My Beautiful Dark Twisted Fantasy-Kirk Walker Graves 2014 "In the first decade of the twenty-first century, Kanye West created the most compelling body of pop music by an American artist during the period. Having risen from obscurity as a precocious producer through the ranks of Jay Z's Roc-A-Fella records, by the time he released My Beautiful Dark Twisted Fantasy in late 2010, West had evolved into a master collagist, an alchemist capable of transfiguring semi-obscure soul samples and indelible beats into a brash and vulnerable new art form. A look at the arc of his career, from the heady chipmunk soul exuberance of The College Dropout (2004) to the operatic narcissism of MBDTF, tells us about the march of pop music into the digital age and, by extension, the contradictions that define our cultural epoch. In a cloud-based and on-demand culture a place of increasing virtualization, loneliness, and hyper-connectivity - West straddles this critical moment as what David Samuels of The Atlantic calls the first true genius of the iPhone era, the Mozart of contemporary American music. In the land of taking a selfie, honing a personal brand, and publicly melting down online, Kanye West is the undisputed king. Swallowing the chaos wrought by his public persona and digesting it as a grandiose allegory of self-redemption, Kanye sublimates his narcissism to paint masterpiece after masterpiece on MBDTF, a 69-minute hymn to egotistical excess. Sampling and ventriloquizing the pop music past to tell the story of its future very much a tale of our culture's wish for unfettered digital ubiquity MBDTF is the album of its era, an aesthetic self-acquittal and spiritual autobiography of our era's most dynamic artist."--Bloomsbury Publishing.

Black and White Music-Admin 12 2021-08-13 In the last five years thousands of articles have been written about the white privilege and millions of times have been distributed on social networks. The main idea of these articles is the existence of a privilege that the white artists (more in the USA and UK) benefit, a privilege that lacks or is at a lower level for black people and other minorities. In this report I will explore a small part of the music industry from the USA, more precisely I will investigate the contribution, greater or lesser, of black and white artists in the production and writing of their albums. The artists investigated in this report are Taylor Swift, Kanye West, Beyoncé, Kendrick Lamar, Macklemore & Ryan, Adele and Beck. I selected these artists because the music produced and released by them were used to provide examples of racial discrimination that takes place in the music industry. Why black artists do not win the Album of the Year so often as white artists? The purpose of this report is to show (within the limits of the information used): - the creativity, originality and novelty of the investigated artists; - the artist who enjoys a greater contribution in the production and writing of songs from the album or albums that have been released; - whether the awards and recognition offered by the USA music industry are based on originality, creativity and novelty in music, or are offered based on the colour of the skin; - what are the differences between the music recognized by receiving an award and music that did not receive an award, but was nominated for the music award (either by the vote of the general public or by the vote of the members of the jury that awarded the song or the album); - whether the loss of the award is a direct and personal non-recognition of the artist who performed the songs and under whose name the songs and album are released; - whether the loss of the award is a direct and personal non-recognition of the producers and lyricists who created parts of a song and the album; - reasons that might justify why white artists receive more recognition than black artists in the music industry (only the artists in this report and Grammy Awards: Album of the Year, Best Rap Album, MTV, Beyoncé versus Taylor Swift regarding the originality of two songs). This report was born out of the urgent need to confront and challenge the core arguments of black artists who feel and promote the idea of injustice regarding their music, hoping to provide clearer, more transparent information and better-founded reasons for the institution's decision to award the white artists from this report. Black artists and white artists are in need of answers and this report is a meditative resource about the recognition of their contribution in the music industry. In this report interested people about music and awards will find the space to read about it and confront their knowledge with the report's findings. The report can be used to calm the realities of racism and can provide a point of reference of the quality, originality and novelty of the music used in this report, but also for future artists waiting to be discovered. The findings of the report might be a challenge for people with a fixed opinion about who is the best artist despite the evidence used. In the end, the findings of this report are a challenge for the music industry as well, as it contributes to the wider discussion about creativity, originality and novelty of the artists and who/which artist/song/album should get the higher award.

