2017-07-04 Conrad Fischer
"Targeted review from USMLE expert Conrad Fischer, MD, Master the Boards USMLE Step 2 CK delivers what you need to excel on the exam and match into the residency program you want. The Fischer Method includes disease topics presented in exam-style format: What is the most likely diagnosis? What is the best initial test? What is the most accurate diagnostic test? What is the treatment? Includes: a logical approach that makes patient care easy to remember; hundreds of color diagnostic images, algorithms, and tables; and a new biostatistics chapter and dozens of new infectious disease topics."--

2009-10-06 Conrad Fischer
Written by the creator of the nationally acclaimed course, "Conrad Fischer's Internal Medicine Board Review," the Kaplan Medical Internal Medicine Question Book offers 500 sample questions that teach students how to answer the most important topics tested on the American Board of Internal Medicine certification exam. Under Dr. Fischer, the Board pass rate at a large New York residency program rose from 52 percent to 100 percent in one year. With the most test-like samples on the market, this indepth book features questions framed as case studies that describe patient histories, physical exams, and lab data. Study questions quiz content mastery, while detailed answer explanations ensure clear comprehension. This book

focuses on answering and analyzing the questions students face on the actual exam, broken down into manageable chunks. Fischer's question analysis method is key for students' success on test day.

2011-11-18 Parveen Kumar •
What causes hypertension in children? • Is it common for epileptic patients to have post-ictal vomiting? If so, how often does this occur? • Why is the incidence of parkinsonism less common in smokers? • What is the role of urine examination in diabetic control? Where do you turn to when you have a difficult medical question that needs answering? The 'Ask the Author' online feature from the best-selling textbook Kumar & Clark's Clinical Medicine has collected a wealth of questions and comments directly from medical students and doctors about topics that are of particular interest or difficulty to them. Kumar and Clark have brought together over 1000 of the questions they have been asked along with their answers. It will appeal to the many fans of Kumar & Clark, from first-year students to practising doctors, and will provide a useful and interesting sounding board to help ensure best practice. This unique book will provide you with a quick and easy way to discover the answers to your own medical questions...! The writing style is appealing and conversational, designed to entertain as well as instruct. Carries the 'Kumar & Clark' stamp of authority. All questions fully indexed for ease

of reference. Covers topics that are easily misunderstood in medicine - good preparation for medical students, senior house officers/interns and specialists in training/residents preparing for written or oral exams.

1981 Jan Langman This textbook is a classic. It is extensive and rather than giving a simple step by step account of development (although this is provided in nice tables at the front of the book) it encompasses a more scientific explanation than is found in other embryology texts. It is fairly wordy, but it is easy to pick out relevant information and diagrams are excellent, being numerous, well labelled and easy to understand. This textbook, which is both easy to understand and extensive makes it an excellent buy both for a medical student just beginning embryology, and later on when a more detail may be needed. The book has beautiful photographs which captivate the reader, and there are also nice clinical boxes which break up the text nicely and are also accompanied by photographs. At the end of each chapter are problem solving exercises for which answers are provided at the end of each chapter. This is the embryology textbook to buy. I wouldn't recommend any other. It will keep you company through medical school and beyond

High-Yield Review Checklist of pathological processes within each organ system Clinical vignettes with high-yield explanations of conditions Ten representative diseases detailing morphologic features and differential diagnoses Physiology and pharmacology correlations for every disease Practice questions for self-assessment

2016-06-22 Conrad Fischer Master the Wards: Internal Medicine Handbook improves your confidence so you can survive the clerkship and ace the shelf. With this in hand, you

can arrive prepared on day 1 of your medicine rotation. Written by a residency director who has been a clerkship director--and once, long ago, a med student just like you!--this handbook presents a core set of diseases and disorders from the point of view of how patients present, and teaches you how to assess patients beginning with their chief complaints. Special features help you look like a rock star and improve patient safety: Organized by chief complaint Round-Saver tips help you delivery quality care How NOT to Kill Your Patient boxes point you to critical "don't miss" diagnoses and things to look out for Things You Will Be Asked On Rounds boxes prep you for attendings' questions

2019-02-01 Robert M. Kaplan American science produces the best medical treatments in the world. Yet U.S. citizens lag behind in life expectancy and quality of life. Robert Kaplan marshals extensive data to make the case that U.S. health care priorities are sorely misplaced—invested in attacking disease, not in solving social problems that engender disease in the first place.

2013-07-08 Robert D. Ficalora This question-and-answer companion to Mayo Clinic Internal Medicine Board Review, 10th Edition, tests physicians and physicians-in-training on all relevant material related to the goals set forth by ABIM to ensure the success of internal medicine clinicians. By dividing each

chapter according to a major subspecialty and with every question structured as a mock clinical interview, Mayo Clinic Internal Medicine Board Review: Questions and Answers is the perfect study tool for physicians-in-training and practicing clinicians preparing themselves for board examinations in internal medicine.
