Precious Stones Vol 1 Max Bauer

Precious Stones-Max Bauer 2012-08-29 This classic study begins with a general analysis of precious stones followed by descriptions of their cutting and mounting. The remainder of this volume focuses on the diamond. 52 figures.

Faceting History: Cutting Diamonds and Colored Stones-Glenn Klein 2005-10-13 The author of, "FACETING HISTORY: CUTTING DIAMONDS AND COLORED STONES" has for a long time had a deep interest in learning how the early faceters (cutters) of diamonds and colored gemstones were able to complete their work. What methods did they use? What equipment did they have to make success possible? How soon did they discover how to complete the many phases necessary to accomplish their work? How did the equipment and methods differ between fashioning diamonds and faceting colored stones? These are just a few of the questions that the author wanted to find the answers for. In looking for answers to these and other questions, the author found that there were bits and pieces of information available in many previous books, but there was not a good book available that would answer most of his questions. Upon hearing the author’s remarks about this fact, one of the librarians at the wonderful library located at the Gemological Institute of America’s Carlsbad campus said that if such a book was not available, "maybe you should write the book!" Well, the author had been thinking of doing just that, but the remark caused the author to see the light and agree to get started on the project. Little did he know then that the project would require many months of eight hour days over seven day weeks to get the book completed. He decided to write a book that would answer these and other related questions that he had. The thought also occurred to him that such a book
would be a valuable volume to be placed in libraries of individual faceters around the world. He realized that such a book would also be of great value to anyone who works behind a Jewelry store counter. A successful sales person is one who is knowledgeable about the products that they are selling. A book of faceting information would be extremely valuable if read and re-read from time to time. A customer in the Jewelry store will no doubt be favorably impressed by a sales presentation that is made with the use of interesting and informative information about diamonds and the various colored gemstones. The customer will be convinced that the sales person knows about what they are talking. The author has spent nearly three years on the project of researching the GIA library and other libraries, along with the extensive personal library of gemstone related books that he personally possesses. Many conflicting reports were noted in his study. He has made the statements in his book reflect the most commonly accepted opinions, of the most respected authors’ works that he has found in his research. History is only obtainable from the earlier works of other authors. We cannot go back to the long past centuries ourselves, to see first hand what really happened and when it happened. A study of faceting history requires making the best choices of the information that is available. This completed book answers questions as to why the fashioning of diamonds was/is so different from the faceting of colored gemstones. The book compares the needed equipment and the methods that have brought the greatest successes. In addition, a great deal of other information connected to faceting is included. There are seven chapters in the book and there are over 125 photographs of the early equipment and methods that were used. The photographs show the faceters, the workroom conditions, and the tools and equipment that they used to complete beautiful and lasting gemstones. The book chapters are titled: An Introduction to Faceting, Early Man’s Stone Appreciation, Diamond Fashioning Procedure and Equipment,
Colored Stone Faceting Procedure and Equipment, The Evolution of Cut Designs, Famous and Historic Gemstones, Sources of Diamond and Colored Stone Rough, and lastly, Advances in Faceting Over the Past One Hundred Years. By books end, the reader will be well informed as to what is r
Framework for Industrialization in Africa-Thomas A. Taku 1999 Provides a detailed overview of the steps needed for African industrialization and development, including lessons from the developed world and descriptions of key facets of Africa's current environment.
Precious Stones-Max Bauer 1968-01-01 This classic study begins with a general analysis of precious stones followed by descriptions of their cutting and mounting and the ways in which their value and authenticity are assessed. The remainder of this volume focuses on the diamond: its characteristics; its natural occurrences and artificial production; and its use in jewelry. 52 figures.
Quartz Gem Stones-I. Aitkens 1932
Acts: An Exegetical Commentary : Volume 1-Craig S. Keener 2012-09-01 Highly respected New Testament scholar Craig Keener is known for his meticulous and comprehensive research. This commentary on Acts, his magnum opus, may be the largest and most thoroughly documented Acts commentary available. Useful not only for the study of Acts but also early Christianity, this work sets Acts in its first-century context. In this volume, the first of four, Keener introduces the book of Acts, particularly historical questions related to it, and provides detailed exegesis of its opening chapters. He utilizes an unparalleled range of ancient sources and offers a wealth of fresh insights. This magisterial commentary will be a valuable resource for New Testament professors and students, pastors, Acts scholars, and libraries.

Chinese Jade Throughout Ages-Stanley Charles Nott 2013-01-15
This classic guide to Chinese jade is of great interest to art collectors and casual readers alike. First published in 1936 and since then a collector's item of increasing rarity, Chinese Jade Throughout the Ages comprises a review of the characteristics, decorations, folklore, and symbolism of this esteemed mineral that has always held a proud place among gems of the world. The book presents a full descriptive account of the significance and meaning of the carvings produced in this prize stone by Chinese craftsmen from the earliest times, through the Chou and succeeding dynasties, down to the twentieth century. The text is illustrated with a magnificent series of more than 350 reproductions in color, black and white, and line drawings of choice pieces selected from the chief Asian, European, and American collections. In addition the Chinese art history book explains no only the wealth of symbolic designs used in the decoration of jade but also a large number of the marks and devices by which collectors identify the origin and the date of valued pieces.
