
Poland's Transformation-Marek Jan Chodakiewicz 2003 Poland has carried out two peaceful revolutions in the span of one generation: first, the self-limiting movement of Solidarity, which undermined the legitimacy of Communism and then a negotiated transfer of power from Communism to free market democracy. Today, while Poland is seen as a success story and is joining political and economic associations in the democratic West, Poles themselves seem downcast. They ask: is social anomie a price worth paying for a successful transformation? In making moral compromises with an outgoing tyranny, can one avoid cynicism and disappointment with democracy? Zbigniew Brzezinski, professor of American Foreign Policy at Johns Hopkins University has called Polish Transformation "a work that provides a comprehensive as well as incisive overview of the extraordinary difficult and historically unprecedented process of transforming an increasingly corrupt and decayed totalitarian system into a modern democracy." John Lenczowski, director of the Institute of World Politics, adds that "this extremely useful volume explains the essential elements of the post-communist political transition in Poland. Its authors convey...the cultural and ideological underpinnings that can be captured only by authorities who have developed over a lifetime that special sixth sense for detecting the elusive and unquantifiable soul of a country." Radek Sikorski, the executive director of the New Atlantic Initiative at the American Enterprise Institute, writes that "we should be grateful to the authors and editors of this thoughtful volume for asking questions which remain relevant for that uncomfortably large
part of humanity that still lives under totalitarian or authoritarian regimes." Marek Jan Chodakiewicz holds the Kosciuszko chair in Polish Studies at the Miller Center of Public Affairs at the University of Virginia. He is the author of After the Holocaust: Polish-Jewish Conflict in the Wake of World War II and Between Nazis and Soviets: A Case Study of Occupation Politics in Politics, 1939-1947. John Radzilowski is author and editor of numerous works ranging from Polish to East European history. Dariusz Tokczyk is associate professor of Slavic Languages at the University of Virginia. He is the author of See No Evil: Literary Cover-Ups and Discoveries of the Soviet Camp Experience.

Reinventing Poland - Martin Myant 2008-03-03

The end of communism and accession to the European Union have had a huge impact on Poland. This book provides an overall assessment of the post-1989 transformation in Poland. It focuses in particular on four key themes: economic transformation and its outcomes; the heritage of the past and national identity; regional development in Poland including the implications of EU accession for regional development; and political developments both before and after EU accession. In addition the book shows how changes in all these areas are related, and emphasises the overall common themes. The book is in memory of George Blazyca, of the University of Paisley, whose work on the political economy of transition in Poland is highly regarded, and who did a great deal to support the work of Polish academic colleagues and to promote the work of young scholars.

The Polish Economy - Ben Slay 2014-07-14

In 1989, Poland became the first Eastern Bloc country to shake off the dominance of its ruling Communist party. Although other post-Communist countries have since followed suit, Poland's experience has been unique in its move to Westernize. In this timely and insightful account, Ben Slay provides the first integrated, comprehensive assessment of Poland's economic transformation from central planning to a market system, and the political and sociological factors that have contributed to it. Drawing on the work of Western and Polish scholars as well as his own research, Slay traces the evolution of the Polish transformation from its historical roots in People's Poland and predicts potential problems and successes facing the Polish economy. A groundbreaking addition to the emerging study of post-Communist political economies, The Polish Economy demonstrates that other countries now struggling to join the West have much to learn from Poland's example. Of interest to scholars across the social sciences, this work provides general as well as professional
readers with a compelling account of the realities behind one of the most important events of our time—the collapse of the Eastern Bloc. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. Intermarium—Marek Jan Chodakiewicz 2012 History and collective memories influence a nation, its culture, and institutions; hence, its domestic politics and foreign policy. That is the case in the Intermarium, the land between the Baltic and Black Seas in Eastern Europe. The area is the last unabashed rampart of Western Civilization in the East, and a point of convergence of disparate cultures. Marek Jan Chodakiewicz focuses on the Intermarium for several reasons. Most importantly because, as the inheritor of the freedom and rights stemming from the legacy of the Polish-Lithuanian/Ruthenian Commonwealth, it is culturally and ideologically compatible with American national interests. It is also a gateway to both East and West. Since the Intermarium is the most stable part of the post-Soviet area, Chodakiewicz argues that the United States should focus on solidifying its influence there. The ongoing political and economic success of the Intermarium states under American sponsorship undermines the totalitarian enemies of freedom all over the world. As such, the area can act as a springboard to addressing the rest of the successor states, including those in the Caucasus, Central Asia, and the Russian Federation. Intermarium has operated successfully for several centuries. It is the most inclusive political concept within the framework of the Commonwealth. By reintroducing the concept of the Intermarium into intellectual
discourse the author highlights the autonomous and independent nature of the area. This is a brilliant and innovative addition to European Studies and World Culture.

