This period also saw Kasparov achieve spectacular results in both individual and team events. Kasparov won the board gold medal in three Olympiads (Dubai 1986, Thessaloniki 1988 and Manila 1992). The late 1980s also saw the emergence of the World Cup series which Kasparov utterly dominated, finishing either clear first or equal first at Belfort 1988 (11½/15), Reykjavik 1988 (11/17), Barcelona 1989 (11/16) and Skelleftea 1989 (9½/15). Garry Kasparov on Modern Chess: Part Three: Kasparov Vs Karpov 1986-1987-Garry Kasparov 2009-07 Garry Kasparov and Anatoly Karpov are unquestionably the protagonists who featured in the greatest ever chess rivalry. Between 1984 and 1990 they contested five long matches for the World Championship. This 3rd volume of the, 'Garry Kasparov on Modern Chess' series concentrates on the third and fourth matches in this sequence:

London/Leningrad 1986 and Seville 1987. Both matches were tremendously exciting and hard fought and both produced chess of an extremely high level. The 1986 clash was groundbreaking in that it was the first World Championship match between two Soviets to take place outside Moscow. It was split between London and Leningrad with twelve games being played at both venues. The defending champion was now Kasparov (having won the 1985 match) and he leapt into an apparently decisive three point lead. However, this sensationally dissolved when a crisis broke out in the Kasparov camp. Karpov exploited this and pulled off the remarkable feat of winning three games in a row. Kasparov finally regained his composure and eventually clinched the match with a late victory. The 1987 match was notable for it's sensational finale. Kasparov approached the final game with a one point deficit, knowing that only a win would enable him to retain the title. When the game was adjourned overnight in a position where Kasparov had to win to stay champion, Spanish TV cleared its entire schedule so that the nail-biting conclusion could be watched live. A pre-internet global audience of millions was glued to their TV screens as Kasparov ground out his historic victory. In this volume Garry Kasparov (world champion between 1985 and 2000 and generally regarded as the greatest player ever) analyses in depth the clashes from 1986 and 1987, giving his opinion on the background to the matches as well as the games themselves

Chess Metaphors-Diego Rasskin-Gutman 2012-02-10 How the moves of thirty-two chess pieces over sixty-four squares can help us understand the workings of the mind. When we play the ancient and noble game of chess, we grapple with ideas about honesty, deceitfulness, bravery, fear, aggression, beauty, and creativity, which echo (or allow us to depart from) the attitudes we take in our daily lives. Chess is an activity in which we deploy almost all our available cognitive resources; therefore, it makes an ideal laboratory for investigation into the workings of the mind. Indeed, research into artificial intelligence (AI) has used chess as a model for intelligent behavior since the 1950s. In Chess Metaphors, Diego Rasskin-Gutman explores fundamental questions about memory, thought, emotion, consciousness, and other cognitive processes through the game of chess, using the moves of thirty-two pieces over sixty-four squares to map the structural and functional organization of the brain. Rasskin-Gutman focuses on the cognitive task of problem solving, exploring it from the perspectives of both biology and AI. Examining AI researchers' efforts to program a computer that could beat a flesh-and-blood grandmaster (and win a world chess championship), he finds that the results fall short when compared to the truly creative nature of the human mind. Garry Kasparov on Modern Chess: Part Two: Kasparov Vs Karpov 1975-1985-Garry Kasparov 2008-08 The history of sport has seen many great gladiatorial clashes: Ali v Frazier in boxing, McEnroe v Borg in tennis, Prost v Senna in motor racing. None however can quite compare to the intensity of the rivalry between those two great world chess champions: Garry Kasparov and Anatoly Karpov. Between 1984 and 1990 they contested an astonishing five World Championship matches consisting of 144 individual encounters. This volume concentrates on the first two of those matches. The epic 1984/85 contest which was lasted six months before being controversially halted "without result" by the then President of FIDE Florencio Campomanes.The 1985 match when Kasparov brilliantly won the final game to take the title and become - at the age of 22 - the youngest ever world champion. Great chess contests have often had resonances extending beyond the 64 squares. The Fischer v Spassky match was played during the Cold War with both champions being perceived as the finest products of their respective ideologies. The Karpov v Korchnoi battles (three matches between 1974 and 1981) were lent an edge with Karpov being a Russian hero of the pre-Glasnost era whilst Korchnoi was the disaffected dissident. The Kasparov v Karpov encounters mirrored a battle between the new Russia and old Russia with Kasparov seen as a symbol of the new ideology emerging under Gorbachev whereas Karpov was seen to represent the old regime of die-hard Communists such as Brezhnev. In this volume Garry Kasparov (world champion between 1985 and 2000 and generally regarded as the greatest player ever) analyses in depth the clashes from 1984 and 1985, giving his opinions both on the political machinations surrounding the matches as well as the games themselves.

Man vs. Machine-Karsten Müller 2018-10-30 Man vs. Machine Technology continues to advance at a rapid pace. It may sound quaint today, but not so long ago, computers battled humans for supremacy at the game of chess. The challenge of building a computer program capable of defeating the best of human-kind at chess was one of the original grand challenges of the fledgling field of artificial intelligence. On one side were dedicated scientists and hobbyists who invested decades of effort developing the software and hardware technology; on the other side were incredibly talented humans with only their determination and preparation to withstand the onslaught of technology. The man versus machine battle in chess is a landmark in the history of technology. There are numerous books that document the technical aspects of this epic story. The human side is not often told. Few chess players are inclined to write about their man-machine encounters, other than annotating the games played. This book brings the two sides together. It tells the stories of many of the key scientists and chess players that participated in a 50-year research project to advance the understanding of computing technology. “Grandmaster Karsten Müller and Professor Jonathan Schaeffer have managed to describe the fascinating history of the unequal fight of man against machine in an entertaining and instructive way. It evoked pleasant and not so pleasant memories of my own fights against the monsters. I hope that their work gives you as much pleasure as it has given me.” - From the Foreword by Vladimir Kramnik, 14th World Chess Champion
