Practicing Psychiatry In The Community A Manual

Practicing Psychiatry in the Community-Jerome V. Vaccaro 1996 Today's rapidly changing mental health care environment has created both complex challenges and unique opportunities for the community psychiatrist. Practicing Psychiatry in the Community: A Manual is an indispensable resource for practitioners and psychiatric residents. Clinically active psychiatrists will find this manual invaluable as they adopt new roles in this dynamic and exciting field. This comprehensive work by leading experts in the field addresses the major issues currently facing community psychiatrists. It even includes a user-friendly guide to the development of a research program in a community setting. Organized into three main sections, this manual provides essential information on treatment settings, target populations, and special topics in the community psychiatry domain. The Treatment Continuum explores the varied environments in which community psychiatric services may be offered, including outpatient treatment, crisis resolution services, and psychiatric rehabilitation programs. Populations such as mentally disordered children, adolescents, and the elderly; HIV-infected patients; the homeless mentally ill; the developmentally disabled; chemically dependent patients; dually diagnosed patients; violent patients; and the chronically mentally ill have unique needs requiring skilled clinical care. The Target Populations section provides the community psychiatrist with useful and practical guidelines for the treatment of each of these patient groups. The Special Topics section ushers the community psychiatrist into the era of contemporary community psychiatric practice with vital information on emerging issues like cultural diversity, the principles of effective collaboration with advocacy and family/self-help groups, the role of the multidisciplinary team, and legal and training issues.

Handbook of Community Psychiatry-Hunter L. McQuistion 2012-06-05 During the past decade or more, there has been a rapid evolution of mental health services and treatment technologies, shifting psychiatric epidemiology, changes in public behavioral health policy and increased understanding in medicine regarding approaches to clinical work that focus on patient-centeredness. These contemporary issues need to be articulated in a comprehensive format. The American Association of Community Psychiatrists (AACP), a professional organization internationally recognized as holding the greatest concentration of expertise in the field, has launched a methodical process to create a competency certification in community psychiatry. As a reference for a certification examination, that effort will benefit enormously from a comprehensive handbook on the subject.

Psychiatry in Practice-Associate Professor of Psychiatry Andrea Fiorillo 2016-02-16 Psychiatry in Practice: Education, Experience, and Expertise provides detailed advice and useful tips for early career psychiatrists, and all others who wish to enhance their practical psychiatry skills. Each chapter is written by prominent early career psychiatrists from around the world, offering relevant and timely advice to those who are newly qualified, as well as a global perspective on the practical issues faced today. Covering a variety of topics from 'Psychiatric Emergencies' to 'Ethics and clinical practice in psychiatry', chapters include vignettes of scenarios that may be encountered, making this book pertinent and easily applicable to many early career situations. Skills related to personal management and managing resources are often not taught during training but are key to establishing a career in psychiatry - this book will help the new clinician to develop professionally. The emphasis on practicality ensures psychiatrists are prepared for the needs of the modern health service and society at large, and ensures patients across the world experience the best treatment available.

Community Child and Adolescent Psychiatry-Theodore A. Petti 2007-05-03 Child psychiatrists and psychologists, clinical nurses, social workers, and other mental health practitioners working in the public sector -- where limited funds, poverty, social environments, and bureaucracy add to the daily
challenges -- can now turn to Community Child and Adolescent Psychiatry for approaches and insights to make their work easier and more productive. Twenty chapters are divided into four main sections, where 31 seasoned clinicians and administrators detail the most useful tasks, strategies, and tactics for child and family-focused community mental health professionals: Multiple facets of public sector agency work with or consultation to community agencies from the major mental health disciplines employed in community settings, differentiating roles and responsibilities and detailing consultation phases, including pitfalls. Basic community practice principles and issues commonly faced by public sector professionals, including particular types of agencies and differences between rural and urban practice. Contemporaneous concerns about the impact of a managed care or cost-cutting environment on service delivery, including reimbursement, differentiating consultation from direct service, and the location of a system of care. Descriptions of the setting or activity of each community agency, including the qualifications that allow the professional or trainee to enter and work in that system. Practicalities of clinical practice or consultation or both in community settings in the current service environment. Questions -- from differing perspectives -- that mental health care practitioners must consider before consulting to or assuming a staff or administrative position in a community agency, different types of demands -- and discussion of/for each role. Managed care has forever altered the service system landscape of mental health care in both the private and public sectors. Community Child and Adolescent Psychiatry provides insight into the public system of care and the requisite tools to manage the rapidly changing clinical, political, and administrative landscape. As a resource guide to the profession, Community Child and Adolescent Psychiatry emphasizes the practical necessities of child psychiatrists and other professionals working with mentally ill youngsters and their families in the practice of community psychiatry and public mental health. Trainees, practitioners, and administrators alike will welcome this indispensable road-map to a higher level of practice in community settings.