Transformation at Work-Anna Pollert 2000-01-13 'The book is well written and clearly structured, bringing together much dispersed material. The most interesting part of the book is the case study of the Czech engineering firm CKD. The case study gives an insight into the continuing processes of transition: transition is a process, rather than a jump from Socialism to capitalism. The author provides solid evidence on the ways in which adjusting to the market has proved painful, and in the end unsuccessful for CKD, which has been merged with another firm. Overall, Transformation at Work provides a valuable insight into the realities of the transition process at the enterprise level' - Employee Relations In this book, Anna Pollert questions the values hidden in the burgeoning literature on 'transformation', and addresses the main concerns arising from these. In exploring the key issues of post-communist transformation, the author discusses important theoretical issues about the nature of change and continuity, such as historical, socio-economic and political effects of transformation, the broad problems of how workers and their organizations respond to change from command to capitalist economies, and case studies of how managers, workers and trade unionists experience these changes within their organizations. Transformation at Work explores the key issues of post-communist transformation in Eastern Europe. The author discusses important aspects of the nature of change and continuity including: historical, socio-economic and political effects; how workers and their organizations respond to change from command to capitalist economies; and how managers, workers and trade unionists experience change within their organizations.

The Transformation of Property Regimes and Transitional Justice in Central Eastern Europe-Liviu Damşa 2017-01-03 This volume examines the property transformations in post-communist Central Eastern Europe (CEE) and focuses on the role of restitution and privatisation in such transformations. It argues that the theorisation of ‘restitution’ in post-communist CEE is incomplete in the transitional justice scholarship and in the literature on correction of historical wrongs. The book also argues that, for a more complete theorisation of (post-communist) restitution, the transformations of property in post-communist societies ought to be studied in a more holistic way. The main legal vehicles used for such transformations, privatisation and restitution, should not be studied separately and in abstract, but in their reciprocal relationship, and in connection to the dimension of justice which each could achieve. Finally, the book integrates ‘privatisation’ in a theory of post-communist transformation of property.

Handbook of Work and Organizational Psychology: Organizational psychology-Pieter Johan Diederik Drenth 1998 Organizational processes and the organization-environment interaction are discussed in this volume of the Handbook of Work and
Organizational Psychology. Both organizational and environmental characteristics affect the behaviour of individuals and groups, but such characteristics are in turn also influenced by behavioural features. This volume on organizational psychology covers subject areas such as organization theory, organizational culture and change, leadership, decision making and participation, motivation and satisfaction, payment systems, effective communication, and social-organizational aspects of automation. The final chapter describes the impact upon behaviour and attitudes of the transition of a socialist-led society to a market economy.

European spirit, adaption to market economy and national identity in Poland and Ukraine-Matthias Reichhard 2008-05-06

Inhaltsangabe: Abstract: The major objective of this work is besides economic considerations to estimate how far Poland and Ukraine have grown on the social and cultural EI path layer of inter-country convergence which is assumedly even more difficult to achieve than consensus in an economic and political state union - what are the causes of the present state of evolution and what inferences for future transformations steps can be deducted thereof. In terms of more specific terms of reference, so-to-speak research question antedating each chapter of the corpus, the author posed the following hypothesis: In the section about national identities, the embracing question is the following, since it is suspected that the course of history of both nations observed moulded the tangible layers of NC and thus indirectly the development of mental EU convergence: Hypothesis 1: Design and intensity of national identity contribute to Polish and Ukrainian aggregated opinion about their home countries` role on the European theatre and general emotions about the contact to Europe In order to be able to proceed solidly on the territory of BHN, the frame of research is meant to be solidified by retrieving answers to whether the very existence of needs varies across nations or merely their degree of intensity by claiming the
following fact: Hypothesis 2: The scan of advertising in Poland (Pl) and Ukraine (Uk) reveals types of human needs which are not part in commonly cited BHN theories; in other words: human needs are culture-specific instead of universal. The structure and intensity of BHN like in the case of other features alongside the N-B-V-A (Needs-Beliefs-Values-Attitudes) axis are a fairly difficult entity to seize; what may be observed and thus measured at utmost is when the bearer satisfies a need by an overt action, e.g. when he buys soap to satisfy his needs of body spruceness. However, purchase decisions are decided by so many factors, e.g. branding, packaging, CRM (Customer Relations Management) etc. that it seems more rewarding to observe what conditions of internal tension are activated by advertising as intermediate entity and possible incentive of acquiring the item promoted.

Hypothesis 3: Advertising of fast-moving resp. durable consumer goods delivers indications on single elements of Poles` and Ukrainians` human need structure Experts of transformations studies commonly consider a brisk small-business sector and salubrious [...]
There are valuable lessons to be learned from linking past to present. Classic issues of class, stratification, mobility, and attainment have endured decades of radical social change. These concepts remain valid even when society tries to eradicate them.

The Political Economy of Poland's Transition-John E. Jackson

In the time span of a two-term US presidency, Poland went from an authoritarian one-party state with a faltering centrally planned economy to become a relatively stable multiparty democracy and a market economy with one of the highest GDP growth rates in Europe. A central feature of these economic and political reforms is a high rate of entry of new, domestically owned firms. This book uses detailed economic and political data to examine how these new firms contributed to the Polish transition. The authors test propositions about why some regions have more new firms than others and how the success of these new firms contributed to political constituencies that supported economically liberal parties. The book concludes by contrasting the Polish with the experiences of other transitional countries.

