instances that prove the essentiality if carrying out a survey of a particular locality for bringing about a change there' - Rafique Jalal. DAWN This book provides a comprehensive introduction and handbook for undertaking and managing research in development. It is designed to provide both a quick reference manual and an indispensable learning tool for all students, researchers and practitioners engaged in development work. The text is divided into two parts: Managing research for development, and Doing research for development. Together the two parts review the complete research process from outlining the essential role and purpose of research, highlighting specific issues to development research, to demonstrating how to evaluate and secure the best results from subsequent research projects. The book includes: an overview of different types of research in development work; practical steps to writing a brief and managing research; practical steps to evaluating and promoting research findings; step by step guides to getting started and choosing a research method; detailed guidelines to seven key research techniques; examples, exercises, summaries and checklists; and glossary and guides to additional resources and packages Drawing on considerable hands-on experience, Research for Development will be an essential companion and invaluable tool for anyone engaged in contemporary development research, development work and development studies.

Planning and Designing Clinical Research-S.B. Martins 2013-04-18 This is an introduction to the design and planning of clinical research. Practical issues are covered with a theoretical background. The refinement of a research question, searching and critically appraising the literature and management of references are discussed. Ethical concerns are raised throughout the development of the study protocol. Study designs are described and special emphasis is given to writing a protocol of a clinical trial. Sample selection and recruitment, variable measurement, randomization, follow up, statistical analysis, sample size and bias are covered. Tips on how to successfully write and publish the research report are provided.

Abstract: With the wide development of information technology, the application of digital libraries has been greatly popularized. The advantage of such libraries lies in their capability of collecting and producing multiple different information sources, which makes it possible for them to provide researchers with a rich and convenient knowledge map with both extensiveness and profoundness. They, therefore, to some extent, act as not only an important instrument for researchers, but also a high-level platform for knowledge exchange in various fields. Since the very start of their construction in 2003, the digital libraries in Vietnam has received intensive attention from government officials. In recent years, most of the libraries at home have begun the process of modernized management, adopting digitalized management method, which obtains significant achievements in applied science and art fields. So far, however, the development of digital libraries in Vietnam remains the primary stage. It can be ascribed to two facts as following: on one hand, due to outdated library management system and lack of plan and regulation in industry supervision department, management software are applied with no unification, which results in invalid link and resource division between libraries; on the other hand, the difficulties in the application of software, including unavailability of Vietnamese version, poor human-resource and management support, and lack of operation instruction, altogether contribute to technicains' lack of and ordinary staff's having no access to the opportunity of uniform training. The research discusses the application situation of open source software in libraries of Vietnam by means of questionnaire survey, in an attempt to put forward a comprehensive and professional view on the issue and find a corresponding solution to the problems, which may lend a helping hand to the development of domestic digital libraries. The thesis includes the following parts: Chapter one raises the question, and mainly includes research background, major concerns currently affecting today's business landscape. Discover additional answers to consider and the many pearls of wisdom offered within these pages. Continue the journey with us to become refractive thinkers.