The General Practice of Community Psychiatry-Ralph Crawshaw 1969
Community Mental Health-Samuel J. Rosenberg 2017-07-06 The newest edition of Community Mental Health continues to be at the leading edge of the field, providing the most up-to-date research and treatment models that encompass practice in community settings.Experts from a wide range of fields explore the major trends, best practices, and policy issues shaping community mental health services today. New sections address the role of spirituality, veterans and the military, family treatment, and emerging new movements. An expanded view of recovery ensures that a thorough conversation about intersectionality and identity runs throughout the book.

Concepts of Community Psychiatry-National Institute of Mental Health (U.S.) 1965
Social and Community Psychiatry-Stelios Stylianidis 2016-05-14 This book presents the basic theoretical and historical concepts and it describes current perspectives and data, focusing on good practices in community psychiatry in Greece and in other parts of Europe. Concepts such as the biopsychosocial model, psychiatric reform, psychosocial rehabilitation and the recovery model, as well as new case management models are approached from a critical, anthropocentric perspective. The current socioeconomic crisis in Europe brings with it new realities in mental health systems. New forms of social suffering are forcing the psychiatric community to re-examine what is considered normal. In order to respond to the complexity of the newly emerging needs, social and community psychiatry has been compelled to broaden the objectives of intervention and research alike, developing new and dynamic relations with complementary scientific fields such as social anthropology, psychoanalysis and microeconomics. The present work is the result of collaboration between professionals from across these different fields.

Public Health Service Publication-Mental Health Services-Bruce Lubotsky Levin 2004 Increasingly, a public health framework is needed to develop and advance mental health systems both nationally and locally. This uniquely
multidisciplinary work integrates knowledge derived from research in epidemiology, treatment methods, service systems, and public policy to delineate such a framework. The second edition has been expanded to give readers a more comprehensive understanding of the organization, financing and delivery of mental health and substance abuse services. Several new chapters deal with state mental health systems, recovery as a guiding principle in the design of systems, the evolution of mental health informatics, the importance of psychopharmacology, and the specific needs and challenges of special populations, such as individuals with co-occurring mental and addictive disorders and those in the criminal justice system who have mental disorders. The rest of the book has been thoroughly updated, including the series of chapters on the epidemiologic, treatment, and service delivery issues among various at-risk populations: children and adolescents, adults, older adults, and substance abusers. Written by national experts, this timely work will provide policymakers, administrators, clinicians, and graduate students with the knowledge base needed to manage and transform mental health service delivery systems.