Barbarism and Civilization-Bernard Wasserstein

The twentieth century in Europe witnessed some of the most brutish episodes in history. Yet it also saw incontestable improvements in the conditions of existence for most inhabitants of the continent—from rising living standards and dramatically increased life expectancy, to the virtual elimination of illiteracy, and the advance of women, ethnic minorities, and homosexuals to greater equality of respect and opportunity. It was a century of barbarism and civilization, of cruelty and tenderness, of technological achievement and environmental spoliation, of imperial expansion and withdrawal, of authoritarian repression - and of individualism resurgent. Covering everything from war and politics to social, cultural, and economic change, Barbarism and Civilization is by turns grim, humorous, surprising, and enlightening: a window on the century we have left behind and the earliest years of its
troubled successor.

Poland Into the New Millennium-Ryszard Rapacki 2001-01-01 It is a widely held belief that the Polish experience of system transformation following the final collapse of socialism in 1989 is one of the best. This text surveys Poland's post-communist transformation as it prepares for the new century.

Postsocialist Europe-László Kürti 2009 Now that nearly twenty years have passed since the collapse of the Soviet bloc there is a need to understand what has taken place since that historic date and where we are at the moment. Bringing together authors with different historical, cultural, regional and theoretical backgrounds, this volume engages in debates that address new questions arising from recent developments, such as whether there is a need to reject or uphold the notion of post-socialism as both a necessary and valid concept ignoring changes and differences across both time and space. The authors' firsthand ethnographies from their own countries belie such a simplistic notion, revealing, as they do, the cultural, social, and historical diversity of countries of Central and Southeastern Europe.

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion-Professor James W. Scott 2012-11-28 The 2004 entry of 10 Central and Eastern European countries, along with Malta and Cyprus, into the EU has caused a huge shift in the EU's external boundaries. The socio-economic and political transformations that this shift has caused not only suggest new regional development opportunities, but also many potential problems and tensions. While the EU insists that enlargement will not signify 'new divisions', processes of inclusion and exclusion and the imposition of visa restrictions on non-EU citizens could pose obstacles to co-operation, conjuring fears of an emerging 'fortress Europe' that effectively divides the continent. Illustrated
with case studies from Central and Eastern European border areas, this book examines capacities for region building across national borders in within the context of EU enlargement, synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's 'Wider Europe' strategy.

The Subjective Experience of Joblessness in Poland-Irina Tomesccu-Dubrow 2019-05-07 This book describes the experience of joblessness and unemployment in contemporary Poland. It does so by combining qualitative and quantitative data from a special project conducted in Poland after the Great Recession and the long-term Polish Panel Survey (POLPAN) to describe the lives of the jobless: women and men currently out of work, the recently re-employed, and housewives. The book uses a class and inequality perspective to investigate how these women and men became jobless, how they look for and find employment, their household and social activities, and their political participation. It contextualizes these experiences with a description of Poland’s economy, labor market and employment policies after the fall of Communism and builds on the active interviewing and social constructionist approaches to explore the complex interviewer-respondent relationship.

Democracy Derailed in Russia-M. Steven Fish 2005-08-29
Why has democracy failed to take root in Russia? After shedding the shackles of Soviet rule, some countries in the postcommunist region undertook lasting democratization. Yet Russia did not. Russia experienced dramatic political breakthroughs in the late 1980s and early 1990s, but it subsequently failed to maintain progress toward democracy. In this book, M. Steven Fish offers an explanation for the direction of regime change in post-Soviet Russia. Relying on cross-national comparative analysis as well as on in-depth field research in Russia, Fish shows that Russia's failure to democratize has three causes: too much economic reliance on oil, too little economic liberalization, and too weak a national legislature. Fish's explanation challenges others that have attributed Russia's political travails to history, political culture, or to 'shock therapy' in economic policy. The book offers a theoretically original and empirically rigorous explanation for one of the most pressing political problems of our time.

2006 Poland lies at the very centre of the European continent. From the early 1990s on, it was possible to discern certain phenomena that were an outcome of either earlier decisions taken by the communist authorities, or else part of what the communists had inherited from earlier times. This book looks into these areas.

The Government of Poland-Jean-Jacques Rousseau 1985 "The Government of Poland is the only finished work in which Rousseau himself dons the mantle of legislator, applying the principles of the Social Contract to the real world around him. Poland teaches us much about the mysterious art of the Social Contract's 'legislator,' how he transforms each individual into part of a larger whole. Only in . . . Poland do we find what this crucial transformation entails and what it presupposes. But probably the greatest lesson to be learned from . . . Poland concerns Rousseau's understanding of the proper relationship between theory and practice. . . . Time and again we see Rousseau advising the Poles to do things which are in gross violation of the strict principles of political right he had elaborated in the Social Contract." --Richard Myers in Canadian Journal of Political Science

Social and Economic Transformation in East Central Europe-Terry Cox 1999 A review, not only of the economic and political transformation since the demise of communism in Eastern and Central Europe, but also of the relationships between economic organization, social patterns and institutional change. It uses case studies from the Czech Republic, Hungary and Poland.
