Post Impressionism The Rise Of Modern Art
1880 1920

Post-impressionism-Thomas Parsons 1999 Within a year of closing the last Impressionist exhibition in 1886, a large and disparate group of movements had appeared, each with its own beliefs about the nature and function of art. From Neo-Impressionism to Symbolism, from Gauguin and van Gogh to Matisse and Munch, the program of 20th-century art was emerging. These individual styles are now collectively referred to as Post-Impressionism. This book imposes coherence and a sense of pattern upon this diverse mix of movements and individuals that reacted against the style and subject matter of the Impressionists. The sociohistoric background against which Post-Impressionism evolved and the international reverberations of the movement are presented. Special emphasis is given to the revolution that Post-Impressionism created in Russia, which had effects far beyond the confines of art.

Impressionist and Post-impressionist Paintings in the Metropolitan Museum of Art-Metropolitan Museum of Art (New York, N.Y.) 1985
Post-Impressionism-Nathalia Brodskaya 2014-05-10 Whilst Impressionism marked the first steps toward modern painting by revolutionising an artistic medium stifled by academic conventions, Post-Impressionism, even more revolutionary, completely liberated colour and opened it to new, unknown horizons. Anchored in his epoch, relying on the new chromatic studies of Michel Eugène Chevreul, Georges Seurat transcribed the chemist’s theory of colours into tiny points that created an entire image. With his heavy strokes, Van Gogh illustrated the midday sun, whilst Cézanne renounced perspective. Rich in its variety and in the singularity of its artists, Post-Impressionism was a passage taken by all the well-known figures of 20th century painting - it is here presented, for the great pleasure of the reader, by Nathalia Brodskaya.

Post-Impressionism-Flaminio Gualdoni 2008 Post-Impressionism is a movement in France that represented both an extension of Impressionism and a rejection of that style’s inherent limitations. The term Post-Impressionism was coined by the English art critic Roger Fry for the work of such late 19th-century painters as Paul Cézanne, Georges Seurat, Paul Gauguin, Vincent van Gogh, Henri de Toulouse-Lautrec, and others. Most of these painters began as Impressionists; each of them abandoned the style, however, to form his own highly personal art. Impressionism was based, in its strictest sense, on the objective recording of nature in terms of the fugitive effects of colour and light. The Post-Impressionists rejected this limited aim in favour of more ambitious expression, admitting their debt, however, to the pure, brilliant colours of Impressionism, its freedom from traditional subject matter, and its technique of defining form with short brushstrokes of broken colour. The work of these painters formed a basis for several contemporary trends and for early
20th-century modernism.

The Rise and Fall of American Art, 1940s-1980s-Catherine Dossin 2016-03-03 In The Rise and Fall of American Art, 1940s-1980s, Catherine Dossin challenges the now-mythic perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall, a position of power that brought the city prestige, money, and historical recognition. Dossin reconstructs the concrete factors that led to the shift of international attention from Paris to New York in the 1950s, and documents how ‘peripheries’ such as Italy, Belgium, and West Germany exerted a decisive influence on this displacement of power. As the US economy sank into recession in the 1970s, however, American artists and dealers became increasingly dependent on the support of Western Europeans, and cities like Cologne and Turin emerged as major commercial and artistic hubs - a development that enabled European artists to return to the forefront of the international art scene in the 1980s. Dossin analyses in detail these changing distributions of geopolitical and symbolic power in the Western art worlds - a story that spans two continents, forty years, and hundreds of actors. Her transnational and interdisciplinary study provides an original and welcome supplement to more traditional formal and national readings of the period.

Art, Aesthetics, and the Brain-Joseph P. Huston 2015-06-25 Humans have engaged in artistic and aesthetic activities since the appearance of our species. Our ancestors have decorated their bodies, tools, and utensils for over 100,000 years. The expression of meaning using color, line, sound, rhythm, or movement, among other means, constitutes a fundamental aspect of our species' biological and cultural heritage. Art and aesthetics, therefore, contribute to our species identity and distinguish it from its living and extinct relatives. Science is faced with the challenge of explaining the natural foundations of such a unique trait, and the way cultural processes nurture it into magnificent expressions, historically and ethnically unique. How does the human brain bring about these sorts of behaviors? What neural processes underlie the appreciation of painting, music, and dance? How does training modulate these processes? How are they impaired by brain lesions and neurodegenerative diseases? How did such neural underpinnings evolve? Are humans the only species capable of aesthetic appreciation, or are other species endowed with the rudiments of this capacity? This volume brings together the work on such questions by leading experts in genetics, psychology, neuroimaging, neuropsychology, art history, and philosophy. It sets the stage for a cognitive neuroscience of art and aesthetics, understood in the broadest possible terms. With sections on visual art, dance, music, neuropsychology, and evolution, the breadth of this volume's scope reflects the richness and variety of topics and methods currently used today by scientists to understand the way our brain endows us with the faculty to produce and appreciate art and aesthetics.

