Doing Psychotherapy Effectively-Mona Sue Weissmark 2008-04-15 Psychotherapy is a \$2.5 billion business in the United States, but no one can answer the basic question of how therapy works. No watchdog groups rank therapists for potential consumers; no one school of thought has proven to be superior to another. And no method has emerged for determining what makes therapy successful for some but not for others. Doing Psychotherapy

Effectively proposes much-needed answers to the puzzling questions of what therapists actually do when they are effective. Mona Sue Weissmark and Daniel A. Giacomo offer a unique mode of evaluation that focuses not on a particular school of therapy but on the relationship between therapist and patient. Their approach, the "Harvard Psychotherapy Coding Method," begins with the assumption that good therapeutic relationships are far from intuitive. Successful relationships follow a pattern of behaviors that can be identified and quantified, as the authors demonstrate through clinical research and videotaped sessions of expert therapists. Likewise, positive changes in the patient, observed through client feedback and case studies, can be described operationally; they involve the process of overcoming feelings of detachment, helplessness, and rigidity and becoming more involved, effective, and adaptable. Weissmark and Giacomo explain and ground these principles in the practice of psychotherapy, making Doing Psychotherapy Effectively an accessible and pragmatic work which will give readers a tool for measuring therapeutic effectiveness and further understanding human transformation. For the first time, successful therapy is described in a way that can be practiced and communicated.

Justice Matters-Mona Sue Weissmark 2004-01-29 In the fall of 1992, in a small room in Boston, MA, an extraordinary meeting took place. For the first time, the sons and daughters of Holocaust victims met face-to-face with the children of Nazis for a fascinating researh project to discuss the intersections of their pasts and the painful legacies that history has imposed on them. Taking that remarkable gathering as its starting point, Justice Matters illustrates how the psychology of hatred and ethnic resentments is passed from generation to generation. Psychologist Mona Weissmark, herself the child of Holocaust survivors, argues that justice is profoundly shaped by emotional responses. In her in-depth study of the legacy encountered by these children, Weissmark found, not surprisingly, that in the face of unjust treatment, the natural response is resentment and deep anger-and, in most cases, an overwhelming need for revenge. Weissmark argues that, while legal systems offer a structured means for redressing injustice, they have rarely addressed the emotional pain, which, left unresolved, is then passed along to the next generation-leading to entrenched ethnic tension and group conflict. In the grim litany of twentieth-century genocides, few events cut a broader and more lasting swath through humanity than the Holocaust. How then would the offspring of Nazis and survivors react to the idea of reestablishing a relationship? Could they talk to each other without open hostility? Could they even attempt to imagine the experiences and outlook of the other? Would they be willing to abandon their self-definition as aggrieved victims as a means of moving forward? Central to the perspectives of each group, Weissmark found, were stories, searing anecdotes passed from parent to grandchild, from aunt to nephew, which personalized with singular intensity the experience. She describes how these stories or "legacies" transmit moral values, beliefs and emotions and thus freeze the past into place. For instance, cdxmerged that most children of Nazis reported their parents told them stories about the war whereas children of survivors reported their parents told them stories about the Holocaust. The daughter of a survivor said: "I didn't even know there was a war until I was a teenager. I didn't even know fifty million people were killed during the war I thought just six million Jews were killed." While the daughter of a Nazi officer recalled: "I didn't know about the concentration-camps until I was in my teens. First I heard about the [Nazi] party. Then I heard stories about the war, about bombs falling or about not having food." At a time when the political arena is saturated with talk of justice tribunals, reparations, and revenge management, Justice Matters provides valuable insights into the aftermath of ethnic and religious conflicts around the world, from Rwanda to the Balkans, from Northern Ireland to the Middle East. The stories recounted here, and the lessons they offer, have universal applications for any divided society determined not to let the ghosts of the past determine the future.

Handbook for Teaching Introductory Psychology-Michelle Rae Hebl 2001-08-01 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology.

Building Strong Brands-David A. Aaker 2011-11-08 As industries turn increasingly hostile, it is clear that strong brand-building skills are needed to survive and prosper. In David Aaker's pathbreaking book, Managing Brand Equity, managers discovered the value of a brand as a strategic asset and a company's primary source of competitive advantage. Now, in this compelling new work, Aaker uses real brand-building cases from Saturn, General Electric, Kodak, Healthy Choice, McDonald's, and others to demonstrate how strong brands have been created and managed. A common pitfall of brand strategists is to focus on brand attributes. Aaker shows how to break out of the box by considering emotional and self-expressive benefits and by introducing the brand-as-person, brand-as-organization, and brand-as-symbol perspectives. The twin concepts of brand identity (the brand image that brand strategists aspire to create or maintain) and brand position (that part of the brand identity that is to be actively communicated) play a key role in managing the "out-of-the-box" brand. A second pitfall is to ignore the fact that individual brands are part of a larger system consisting of many intertwined and overlapping brands and subbrands. Aaker shows how to manage the "brand system" to achieve clarity and synergy, to adapt to a changing environment, and to leverage brand assets into new markets and products. Aaker also addresses practical management issues, introducing a set of brand equity measures, termed the brand equity ten, to help those who measure and track brand equity across products and markets. He presents and analyzes brand-nurturing organizational forms that are responsive to the challenges of coordinated brands across markets, products, roles, and contexts. Potentially destructive organizational pressures to change a brand's identity and position are also discussed. As executives in a wide range of industries seek to prevent their products and services from becoming commodities, they are recommitting themselves to brands as a foundation of business strategy. This new work will be essential reading for the battle-ready.

"In this new edition, John Conger and Nancy Galambos emphasize a life span perspective, addressing development as a lifelong process that results from the continuing interaction between individuals and their environment. They present a new focus on adolescents at risk, reflecting the growing body of research on the nature, sources, and consequences of problem behaviors, such as substance abuse, adolescent pregnancy, youth violence, eating disorders, and depression." "This fifth edition also features a number of new boxes that present new and exciting research and focus on important social issues, challenging readers to consider alternative ways to view social problems. Additional boxes present real life stories about the joys and pains of adolescence. With an enhanced, integrated focus on gender and ethnicity and a new full-color design, Adolescence and Youth offers the most up-to-date, visually effective coverage for your adolescent development course."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. ASEAN and East Asian International Relations-David Martin Jones 2006 Academic and accepted orthodoxy maintains that Southeast Asia, and Asia generally, is evolving into a distinctive East Asian regional order. This book questions this claim and reveals instead uncertainty and incoherence at the heart of ASEAN, the region's foremost institution. The authors provide a systematic critique of ASEAN's evolution and institutional development, as well as a unified understanding of the international relations and political economy of ASEAN and the Asia Pacific. It is the first study to provide a sceptical analysis of international relations orthodoxies regarding regionalization and institutionalism, and is based on wide-ranging and rigorous research. Students of international relations, the Asia Pacific, Southeast Asia, regional studies, international history and security and defence studies will find this book of great interest, as will scholars, policy makers and economic forecasters with an interest in long-term Asia Pacific trends.