The Casebook of a Residential Care Psychiatrist—Martin Fleishman 2014-03-18 Discover an alternative realm of psychiatry—without offices or couches! The Casebook of a Residential Care Psychiatrist: Psychopharmacosocioeconomics and the Treatment of Schizophrenia in Residential Care Facilities addresses the problems involved in the onsite treatment of mentally ill patients in residential care facilities. This book is the first to identify the need for psychiatrists to be available to individuals in such facilities as adult homes, community care homes, transitional living facilities, and rest homes. This vital resource also contains specific recommendations as to how these visits should be conducted with regard to frequency, duration, space, and the types of Medicare procedure codes to utilize. In The Casebook of a Residential Care Psychiatrist, Dr. Fleishman uses his 40 years of experience as a psychiatrist to show you the ins and outs of practicing psychiatry in residential facilities. The book also discusses the profound changes psychiatric drugs have produced in the social, economic, and legal arenas. Using anecdotes, personal stories, and actual documents from Dr. Fleishman’s files, this book provides you with a wealth of knowledge not found anywhere else. With this book, you’ll learn more about: time-saving interview/assessment techniques the importance of psychopharmacology in residential care and how it has changed the practice of psychiatry Dr. Fleishman’s method for appropriately creating and using progress notes and other records during treatment ways to work with other members of the residential facility professional community—including psychologists, social workers, pharmacists, and administrators—to make everyone’s job easier the best ways to control paperwork obligations the impact that federal, state, and local government agencies have had on mental health spending, services, and practitioners In The Casebook of a Residential Care Psychiatrist, you will find wisdom, knowledge, and advice along with case studies, tables and examples. While focused on psychiatry and schizophrenia, this book will be of interest to mental health workers, long-term caregivers, and residential facility administrators as well as psychiatrists and psychologists.

Treatment and Rehabilitation of Severe Mental Illness—William Delbert Spaulding 2003-01-24 Synthesizing the growing body of biomedical and psychosocial research on the nature and treatment of severe mental illness, this volume presents an innovative framework for planning and implementing effective rehabilitation services. An integrative model of case formulation is described that conceptualizes the individual's recovery on multiple levels: physiological, cognitive, interpersonal, behavioral, and environmental. The authors draw on outcome research and extensive clinical experience to identify interventions of known effectiveness, including psychopharmacology, functional assessment, behavioral analysis, and cognitive therapies. Outlining a comprehensive approach to assessment, treatment, and progress evaluation, the book also provides practical recommendations for program development and staff training. A broad range of professionals involved in treatment and rehabilitation of people with severe mental illness, including clinical psychologists, neuropsychologists, and psychiatrists, as well as advanced students in these areas. Also of interest to nurses, hospital administrators, and social workers.

Practicing Care in Rural Congregations and Communities—Jeanne Hoeft, L. Shannon Jung, Joretta
Pastoral care in rural communities is different from care in other locales. Despite these differences, rural churches and communities also hold a particular wisdom from which the rest of the church might benefit. Small towns and rural areas have particular challenges, and in seeking to live out the Christian life in the midst of those, local churches have unique and useful insights into what it means to care for one another.

Handbook of Mental Health Consultation- 1986
Handbook of Community Mental Health Practice-H. Richard Lamb 1969
Modern Community Mental Health-Kenneth Yeager 2013-03-21 This is the first truly interdisciplinary book that examines how professionals work together within community mental health. It takes into account the key concepts of community mental health and combines them with current technology to develop an effective formula that redefines the community mental health practice.

Workforce Development Theory and Practice in the Mental Health Sector-Smith, Mark 2016-11-09 Across the globe, evaluating the initiatives and planning strategies of the modern workforce has become increasingly imperative. By developing professional competencies, various sectors can achieve better quality skill development. Workforce Development Theory and Practice in the Mental Health Sector is an essential reference source on the understanding of workforce capacity and capability and examines specific benefits and applications in addiction and mental health services. Featuring extensive coverage on a range of topics including public service provision, staff motivation, and clinical competency, this book is ideally designed for policy makers, academicians, researchers, and students seeking current research on the challenges facing countries in the areas of planning and development in the workforce.

Interventions Following Mass Violence and Disasters-Elspeth Cameron Ritchie 2007-06-25 Grounded in the best science available, this essential volume presents practical guidelines for effective clinical intervention in the immediate, intermediate, and long-term aftermath of large-scale traumatic events. Vital lessons learned from a variety of mass traumas and natural disasters are incorporated into the book's thorough review of strategies for helping specific victim and survivor populations. The editors and authors include over 40 leading experts in disaster mental health. Of crucial importance, they clearly summarize the empirical evidence supporting each intervention and provide other guidance based on experience and consensus recommendations.