Elizabeth Robins Pennell, Nineteenth-Century Pioneer of Modern Art Criticism-Dr Kimberly Morse Jones 2015-06-28 Mining various archives and newspaper repositories, Morse Jones provides the first full-length study of this remarkable woman. Pennell, a 'New Art Critic', helped develop formalist methodology in Britain, which she applied to her mostly anonymous or pseudonymous reviews. Pennell used her platform to promote the work of 'new' artists, including Manet and Degas, as well as championing the work of Whistler for whom she wrote a biography. Her contributions to the art world highlight the pivotal role of criticism in the production and consumption of art in the late-nineteenth century.

Colours of Impressionism: Masterpieces from the Musée d’Orsay-Paul Perrin 2018-01-31 One of the great innovations of the Impressionists was their radical use of colour: their application of strokes of complementary or contrasting hues captured the shifting effects of light and foregrounded the nature of vision. Using colour as the lens through which to magnify the movement’s intricacies, this catalogue sweeps us from Manet’s rich blacks, through green and blue landscapes of Monet and Cézanne, to the sensuous pinks of Renoir. Along this journey, scientific discoveries and emerging definitions of modernity are explored, illuminating the profound innovations of the Impressionists and the shifting preconceptions of their art.

Becoming John Dewey-Thomas Dalton 2002-09-11 As one of America's "public intellectuals," John Dewey was engaged in a lifelong struggle to understand the human mind and the nature of human inquiry. According to Thomas C. Dalton, the successful pursuit of this mission demanded that Dewey become more than just a philosopher; it compelled him to become thoroughly familiar with the theories and methods of physics, psychology, and neurosciences, as well as become engaged in educational and social reform. Tapping archival sources and Dewey's extensive correspondence, Dalton reveals that Dewey had close personal and intellectual ties to scientists and scholars who helped form the mature expression of his thought. Dewey's relationships with F. M. Alexander, Henri Matisse, Niels Bohr, Myrtle McGraw, and Lawrence K. Frank, among others, show how Dewey dispersed pragmatism throughout American thought and culture.
The Capitalist and the Critic—Charles Molesworth 2016-03-01 Shortly after the turn of the twentieth century, the Metropolitan Museum of Art began an ambitious program of collection building and physical expansion that transformed it into one of the world’s foremost museums, an eminence that it has maintained ever since. Two men of singular qualities and accomplishments played key roles in the Met’s transformation—J. P. Morgan, America’s leading financier and a prominent art collector, and Roger Fry, the headstrong English expert in art history who served as the Met’s curator of painting. Their complicated, often contentious relationship embodies and illuminates the myriad tensions between commerce and art, philanthropists and professional staff, that a great museum must negotiate to define and fulfill its mission. In this masterful, multidisciplinary narrative, Charles Molesworth offers the first in-depth look at how Morgan and Fry helped to mold the cultural legacy of masterpieces of painting and the development of the “encyclopedic” museum. Structuring the book as a joint biography, Molesworth describes how Morgan used his vast wealth to bring European art to an American citizenry, while Fry brought high standards of art history from the world of connoisseurs to a general public. Their clashes over the purpose and functions of the Met, which ultimately led to Fry’s ouster, reveal the forces—personal and societal—that helped to shape the Metropolitan Museum and other major American cultural institutions during the twentieth century.

French Painters and Paintings from the Fourteenth Century to Post-impressionism—Gerd Muehsam 1970

Bonnard and the Nabis—Albert Kostenevitch 2012-05-08 Pierre Bonnard was the leader of a group of post-impressionist painters who called themselves the Nabis, from the Hebrew word meaning ‘prophet’. Bonnard, Vuillard, Roussel and Denis, the most distinguished of the Nabis, revolutionized the spirit of decorative techniques during one of the richest periods in the history of French painting. Influenced by Odilon Redon and Puvis de Chavanne, by popular imagery and Japanese etchings, this post-impressionist group was above all a close circle of friends who shared the same cultural background and interests. An increasing individualism in their art often threatened the group’s unity and although tied together by a common philosophy their work clearly diverged. This publication lets us compare and put into perspective the artists within this fascinating group. The works presented in this collection offer a palette of extraordinary poetic expressions: candid in Bonnard, ornamental and mysterious in Vuillard, gently dream-like in Denis, grim and almost bitter in Vallotton, the author shares with us the lives of these artists to the very source of their creative gifts.

The Post-impressionists—Belinda Thomson 1983

Art and Truth after Plato—Tom Rockmore 2013-06-24 Despite its foundational role in the history of philosophy, Plato’s famous argument that art does not have access to truth or knowledge is now rarely examined, in part because recent philosophers have assumed that Plato’s challenge was resolved long ago. In Art and Truth after Plato, Tom Rockmore argues that Plato has in fact never been satisfactorily answered—and to demonstrate that, he offers a comprehensive account of Plato’s influence through nearly the whole history of Western aesthetics. Rockmore offers a cogent reading of the post-Platonic aesthetic tradition as a series of responses to Plato’s position, examining a stunning diversity of thinkers and ideas. He visits Aristotle’s Poetics, the medieval Christians, Kant’s Critique of Judgment, Hegel’s phenomenology, Marxism, social realism, Heidegger, and many other works and thinkers, ending with a powerful synthesis that lands on four central aesthetic arguments that philosophers have debated. More than a mere history of aesthetics, Art and Truth after Plato presents a fresh look at an ancient question, bringing it into contemporary relief.
