North Pole / South Pole-Michael Bright 2020-09-08 Fully-illustrated and with a fun and innovative flip-book format, the book provides the perfect way to explore and compare the extreme environments of the two Poles. Take a trip to the ends of the earth and discover the extreme environments of the North and South Poles. Find out which animals live where, what the weather and climate is like and the effect global warming is having. Beginning with the North Pole, the book introduces the geography and climate of the Arctic. Readers will discover how climate change is affecting sea ice and why multi-year ice is so important to walruses and polar bears. Find out what ice floes are and what lives under the ice. The many uses of the Arctic are explained, from the home it provides to whale hunters to the rocket and missile test sites it houses. And then flip the book over and you arrive in the South Pole... The famous race to reach the pole in 1911 is retold and readers will discover why the orca is the ultimate polar predator. The huge tabular icebergs, sub-glacial lakes, and ice chimneys of the Antarctic are brought to life in all their impressive glory, not to mention the sea spiders, 'death star' starfish and other undersea giants!

Pole To Pole-Michael Palin 2010-05-27 No.1 bestseller Michael Palin's epic journey from the North Pole to the South Pole. 'The cracked and fissured ice-pack offers no comfortable reassurance - no glimmer of any reward to the traveller who has made his way to the top of the world. The Arctic Ocean, known to the Victorians as the Sea of Ancient Ice, stares balefully back as we descend towards it, reflecting nothing but the question: Why?' Michael Palin's adventure begins when he is enrolled in the Royal and Ancient Polar Bear Society... Travelling by train, truck, raft, Ski-Doo, barge, balloon and bicycle, Michael Palin experiences every extreme the world has to offer. Braving the cold grip of the Arctic Circle, and the swirling snowstorms of Spitsbergen, Palin has to cope with friendly locals, occasional gunfire and his own unruly digestive system before he can finally stand in Scott's shoes at the South Pole, in the Land of the Midnight Sun.

North Pole-Michael Bravo 2019-01-15 In North Pole, Michael Bravo explains how visions of the North Pole have been supremely important to the world's cultures and political leaders, from Alexander the Great to neo-Hindu nationalists. Tracing poles and polarity back to sacred ancient civilizations, this book explores how the idea of a North Pole has given rise to utopias, satires, fantasies, paradoxes and nationalist ideologies, from the Renaissance to the Third Reich. The Victorian conceit of the polar regions as a vast empty wilderness, and the preserve of white males battling against the elements, was far from the only polar vision. Michael Bravo shows an alternative set of pictures, of a habitable Arctic criss-crossed by densely connected networks of Inuit routes, rich and dense in cultural meanings. In Western and Eastern cultures, theories of a sacred North Pole abound. Visions of paradise and a lost Eden have mingled freely with the imperial visions of Europe and the United States. Forebodings of failure and catastrophe have been companions to tales of conquest and redemption. Michael Bravo shows that visions of a sacred or living pole can help humanity understand its twenty-first-century predicament, but only by understanding the pole's deeper history.

Himalaya-Michael Palin 2012-02-01 Having risen to the challenge of seas, poles, dhows and deserts, the highest mountains in the world were a natural target for Michael Palin. In a journey rarely, if ever, attempted before, in 6 months of hard travelling Palin takes on the full length of the Himalaya including the Khyber Pass, the hidden valleys of the Hindu Kush, ancient cities like Peshawar and Lahore, the mighty peaks of K2, Annapurna and Everest, the gorges of the Yangtze, the tribal lands of the Indo-Burmese border and the vast Brahmaputra delta in Bangladesh. Facing altitudes as high as 17,500 feet as well as some of the world's deepest gorges, Palin also passed through political flashpoints like Pakistan's remote north-west frontier, terrorist-torn Kashmir and the mountains of Nagaland, only recently open to visitors.

Sahara-Michael Palin 2010-05-27 Michael Palin's superb No. 1 bestseller about his incredible voyage across the Sahara. Michael Palin's epic voyages have seen him circumnavigate the globe, travel from the North to the South Pole and circle the countries of the Pacific Ocean, but this was perhaps the greatest challenge yet: to cross the vast and merciless Sahara desert. As the journey unfolds, the Sahara reveals not the emptiness of endless sand dunes, but a huge and diverse range of cultures and landscapes and a long history of commerce and conquest stretching from the time of the ancient Egyptians to the oil-rich Islamic republics of today. On his way, he encounters dangers such as camel stew, being run over by the Paris-Dakar rally and Dakar nightlife, as well as returning to the original spot where THE LIFE OF BRIAN was filmed.

