The Grammar of Lithography-W. D. Richmond 2010-03-04 A comprehensive practical guide to the many lithographic techniques current in the nineteenth century.

The Grammar of Lithography-W. D. Richmond 1880 First edition published 1878. "Undoubtedly the most importanttextbook of this half-century was Richmond's Grammar which found its first readership amongst the subscribers to a lithographic trade periodical and, after republication in book form, remained in print virtually unaltered as the standard "trade" manual for the next 30 years. Richmond acknowledged the help of four luminaries of the old school, Louis Haghe, Michael Hanhart, William Simpson and Harry Sanders (i.e. W. J. Stannard), and they no doubt helped him to achieve a balanced coverage of traditional and modern workshop approaches as well as enhancing the work's authority." - Bridson/Wakeman p. 129 and D67. Bigmore & Wyman: "Up to the date of the publication of the first edition of this work there had been no hand-book in the English language of the art of lithography that was of any practical use except the English translation of the work of Senefelder himself and the translation by Hullmandel, of the work of M. Raucourt." (II, pp. 256-7) (Charles Wood 160/96).

Dynamic Police Training-Ann R. Bumbak 2010-09-15 As police work has become increasingly professionalized, classrooms have become a preferred environment for training. However, the best preparation for police work has traditionally been conducted on the job. Dynamic Police Training partners the experienced law enforcement officer's "street-smart" perspective of what makes training work with a professional educator's "book-smart" approach to writing curriculum to achieve the best results in police training programs. A results-oriented handbook for police trainers seeking clear and definitive information on curriculum development, the book facilitates training designed to develop students' critical thinking skills, physical competencies, and in-depth understanding of concepts such as use of force, consequences of failure, and value-based judgment. Authored by a former police officer and trainer with over 14 years of experience in the field and the classroom, this volume: Examines the typical strengths and limitations of police trainers and describes how to build on existing skills Explains how to go beyond the lecture and slide show format to make police training an interactive and thought-provoking experience for students Translates the theoretical basis of cognitive, affective, and psychomotor skills training into police-oriented language Outlines the methods for developing high-quality law enforcement instructional content Provides a step-by-step construction guide for law enforcement lesson plan development with versatile templates included for the reader's use Understanding how to write an interactive curriculum that allows police officers to achieve mastery of skills in the classroom is what differentiates outstanding training from the mediocre. Dynamic Police Training helps police trainers who deliver, revise, or develop training programs in the academy and beyond, enabling them to achieve top-notch training results within the confines of the classroom setting that translate into real results on the street.

The Ethic of Care: A Moral Compass for Canadian Nursing Practice (Revised Edition)-Kathleen Stephany 2020-02-04 There is an increased use of technology and informatics, heavier workloads and constant changes in the way in which disease processes are managed. Yet, when compared with other health professionals, nurses still spend a great deal of time in direct contact with patients and clients. They stay at the bedside, listen to their stories, give comfort and advocate. The Ethic of Care: A Moral Compass for Canadian Nursing Practice is unique from other nursing ethics textbooks in several key ways. The book adds a heightened dimension to the already rich knowledge in the field of applied nursing ethics and the ethic of care. The author argues that the ethic of care, or the moral imperative to act justly, be the guiding compass for everything that nurses do. It is with passion and conviction that nurses are encouraged to embody the ethic of care as a "lived virtue." Nurses are also inspired to be the leaders of tomorrow by working toward achieving accountability and sustainability in the Canadian publicly funded health care system and by effectively addressing social inequities. At the end of each chapter the author conveys real life case studies, as derived from her experiences as a critical care nurse, psychiatric nurse clinician and former Coroner. These vignettes bring the subject to life and serve as a means for applying newly acquired ethical knowledge. The aim of this book is to inspire nurses to be as skillful, and compassionate as they can be so that they will leave every encounter with their clients, better than when they first arrived. The book attempts to inspire nurses to be ethical leaders for social change at the patient/client, community and global level. This revised edition of the book includes additional information about trauma-informed care to combat systemic racism and improve the health outcomes for Indigenous people; ethics, gender and sexual orientation is dealt with in an inclusive and sensitive way, and a new Code of Conduct has been included.

Improving the Marriage of Modelling and Theory for Accurate Forecasts of Outcomes-Arch G. Woodside 2018-01-29 This volume in the series has big objectives: describe the bad science practices now in use in most studies in business-to-business marketing strategy and describe a true paradigm shift to good science practices by replacing the variable-based linear-symmetric null hypothesis testing (NHST) approach in theory construction and testing—with case-based asymmetric models with somewhat precise outcome testing (SPOT). Whether the question refers to success or failure, wise executives ask, how did we get here? What's in store for the next decade? Unfortunately, the majority of scholarly articles examining the causes of success and failure offers scant useful information that is accurate in forecasting success or failure strategy outcomes. The majority of studies on strategy performance outcomes focus on variable relationships and testing for the directionality (positive or negative relationships) and effect size of relationships—using multiple regression analysis and structural equation modeling (MRA/SEM) using null hypothesis statistical testing (NHST). Research on the value of NHST indicates that such studies are worse than useless: such research does not focus on case-based outcomes and achieving a statistically significant relationship greatly depends on the sample size of firms in the studies. Researchers using NHST are answering the wrong questions in examining the net effects of independent variables on dependent variable of interest (e.g., net earnings per revenue). Here are the right questions to ask. What configurations of antecedent conditions combine to generate positive outcomes for our firm and similar firms? What configurations of antecedent conditions combine to generate negative outcomes for firms in our industry? Sound reasoning and empirical evidence supports the wisdom of business executives ignoring the scholarly empirical literature on forecasting successful and unsuccessful management strategies using the NHST of the size and directionality of relationships. Good science practice relies on the complexity theory tenets covered in the chapters in this volume. Good science practice includes matching case-focused theory with case-focused data analytic tools and using somewhat precise outcome tests (SPOT) of asymmetric models. Good science practice achieves requisite variety necessary for deep explanation, description, and accurate prediction. The fear of submission rejection is another reason for rejecting case-based asymmetric modeling and SPOT. Overcome such fear by learning to apply complexity theory tenets, constructing separate case-based, mid-range, models of successful versus unsuccessful outcomes, and testing for accuracy via SPOT. This volume provides tools necessary for you to accomplish this task.
