2019-03-19 Laia Lopez With almost a million followers on Instagram this is the most personal book of artist Laia López to date. In her own words: From recreating my dad's arts and crafts to releasing my own art book. All the way from Barcelona, I present this book, the result of no small amount of hard work, love and dedication, a publication to share some of the work I've put out on social networks. Inside you'll find a compilation of my favorite illustrations to date, as well as some unpublished creations. Gleaming is a little piece of me I give to you, in which I explain my methods and techniques, tips, anecdotes and the intentions hidden away behind my projects, so you can see just how intensely art shines in my day-to-day life.

2017-09-19 Charles W. Finkl This book integrates a wide range of subjects into a coherent purview of the status of coastal marine science. Designed for the professional or specialist in coastal science, oceanography, and related disciplines, this work will appeal to workers in multidisciplinary fields that strive for practical solutions to environmental problems in coastal marine settings around the world. Examples are drawn from many different geographic areas, including the Black Sea region. Subject areas covered include aspects of coastal marine geology, physics, chemistry, biology, and history. These subject areas were selected because they form the basis for integrative investigation of salient environmental problems or perspective solutions or interpretation of historical context.

2019-09-23 Stephen Erickson This is a "save-the-planet" book. More and more of us are realizing we are facing humanity's greatest challenge. Over the next two decades, the global warming climate crisis threatens to bring about the end of our Anthropocene Epoch - of us and virtually every multicellular life form. Stephen Erickson introduces you to exquisite creatures, human and non-human. The challenges they face reveal the immensity of the threat facing each of us - and its urgency. Widespread awareness is essential. Most of us don't realize who our Arch-Villain is - the main cause of our predicament. We all need to. And we can't win this fight without a clear understanding of the one solution we have. Key to achieving this solution rapidly and at necessary scale are Five Compassions: for Animals, for Self, for the Land, for Community, and for Democracy. Compassionate activism can create The Great Healing: the healing of our planet and the halting of the ongoing sixth great extinction. More than a "call-to-action" book, more than a book of compelling stories, this is a book with a plan. Four esteemed thought leaders have joined Stephen, contributing 3 new short essays, photos, and a poem: Wendell Berry (essayist, novelist, poet, farmer, national treasure), Joel Fuhrman, M.D. (author of 6 New York Times bestsellers including Eat to Live and The End of Diabetes), Alan Lewis (guides Food and Agriculture Policy for Natural Grocers), and investigative photographer Jo-Anne McArthur, whose images are as heartbreaking as they are

beautiful. There is a reason you were born here in human form at this very special time. You matter. You are part of a special generation. You can create the future you want to see. Find your voice, use it. Join us in what will become the most important cause of all of humanity's endeavors to date. You have the power. More than you realize. You'll see." An exceptionally well and persuasively written clarion call to personal and collective action, *The Great Healing - Five Compassions That Can Save Our World* is unreservedly and urgently recommended." - Midwest Book Review

2007 Blake Stimson "Don't start an art collective until you read this book." —Guerrilla Girls "Ever since Web 2.0 with its wikis, blogs and social networks the art of collaboration is back on the agenda. Collectivism after Modernism convincingly proves that art collectives did not stop after the proclaimed death of the historical avant-gardes. Like never before technology reinvents the social and artists claim the steering wheel!" —Geert Lovink, Institute of Network Cultures, Amsterdam "This examination of the succession of post-war avant-gardes and collectives is new, important, and engaged." — Stephen F. Eisenman, author of *The Abu Ghraib Effect* "Collectivism after Modernism crucially helps us understand what artists and others can do in mushy, stinky times like ours. What can the seemingly powerless do in the face of mighty forces that seem to have their act really together? Here, Stimson and Sholette put forth many good answers." —Yes Men Spanning the globe from Europe, Japan, and the United States to Africa, Cuba, and Mexico, *Collectivism after Modernism* explores the ways in which collectives function within cultural norms, social conventions, and corporate or state-sanctioned art. Together, these essays demonstrate that collectivism survives as an influential artistic practice despite the art world's star system of individuality. *Collectivism after Modernism* provides the historical understanding necessary for thinking through postmodern collective practice, now and into the future. Contributors: Irina Aristarkhova, Jesse Drew, Okwui Enwezor, Rubén Gallo, Chris Gilbert, Brian Holmes, Alan Moore, Jelena Stojanović, Reiko Tomii, Rachel Weiss. Blake Stimson is associate professor of art history at the University of California Davis, the author of *The Pivot of the World: Photography and Its Nation*, and coeditor of *Visual Worlds and Conceptual Art: A Critical Anthology*. Gregory Sholette is an artist, writer, and cofounder of collectives *Political Art Documentation/Distribution* and *REPOhistory*. He is coeditor of *The Interventionists: Users' Manual for the Creative Disruption of Everyday Life*. "To understand the various forms of postwar collectivism as historically determined phenomena and to articulate the possibilities for contemporary collectivist art production is the aim of *Collectivism after Modernism*. The essays assembled in this anthology argue that to make truly collective art means to reconsider the relation between art and public; examples from the Situationist International and Group Material to Paper Tiger Television and the Congolese collective *Le Groupe Amos* make the

point. To construct an art of shared experience means to go beyond projecting what Blake Stimson and Gregory Sholette call the "imagined community": a collective has to be more than an ideal, and more than communal craft; it has to be a truly social enterprise. Not only does it use unconventional forms and media to communicate the issues and experiences usually excluded from artistic representation, but it gives voice to a multiplicity of perspectives. At its best it relies on the participation of the audience to actively contribute to the work, carrying forth the dialogue it inspires." —BOMB

