Preemie Parents Companion The Essential Guide To Caring For Your Premature Baby In The Hospital At Home And Through The First Years

The Preemie Parents’ Companion—Susan L. Madden 2000 For parents of the nearly 300,000 babies born prematurely each year, Susan L. Madden has written The Preemie Parents Companion.

Primary Care of the Premature Infant—Dara Brodsky 2008 Our understanding of the management of diseases in the premature infant has changed dramatically in recent years, and it can be quite difficult to remain up-to-date on changes in this highly scientific field. Dr. Brodsky and Ms. Ouellette have worked together to create a comprehensive reference that covers both the pathophysiology and epidemiology of problems occurring in premature babies in the Neonatal Intensive Care Unit, and the management of these problems once the infant has been released from the NICU to a community practice. The book emphasizes specific diseases that affect premature infants and focuses on two primary categories: background and management in the NICU, and management of specific illnesses after discharge from the NICU. Find information quickly using an up-to-date summary of the problems that are likely to affect the premature infant. Review helpful guidelines on feeding and growth, neurologic outcomes, developmental problems, retinopathy of prematurity, bronchopulmonary dysplasia, and much more. Use easy-to-follow management algorithms to help diagnose and manage common issues in premature infants after discharge. Make effective decisions about screening, immunizations, counseling of parents, and more. Help families deal with the emotional impact of caring for a premature infant. Access a list of disease-specific websites for clinicians and families.

The Expectant Parents’ Companion—Kathleen Huggins 2006-04-20 Sifting through the inundation of “must have” baby product recommendations for today’s parents, a practical resource helps expectant moms and dads to prioritize baby accessory needs while placing an emphasis on easing and simplifying childcare, sharing additional tips on how to identify unnecessary items, render an environment baby friendly, and choose a day care provider. Simultaneous.

Parenting Your Premature Baby and Child—Deborah L. Davis 2004 Offers advice to parents of premature babies on such topics as coping with the difficulties involved in caring for a premature infant, communicating with hospital staff, and determining the viability of future pregnancies. Nobody Ever Told Me (or My Mother) That!—Diane Bahrt 2010 Nobody Ever Told Me (Or My Mother) That!—Everything from Bottles and Breathing to Healthy Sleep Development fills a missing niche in the child rearing world. It explains everything from the basics of nursing, to SIDS, to facial massage; finishing with the secrets to good sleep development and your child’s best natural appearance. Written by an SLP with over 30 years of experience, this book is a wealth of necessary information for any new parent.

The Joy of Pregnancy—TorI Kropp 2008 Are you expecting mystery, sensuality, wonder, and delight? If you’re pregnant, you should be! Mothering Magazine’s Having a Baby, Naturally—Peggy O’Mara 2007-11-01 For more than twenty-five years, Mothering magazine has captured an audience of educated women who appreciate its “we’ll inform, you choose” approach to parenting. Having a Baby, Naturally reflects this spirit with straightforward, uncensored information about pregnancy and childbirth, addressing common concerns and questions in a compassionate, nonjudgmental style. Written by Peggy O’Mara, the longtime publisher, editor, and owner of Mothering magazine, it synthesizes the best theories and safest practices used in natural childbirth, including recommendations from the World Health Organization, the American Academy of Pediatrics, and the American College of Obstetricians and Gynecologists. Throughout, O’Mara reinforces her belief that each woman’s pregnancy and birth experience is a one-of-a-kind event. She covers such topics as: Nutrition, diet, and exercise Emotional self-awareness during and after pregnancy A trimester-by-trimester guide to what is happening in your body and your child’s Birth choices—offering suggestions, not “rules” Pain medication alternatives Birth locations, from hospitals to home birth Relieving morning sickness with natural remedies Prenatal testing Prematurity and multiple births Balancing work and family The father’s role during pregnancy and beyond Difficult subjects, such as birth defects, miscarriages, and postpartum depression, are also treated with sensitivity and candor. Finally, a book for the thinking woman who believes in her own inherent capacity to make smart, informed decisions about her pregnancy and birth, just as she makes in other areas of her life. Having a Baby, Naturally is a celebration of childbirth and an accurate and objective guide to helping women fortify their spirits, develop trust in their bodies, and make the best possible choices to protect their new baby’s health.

Parent to Child—Guideline Natalie Bandlow 2006-02-01 This guide provides parents with an opportunity to chronicle their own personal history and past experiences as well as the history and experiences of their child’s life in a direct, loving, and supportive way. Don’t wait - let Parent To Child: The Guide assist you in writing the legacy you want and need to leave for your children ... just in case. The Zuckerman-Farker Handbook of Developmental and Behavioral Pediatrics for Primary Care—Marilyn Augustyn 2010-09-29 The thoroughly updated Third Edition of this popular handbook provides practical guidance on diagnosing and treating children with developmental and behavioral problems in the primary care setting. Chapters written in outline format address topics ranging from everyday problems such as biting and social avoidance to serious and complex psychiatric disorders such as anorexia and depression. This edition includes new chapters on dealing with difficult child behavior in the office; alternative therapy for autism spectrum disorders; treatment of autism spectrum disorders; oppositional defiant disorder; bilingualism; health literacy; incarcerated parents; and military parents. Recommended readings for physicians and parents are included. A companion website includes the fully searchable text.

