Handbook of Career Development-Gideon Arulmani 2014-02-08 This book is focused on work, occupation and career development: themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development, counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies, some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing, research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

Social Work in Mental Health-Abraham P. Francis 2014-08-05 Social Work in Mental Health brings together a range of scholarly reflections and writings on the different roles of a social worker in the field of mental health. It provides a holistic picture to introduce readers to the wider issues of social work and mental health practice. The book offers a detailed discussion on the theoretical and practice frameworks that are based on social justice and human rights perspectives. It not only provides an overview of intervention strategies but also directs readers' attention to an alternative way of addressing mental health issues. The author presents a cross-cultural and global perspective of mental health, but with specific references to India and Asia. He also addresses some of the recent debates in recovery, partnerships and strengths-based practices. The book has been specially designed for social work students, human service professionals and mental health practitioners and academicians. Areas of Practice, Challenges and Way Forward offers the readers an exposure to the many different contexts within which social workers come into contact with those experiencing mental health concerns. The specific needs for particular community groups, including children, young and older people, are identified.

New Vistas in Agroforestry-P. K. Ramachandran Nair 2013-03-09 It was in late 2002 that the idea of preparing a collection of multi-authored chapters on different aspects of ag- st forestry as a compendium for the 1 World Congress of Agroforestry, June 2004, was tossed around. With the approval of the idea by the Congress Organizing Committee, serious efforts to make it a reality got under way in early 2003. The rigorously peer-reviewed and edited manuscripts were submitted to the publisher in December 2003. Considering the many differentindividualsinvolved in the task as authors and manuscriptreviewers, we feel quite pleased that the task could be accomplished within this timeframe. We are pleased also about the contents on several counts. First of all, the tropical-temperate mix of topics is a rare feature of a publication of this nature. In spite of the scienti?c commonalities between tropical and temperate practices of agroforestry, the differences between them are so enormous that it is often impossible to mesh them together in one publication. Secondly, several of the chapters are on topics that have not been discussed or described much in agroforestryliterature. A third feature is that some of the authors, though well known in their own disciplinary areas, are somewhat new to agroforestry; the perceptions and outlooks of these scholars who are relatively unin?uenced by the past happenings in agroforestry gives a whole new dimension to agroforestry and broadensthescopeofthesubject. Finally, ratherthanjustreviewingandsummarizingpastwork,mstchapterstake the extra effort in attempting to outline the next steps.

Information Processing and Management-Vinu V Das 2010-04-01 It is my pleasure to write the preface for Information Processing and Management. This book aims to bring together innovative results and new research trends in inf- mation processing, computer science and management engineering. If an information processing system is able to perform useful actions for an obj- tive in a given domain, it is because the system knows something about that domain. The more knowledge it has, the more useful it can be to its users. Without that kno- edge, the system itself is useless. In the information systems field, there is conceptual modeling for the activity that elicits and describes the general knowledge a particular information system needs to know. The main objective of conceptual modeling is to obtain that description, which is called a conceptual schema. Conceptual schemas are written in languages called conceptual modeling languages. Conceptual modeling is an important part of requi- ments engineering, the first and most important phase in the development of an inf- mation system.
