Martial Arts of the World: A-Q-Thomas A. Green 2001 "Did you know that the martial arts include such former Western pursuits as dueling, gunfighting, and gladiatorial combat? Nearly 100 articles by scholars discuss specific martial arts, countries, and concepts such as religion and spiritual development common to martial arts traditions of the world. Definitions of unfamiliar terms and an index that notes the historical figures and classic texts discussed within articles help to make this set a scholarly corrective in an area often informed by the movies."--"Outstanding Reference Sources," American Libraries, May 2002.

Academic Approaches to Martial Arts Research, Vol. 2-Michael DeMarco This two-volume anthology conveniently contains useful academic tools for studying the combative arts. Each chapter will prove special to all interested in the intellectual side to the martial arts. Some chapters provide fine details for categorizing the variety of what we commonly refer to as "martial arts." Other chapters focus on the martial arts as living culture and social implications. The quality of instruction can either encourage negative traits such as violence or allow a practitioner to experience a self-transformation that improves character. The World's First SWAT Team-Leroy Thompson 2012-10-24 In turbulent Shanghai in the years between the World Wars, the International Settlement was a mercantile powerhouse that faced unrest from Communist labor unions, criminal gangs, spies, political agitators, armed kidnapers and assassins. Adjoining the Settlement were the French Concession and the Chinese city, both hotbeds of intrigue and crime themselves. Called the most sinful in the world, the Settlement relied on its police: the Shanghai Municipal Police, one of the most advanced forces in the world. After an incident in 1926 when the police fired upon demonstrators, which resulted in unrest and strikes, W. E. Fairbairn was charged with forming a specialized unit to deal with riots and armed encounters. The resulting Reserve Unit became the prototype for future SWAT teams, as it developed tactics for using snipers in barricade and hostage incidents, techniques for use of the submachine gun during raids, hostage rescue tactics, aggressive riot-dispersal tactics and various other tactical innovations. Out of the experiences of the unit came many of the techniques later taught by W. E. Fairbairn, E. A. Sykes, Pat O'Neill and others to the Commandos, Rangers, SOE, OSS, 1st Special Service Force and other Second World War elite units. Those same techniques still resonate today with special forces and police tactical units.