In undertaking his new journey through Eastern Europe, breathing in its rich history, and exquisite sights and talking to its diverse peoples, Michael fills what has been a void in his own experience and that of very many others. NEW EUROPE is very much a voyage of discovery, from the snows of the Julian Alps to the beauty of the Baltic sea, he finds himself in countries he’d barely heard of, many unfamiliar and mysterious, all with tragic histories and much brighter futures. During his 20-country adventure Palin meets Romanian lumberjacks, drives the 8.58 stopping train from Poznan to Wolsztyn, treads the catwalk at a Budapest fashion show, learns about mine-clearing in Bosnia and watches Turkish gents wrestling in olive oil. As with all his bestselling books, in his uniquely entertaining style, Palin opens up a new and undiscovered world to millions of readers.

The Complete Michael Palin Diaries-Michael Palin 2015-12-10 Volume I: THE PYTHON YEARS (1969-1979) Michael Palin's diaries begin when he was newly married and struggling to make a name for himself in the world of television comedy. But Monty Python was just around the corner . . . Enjoying an unlikely cult status early on, the Pythons then proceeded to tour the USA and Canada. As their popularity grew, so Palin relates how the group went their separate ways, later to re-form for stage shows and the celebrated films THE HOLY GRAIL and LIFE OF BRIAN. Living through the three-day week and the miners strike, and all the trials of a peripatetic life are also essential ingredients of these perceptive and funny diaries. Volume II: HALFWAY TO HOLLYWOOD (1980-1988) After a live performance at the Hollywood Bowl, The Pythons made their last performance together in 1983 in the hugely successful MONTY PYTHON’S MEANING OF LIFE. Writing and acting in films and television then took over much of Michael’s life, culminating in the smash hit A FISH CALLED WANDA (for which he won a BAFTA for Best Supporting Actor), and the first of his seven celebrated television journeys for the BBC. He co-produced, wrote and played the lead in THE MISSIONARY opposite Maggie Smith, who also appeared with him in A PRIVATE FUNCTION, written by Alan Bennett. Such was his fame in the US, he was enticed into once again hosting the enormously popular show Saturday Night Live, in one edition of which his mother makes a highly successful surprise guest appearance. He filmed several journeys for television and became chairman of the pressure group, Transport 2000. His family remains a constant as his and Helen's children enter their teens. Volume III: Travelling to Work (1988-1998) TRAVELLING TO WORK is a roller-coaster ride driven by the Palin hallmarks of curiosity and sense of adventure. Michael was not the BBC’s first choice for the travel series AROUND THE WORLD IN 80 DAYS, but after its success, the public naturally wanted more. Palin, however, had other plans. There was his film AMERICAN
FRIENDS, a role in Alan Bleasdale's award-winning drama GBH, the staging of his West End play THE WEEKEND, a first novel, HEMINGWAY’S CHAIR, and a lead role in FIERCE CREATURES. He did find time for two more travel series, POLE TO POLE in 1991 and FULL CIRCLE in 1996, and wrote two bestselling books to accompany them. These ten years in different directions offer riches on every page.

Lost Continents & the Hollow Earth-David Hatcher Childress 1999 This book is Childress' thorough examination of the early hollow earth stories of Richard Shaver, and the fascination that fringe fantasy subjects such as lost continents, UFOs, and the hollow earth have had on people. Shaver's rare 1948 book, I Remember Lemuria is reprinted in its entirety, and the book is packed with illustrations from Ray Palmer's Amazing Stories issues of the 1940s. Childress discusses famous hollow earth books and delves deep into whatever reality may be behind the stories of tunnels underground.

