Introductory Maternity and Pediatric Nursing-Nancy T. Hatfield 2013-11-07 Written specifically for the LPN/LVN student, this Third Edition of Introductory Maternity and Pediatric Nursing provides clear, well-illustrated, and clinically relevant coverage of pregnancy, birth, and pediatrics to help student’s master key clinical and critical thinking skills and prepare for the NCLEX® exam and successful practice. This Third Edition is enhanced by new care plans in the clinical chapters, new case studies, a new art program, a new pronunciation guide, and more. Online video clips of live births, Cesarean delivery, breastfeeding, pediatric milestones, the well child, and the hospitalized child bring concepts to life in dynamic full color. To ensure student mastery of key topics, an integrated workbook at the end of each chapter includes NCLEX-style questions (many NEW to this edition), study activities, and critical thinking: "What Would You Do?" exercises.

Life-Span Human Development-Carol K. Sigelman 2014-02-26 Known for its clear, straightforward writing style, comprehensive coverage, strong and current research-based approach, and excellent visuals and tables, this life-span development text offers a topical organization at the chapter level and a consistent chronological presentation within each chapter. Each chapter focuses on a domain of development such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. Within each chapter, you will find sections on four life stages: infancy, childhood, adolescence, and adulthood. This unique organization enables students to comprehend the processes of transformation that occur in key areas of human development. Another staple of the text is its emphasis on theories and how they apply to specific topics in each chapter. This new edition also asks students to engage more actively with the content, and includes a clear focus on the complex interactions of nature and nurture in development, more integrated coverage of culture and diversity, and an exciting new media package for both students and instructors. Child Development: A Thematic Approach-Danuta Bukatko 2012-12-20 Bukatko/Daehler's CHILD DEVELOPMENT: A THEMATIC APPROACH
provides a comprehensive, topically organized, up-to-date picture of development from conception to adolescence. Most important, it draws students’ attention to the themes that replay themselves throughout the course of development, fundamental issues that resurface continually and that provide coherence to sometimes seemingly disparate research. The themes can serve as frameworks to help students further understand and remember the multitude of facts about child development. Bukatko/Daehler's sixth edition text draws on five themes, Nature and Nurture, Sociocultural Influence, Continuity/Discontinuity, Interaction among Domains, and Risk/Resilience. By drawing on these themes, the authors hope to stimulate readers to think about the process of development, or why it proceeds as it does. Through new For Your Review and Reflection sections, the authors also hope students will engage with the text and become more adept critical thinkers, who are more likely to appreciate the ramifications of theory and research for applied issues such as parenting practices, education, and social policy for children, which are ultimately concerns for us all. Growth and Development Across the Lifespan-Gloria Leifer, MA, RN, CNE 2012-10-19 This book provides introductory coverage of growth and development throughout the lifespan. The content emphasizes normal aspects as well as the unique problems and health promotion needs of each age and stage of development. It features a strong health promotion theme structured around Healthy People 2020 objectives. Lifespan coverage from prenatal development to death helps students integrate concepts related to normal changes in each stage of the life cycle. Coverage of current research and trends in health care provide readers with the most up-to-date, accurate information. Health promotion and disease prevention, including Healthy People 2020 objectives, are highlighted throughout the book. Cultural content is highlighted throughout the book and in new Chapter 3: Cultural Considerations in Health Care to encourage students to consider cultural implications at every stage of development. Separate chapter on advanced old age and geriatrics (Chapter 14) discuss the theories, physiological changes, and psychological aspects of aging; health promotion and maintenance; and the role of health care providers in caring for the geriatric patient. All of this helps students understand how to maintain quality of life and promote health in advanced old age. Teaching techniques for every developmental stage are part of a consistent chapter format and provide age-appropriate patient education tips. Consistent chapter organization for each stage of growth and development makes information easy to access. Critical Thinking scenarios and questions appear at the end of each chapter to help students consider all variables when planning care across the lifespan. Student learning features include Objectives, Key Terms, Key Points, and Review Questions. Appendix A includes the FDA's Recommended Child and Adult Immunization Schedules, providing essential health promotion information. NEW Appendix B provides a Multilingual Glossary of Symptoms to enhance students' awareness of culturally sensitive care. Glossary includes definitions of Key Terms and additional terms help students review concepts and terminology at a glance. Bibliography is organized by chapter at the end of the book to facilitate additional research and study.

The Behavioral Sciences and Health Care-Sahler, Olle Jane Z. 2017-08-31 The fourth edition of The Behavioral Sciences and Health Care provides trainees in every area of health care with foundational concepts of behavioral science as applied to individual and population health and disease. The text breathes new life into the biopsychosocial model by highlighting the integrated sciences model, which focuses on interdependence of the contributions made by all of the sciences basic to medicine. This integration is exemplified by the unifying conceptual framework of evolutionary science, in which increasingly complex gene-individual-environmental interactions explain behavior at the individual and social level. Concise, updated chapters cover foundational elements of neuroscience, stress biology, normal psychology, and social factors in health care, addressing both traditional areas of behavioral science and topical concerns such as pain, palliative care, addictions, health care disparities, and violence. Uniquely
among books of this kind, the text includes a thorough discussion of psychiatric disorders and therapies, aligned with current nosology (DSM-5). All chapters contain clinical pearls or vignettes, highlighted to emphasize applications in healthcare settings, as well as review questions and suggestions for further reading. A practice exam with extensive discussion of answers deepens students’ understanding of core topics while preparing them for certifying and licensing exams. This text is particularly suited for use in systems-based and case-based curricula. Individual chapters can be used creatively in flipped classrooms and other active learning environments. Accessible and clear, without oversimplification, the book facilitates interdisciplinary education, providing a common core of knowledge for students in medicine, nursing, psychology, social work, and other health care professions.