Prenemies - Second Edition—Dana Wechsler Linden 2013-02-05 The comprehensive "Dr. Speck"-like reference that is both reassuring and realistic—now updated to reflect the many advances in neonatology. Prenemies, Second Edition is the only parents’ reference resource of its kind—delivering up-to-the-minute information on medical care in a warm, caring, and engaging voice. Authors Dana Wechsler Linden and Emma Trenti Paroli are parents who have “been there.” Together with neonatologist Mia Wechsler Doron, they answer the dozens of questions that parents will have at every stage—from high-risk pregnancy through premature hospitalization, to homecoming and the preschool years—imparting a vast, detailed store of knowledge in clear language that all readers can understand. Prenemies, Second Edition covers topics related to premature birth, including: What are your risk factors for having a premature baby? Can you do something to delay early labor? What do doctors know about you baby’s outlook during her first minutes and days of life? How will your preemie’s progress be monitored? How do you cope with a long hospitalization? Are there special preparations for your baby’s homecoming? What kind of stimulation during the first year gives your baby the best chance? Will your preemie grow up healthy? Normal? Merenstein & Gardner’s Handbook of Neonatal Intensive Care E-Book—Sandra Lee Gardner 2010-04-01 The leading resource for collaborative critical care for newborns, Merenstein & Gardner’s Handbook of Neonatal Intensive Care, 7th Edition provides a multidisciplinary approach and a real-world perspective. It focuses on evidenced-based practice, with clinical directions in color for easy retrieval and review. Special features help you prioritize the steps in initial care, and provide a guide to sharing information with parents. With each chapter written jointly by both physicians and nurses, this book is comprehensive enough to suit the needs of the entire team in your neonatal intensive care unit. Unique! A multidisciplinary perspective is provided by an editorial team of two physicians and two nurses, and each chapter is written and reviewed by a physician and nurse team, so information mirrors the real-world experience in a neonatal intensive care unit. Unique! Clinical content is in color, so you can quickly scan through chapters for information that directly affects patient care. Unique! Parent Teaching boxes highlight the relevant information to be shared with a patient’s caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention, helping you prioritize
nutrition, immunization, and health promotion. UNIQUE! Data Cues list assessment data to help you recognize possible pediatric disorders. Nursing Care Plans with Critical Thinking Questions reinforce the nursing process as applied to pediatric disorders. 13 Skills follow the nursing process and are clearly presented in an Action/Rationale format and teach basic procedures used by the LPN/LVN in pediatric nursing settings. UNIQUE! Chapter 3 includes a section on NIC/NOC, classification systems used in many clinical and hospital settings. Online Resources appear at the end of each chapter and provide an opportunity for further study. Perforated Self-Assessment Workbook included at the back of the book features a variety of matching, multiple-choice, study questions, case studies with critical thinking questions, and Internet activities. UNIQUE! Critical Thinking Snapshots of selected clinical situations with brief scenarios are located after the Critical Thinking Questions at the end of selected Nursing Care Plans and provide visual examples of specific disorders to help you apply critical thinking skills to clinical situations. UNIQUE! January 2007 Recommended Childhood Immunization Schedule (Appendix A) for children, adolescents, and catch-up growth immunizations provide the most up-to-date information for nurses and families. UNIQUE! JCAHO's Lists of Dangerous Abbreviations, Acronyms, and Symbols provides guidelines for the prevention of medication administration error, especially serious in pediatric dosages. Health Promotion boxes highlight wellness and disease prevention in light of relevant Healthy People 2010 objectives. Content on evidence-based practice, increased cultural content added to Chapter 1: Child Health Evolution and new information on complementary and alternative therapies in Chapter 3: Care of the Hospitalized Child have been added. Home Care Tips related to specific disorders supplement the content on home care in Chapter 3.

There's Going to Be a Baby-John Burningham 2008-07-24 Simplified Chinese edition of There's Going to be a Baby

Parents at Risk-Ramona Thieme Mercer 1990 This book outlines the challenges of parental role achievement in adverse circumstances during the critical first year of a baby's life. How do parents respond and adapt to such situations? How can nurses help families at this sensitive time? Dr. Mercer offers some practical guidelines for help, along with substantive discussions of the theory and research surrounding this topic.

Neonatal Intensive Care Nursing-Glenys Boxwell (Connolly) 2019-11-19 Thoroughly revised and updated, this new edition of Neonatal Intensive Care Nursing is a comprehensive, evidence-based text for nurses and allied health professionals caring for sick newborn infants. This user-friendly text focuses on the common problems and related care occurring within the neonatal specialty. All previous chapters have been thoroughly updated and new content includes chapters on, for example, organisation of neonatal care, assessment of the neonate, the premature and low birth weight neonate as well as palliative care. In addition, the book now includes a broad and in-depth web-based companion comprising online resources, case studies with answer guides and learning activities. This accessible and interactive approach enables nurses to recognise, rationalise and understand clinical problems using an evidence-based approach. Divided into four parts, the book provides an overview of neonatal care, and a detailed look at the physical and emotional wellbeing of neonate and family, a range of clinical aspects of neonatal care, and key practices and procedures. Neonatal Intensive Care Nursing will be essential reading for both new and experienced nurses, allied health professionals and students learning about neonatal care including those undertaking qualifications in the neonatal specialism and pre-registration students taking relevant modules or placements.