Diaries 1969-1979-Michael Palin 2006 Michael Palin has kept a diary since newly married in the late 1960s, when he was beginning to make a name for himself as a TV scriptwriter (for the Two Ronnies, David Frost etc). Monty Python was just around the corner. This first volume of his diaries reveals how Python emerged and triumphed, how he, John Cleese, Graham Chapman, the two Terrys - Jones and Gilliam - and Eric Idle, came together and changed the face of British comedy. But this is but only part of Palin's story. Here is his growing family, his home in a north London Victorian terrace, which grows as he buys the house next door and then a second at the bottom of the garden; here, too, is his solo effort - as an actor, in Three Men in a Boat, his writing endeavours (often in partnership with Terry Jones) that produces Ripping Yarns and even a pantomime. Meanwhile Monty Python refuses to go away: the hugely successful movies that follow the TV (his account of the making of both The Holy Grail and the Life of Brian movies are pager-turners), the at times extraordinary goings on of the many powerful personalities who coalesced to form the Python team, the fight to prevent a American TV network from bleeping out the best jokes on US transmission, and much more - all this makes perceptive, funny and rivetting reading.

Python beyond Python-Paul N. Reinsch 2017-07-14 This collection of original, interdisciplinary essays addresses the work of Monty Python members beyond the comedy show, films, and live performances. These men are prolific creators in a variety of artistic realms beyond the confines of the comedy troupe. Their work as individuals, before and after coming together as Monty Python, demonstrates a restless curiosity about culture that embraces absurdity but seldom becomes
cynical. Python members collectively and individually create unique approaches to theatre, film, video games, comic books, business training videos and more. Python Beyond Python increases our understanding of this often neglected work and the meanings of Monty Python.

Michael Palin's Hemingway Adventure-Michael Palin 2010-05-27 A winning combination of No.1 travel writer Michael Palin and one of the great literary figures of the century. When Michael Palin was researching for his novel HEMINGWAY'S CHAIR his interest was stimulated by Hemingway's appetite for travel and 'Papa's' evocations of the places he knew. Hemingway remains a compelling figure, and Palin's goal was to revisit Hemingway's world. This book includes the American West ('wide lawns and narrow minds'), Idaho, Michigan ('fly fishing, hunting'), Europe in the First World (where Hemingway was wounded serving in the Ambulance Brigade), Cuba (where Hemingway wrote FOR WHOM THE BELL TOLLS), Paris in the Roaring Twenties and Spain during the Spanish Civil War, Sun Valley and Key West - where the Hemingway lookalike competition is an annual event.

Erebus-Michael Palin 2018-10-16 Intrepid voyager, writer and comedian Michael Palin follows the trail of two expeditions made by the Royal Navy's HMS Erebus to opposite ends of the globe, reliving the voyages and investigating the ship itself, lost on the final Franklin expedition and discovered with the help of Inuit knowledge in 2014. The story of a ship begins after the defeat of Napoleon at Waterloo, when Great Britain had more bomb ships than it had enemies. The solid, reinforced hulls of HMS Erebus, and another bomb ship, HMS Terror, made them suitable for discovering what lay at the coldest ends of the earth. In 1839, Erebus was chosen as the flagship of an expedition to penetrate south to explore Antarctica. Under the leadership of the charismatic James Clark Ross, she and HMS Terror sailed further south than anyone had been before. But Antarctica never captured the national imagination; what the British navy needed now was confirmation of its superiority by making the discovery, once and for all, of a route through the North-West Passage. Chosen to lead the mission was Sir John Franklin, at 59 someone many considered too old for such a hazardous journey. Nevertheless, he and his men confidently sailed away down the Thames in April 1845. Provisioned for three winters in the Arctic, Erebus and Terror and the 129 men of the Franklin expedition were seen heading west by two whalers in late July. No one ever saw them again. Over the years there were many attempts to discover what might have happened--and eventually the first bodies were discovered in shallow graves, confirming that it had been the dreadful fate of the
explorers to die of hunger and scurvy as they abandoned the ships in the ice. For generations, the mystery of what had happened to the ships endured. Then, on September 9th, 2014, came the almost unbelievable news: HMS Erebus had been discovered thirty feet below the Arctic waters, by a Parks Canada exploration ship. Palin looks at the Erebus story through the different motives of the two expeditions, one scientific and successful, the other nationalistic and disastrous. He examines the past by means of the extensive historical record and travels in the present day to those places where there is still an echo of Erebus herself, from the dockyard where she was built, to Tasmania where the Antarctic voyage began and the Falkland Islands, then on to the Canadian Arctic, to get a sense of what the conditions must have been like for the starving, stumbling sailors as they abandoned their ships to the ice. And of course the story has a future. It lies ten metres down in the waters of Nunavut's Queen Maud Gulf, where many secrets wait to be revealed.