Medical Psychiatric Practice-Alan Stoudemire 1993 This volume is the second in a series of succinct, analytical reviews of advances in the psychiatric care of medically ill patients. Medical-Psychiatric Practice, Volume 2 is designed to help psychiatrists who specialize in the care of medical patients integrate psychotherapeutic, psychopharmacological, and behavioral approaches to therapy, while dealing with complex systems of medical care, mental health care, and health care financing. Under the guidance of an eminent editorial advisory board, the second volume includes critical reviews of the latest advances for medically ill patients in psychotherapy, psychopharmacology, neuropsychiatry, medical-legal issues, and special topics such as psychiatric aspects of anesthesia and cardiac diseases.

Combating Physician Burnout-Sheila LoboPrabhu, M.D. 2019-11-05 Edited by experts on burnout, five sections lay out the scope of the challenge and outline potential interventions. The introduction, which discusses the history and social context of burnout, provides psychiatrists who may be struggling with burnout with much-needed perspective. Subsequent sections discuss the potential effects of burnout on clinical care, contextual elements that may contribute to burnout, and, potential systemic and individual interventions.

Research Facilities, Mental Health Staffing, Continuation of Health Programs, and Group Practice—United States. Congress. House. Committee on Interstate and Foreign Commerce 1965

Health Information Systems: Concepts, Methodologies, Tools, and Applications-Rodrigues, Joel J.P.C. 2009-12-31 “This reference set provides a complete understanding of the development of
applications and concepts in clinical, patient, and hospital information systems”--Provided by publisher.

Mental Health (supplemental)-United States. Congress. House. Committee on Interstate and Foreign Commerce 1963

Handbook of Community Psychiatry and Community Mental Health-Leopold Bellak 1964

Transforming Mental Health Services-Howard H. Goldman 2009-06-26 This compendium of 17 articles addresses the goals set forth by the President’s New Freedom Commission on Mental Health in its 2003 report, Achieving the Promise: Transforming Mental Health Care in America. The report represents the first time since the Carter Administration that such a high-level group evaluated U.S. mental health care. The report painted a dismal picture of the nation's mental health system, saying the system was so broken that it was "beyond simple repair." The Commission said that current services focused on "managing disabilities" rather than helping patients achieve a meaningful life in their communities. It also stated that mental health service providers ignored the preferences of consumers and their families. The articles in Transforming Mental Health Services: Implementing the Federal Agenda for Change, originally published between 2006 and 2009 in Psychiatric Services (journal of the American Psychiatric Association), offer recommendations to assist adults with serious mental illness and children with serious emotional disturbances. They include a series of reforms in which the emphasis is on recovery as an achievable goal, and the need for a person-centered orientation in service delivery. There is also discussion of the reasons many service providers resist using a recovery orientation and how this can be remedied. Transforming Mental Health Services: Implementing the Federal Agenda for Change consists of updates of papers written by the Commission's subcommittees addressing issues fundamental to those living with mental illness. It is organized into four sections: The first focuses on the interface between mental health and general health, and on employment, housing, and Medicaid financing. The second continues addressing financing and Medicaid as well as issues related to school mental health, recovery, transformation of data systems, and acceleration of research. The third includes reports from four states with transformation initiatives designed to ensure that consumers have a strong voice in the development of recovery-oriented services. The final section describes progress five years after the President's Commission Report and concludes with a proposal by the current director of the Center for Mental Health Services for a public health model of mental health care for the 21st century. This compilation of well-researched and well-written articles offers an excellent resource for frontline care providers, facility administrators and advocates. It serves as an equally valuable resource for state policy makers who wish to present a convincing case that change is happening and that the recommendations can be translated into effective policies. Although consumers and their families will receive support for their perception that service providers ignore their needs, they will also be encouraged that change for the better is coming to the U.S. mental health care system.