2003-03 Steven A. Nash This absorbing book draws upon new research and works that, in some cases were held out of public view in Picasso's own collection, to explore the critically important--but still under-studied--period of his life from the Spanish Civil War through World War II and the Nazi occupation of France. This span of years is marked by some of the most intensely personal and expressive work of his career. The subjects he painted changed dramatically in direct response first to the horrors of war and then the dangers and privations of life in occupied Paris, where, though branded a degenerate artist by the Nazis, he chose to remain until the Liberation.

is based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). Its main goal is to increase the efficiency and effectiveness of the PCP and reduce errors in the later stages, and to incorporate considerations for the full lifecycle, through-life operations, and environmental issues of the product. It has become the substantive basic methodology in many industries, and the initial basic concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book presents the proceedings of the 24th ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering (TE 2017), held in Singapore, in July 2017. The 120 peer-reviewed papers in the book are divided into 16 sections: air transport and traffic operations and management; risk-aware supply chain intelligence; product innovation and marketing management; human factors in design; human engineering; design methods and tools; decision supporting tools and methods; concurrent engineering; knowledge-based engineering; collaborative engineering; engineering for sustainability; service design; digital manufacturing; design automation; artificial intelligence and data analytics; smart systems and the Internet of Things. The book provides a comprehensive overview of recent advances in transdisciplinary concurrent engineering research and applications, and will be of interest to researchers, design practitioners and educators working in the field.

2017-01-12 Helen McLoughlin MY NAMEDAY—COME FOR DESSERT, which was first published in 1962, is an invitation to parents to celebrate the family's namedays. It contains the names, feasts, and symbols of our Blessed Mother and the saints, prayers of the liturgy, and appropriate desserts for the celebration of the sanctoral cycle of the Church year in the home. A nameday commemorates the feast of the saint whose name we received at baptism. To the Church's mind, the day of the saint's death is his real feastday, and that is the day usually assigned as his feast—his birthday into heaven. In some countries and in most religious orders it is customary to observe namedays instead of birthdays. On a child's nameday, "My Nameday—Come for Dessert" is a popular way to entertain. It is economical, festive and meaningful, and permits the family to splurge on a fabulous dessert without inflicting lasting wounds on the budget. It can be a "little evening"—a time for a party and a prayer for the child in the company of his friends, a time for pleasant conversation for the grown-ups who accompany them.

2013-12-04 Derek Elley As Charlton Heston put it: 'There's a temptingly simple definition of the epic film: it's the easiest kind of picture to make badly.' This book goes beyond that definition to show how the film epic has taken up one of the most ancient art-forms and propelled it into the modern world, covered in twentieth-century ambitions, anxieties, hopes and fantasies. This survey of historical epic films dealing with periods up to the end of the Dark Ages looks at epic form and discusses the films by historical period, showing how the cinema reworks history for the changing needs of its audience, much as the ancient mythographers did. The form's main aim has always been to entertain, and Derek Elley reminds us of the glee with which many epic films have worn their label, and of the sheer fun of the genre. He shows the many levels on which these films can work, from the most popular to the specialist, each providing a considerable source of enjoyment. For instance, spectacle, the genre's most characteristic trademark, is merely the cinema's own transformation of the literary epic's taste for the grandiose. Dramatically it can serve many purposes: as a resolution of personal tensions (the chariot race in Ben-Hur), of monotheism vs idolatry (Solomon and Sheba), or of the triumph of a religious code (The Ten Commandments). Although to many people Epic equals Hollywood, throughout the book Elley stresses debt to the Italian epics, which often explored areas of history with which Hollywood could never have found sympathy. 2011-03-01 Sally Banes Drawing of the postmodern perspective and concerns that informed her groundbreaking Terpsichore in Sneakers, Sally Banes's Writing Dancing documents the background and developments of avant-garde and popular dance, analyzing individual artists, performances, and entire dance movements. With a sure grasp of shifting cultural dynamics, Banes shows how postmodern dance is integrally connected to other oppositional, often marginalized strands of dance culture, and considers how certain kinds of dance move from the margins to the mainstream. Banes begins by considering the act of dance criticism itself, exploring its modes, methods, and underlying assumptions, and examining the work of other critics. She traces the development of contemporary dance from the early work of such influential figures as Merce Cunningham and George Balanchine to such contemporary choreographers as Molissa Fenley, Karole Armitage, and Michael Clark. She analyzes the contributions of the Judson Dance Theatre and the Workers' Dance League, the emergence of Latin postmodern dance in New York, and the impact of black jazz in Russia. In addition, Banes explores such untraditional performance modes as breakdancing and the "drunk dancing" of Fred Astaire. Ebook Edition Note: Ebook edition note: All images have been redacted.

Michael Burleigh, Sunday Telegraph'Francis Spufford has one of the most original minds in contemporary literature.' Nick HornbyThe Soviet Union was founded on a fairytale. It was built on 20th-century magic called 'the planned economy', which was going to gush forth an abundance of good things that the penny-pinching lands of capitalism could never match. And just for a little while, in the heady years of the late 1950s, the magic seemed to be working.Red Plenty is about that moment in history, and how it came, and how it went away; about the brief era when, under the rash leadership of Nikita Khrushchev, the Soviet Union looked forward to a future of rich communists and envious capitalists, when Moscow would out-glisten Manhattan, every Lada would be better engineered than a Porsche and sputniks would lead the way to the

stars. And it's about the scientists who did their genuinely brilliant best to make the dream come true, to give the tyranny its happy ending.
