Keeping the World Strange-Cody Walker 2011

Keeping the World Strange-Cody Walker 2011 "A snowflake that describes the multiverse. A team of archaeologists with a mystery benefactor. A century of pulp heroes, atomic ants, kung-fu ghosts, and ships that sail between universes. Villains who hide these wonders from a world they have sold to an unfathomable alien intelligence. And the man, born with the 20th century, who alone can save the world... and his lost friend. These are the elements of Planetary. In telling its story, creators Warren Ellis and John Cassaday uncovered the secret history of the super-hero genre and helped point towards its future, as well as - just perhaps - our own. Keeping the World Strange: A Planetary Guide excavates all of this, as well as future studies, revisionism, decompression, whether the characters are proactive or reactive, and other topics. This book offers an archaeology of the archaeologists, and its essays allow us to see the snowflake-like structure of the series from new angles. Planetary lives and grows in these pages."-

Strange But True Stories from Japan-Jack Seward 2011-07-05 Strange but True Stories from Japan is a fascinating collection of vignettes, ranging from historical to the personal. Here you will be exposed to the goings-on of Americans serving time in Japanese prisons and the many who claimed the identity of Tokyo Rose. And learn about the bizarre habits of the eels that roam the Chikugo River. In this eclectic and, well, strange, book you'll relive-from a distance-Kamakura's hara-kiri bloodshed and discover the surprising fate of the armless geisha, Tsuma-kichi. Seward also weaves touching memoir pieces between chapters that recount hilarious instances of fractured English and shocking-to-the-average-American Japanese cuisine. Written with an eye and ear for the theatrical and for the rhythm of Japanese life, this delightful but serious romp through modern Japan brings Seward's wide and varied cultural and military background to center stage.

Keeping the Lights on for Ike-Rebecca Daniels 2019-02-20 Most people don't realize that during the war in Europe in the 1940s, it took an average of six support soldiers to make the work of four combat soldiers possible. Most of what's available in the literature tends toward combat narratives, and yet the support soldiers had complex and unique experiences as well. This book is based on personal correspondence, and it is primarily a memoir that creates a picture of the day-to-day realities of an individual soldier told in his own words [as much as he could tell under the wartime rules of censorship, that is] as well as giving insight into what it was actually like to be an American soldier during WWII. It explores the experiences of a non-combat Army utilities engineer working in a combat zone during the war in Europe and takes the protagonist from basic training through various overseas assignments—in this case to England, North Africa, and Italy as a support soldier under Eisenhower and his successors at Allied Force Headquarters. It also includes some reflections about his life after returning to Oregon when the war was over. The soldier involved is Captain Harold Alec Daniels [OSU, Class of 1939, ROTC] and most of the letters were written to his wife, Mary Daniels [attended U of O in the late 1930s]. They are the author's parents, and she inherited the letter collection, photos, and all other primary source materials after her mother's death in 2006.

Keep Christianity Weird-Michael Frost 2018-09-04 Jesus is different. Go and do likewise. Many Christians have become comfortable letting the world mold them instead of being set apart by God. And many churches have traded in their biblical roots for complacent conventionality. But Jesus and the church are anything but conventional. The hallmark of our faith is that it sees the world differently than the world sees itself. We are called to be eccentric—off center, unique, different; not conformed to the patterns of the world but transformed by the renewing of our minds. By the grace of God we are not only dissatisfied by sin but increasingly uncompelled by conventionality. So resist the allure of acceptability. Get back to the unsafe roots of our faith. Be equipped to surprise the world with the Good News it didn't even know it was waiting for. Challenge the way things are by living a life that has been truly set free by Christ.

Midwestern Strange-B.J. Hollars 2019-09 Midwestern Strange chronicles B.J. Hollars’s exploration of the mythic, lesser-known oddities of flyover country. The mysteries, ranging from bipedal wolf sightings to run-ins with pancake-flipping space aliens to a lumberjack-inspired “Hodag hoax,” make this book a little bit X-Files, a little bit Ghostbusters, and a whole lot of Sherlock Holmes. Hollars’s quest is not to confirm or debunk these mysteries but rather to seek out these unexplained phenomena to understand how they complicate our worldview and to discover what truths might be gleaned by reexamining the facts in our “post-truth” era. Part memoir and part journalism, Midwestern Strange offers a fascinating, funny, and quirky account of flyover folklore that also contends with the ways such oddities retain cultural footholds. Hollars shows how grappling with such subjects might fortify us against the glut of misinformation now inundating our lives. By confronting monsters, Martians, and a cabinet of curiosities, we challenge ourselves to look beyond our presumptions and acknowledge that just because something is weird, doesn’t mean it is wrong.