Mental Health Practice and the Law-Ronald Schouten, M.D. 2017 Mental health professionals, more than any other clinicians, encounter legal issues on a regular basis. This is a book for anyone in the field, at any stage in their training or practice, who has ever found themselves scratching their head in confusion or dreading that they will expose themselves to liability as they navigate the complexities at the interface of law and mental health. Written by established experts and the rising stars of the next generation, the 16 chapters in this book offer readers a basic understanding of legal principles encountered in clinical practice, as well as practical advice on how to manage situations at the interface of law and clinical practice. Using case examples and clear language, this book helps clinicians understand the underlying principles behind the legal requirements of clinical care. It aims to enhance the reader’s knowledge of legal issues and ability to deliver good clinical care when those issues are encountered. This book is unique in that it is, first and foremost, for mental health clinicians in training and those already in practice. While it is not a textbook for lawyers or forensic clinicians, forensic specialists and other professionals who encounter mental health issues in their work, such as law enforcement professionals, will benefit from its practical and clear discussion of legal and mental health issues.
Practicing Social Work in Deprived Communities-Ana Opačić

The American Psychiatric Association Publishing Textbook of Schizophrenia-Jeffrey A. Lieberman

2020-01-30 The new edition of The American Psychiatric Association Publishing Textbook of Schizophrenia plumbs the current state of knowledge about the disorder's origin, nature, and treatment in a comprehensive, authoritative, and thoroughly revised text. Schizophrenia is one of the leading causes of disability worldwide and remains among the most challenging and disheartening disorders confronting psychiatrists and other mental health care providers because of its profound effects on patient functioning, its onset just as young adults are launching their lives, and the limitations of current pharmacological treatments. Designed to bring the reader up to date on the latest research, this new edition represents a complete overhaul of the previous text, with a new structure, new chapters, and new contributors. Subjects such as genetics and neurobiology, distinguished by rapid advancements in knowledge, are explored in depth, as are new models of service delivery and psychosocial treatments that are making a significant difference in patients' lives. Foundational information on the epidemiology, etiology, and psychopathology of the illness is presented clearly and cogently, emphasizing research conducted over the last decade. Theories regarding the pathophysiological basis of the disorder, including genetic, molecular, and neurocircuitry models, are examined in detail. Other noteworthy topics include: Cultural variations, examining how culture influences the presentation of schizophrenia from the perspective of the experts in cultural psychiatry who developed the DSM-5 Cultural Formulation Interview Service delivery models, including assertive community treatment, critical time intervention, coordinated specialty care for early psychosis, and integrated dual diagnosis, informing clinicians about options for providing treatment to individuals with schizophrenia Advances in the existing pharmacological treatments, including use of adjunctive medications and combinations of antipsychotics, which, in the absence of new drug therapies, is indispensable knowledge A review of the promising field of neuromodulation Evaluation and treatment of comorbidities, such as depression, obsessive-compulsive disorder, and substance use disorders, vital information because over half of people with schizophrenia have at least one co-occurring behavioral health disorder Individual- and family-centered care, which presents the rationale and evidence for actively involving patients and family members in interventions and decision-making about treatments Designed for ease of use, The American Psychiatric Association Publishing Textbook of Schizophrenia furnishes evidence-based and cutting-edge knowledge for the next generation of students, trainees, and clinicians.

Managed Behavioral Health Care Handbook-E. Clarke Ross 2001 Written by a team of nationally recognized authorities on managed care, Managed Behavioral Health Care Handbook guides you through specific strategies that characterize contemporary efforts made at managing behavioral health care, building a clear understanding of their role, and their effect in improving the quality of behavioral health care today, and in the future. From beginning to end, you will learn the core components of the managed behavioral health care process and gain invaluable insight into the numerous controversies and public policy issues.

A Guide to Global Mental Health Practice-Craig L. Katz 2015-05-01 Drawing on the authors' experience in developing and implementing global mental health programs in crisis and development settings, A Guide to Global Mental Health Practice: Seeing the Unseen is designed for mental health, public health, and primary care professionals new to this emerging area. The guide is organized topically and divided into four sections that move from organizing and delivering global mental health services to clinical practice, and from various settings and populations likely to be encountered to special issues unique to global work. Case studies based around a central scene are threaded throughout the book to convey what global mental health work actually involves. Mental health professionals of all backgrounds, including social workers, nurses, nurse practitioners, psychologists, and psychiatrists, as well as public health professionals and community level medical professionals and mental health advocates will benefit from this engaging primer. It is the book for anyone committed to addressing mental health issues in a low resource or crisis-hit setting, whether
international or domestic.

