted almost all boats, not just the yachts. Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second. It's a visionary, pragmatic, sure-to-be controversial plan that will lead

to job growth and a new American economy in places now left behind.

Jump-starting America-Jonathan Gruber 2019 The untold story of how America once created the most successful economy the world has ever seen and how we can do it again. The American economy glitters on the outside, but the reality is quite different. Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves. Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas-and destroying middle class jobs elsewhere. To turn this tide, we must look to a brilliant and all-but-forgotten American success story and embark on a plan that will create the industries of the future-and the jobs that go with them. Beginning in 1940, massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen. Private enterprise then built on these breakthroughs to create new industries-such as radar, jet engines, digital computers, mobile telecommunications, life-saving medicines, and the internet-that became the catalyst for broader economic growth that generated millions of good jobs. We lifted almost all boats, not just the yachts. Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second. It's a visionary, pragmatic, sure-to-be controversial plan that will lead to job growth and a new American economy in places now left behind.

Power on the Precipice-Andrew Imbrie 2020-09-08 An essential guide to renewing American leadership in a turbulent, polarized, and postdominant world Is America fated to decline as a great power? Can it recover? With absorbing insight and fresh perspective, foreign policy expert Andrew Imbrie provides a road map for bolstering American leadership in an era of turbulence abroad and deepening polarization at home. This is a book about choices: the tough policy trade-offs that political leaders need to make to reinvigorate American money, might, and clout. In the conventional telling, the United States is either destined for continued dominance or doomed to irreversible decline. Imbrie argues instead that the United States must adapt to changing global dynamics and compete more wisely. Drawing on the author's own experience as an adviser to Secretary of State John Kerry, as well as on interviews and comparative studies of the rise and fall of nations, this book offers a sharp look at American statecraft and the United States' place in the world today.

American and NATO Veteran Reintegration-MaryCatherine

McDonald 2021-06-16 In American and NATO Veteran

Reintegration, MaryCatherine McDonald and Gary Senecal

examine mental health issues among former American service

members. McDonald and Senecal argue that sociocultural factors,

such as military training and civilian society, have a dramatic

impact on the rates of post-traumatic stress disorder (PTSD)

experienced by veterans.

5 Pounds-Harley Pasternak 2015-03-03 For most people, the hardest part of lasting weight loss is either getting started or reaching their goals--too often, motivation is tough to maintain or those final few pounds simply won't budge, no matter how many hours are logged on the treadmill and how many calories counted. Now, from the New York Times bestselling author of The Body Reset Diet, comes a deceptively simple plan to slim down--whether you need to shed those last few stubborn pounds or want to jump start a more significant weight-loss effort. 5 Pounds teaches readers how to implement five simple strategies as daily habits: • Walk 5 miles a day. • Eat protein and fiber 5 times a day. • Do resistance exercise 5 minutes a day. • Sleep at least 7 hours a night. • Unplug at least 1 hour a day. Readers will enjoy immediate results--dropping 5 pounds or more in just 5 days--and boost energy, improve overall health, and finally achieve long-term weight-loss success. With step-by-step advice, easy-to-prepare recipes, and motivating success stories, 5 Pounds will transform the way readers look and feel forever.

Markets, Minds, and Money-Miguel Urquiola 2020 Free markets made US universities world leaders in research. Economist Miguel Urquiola argues that in the late nineteenth century, entrepreneurial universities saw they could meet the industrializing country's demand for expertise. They moved away from religiously inspired teaching, and market dynamics allowed them to surpass European competitors.

The Economist's View of the World-Steven E. Rhoads 2021-10-21 A thought-provoking tour of the economist's mind using non-technical language and relevant political examples throughout.

