Integrated Behavioral Health in Primary Care-Stephanie B. Gold 2018-11-01 This book provides an evidence-based guide for primary care physicians seeking to integrate behavioral health into their practice. This is grounded in the underlying notion that integrating behavioral health and primary care is not an adjustment to practice but a reconstruction of how primary health care is defined and delivered. While some aspects (billing and financing) will be specific to the policy context in the United States, much of the book will contain universal lessons for an approach to integration from a primary care perspective that may be relevant across the globe. This guide is organized to follow a comprehensive approach, derived from lessons learned by early adopters of integration. Dividing the book in this manner creates a unique and natural flow from the “why” of integrating care to a step-by-step approach to achieve integration in a practice. The book includes the case for why integrating behavioral health is important; what integration looks like in practice; and how to transform a...
practice and grow a team of clinicians to work together to address mental, emotional, and behavioral problems. Each chapter starts with a short preamble to introduce the stage of integration. Each chapter and subchapter would end with a summary box of key messages and a short list of resources (articles, websites, etc) for further information for each topic. Where relevant, chapters additionally include a brief section on application for specific populations (pediatrics, geriatrics, etc). This is an ideal guide for primary care physicians and their medical and administrative teams interested in integrating behavioral health in their practice.

Society, Schools & Progress in China-Chiu-Sam Tsang 2016-06-06 Society, Schools and Progress in China presents the systematic use of education to achieve prosperity, security, and social well-being. This book provides a concise account of the historical events and the social, religious, political, and other influences, which have combined to create China. Organized into nine chapters, this book begins with an overview of China's historical background to understand the struggle and aspirations of the Chinese people. This text then examines the type of economic and social structure in China's rural areas since 1958, which has been known as the "People's Commune". Other chapters consider the social, technological, and international change in China. This book discusses as well the establishment of the educational system in the People's Republic of China. The final chapter deals with the characteristics of the Chinese society. This book is intended to be suitable for students of sociology, government and politics, as well as education.

Integrated Multi-Tiered Systems of Support-Kent McIntosh 2016-03-15 Many schools have implemented academic response to intervention (RTI) and schoolwide positive behavioral interventions and supports (PBIS) as separate initiatives. This book provides keys to making these programs more effective, seamless, efficient, and sustainable by combining them into a single multi-tiered system of support (MTSS). Steps and strategies are outlined for integrating data structures, practices, teams, and district systems. Contributing authors present detailed case examples of successful MTSS implementation in three states. In a large-size format with lay-flat binding, the book features 27 reproducible checklists and evaluation tools. Purchasers get access to a companion website where they can download and print the reproducible materials plus other helpful resources. This book is in The Guilford Practical Intervention in the Schools Series, edited by T. Chris Riley-Tillman.

Integrative Ophthalmology-Ningli Wang 2019-09-05 With the development of nature science and industrial technology, more and more patients are benefitting from the rapid progress in ophthalmology, as the use of new medicine and delicate surgical therapy has ensured them the chance to restore their sight. However, some problems have come up during its development, of which the most serious one is the limitation of the ophthalmology. Eyes are not isolated organs, they are connected to our body, and thus, the general status of our body will affect the eyes’ function. Therefore, it is of great importance that the ophthalmologists see the big picture while dealing with the clinical problems. Based on the above observations, we put forward the concept of Integrative Ophthalmology, and describe the ophthalmology related medical situations that are prone to be neglected in clinical practice in a bid to increase the awareness of doctors from all fields that a holistic view should be adopted in clinical practice, and it is the patients that we are treating rather than the disease. There are 9 parts in the book, containing the concept of integrative ophthalmology, intraocular and intracranial pressure gradient related diseases, and the relationship between the different general status and eye disorders. We do believe that the integrative ophthalmology is the
key to the development of ophthalmology and hope readers can benefit from this book.

Integrated Transport-Moshe Givoni 2010-07-02 Travel is an essential part of everyday life and today most journeys are multimodal. It is the total travel experience that counts and integrated transport must reduce the inconvenience of transfers between modes. Most research and many publications on transport policy advocate sustainable transport, but the priority given to integration has been negligible. Yet integration is one of the most important means to advance sustainable transport and sustainability more generally. While integrated transport systems are seen to be an ideal, there is a failure to make the transition from policy to practice. The authors argue that the achievement of sustainable transport is still a dream, as an integrated transport policy is a prerequisite for a sustainable transport system. It is only when the two concepts of sustainability and integration operate in the same direction and in a positive way that real progress can be made. In this book, transportation experts from across the world have addressed the questions about what is integration, why is it so important and why is it so hard to achieve? The book provides an in-depth analysis of these issues and it aims to provide a better understanding of the subject, about what should be strived for, about what is realistic to expect, and about how to move forward towards a more integrated provision of transport infrastructure, services and management.
