Keywords-Raymond Williams 2014 First published in 1976, Raymond Williams' highly acclaimed Keywords: A Vocabulary of Culture and Society is a collection of lively essays on words that are critical to understanding the modern world. In these essays, Williams, a renowned cultural critic, demonstrates how these key words take on new meanings and how these changes reflect the political bent and values of our past and current society. He chose words both essential and intangible—words like nature, underprivileged, industry, liberal, violence, to name a few—and, by tracing their etymology and evolution, grounds them in a wider political and cultural framework. The result is an illuminating account of the central vocabulary of ideological debate in English in the modern period. This edition features a new original foreword by Colin MacCabe, Distinguished Professor of English and Literature, University of Pittsburgh, that reflects on the significance of Williams' life and work. Keywords remains as relevant today as it was over thirty years ago, offering a provocative study of our language and an insightful look at the society in which we live.

Academic Keywords-Cary Nelson 2002-06-01 Know what academic freedom is? Or what it's come to mean? What's affirmative about affirmative action these days? Think you're up on the problem of sexual harassment on campus? Or know how much the university depends on part-time faculty? Academic Keywords is a witty, informed, and sometimes merciless assessment of today's campus, an increasingly corporatized institution that may have bitten off more than its administration is ready to chew. Cary Nelson and Steve Watt use the format of a dictionary to present stories and reflections on some of the most pressing issues affecting higher education in America. From the haphazard treatment of graduate students to the use and abuse of faculty (as well as abuses committed by faculty), Nelson and Watt present a compelling and, at times, enraging report on the state of the campus.

Teaching Translation and Interpreting-Lukasz Bogucki 2012-12-21 Traslation is a phenomenon that affects us all on a daily basis, the more so now that dissemination of information is greatly enhanced by modern technology. However, there are no strict regulations on who can become a translator and what qualifications are required. The contributors to this volume strive to find out whether translators are taught, self-taught or trained, what the teaching or training programmes are like and how they can be improved. This is a companion volume to Teaching Translation and Interpreting: Challenges and Practices (edited by Lukasz Bogucki, Cambridge Scholars Publishing, 2010). It contains papers delivered at two international conferences devoted to teaching translation and interpreting, organised in Łódź, Poland, as well as invited contributions. The authors are translation and interpreting scholars and teachers from leading Polish and Ukrainian universities.

Keywords in Evolutionary Biology-Evelyn Fox Keller 1994 In science, more than elsewhere, a word is expected to mean what it says, nothing more, nothing less. But scientific discourse is neither different nor separable from ordinary language—meanings are multiple, ambiguities ubiquitous. Keywords in Evolutionary Biology grapples with this problem in a field especially prone to the confusion engendered by semantic imprecision. Written by historians, philosophers, and biologists—including, among others, Stephen Jay Gould, Diane Paul, John Beatty, Robert Richards, Richard Lewontin, David Sloan Wilson, Peter Bowler, and Richard Dawkins—these essays identify and explicate those terms in evolutionary biology which, though commonly used, are plagues by multiple concurrent and historically varying meanings. By clarifying these terms in their many guises, the editors Evelyn Fox Keller and Elisabeth Lloyd hope to focus attention on major scholarly problems in the field—problems sometimes obscured, sometimes reveals, and sometimes even created by the use of such equivocal words. "Competition," "adaptation," and "fitness," for instance, are among the terms whose multiple meaning have led to more than merely semantic debates in evolutionary biology. Exploring the complexity of keywords and clarifying their role in prominent issues in the field, this book will prove invaluable to scientists and philosophers trying to come to terms with evolutionary theory; it will also serve as a useful guide to future research into the way in which scientific language works.

Understanding Cultures through Their Key Words-Anna Wierzbicka 1997-08-07 This book develops the dual themes that languages can differ widely in their vocabularies, and are also sensitive indices to the cultures to which they belong. Wierzbicka seeks to demonstrate that every language has "key concepts," expressed in "key words," which reflect the core values of a given culture. She shows that cultures can be revealingly studied, compared, and explained to outsiders through their key concepts, and that the analytical framework necessary for this purpose is provided by the "natural semantic metalanguage," based on lexical universals, that the author and colleagues have developed on the basis of wide-ranging cross-linguistic investigations. Appealing to anthropologists, psychologists, and philosophers as well as linguists, this book demonstrates that cultural patterns can be studied in a verifiable, rigorous, and non-speculative way, on the basis of empirical evidence and in a coherent theoretical framework.