Community Mental Health in Canada, Revised and Expanded Edition-Simon Davis 2013-11-15

Community Mental Health in Canada offers a timely, critical overview of the provision of public mental health services in Canada, past, present, and future. This new edition has been substantially revised and expanded and includes a deeper discussion of stigma, the recovery vision, the pharmaceutical industry, and mental health law, in addition to an array of new topics. Recent developments such as the creation of the Mental Health Commission of Canada in 2007 and the release of its national mental health strategy document in 2012 are also discussed. Accessibly written and highly informative, it is an indispensable resource for students, practitioners, and policy makers, as well as service recipients and their families.

Bibliography on Medical Education-National Library of Medicine (U.S.) 1966

Psychiatric Malpractice-Robert I. Simon 1992 What are the facts about psychiatric malpractice? Is it increasing? If so, how rapidly? What areas of psychiatric practice pose higher risks of legal liability? The anxieties and uncertainties created by the increased threat of being sued for malpractice can interfere with the psychiatrist's provision of good clinical care. Through a general overview -- as well as a discussion of specific legal cases -- this volume presents the major malpractice traps encountered in everyday psychiatric practice.

Administration in Mental Health-National Institute of Mental Health (U.S.) 1975

Principles and Practice of Geriatric Psychiatry-Mohammed T. Abou-Saleh 2011-07-28 The renowned Principles and Practice of Geriatric Psychiatry, now in its third edition, addresses the social and biological concepts of geriatric mental health from an international perspective. Featuring contributions by distinguished authors from around the world, the book offers a distinctive angle on issues in this continually developing discipline. Principles and Practice of Geriatric Psychiatry provides a comprehensive review of: geriatric psychiatry spanning both psychiatric and non-psychiatric disorders scientific advances in service development specific clinical dilemmas New chapters on: genetics of aging somatoform disorders epidemiology of substance abuse somatoform disorders care of the dying patient Continuing the practice of earlier editions, the major sections of the book address aging, diagnosis and assessment and clinical conditions, incorporating an engaging discussion on substance abuse and schizophrenic disorders. Shorter sections include the presentation of mental illness in elderly people from different cultures—one of the most popular sections in previous editions. Learning and behavioural studies, as well as models of geriatric psychiatry practice, are covered extensively. This book provides a detailed overview of the entire range of mental illness in old age, presented within an accessible format. Principles and Practice of Geriatric Psychiatry is an essential read for psychiatrists, geriatricians, neurologists and psychologists. It is of particular use for instructors of general psychiatry programs and their residents.

The Yale Textbook of Public Psychiatry-Jeanne L. Steiner 2016-02-03 Yale Textbook of Public Psychiatry is a comprehensive resource on treatment, rehabilitation, recovery, and public health of persons cared for in organized, publically funded systems of care. Edited and authored by experts in public psychiatry at the Yale Department of Psychiatry, this text provides up-to-date information on clinical work in the public sector. This book will be a useful reference for professionals and students of public psychiatry, administrators, and policy makers.

Clinical Assessments in Psychiatry-Rajesh R. Tampi 2010 "This book contains case vignettes and discussions to help residents, fellows, and practitioners maximize their competency in performing clinical assessments in psychiatry. Derived from a highly successful course at Yale University, the book focuses on the key clinical skills emphasized by the American Board of Psychiatry and Neurology in residency training and on the oral board examination. These skills include physician-patient relationship; psychiatric interview, including mental-status exam; case presentations; live patient; case formulation; differential diagnosis; and treatment interventions. Dr. Tampi's training in the U.S., U.K., and India enables him to cross cultures around the globe. A companion website will contain videos demonstrating interview skills and patient assessments."--BOOK JACKET.
