

Kids Teachers Tardigrade Science Project Book How To Find Tardigrades And Observe Them Through A Microscope

Kids and Teachers Tardigrade Science Project Book-Michael W. Shaw 2014-07-15 For students wishing to do a science fair project on tardigrades, this book is essential. With over 100 pictures and detailed explanations, this book is written in a style intended to assist students and teachers in a variety of possible science projects with tardigrades. There are many science hobbyists at all levels who need an additional resource on this topic. Besides information specific to tardigrades, the book provides a basic primer on collecting and viewing specimens of many types under the microscope. Beginning with some basic information about tardigrades, the book explains the where's and how's of finding these fascinating creatures. Covered are the essential techniques of sample collection, specimen and slide preparation, and the basics of microorganism viewing under a microscope. How to build science fair models of tardigrade eggs and tardigrades is explained in detail with step by step pictures. Also included are bonus sections showing how to build a microscope camera adapter, and how to build a plant press for preserving leaves and flowers. For anyone wishing to embark on a new voyage of scientific discovery, this book will help point the way. "This is a fascinating book for anyone, not just teachers & kids. I've been curious about tardigrades ever since I saw a picture of one. They are pretty amazing animals that are as close as you can get to indestructible, withstanding temperatures that would kill most other creatures." - Maureen A. Carr - 5 Star Amazon Review "The discussion on microscopy is particularly good -- especially the section about depth of field, and the comparison of stereo microscopes with compound microscopes. Indeed, even my college students and teachers in professional development classes sometimes have a difficult time grasping these concepts (higher mag is not always "better") Indeed, this book would be very useful for anyone interested in basic microscopy." - Karen Kalumuck - College Professor "A wonderful guide. Clearly written as well as charming. My granddaughter used the book for an independent research project (2nd grade) and is now using it in her science fair project. Inspiring to budding young scientists." - Rona Ostrow - 5 Star Amazon Review

Bilim Çocukları Mars Görevinde-Emre Bayrak STEAM+M, bilim, teknoloji, mühendislik, sanat, matematik ve medikalın başharflerinden oluşan bir kısaltmadır. STEAM+M denince herkesin aklına hemen kodlama ya da teknolojik aletlerle dolu labor atuarlar gelmektedir. Ya da bu altı disiplinin bir araya gelmesi şeklinde algılanmaktadır. Ama STEAM+M bundan çok daha fazlasıdır; STEAM+M günümüzde bile tekstilden gıdaya, sağlıktan daha başk a birçok alana k adar birçok şey için temel oluşturmaktadır . Diğer taraftan eğitimcilere ve araştırmacılara göre STEAM+M, gerçek hayata benzeyecek şekilde beceri ve konulara odaklanan bir felsefedir. STEAM+M eğitimi ile öğrenciler gerçekleri ve gerçek dünyadaki sorunları çözmek için uygulanabilecek bir düşünme yöntemini öğrenirler.

Water Bear Don't Care-YeoYs Back To School 2018-12-04 You love funny puns, humorous sayings and quotes? Then this men, women & kids notebook is just the thing for you! Perfect for science teachers, biology students, as lab experiment journal or laboratory workbook. 100 college ruled blank lined duo sided bright white pages 6 x 9 dimensions, portable size (bag, school, home, work, desc, ...) High quality Glossy softbound cover designed with love Makes an ideal present for any gift giving occasion Perfect gift idea for: birthdays, back to school, christmas, thanksgiving, family & friends, notebook & planner lovers, teachers, graduation gifts, co-workers, boss gift, gift baskets,...

Outdoor Science Lab for Kids-Liz Heinecke 2016-06-15 Learn physics, chemistry and biology in your own backyard! At-home science provides an environment for freedom, creativity and invention that is not always possible in a school setting. In your own backyard, it's simple, inexpensive, and fun to whip up a number of amazing science experiments using the great outdoors. Science can be found all around in nature. Backyard Science Lab for Kids offers 52 fun science activities for families to do together. The experiments can be used as individual projects, for parties, or as educational activities for groups. Backyard Science Lab for Kids will tempt families to learn about physics, chemistry and biology in their backyards. Learn scientific survival skills and even take some experiments to the playground! Many of the experiments are safe enough for toddlers and exciting enough for older kids, so families can discover the joy of science together.

The most curious thing is, the virus exists only in corpses. A 2000 Nebula Award winner. In Traditional Chinese. Distributed by Tsai Fong Books, Inc.

Extinction-Laura Perdue 2017-09-15 Have you seen a dodo bird recently? Do you have mastodons playing in your back yard? Not likely—these species are both extinct, which means the entire population has died out. More than 99 percent of all species, or about 5 billion, have gone extinct since life first formed on Earth 4.5 billion years ago. Some of those species went extinct at the same time in an event know as a mass extinction. What type of event could cause such a massive die off? This is a question that scientists have asked for decades as they explore the causes of extinction. In Extinction: What Happened to the Dinosaurs, Mastodons, and Dodo Birds? readers ages 9 to 12 learn about the scientific investigative work necessary to answer these questions and find the culprit behind mass extinctions. Follow the scientists as they look at all potential reasons for extinction, including asteroid impacts, massive volcanic eruptions, excessive gases in the atmosphere, climate change, and more. Where do scientists find clues to help them answer their questions? In rocks—scientists travel the globe to excavate the evidence. They look for fossils that might tell them what lived before an extinction and what lived after. They also examine the chemical elements in rocks at the boundaries between geologic eras, as well as the structure of rocks. As they follow the evidence, the pieces of the puzzle come together to form a clearer picture of events that happened millions of years ago, whether it's an asteroid strike or a massive volcanic eruption. Extinction is not just a thing of the past. It is happening right now, at a higher rate than is typical. Because of this, there is debate about whether or not the presence of humans on Earth is having the same effect as an asteroid strike or a massive volcanic eruption. Are we currently experiencing the sixth mass extinction? And if so, what are the causes? Can we stop it? Extinction: What Happened to the Dinosaurs, Mastodons, and Dodo Birds? includes hands-on activities and critical thinking exercises to encourage readers to consider humans' role in the current extinction, what we can learn from past extinction events, and how they can be part of efforts to prevent extinction. Hands-on activities, a fun narrative style, interesting facts, species spotlights, and links to primary sources combine to bring the subject of extinction to life in a fun and engaging way.
