The New Cambridge History of Islam-Chase F. Robinson 2010-11-04 Volume One of The New Cambridge History of Islam, which surveys the political and cultural history of Islam from its Late Antique origins until the eleventh century, brings together contributions from leading scholars in the field. The book is divided into four parts. The first provides an overview of the physical and political geography of the Late Antique Middle East. The second charts the rise of Islam and the emergence of the Islamic political order under the Umayyad and the Abbasid caliphs of the seventh, eighth and ninth centuries, followed by the dissolution of the empire in the tenth and eleventh. 'Regionalism', the overlapping histories of the empire's provinces, is the focus of Part Three, while Part Four provides a cutting-edge discussion of the sources and controversies of early Islamic history, including a survey of numismatics, archaeology and material culture.

The New Cambridge History of Islam-David O. Morgan 2010-11-04 This volume traces the second great expansion of the Islamic world eastwards from the eleventh century to the eighteenth. As the faith crossed cultural boundaries, the trader and the mystic became as important as the soldier and the administrator. Distinctive Islamic idioms began to emerge from other great linguistic traditions apart from Arabic, especially in Turkish, Persian, Urdu, Swahili, Malay and Chinese. The Islamic world transformed and absorbed new influences. As the essays in this collection demonstrate, three major features distinguish the time and place from both earlier and modern experiences of Islam. Firstly, the steppe tribal peoples of central Asia had a decisive impact on the Islamic lands. Secondly, Islam expanded along the trade routes of the Indian Ocean and the South China Sea. Thirdly, Islam interacted with Asian spirituality, including Hinduism, Sikhism, Buddhism, Taoism and Shamanism. It was during this period that Islam became a truly world religion.

The New Cambridge History of Islam: Volume 4, Islamic Cultures and Societies to the End of the Eighteenth Century-Robert Irwin 2010-11-04 Robert Irwin's authoritative introduction to the fourth volume of The New Cambridge History of Islam offers a panoramic vision of Islamic culture from its origins to around 1800. The introductory chapter, which highlights key developments and introduces some of Islam's most famous protagonists, paves the way for an extraordinarily varied collection of essays. The themes treated include religion and law, conversion, Islam's relationship with the natural world, governance and politics, caliphs and kings, philosophy, science, medicine, language, art, architecture, literature, music and even cookery. What emerges from this rich collection, written by an international team of experts, is the diversity and dynamism of the societies which created this flourishing civilization. Volume four of The New Cambridge History of Islam serves as a thematic companion to the three preceding, politically oriented volumes, and in coverage extends across the pre-modern Islamic world.

Morgan 2010-11-04 This volume traces the second great expansion of the Islamic world eastwards from the eleventh century to the eighteenth. Robinson 2010-11-04 Volume One of The New Cambridge History of Islam, which surveys the political and cultural history of Islam from its Late Antique origins until the eleventh century, brings together contributions from leading scholars in the field. The Cambridge Companion to Classical Islamic Theology-Tim Winter 2008-05-22 This series of critical reflections on the evolution and major themes of pre-modern Muslim theology begins with the revelation of the Koran, and extends to the beginnings of modernity in the eighteenth century. The significance of Islamic theology reflects the immense importance of Islam in the history of monotheism, to which it has brought a unique approach and style, and a range of solutions which are of abiding interest. Devoting especial attention to questions of rationality, scriptural fidelity, and the construction of 'orthodoxy', this volume introduces key Muslim theories of revelation, creation, ethics, scriptural interpretation, law, mysticism, and eschatology. Throughout the treatment is firmly set in the historical, social and political context in which Islam's distinctive understanding of God evolved. Despite its importance, Islamic theology has been neglected in recent scholarship, and this book provides a unique, scholarly but accessible

introduction.