Under My Thumb-Rhian Jones 2017-10-19 In the majority of mainstream writing and discussions on music, women appear purely in relation to men as muses, groupies or fangirls, with our own experiences, ideas and arguments dismissed or ignored. But this hasn't stopped generations of women from loving, being moved by and critically appreciating music, even - and sometimes especially - when we feel we shouldn't. Under My Thumb: Songs that Hate Women and the Women Who Love Them is a study of misogyny in music through the eyes of women. It brings together stories from journalists, critics, musicians and fans about artists or songs we love (or used to love) despite their questionable or troubling gender politics, and looks at how these issues interact with race, class and sexuality. As much celebration as critique, this collection explores the joys, tensions, contradictions and complexities of women loving music - however that music may feel about them. Featuring: murder ballads, country, metal, hip hop, emo, indie, Phil Spector, David Bowie, Guns N' Roses, 2Pac, the Rolling Stones, Bob Dylan, AC/DC, Elvis Costello, Jarvis Cocker, Kanye West, Swans, Eminem, Jay-Z, Taylor Swift, Combichrist and many more.

Listen to This If You Love Great Music-Robin Murray 2021-06-01 Listen To This If You Love Great Music is a must read for anyone with even a passing interest in music. Featuring 100 of the best albums from the last four decades, *clashmusic.com* editor Robin Murray shares his passion for exceptional music and offers insightful takes on what elevates these records above the competition. Robin steers clear of the usual classics - The Beatles and The Clash, for example - and instead goes deep into his record collection to pull out the albums he considers the greatest ever. For each, a solid case is made for why it represents a watershed moment in music history, outlining the story behind the record and critiquing what constitutes a classic. Uniquely curated to offer a fresh perspective on the last 40-plus years of music, find politically charged rock brushing shoulders with dub-infused electronica, progressive pop and dreamy shoegaze shaken awake by ear-drum rattling grime and house music. Whether it's bass-heavy hip-hop from Nas that inspired a thousand MCs to pick up a mic or experimental indie dance from LCD Soundsystem that blurred genres and tempted musicians to trade in their guitars for synthesizers, this is an essential rundown of the albums that really matter. You need to play them loud.

I Got Something to Say-Matthew Oware 2018-07-11 What do millennial rappers in the United States say in their music? This timely and compelling book answers this question by decoding the lyrics of over 700 songs from contemporary rap artists. Using innovative research techniques, Matthew Oware reveals how emcees perpetuate and challenge gendered and racialized constructions of masculinity, femininity, and sexuality. Male and

female artists litter their rhymes with misogynistic and violent imagery. However, men also express a full range of emotions, from arrogance to vulnerability, conveying a more complex manhood than previously acknowledged. Women emphatically state their desires while embracing a more feminist approach. Even LGBTQ artists stake their claim and express their sexuality without fear. Finally, in the age of Black Lives Matter and the presidency of Donald J. Trump, emcees forcefully politicize their music. Although complicated and contradictory in many ways, rap remains a powerful medium for social commentary.

Digital Signatures-Ragnhild Brøvig-Hanssen 2016-02-19 How sonically distinctive digital “signatures”—including reverb, glitches, and autotuning—affect the aesthetics of popular music, analyzed in works by Prince, Lady Gaga, and others. Is digital production killing the soul of music? Is Auto-Tune the nadir of creative expression? Digital technology has changed not only how music is produced, distributed, and consumed but also—equally important but not often considered—how music sounds. In this book, Ragnhild Brøvig-Hanssen and Anne Danielsen examine the impact of digitization on the aesthetics of popular music. They investigate sonically distinctive “digital signatures”—musical moments when the use of digital technology is revealed to the listener. The particular signatures of digital mediation they examine include digital reverb and delay, MIDI and sampling, digital silence, the virtual cut-and-paste tool, digital glitches, microrhythmic manipulation, and autotuning—all of which they analyze in specific works by popular artists. Combining technical and historical knowledge of music production with musical analyses, aesthetic interpretations, and theoretical discussions, Brøvig-Hanssen and Danielsen offer unique insights into how digitization has changed the sound of popular music and the listener's experience of it. For example, they show how digital reverb and delay have allowed experimentation with spatiality by analyzing Kate Bush's “Get Out of My House”; they examine the contrast between digital silence and the low-tech noises of tape hiss or vinyl crackle in Portishead's “Stranger”; and they describe the development of Auto-Tune—at first a tool for pitch correction—into an artistic effect, citing work by various hip-hop artists, Bon Iver, and Lady Gaga.