Full Circle-Michael Palin 2009 For almost a year, Michael Palin travelled through 18 countries on the perimeter of the world's largest ocean, in a spectacular journey of contrasts, drama and beauty. From head-hunters in Borneo to a meal of maggots in Mexico, his route takes him to some of the most politically volatile and physically demanding places on Earth. Whether climbing the Exalted Mountains in China, dodging icebergs in Chile, or being taken short on the banks of the Amazon, Michael Palin paints a vivid picture of the people and places around him. 'It was a journey of dazzling surprises and jarring extremes. Beauty and ugliness, sophistication and squalor, unceasing urban noise and monastic tranquillity... This is a record of a year of wonder' Michael Palin.

Italian Reform and English Reformations, c.1535–c.1585-M. Anne Overell 2016-05-06 This is the first full-scale study of interactions between Italy's religious reform and English reformation, which were notoriously liable to pick up other people's ideas. The book is of fundamental importance for those whose work includes revisionist themes of ambiguity, opportunism and interdependence in sixteenth century religious change. Anne Overell adopts an inclusive approach, retaining within the group of Italian reformers those spirituali who left the church and those who remained within it, and exploring commitment to reform, whether 'humanist', 'protestant' or 'catholic'. In 1547, when the internationalist Archbishop Thomas Cranmer invited foreigners to foster a bolder reformation, the Italians Peter Martyr Vermigli and Bernardino Ochino were the first to arrive in England. The generosity with which they were received caused comment all over Europe: handsome travel expenses, prestigious jobs, congregations which included the great and the good. This was an entry con brio, but the book also casts new light on our understanding of Marian reformation, led by Cardinal Reginald Pole, English by birth but once prominent among Italy's spirituali. When Pole arrived to take his native country back to papal allegiance, he brought with him like-minded men and Italian reform continued to be woven into English history. As the tables turned again at the accession of Elizabeth I, there was further clamour to 'bring back Italians'. Yet Elizabethans had grown cautious and the book's later chapters analyse the reasons why, offering scholars a new perspective on tensions between national and international reformation. Exploring a nexus of contacts in England and in Italy, Anne Overell presents an intriguing connection, sealed by the sufferings of exile and always tempered by political constraints. Here, for the first time, Italian reform is shown as an enduring part of the Elect Nation's literature and myth.

Antarctica and the Secret Space Program-David Childress 2020-05-20 David Childress, popular author and star of the History Channel show Ancient Aliens, brings us the incredible tale of Nazi submarines and secret weapons in Antarctica and elsewhere. He looks into the strange life and death of Rudolf Hess, as well as the mystery of James Forrestal and the secret group called MJ-12. He examines Operation Highjump led by Admiral Richard Byrd in 1947 and the battle that he apparently had in Antarctica with flying saucers. Through “Operation Paperclip,” the Nazis
infiltrated aerospace companies, banking, media, and the US government, including NASA and the CIA after WWII. He reveals that the Nazis had built secret bases in a variety of places during WWII, including Greenland, the Canary Islands, Tibet and Antarctica. Childress discusses the secret U-boat fleet that patrolled the Atlantic and Antarctic Oceans for decades after the war. He looks into the secret German space program and its flying disks and tubular aircraft; the secret technology involved, including anti-gravity propulsion technology; underground and under ice bases; strange things happening in South America; and secret bases on the Moon and Mars. Childress looks at the possible merger of Nazi assets in Antarctic with the Americans’ and the use of Antarctica as a space base for traffic to secret space stations in orbit and below the surface of the Moon. The author looks at military space programs such as Solar Warden, Lunex and Project Horizon. Does the US Space Force have a secret space program that maintains huge ships in orbit around the Earth and employs hundreds of astronauts as crew for these vehicles? Includes a 16-page color section.
