Essential Cases on Damage-Benedict Winiger 2012-01-01 With an emerging ius commune in the field of tort law, the extensive range of experiences derived from national court practice on the basis of prior laws will in certain respects be of comparatively less importance. A major lacuna is thus apparent: While publications of court decisions and databases exist, none provide access to a comparative selection of recurring issues in the various European legal systems. Along the lines of the previous Digest project on Causation, this study covers another key element of tort law - damage. The publication contains a systematic selection of cases from 27 countries across Europe in addition to ECJ case-law, with each case benefiting from an analysis and commentary from a national and, where appropriate, a comparative perspective. Further, the impact of these rulings on a future European law of torts is highlighted. Finally, the publication also looks into how key cases would be resolved under unified European tort law drafts. The object of the study is thus to bridge domestic case-law with the new body of uniform tort law thus facilitating the continuity of legal
development in Europe.

Lemon-Aid New Cars and Trucks 2011-Phil Edmonston 2010-11-11 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada’s automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler’s days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz – rich cars, poor quality. There’s only one Saturn you should buy. Toyota – enough apologies: "when you mess up, ‘fess up."

Porsche Carrera-Johnny Tipler 2014-05-31 Porsche Carrera follows the development and design of the Carrera car dynasty, from the origins of the Carrera line in the 550 and 356 models through the highly tuned race cars of the 1960s to the largely hand-crafted, air-cooled cars of the 1970s and the 1980s. The book features detailed profiles of all Carrera models, including roadgoing and race models, prototypes, special builds and rare cars; in-depth explorations of the engineering and tuning of the cars and buyer's guides for the different models. Also included are a series of interviews with racing drivers such as Sir Stirling Moss, Derek Bell, John Surtees and Gijs van Lennep, and key Carrera figures such as designer Richard Soderberg and Klaus Bischof, head of the Porsche Rolling Museum. Foreword by Jurgen Barth, and over 400 colour photographs, many specially commissioned.

Lemon-Aid New Cars and Trucks 2012-Phil Edmonston 2011-01-01 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation). Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway. Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save $2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you $300, including an $80 "handling" charge for $25 worth of urea. When Can You Trust the Experts?-Daniel T. Willingham 2012-07-24 Clear, easy principles to spot what's nonsense and what's reliable Each year, teachers, administrators, and parents face a barrage of new education software, games, workbooks, and professional development programs purporting to be "based on the latest research." While some of these products are rooted in solid science, the research behind many others is grossly exaggerated. This new book, written by a top thought leader, helps everyday teachers, administrators, and family members—who don't have years of statistics courses under their belts—separate the wheat from the chaff and determine which new educational approaches are scientifically supported and worth adopting. Author's first book, Why Don't Students Like School?, catapulted him to superstar status in the field of education Willingham's work has been hailed as "brilliant analysis" by The Wall Street Journal and "a triumph" by The Washington Post Author blogs for The Washington Post and Brittanica.com, and writes a column for American Educator In this insightful book, thought leader and bestselling author Dan Willingham offers an easy, reliable way to discern which programs are scientifically supported and which are the equivalent of "educational snake oil."
