An Examination of the Executive Functioning of Juvenile Offenders-Samantha Himes 2013 Abstract: The current study sought to provide a description of the neurocognitive functioning of a sample of male juvenile offenders with special attention to the executive functioning. The WISC-IV scores of a sample of 599 male juvenile offenders evaluated through a multidisciplinary juvenile court assessment program were analyzed. The sample included predominantly African American boys (77%) with a mean age of 14.75 (SD = 1.18). A mixed model cluster analysis, based on WISC-IV index scores, yielded a three cluster solution labeled "Below Average", "Low processing speed", and "Very Low Functioning" groups. The "Very Low Functioning" group demonstrated significantly lower CBCL scores in the areas of attention, more symptoms of Attention Deficit/Hyperactivity, and Anger Control problems than the other clusters. The findings support previous research which indicates neurocognitive diversity among juvenile offenders.

Mechanics of Materials-Roy R. Craig 2020 "This textbook is an introduction to the topic of mechanics of materials, a subject that also goes by the names: mechanics of solids, mechanics of deformable bodies, and strength of materials. This e-book is based directly on Wiley's hardback 3rd edition Mechanics of Materials textbook by Roy R. Craig, Jr. The most important differences between this 4th edition and the 3rd edition is that the computer software MDSolids, by Dr. Timothy Philpot, has been dropped from this e-book edition, some new computer examples in the Python language have been added, and many homework problems have been modified"--

I Am Not a Juvenile Delinquent-Sharon Charde 2020-06-16 The #metoo movement, particularly the horrific Larry Nasser abuse, shows with frightening clarity the vulnerability of young women to male predators; all the Touchtone girls I encountered suffered similar or worse fates. The book is a pilgrimage, a quest story, divided into five sections. Part I explores the authors first year at the facility, the difficulty and eventual success of establishing my group in such a chaotic and contradictory culture. It recreates their writing sessions, and features the vivid, dramatic personalities of the girls who participated as well as the steep learning curve on which she found herself daily. Part II moves swiftly through the trials and victories between the first and last years, and offers brief profiles of three of the residents who held special resonance to the author. During this time she published an award-winning anthology of poems by the girls, a NYC filmmaker created a documentary film, many readings and public performances took place and received several awards for the program. Part III tells of the joint venture with The Hotchkiss School, revealing the differences yet common ground between the two groups of girls.

Delinquent Girls-Shari Miller 2011-10-17 Traditionally, delinquent girls were considered an anomaly, a rare phenomenon attracting little scholarly notice. Today, more than one in four youth offenders is female, and researchers and practitioners alike are quickly turning their attention and resources to address this challenging situation. Delinquent Girls: Contexts, Relationships, and Adaptation synthesizes what is known about girls involved in delinquent behavior and their experiences at different points in the juvenile justice system. This breakthrough volume adds to the understanding of this population by offering empirical analysis not only of how these behaviors develop but also about what is being done to intervene. Employing multiple theoretical models, qualitative and quantitative data sources, law enforcement records, and insights across disciplines, leading scholars

review causes and correlates; the roles of family and peers; psychological and legal issues; policy changes resulting in more arrests of young women; and evidence-based prevention and intervention strategies. Each chapter covers its subject in depth, providing theory, findings, and future directions. Important topics addressed include: Narrowing the gender gap – trends in girls' delinquency. Girls at the intersection of juvenile justice, criminal justice, and child welfare. Trauma exposure, mental health issues, and girls' delinquency. Beyond the stereotypes: girls in gangs. Intervention programs for at-risk and court-involved girls. Implications for practice and policy. With its broad scope and solution-oriented focus, *Delinquent Girls: Contexts, Relationships, and Adaptation* is a must-have volume for researchers, professionals, graduate students, and social policy experts in clinical child and school psychology, social work, juvenile justice, criminology, developmental psychology, and sociology.

Exploring the Role of Self-regulation in Adolescent Dating Violence Risk Among Juvenile Justice Involved Females-Erik Hood 2020 "Adolescent dating violence (ADV) among females involved the juvenile justice system (JJS) is particularly problematic. Using variable-centered and person-centered techniques, this study explores how self-regulation (SR) and poor emotional adjustment are associated with ADV involvement among a sample of N=158 JJS involved adolescent females daters. Results showed that SR did not provide unique information about ADV involvement above previously identified risk factors. However, latent profile analyses revealed a four-class solution: the largest profile (Average Risk) was associated with average self-regulation and emotional adjustment, the smallest profile (Low Risk) was associated with higher self-regulation and better emotional adjustment, and two higher-risk profiles were characterized by a) the presence of intense jealous

reactions, and b) poor mental health. Results further showed that severity of ADV involvement was associated with class membership. The results contribute important information about the multiple clusters of risk for ADV involvement among a high-risk sample of JJS-involvement females who are dating"--Author's abstract.