The Wires of War-Jacob Helberg 2021-10-12 From the former news policy lead at Google, an urgent and groundbreaking account of the high-stakes global cyberwar brewing between Western democracies and the autocracies of China and Russia that could potentially crush democracy. From 2016 to 2020, Jacob

Helberg led Google's global internal product policy efforts to combat disinformation and foreign interference. During this time, he found himself in the midst of what can only be described as a quickly escalating two-front technology cold war between democracy and autocracy. On the front-end, we're fighting to control the software—applications, news information, social media platforms, and more—of what we see on the screens of our computers, tablets, and phones, a clash which started out primarily with Russia but now increasingly includes China and Iran. Even more ominously, we're also engaged in a hidden back-end battle—largely with China—to control the Internet's hardware, which includes devices like cellular phones, satellites, fiber-optic cables, and 5G networks. This tech-fueled war will shape the world's balance of power for the coming century as autocracies exploit twenty-first-century methods to re-divide the world into twentieth century-style spheres of influence. Helberg cautions that the spoils of this fight are power over every meaningful aspect of our lives, including our economy, our infrastructure, our national security, and ultimately, our national sovereignty. Without a firm partnership with the government, Silicon Valley is unable to protect democracy from the autocrats looking to sabotage it from Beijing to Moscow and Tehran. The stakes of the ongoing cyberwar are no less than our nation's capacity to chart its own future, the freedom of our democratic allies, and even the ability of each of us to control our own fates, Helberg says. And time is quickly running out.

Science, the Endless Frontier-Vannevar Bush 2021-02-02 "In 1945, the director of the U.S. Office of Scientific Research and Development, Vannevar Bush, issued the now-famous report entitled Science, the Endless Frontier. Commissioned by President Roosevelt in late 1944, as World War II was winding down, the report made a forceful case for the continuing importance of government support of the sciences in peacetime. Bush argued that scientific progress was essential to the health,

security, and prosperity of the nation, and as such was a vital responsibility of the government to promote. Among his major recommendations were the funding of basic research at colleges and universities without expectation of immediate military or industrial application; increased access to higher education for talented students of all economic backgrounds, especially through scholarships; and the establishment of an independent science agency to administer it all. Bush's vision set the course for United States science policy over the next half century and was in large part responsible for the great boom in public funding of basic research after World War II. It remains a touchstone for many today as a passionate articulation of the power and potential of science and its essential role in society. This short volume reproduces Bush's report alongside an original companion essay by Rush D. Holt, offering some historical background and reflecting on the report's legacy and continuing relevance, as well as its limitations. Holt's argument is that today's challenges require a more capacious understanding of science's value to society than Bush articulated: as not only a source of practical benefit, but an empirically based approach to understanding the world that is ultimately fundamental to democracy. Holt's essay closes by issuing a renewed call to science-for scientists, policymakers, and citizens alike"--

Energy Breakthrough-Sarah Ferguson 2011-07-19 Why am I so

tired all the time? Where do exercise and good eating habits fit into my hectic schedule? How can I have more energy every day? In *Energy Breakthrough*, Sarah, The Dutchess of York gives you the keys to attaining a healthier, more energized lifestyle, even in the midst of our overstressed, overscheduled lives. Working with Weight Watchers and drawing on her experiences of coping with life's demands without sacrificing her inner and outward health, The Dutchess helps you lose weight (and keep it off) while raising your energy levels to an all-time high. She begins with a basic equation for success—nutritious eating, effective exercise, and a positive outlook—and helps you to practically incorporate all three into your everyday life. From there, the sky's the limit as you discover how to: - tap into nine ways to get instant energy - fuel your energy with more than 75 easy, delicious recipes and menus all based on the popular Weight Watchers Winning Points® weight-loss plan that includes Points® values - fight fatigue with the Ten Commandments of eating for optimum energy - recharge your batteries with exercise - combat stress, sleep deprivation, and emotional energy drainers - give yourself an energy makeover—with simple lifestyle changes for increased calm and productivity - feel satisfied after every meal or snack while still eating healthfully - make rest and relaxation a vital part of your busy life ... and much more! Jump-start your weight loss with *Energy Breakthrough*—and reap the rewards of a healthier and more fulfilled life.