Keywords for Asian American Studies-Cathy J. Schlund-Vials 2015-05-08 Introduces key terms, research frameworks, debates, and histories for Asian American Studies Born out of the Civil Rights and Third World Liberation movements of the 1960s and 1970s, Asian American Studies has grown significantly over the past four decades, both as a distinct field of inquiry and as a potent site of critique. Characterized by transnational, trans-Pacific, and trans-hemispheric considerations of race, ethnicity, migration, immigration, gender, sexuality, and class, this multidisciplinary field engages with a set of concepts profoundly shaped by past and present histories of racialization and social formation. The keywords included in this collection are central to social sciences, humanities, and cultural studies and reflect the ways in which Asian American Studies has transformed scholarly discourses, research agendas, and pedagogical frameworks. Spanning multiple histories, numerous migrations, and diverse populations, Keywords for Asian American Studies reconsiders and recalibrates the ever-shifting borders of Asian American studies as a distinctly interdisciplinary field. The co-operative firm. Keywords-Andrea Bernardi 2016-05-01 Questo libro è strutturato come un dizionario e come tale presenta 23 brevi contributi, ciascuno con un diverso argomento, scritto da autori con un background differente e una diversa prospettiva disciplinare. Tutti i capitoli ambiscono a descrivere quanto sia antico, ricco e diverso il settore cooperativo a livello mondiale. Tutti i capitoli descrivono esplicitamente o meno il peso del settore cooperativo sulla crescita e lo sviluppo. Presi insieme, i capitoli offrono una spiegazione multidisciplinare del contributo offerto alle nostre vite dal settore cooperativo, illustrano come così è stato da molto tempo e come potrebbe essere ancora a lungo attraverso il reinventarsi del ruolo delle cooperative nella nostra società. Tutti i capitoli descrivono le cooperative con riferimento alle imprese tradizionali ma fanno ciò in maniera critica, piuttosto che retorica o polemica.

Textual Patterns-Mike Scott 2006-03-22 Textual Patterns introduces corpus resources, tools and analytic frameworks of central relevance to language teachers and teacher educators. Specifically it shows how key word analysis, combined with the systematic study of vocabulary and genre, can form the basis for a corpus informed approach to language teaching. The first part of the book gives the reader a strong grounding in the way in which language teachers can use corpus analysis tools (wordlists, concordances, key words) to describe language patterns in general and text patterns in particular. The second section presents a series of case studies which show how a key word / corpus informed approach to language education can work in practice. The case studies include: General language education (i.e. students in national education systems and those following international examination programmes), foreign languages for academic purposes, literature in language education, business and professional communication, and cultural studies in language education.

Keywords for Travel Writing Studies-Charles Forsdick 2019-04-22 In its attention to the 'keywords of travel', Keywords for Travel Writing Studies' takes into account the established status of studies in travel writing and the field's significance for an audience beyond the academy. It responds to what might be described as the 'mobility turn' in the arts and humanities over the past two decades. Each entry in the volume is around 1,000 words, and the style is more essayistic than encyclopaedic, with contributors providing a reflection on their chosen keyword from a variety of disciplinary perspectives. The emphasis on travelogues and other cultural representations of mobility drawn from a range of national and linguistic traditions ensures that the volume has a comparative dimension; the aim is to give an overview of each term in its historical and theoretical complexity, providing readers with a clear sense of how the selected words are essential to a critical understanding of travel writing. Each entry is complemented by an annotated bibliography of five essential items suggesting further reading.

Some Keywords in Dickens-Michael Hollington 2021-08-09 This volume shows how highly conscious Dickens was of words - of their meaning of course, and of the ideas they conjured up, but also of their very substance, texture, plasticity, visuality, and resonance, as well as their interactions with other words, and with their cultural environment. Each keyword is treated not as a semantic unit with a fixed meaning but rather as a flexible linguistic construct. Some keywords are just a word, a characteristic or even idiosyncratic lexical unit; some are treated as a load-bearing conceptual category or theme; some disintegrate into noise, complicating readers' assumptions about what a keyword must be. The focus shifts from “word” at micro- to macro-levels of signification, at times denoting wider cultural usage. Dynamic relations, oppositions, correlations and overlappings result from these individualized reading journeys, creating unforeseen and rich systems of meaning.