Strange Vagabond of God-John Dove 1997 John Bradburne's life was a remarkable spiritual odyssey. After wartime service on the Indian sub-continent he became a perennial pilgrim, never at home in the world, not even in his native England. Restless wanderings led him through Europe to the Holy Land, to a succession of religious communities, and ultimately to Africa, where he met a violent death during the Zimbabwean war of independence in 1979. This astonishing account of his life among the lepers, and the astonishing events at his funeral, make it clear that here was a man marked with special charisma, who was marked out for sanctity. Since his death devotion to his memory has sprung up in southern Africa and elsewhere. Poet, mystic, hermit and vagabond, John Bradburne's life was a ceaseless quest for God. Fr John Dove SJ first met John Bradburne during the Second World War. He entered the Jesuits in 1949 and served the Zimbabwe mission for over thirty years.

Keeping Faith-Fenton Johnson 2012-09-10 Observing an encounter between Catholic and Buddhist monks in 1996 at the Abbey of Gethsemani, near where he grew up in rural Kentucky, Fenton Johnson found himself unable to make the sign of the cross. His distance from his childhood faith had become so great -- he considered himself a rational, skeptical man -- that he could not participate in this most basic ritual. Impelled by this troubling experience, Johnson began a search for the meaning of the spiritual life, a journey that took him from Gethsemani to the San Francisco Zen Center, through Buddhism and back to Christianity, from paralyzing doubt to a life-enriching faith. Keeping Faith explores the depths of what it means for a skeptic to have and to keep faith. Johnson grew up with the Trappist monks, but rejected institutionalized religion as an adult. While living as a member of the Gethsemani community and the Zen Center, however, he learned to practice Christian rituals with a new discipline and studied Buddhist meditation, which brought him a new understanding of the deep relationship between sexuality and faith, body and spirit. Changed in profound ways, Johnson ultimately turned back to his childhood faith, now inflected with the accumulated wisdom of his journey. Johnson interweaves memoir, the personal and often shocking stories of Buddhist and Christian monks, and a revealing history of the contemplative life in the West. He offers lay Christians an understanding of the origins and history of their contemplative traditions and provides the groundwork needed to challenge orthodox understandings of spirituality. No matter their backgrounds, readers will find Keeping Faith a work of great power and immediacy.

"How Come Boys Get to Keep Their Noses?"-Tahneer Oksman 2016-02-16 American comics reflect the distinct sensibilities and experiences of the Jewish American men who played an outsized role in creating them, but what about the contributions of Jewish women? Focusing on the visionary work of seven contemporary female Jewish cartoonists, Tahneer Oksman draws a remarkable connection between innovations in modes of graphic storytelling and the unstable, contradictory, and ambiguous figurations of the Jewish self in the postmodern era. Oksman isolates the dynamic Jewishness that connects each frame in the autobiographical comics of Aline Kominsky Crumb, Vanessa Davis, Miss Lasko-Gross, Lauren Weinstein, Sarah Glidden, Miriam Libicki, and Liana Finck. Rooted in a conception of identity based as much on rebellion as identification and belonging, these artists' representations of Jewishness take shape in the spaces between how we see ourselves and how others see us. They experiment with different representations and affiliations without forgetting that identity ties the self to others. Stemming from Kominsky Crumb's iconic 1989 comic "Nose Job," in which her alter ego refuses to assimilate through cosmetic surgery, Oksman's study is an arresting exploration of invention in the face of the pressure to disappear.

Strange Natures-Kent H. Redford 2021-06-22 A groundbreaking examination of the implications of synthetic biology for biodiversity conservation Nature almost everywhere survives on human terms. The distinction between what is natural and what is human-made, which has informed conservation for centuries, has become blurred. When scientists can reshape genes more or less at will, what does it mean to conserve nature? The tools of synthetic biology are changing the way we answer that question. Gene editing technology is already transforming the agriculture and biotechnology industries. What happens if synthetic biology is also used in conservation to control invasive species, fight wildlife disease, or even bring extinct species back from the dead? Conservation scientist Kent Redford and geographer Bill Adams turn to synthetic biology, ecological restoration, political ecology, and de-extinction studies and propose a thoroughly innovative vision for protecting nature.

Lord Strange's Men and Their Plays-Lawrence Manley 2014-05-28 For a brief period in the late Elizabethan Era an innovative company of players dominated the London stage. A fellowship of dedicated thespians, Lord Strange’s Men established their reputation by concentrating on “modern matter” performed in a spectacular style, exploring new modes of impersonation, and deliberately courting controversy. Supported by their equally controversial patron, theater connoisseur and potential claimant to the English throne Ferdinando Stanley, the company included Edward Alleyn, considered the greatest actor of the age, as well as George Bryan, Thomas Pope, Augustine Phillips, William Kemp, and John Hemings, who later joined William Shakespeare and Richard Burbage in the Lord Chamberlain’s Men. Though their theatrical reign was relatively short lived, Lord Strange’s Men helped to define the dramaturgy of the period, performing the plays of Shakespeare, Christopher Marlowe, Thomas Kyd, and others with their own distinctive flourish. Lawrence Manley and Sally-Beth MacLean offer the first complete account of the troupe and its enormous influence on Elizabethan theater. Seamlessly blending theater history and literary criticism, the authors paint a lively portrait of a unique community of performing artists, their intellectual ambitions and theatrical innovations, their business practices, and their fearless engagements with the politics and religion of their time.
