Political Leadership In Foreign Policy Manipulating Support Across Borders

Transformative Political Leadership- Robert I. Rotberg 2012-03-16 Accomplished political leaders have a clear strategy for turning political visions into reality. With both analytical and political acumen, they are able to achieve the right mix of power, persuasion, and speed and strength; and where responsible leadership therefore has the potential to effect the greatest change. In Transformative Political Leadership, Robert I. Rotberg focuses on the role of leadership in politics and argues that accomplished leaders demonstrate a particular set of skills. Through illustrative case studies of leaders who have performed admirably in the developing world—among them Nelson Mandela in South Africa, Seretse Khama in Botswana, Lee Kuan Yew in Singapore, and Kemal Ataturk in Turkey—Rotberg examines how transformative leaders create change. In doing so, he draws closely on two cases from World War II that illustrate the complexity of the problem: the Nazi destruction of the Czech village of Lidice in 1942 and the American government's relationship with Admiral Darlan, a Nazi sympathizer in the wartime French Vichy Government. Conscience and Power is the first full-length study to systematically consider the problem of "dirty hands" among political leaders. It will be of interest to students, teachers, and anyone interested in international relations.

Changes in China-Shao Chuan Long 1989 Under Deng Xiaoping's dynamic leadership, the People's Republic of China has embarked on a highly significant and ambitious modernization drive resulting in various political, economic, and social changes. It is to the nature and reform program that the book addresses itself. There is general consensus among the authors that important changes are taking place in Deng's China that affect various segments of the society. Most authors seem to believe that although beset with problems and difficulties, current reforms and changes are likely to be continued and expanded in the years ahead.

Political Leadership and New Directions in Canadian Foreign Policy - Assessing Canada's Response to the Yugoslav Crisis-Nicholas Gammer 1996 This dissertation provides an extensive examination of Canada's response to the recent disintegration of the Federal State of Yugoslavia. Nicholas Gammer reflects on how Canadian foreign policy was made and on the role of the prime minister in this decision-making, showing that Brian Mulroney, closely supported by his secretary of state for external affairs, used his office to seize the opportunity to redefine international standards on humanitarian intervention and initiate a shift in Canadian foreign policy. Gammer shows that Mulroney took considerable risks in doing this, ignoring the conventional wisdom that it was fully to become involved in the age-old ethnic conflicts of the former Yugoslavia. Given the support of the Mulroney government, many of the Canadian units under the United Nations in Yugoslavia were willing to bend the United Nations' rules of engagement when confronting Muslim, Serb, and Croat forces, establishing Srebrenica as a Muslim safe haven and defending it against Serb attacks. The Chrétien government, however, assumed a more cautious policy. Gammer shows how understanding the government's role in this particular crisis contributes to our understanding of the role that political leadership plays in shaping Canadian foreign policy in general, as well as advancing our knowledge of the broader theoretical debates surrounding the legitimacy and effectiveness of humanitarian intervention in the internal affairs of state.

Slogan Politics-Jinghan Zeng 2020-07-20 This book studies the three most important Chinese foreign policy concepts under Xi Jinping's leadership - "New Type of Great Power Relations", "Belt and Road Initiative" and "Community of Shared Future for Mankind". Those signature concepts are often considered as China's well-thought-out strategic plans reflecting Beijing's concrete geopolitical vision. This book, however, argues that these views are mistaken. It develops a slogan politics approach to study Chinese foreign policy concepts. The overarching argument is that those concepts should be understood as multifunctional slogans for political communication on the domestic and international stages. This book shows how these concepts function as political slogans to (1) declare intent, (2) assert power and test domestic and international support, (3) promote state propaganda, and (4) call for intellectual support. The slogan politics approach highlights the critical role of China’s academic and local actors as well as international actors in shaping China’s foreign policy ideas. It provides critical insights to understand how Chinese domestic actors exert their influence and voice their narratives to influence China’s policy agenda and debate. It suggests that the existing analyses vastly exaggerate Beijing’s capacity to coordinate domestic actors including forging coherent Chinese foreign policy narratives and unifying use of China’s policy concepts.

Political Opposition and Foreign Policy in Comparative Perspective-Joe D. Hagan 1991 The European Union-Munir Hussain 2016-12-17 This book outlines the foreign and security policy of the European Union as envisaged under the Common Foreign and Security Policy (CFSP). Since establishing the CFSP in the 1990s, the European Union (EU) has shown its enthusiasm for global leadership, empowering European citizenship, and developing its international standing as an economic and political supranational organization. In particular, the book examines the EU's peacekeeping and conflict resolution activities in Western Europe surrounding the legitimacy and effectiveness of humanitarian intervention in the internal affairs of state.

Constraints and Opportunities of Leadership in Post-Communist Europe-Timothy Haughton 2005 Taking Slovakia as a case study, this volume investigates the role of leadership and political leaders in post-communist Europe. In particular it explores the role played by the three-time Prime Minister Vladimir Meciar in determining the course of Slovak politics in the 1990s. Building on the concepts of "constraint" and "opportunity" and the strategic-relational approach, Tim Haughton advances an arena-based model of leadership. The volume will be of particular interest to advanced students of Central and East European politics and political scientists interested in issues of leadership.

Prime Ministers and Premiers-Leslie Alexandre Pal 1988 Essence of Political Manipulation-Nikolaos Zaharidis 2005 This book takes an intriguingly original look at the dynamics of foreign policy making. Adopting a theory of political manipulation and using the case of Greek policy toward the former Yugoslav Republic of Macedonia, Nikolaos Zaharidis examines how human emotion and political institutions interact to produce cooperative and confrontational decisions. His findings have implications for policy makers, students of politics, and informed citizens who want to know how leaders manipulate ideas, emotions, and democratic institutions to make decisions that win all the battles, but ultimately lose the war.
