Thinking, Fast and Slow-Daniel Kahneman 2013-04-02 "[The author] takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, andmore logical. Kahneman reveals the extraordinary capabilities -- and also the faults and biases -- of fast thinking, and the pervasive influence of intuitive impressions on our thoughts and behavior."--Cover, p.[4].

Thinking, Fast and Slow-Daniel Kahneman 2013-04-02 For use in schools and libraries only. A Nobel Prize-winning psychologist draws on years of research to introduce his "machinery of the mind" model on human decision-making to reveal the faults and capabilities of intuitive versus logical thinking, providing insights into such topics as optimism, the unpredictability of happiness and the psychological pitfalls of risk-taking.

Daniel Kahneman's Thinking, Fast and Slow-Jacqueline Allan 2018-02-21 Thinking, Fast and Slow by Daniel Kahneman offers a general audience access to over six decades of insight and expertise from a Nobel Laureate in an accessible and interesting way. Kahneman’s work focuses largely on the problem of how we think, and warns of the dangers of trusting to intuition - which springs from “fast” but broad and emotional thinking - rather than engaging in the slower, harder, but surer thinking that stems from logical, deliberate decision-making. Written in a lively style that engages readers in the experiments for which Kahneman won the Nobel, Thinking, Fast and Slow’s real triumph is to force us to think about our own thinking.

Thinking, Fast and Slow: by Daniel Kahneman | Summary & Analysis-Elite Summaries 2018-07-19 Daniel Kahneman, a psychologist and Nobel Prize winner, is the author of the fascinating book “Thinking, Fast, and Slow.” In general, when we make decisions, be it personally or professionally, all of us utilize two basic thinking systems for problem-solving, and the importance of utilizing the right system. This book is all about two basic thinking systems. The first system is Fast Thinking and the second system is Slow Thinking. p.p1 {margin: 0.0px 0.0px 10.0px 0.0px; text-align: justify; font: 11.0px "Trebuchet MS"; color: #000000; -webkit-text-stroke: #000000} span.s1 {font-kerning: none} In short, Fast Thinking is what our “gut” tells us what we should do. It is intuitive, emotional, and done with little thought or effort. Slow thinking is slow, deliberate, and logical. It usually takes more time, often includes numerical or factual information that our brain needs to process and is void of emotion. Kahneman expresses the importance of making it a habit to train our brains into using the right way of “thinking” as we make decisions, as utilizing the wrong thinking system can lead to poor or even disastrous consequences. Kahneman, through intensive behavioral study, has determined that people are more successful if they can lean on the Slow Thinking method. Kahneman teaches his proven theory simply, and includes a plan of action for learning to train the brain to use the correct “thinking” system. This novel takes a fascinating look at behaviors that can change our lives - personally, professionally, and financially. It is a book you should read to improve and utilize your thinking system the right way.

SUMMARY - Thinking, Fast And Slow By Daniel Kahneman-Shortcut Edition 2021-05-31 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. *As you read this summary, you will learn what the author understood from the many experiences he had with the way we think and make decisions. He carried out these experiments with the help of psychologists and economists. *You will also discover : that the result of these analyses has made it possible to determine two systems of thought; that intuition and reflection are two separate functions; that very often we act without thinking and that the decisions we make "without thinking" are not necessarily bad; that the optimism inherent in human nature leads us towards capitalism; that decision-making involves both systems of thought. *The purpose of this book is to distinguish between intuition and reflection, the "two speeds of thought" that Daniel Kahneman calls System 1 (intuition) and System 2 (reflection). *Without going so far as to say that Man has two brains, he details, with the help of his experiences, the capital differences of these two ways of thinking and shows that these two systems can sometimes be in competition but also prove to be complementary. Daniel Kahneman specifies that most of his research was done with Amos Tversky, an Israeli psychologist who has since passed away. *Other psychologists call this "Fast Thinking" (intuition) and "Slow Thinking" (reflection) but the author prefers to call the two systems because their processes are very different. It is these two systems that will be analyzed in this book. His experiments do not necessarily follow a logic of sequence and do not necessarily have links between them. *Buy now the summary of this book for the modest price of a cup of coffee!

This book is not intended to replace the original book. Instead, we highly encourage you to buy the full version. Renowned psychologist and winner of the Nobel Prize in Economics Daniel Kahneman shows us how the mind has two systems that drive how we think. In Thinking, Fast and Slow, the first system—System 1—is the fast, intuitive, and emotional system while the second system—System 2—is the slower, more deliberate, and logical system. Kahneman shows the impact of overconfidence in making decisions, the difficulties of predicting happiness in the future, and the profound effect of having cognitive biases. These can be understood based on how the two systems control our judgments and decisions. Kahneman shows us when our intuitions can be helpful and when it can't as well as how we can get the benefits of slow thinking. He gives us practical insights into how we make our choices both in business and in our personal lives as well as what techniques we can use in order to protect ourselves against the lapses that can cause us trouble. Given the National Academy of Sciences Best Book Award, the Los Angeles Times Book Prize, and The New York Times Book Review as one of the ten best books of 2011, Thinking, Fast and Slow is a book that would certainly affect how we think and hows we live our lives.
