Encyclopedia of Community Policing and Problem Solving-Kenneth J. Peak 2013-05-28 Community policing, as a philosophy, supports the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues, including crime, social disorder, and fear of crime—as opposed to responding to crime after it occurs. Community policing expands the traditional police mandate. It broadens the focus of fighting crime to include solving community problems and forming partnerships with people in the community so average citizens can contribute to the policing process. Originating during police reform efforts of the 1970s, the philosophy of community policing is currently widespread and embraced by many citizens, police administrators, scholars, and local and federal politicians. What sorts of collaborative partnerships have evolved between policing agencies and the individuals and communities they serve? How do police departments engage in systematic examination of identified problems to develop effective responses? How have police departments aligned their organizational structures to best support community partnerships and proactive problem solving? Just how effective have efforts at community policing been? These questions and more are explored within the pages of this new reference work.

The Canadian Criminal Justice System-Nick Larsen 1995 The administration of justice is an area of social policy that defies attempts to achieve a balance between order and the protection of the public and respect for individual rights. The media contain daily accounts of the failure of the criminal justice system to repress crime. It is within this social and legal context that this work is situated. In addition to including a range of articles in the standard areas of policing, courts, and corrections, recent articles deal with such controversial issues as aboriginal justice, the recruitment of visible minorities by Canadian police forces, and the role of women in the Canadian criminal justice system. The collection concludes with a critical assessment of the retributive model that currently serves as the philosophical underpinnings of the Canadian criminal justice system.

"The middle chapters outline these issues and identify the strategies to improve police community relationships and adjust the measurements for effective policing. The concluding chapters identify strategies designed to facilitate police department organizational change. Using terms from the discipline of economics, a "micro" strategy and a "macro" strategy are outlined. A new theory of policing concludes the book." "The book is intended primarily as a textbook for criminal justice students, but it will also prove useful to police departments, police academies, city managers, and elected officials responsible for police administration and community safety." --Book Jacket.
