There used to be an empty chair at the back of my class, but now a new boy called Ahmet is sitting in it. He's nine years old (just like me), but he's very strange. He never talks and never smiles and doesn't like sweets - not even lemon sherbets, which are my favourite! But then I learned the truth: Ahmet really isn't very strange at all. He's a refugee who's run away from a War. A real one. With bombs and fires and bullies that hurt people. And the more I find out about him, the more I want to help. That's where my best friends Josie, Michael and Tom come in. Because you see, together we've come up with a plan. . . With beautiful illustrations by Pippa Curnick

Preventing Bullying Through Science, Policy, and Practice-National Academies of Sciences, Engineering, and Medicine 2016-10-14 Bullying has long been tolerated as a rite of passage among children and adolescents. There is an implication that individuals who are bullied must have "asked for" this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life.

Although bullying behavior endures through generations, the milieu is changing. Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators and school

administrators, health care providers, policy makers, families, and others concerned with the care of children, this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.

Teaching Between the Lines-Maurie Negrin 2015-08-31 You're a teacher. You are on the front line every day with your students, and in addition to teaching academic content, you are often the first person to field any number of emotional needs your students may bring into your classroom. That domain is often left to school counselors, social workers, or psychologists, but in the absence of such professionals, or in addition to their expertise, there are simple and concrete tools you can use to help your students learn healthy coping strategies. This book is intended as a resource and is divided into four sections addressing the most common needs you may see in your classroom: grief and loss, bullying, off-task behaviors, and adoption. Each section will give you background information on the topic, practical strategies to use with students, frequently asked questions, and resources. Sample scripts are included for specific examples of conversations to have with kids.

The Bully And Me-Helen Carmichael Porter Helen Carmichael Porter has been touring her stories about victims and bullies for over seven years. The stories in The Bully and Me are first person accounts by both victims and bullies. The victims try to change the situation and usually, but not always, succeed. The stories are descriptive narratives of what happens to real people. They are

based on Porter's observations, countless interviews, personal experience, and imagination. The book explores the idea that victims and bullies are two sides of the same coin and that the healing of both lies in dealing with this paradox. There is not a lot of real violence in these stories; there is some, and much of it is implied in threats, taunts, gossip, e-mails, gestures, and language. Most of the bullying is teasing and it is always designed to torment and ridicule. The Bully and Me also refers to biblical and folk tales in the comments showing how bullying is not a new problem. This is not a self-help book; it is about listening to and thinking about the stories of bullying that happen everyday in our homes, our schools, and our communities.

Working with Trauma-Exposed Children and Adolescents-Joanna Pozzulo 2018-12-10 Far too often, children and youth experience trauma, from rare events such as mass shootings, terrorism attacks, and school lockdowns, to very common occurrences such as bullying, exposure to drugs and alcohol, or various mental health issues. They can experience these events both directly and indirectly (from surfing the internet, watching television, or through their friends). Our children spend a large portion of their day at school interacting with other students, teachers, and school personnel, where these topics are raised and discussed. This edited volume addresses how our teachers and school personnel can help students deal with these potentially traumatic events to reach the most positive possible outcomes. This collection brings together leading experts, including academics and professionals working in the field, to provide the most current evidence-based practices on how to help students who may have experienced or witnessed trauma. It presents research and advice on how to respond to traumatic events regarding bullying; drugs and alcohol; sexual abuse; mental health; lesbian, gay, bisexual, transgender, and queer (LGBTQ) safety; stranger danger; childhood disruptive behaviors; school shootings and lockdowns; and terrorism. It also includes a chapter focused on how to implement a school safety program. Schools cannot deal with these issues alone; effective strategies must engage family members and the broader community. Hence, the collection

includes a chapter on how schools can partner with families and the communities they reside in to bring about positive change. All this work pays close attention to cultural and religious sensitivity, socio-economic variabilities, diversity issues, and developmental stages.