The New Cambridge History of Islam: Volume 5, The Islamic World in the Age of Western Dominance-Francis Robinson 2010-11-04 Volume 5 of The New Cambridge History of Islam examines the history of Muslim societies from 1800 to the present. Francis Robinson, a leading historian of Islam, has brought together a team of scholars with a broad range of expertise to explore how Muslims responded to the challenges of Western conquest and domination across the last two-hundred years. As their articles reveal, the social, economic, political and historical circumstances which influenced these responses have, in many different parts of the world, empowered Muslim societies and encouraged transformation and religious revival. The volume offers a fascinating glimpse into the local dimensions of that revival and how regional connections have been forged. Synthesising the academic research of the past thirty years, as well as offering substantial guidance for further study, this book is the starting-point for all those who wish to have a serious understanding of modern Muslim societies.

The New Cambridge History of Islam: Volume 2, The Western Islamic World, Eleventh to Eighteenth Centuries-Maribel Fierro 2010-11-04 Volume 2 of The New Cambridge History of Islam is devoted to the history of the Western Islamic lands from the political fragmentation of the eleventh century to the beginnings of European colonialism towards the end of the eighteenth century. The volume embraces a vast area from al-Andalus and North Africa to Arabia and the lands of the Ottomans. In the first four sections, scholars - all leaders in their particular fields - chart the rise and fall, and explain the political and religious developments, of the various independent ruling dynasties across the region, including famously the Almohads, the Fatimids and Mamluks, and, of course, the Ottomans. The final section of the volume explores the commonalities and continuities that united these diverse and geographically disparate communities, through in-depth analyses of state formation, conversion, taxation, scholarship and the military. A History of Islamic Societies-Ira M. Law and Piety in Medieval Islam-Megan H. Reid 2013-07-22 The Ayyubid and Mamluk periods were two of the most intellectually vibrant in Islamic history. Megan H. Reid's book, which traverses three centuries from 1170 to 1500, recovers the stories of medieval men and women who were renowned not only for their intellectual prowess but also for their devotional piety. Through these stories, the book examines trends in voluntary

religious practice that have been largely overlooked in modern scholarship. This type of piety was distinguished by the pursuit of God's favor through additional rituals, which emphasized the body as an instrument of worship, and through the rejection of worldly pleasures, and even society itself. Using an array of sources including manuals of law, fatwa collections, chronicles, and obituaries, the book shows what it meant to be a good Muslim in the medieval period and how Islamic law helped to define holy behavior. In its concentration on personal piety, ritual, and ethics the book offers an intimate perspective on medieval Islamic society.

Islam and Nazi Germany's War-David Motadel 2014-11-30 With troops fighting in regions populated by Muslims from the Sahara to the Caucasus, Nazi officials saw Islam as a powerful force with the same enemies as Germany: the British Empire, the Soviet Union, and the Jews. David Motadel provides the first comprehensive account of Berlin's ambitious attempts to build an alliance with the Islamic world.

Forbidding Wrong in Islam-Michael Cook 2003-05-27 "Michael Cook's massive study in Islamic ethics, Commanding Right and Forbidding Wrong in Islamic Thought, was published to much acclaim in 2001. It was described by one reviewer as a masterpiece. In that book, the author reflected on the Islamic injunction, incumbent on every Muslim, to forbid wrongdoing. The present book is a short, accessible survey of the same material. Using anecdotes and stories from Islamic sources to illustrate the argument, Cook unravels the complexities of the subject. Moving backwards and forwards through time, he demonstrates how the past informs the present. By the end, the reader will be familiar with a colourful array of characters from Islamic history ranging from the celebrated thinker Ghazzali, to the caliph Harun al-Rashid, to the Ayatollah Khomeini. The book educates and entertains - at its heart, however, is an important message about the Islamic tradition, its values, and the relevance of those values today" --p. [1]

A History of the Ottoman Empire to 1730-V. J. Parry 1976-09-16 From the historian's perspective, the Ottomans in their heyday could claim a more absolute monarchy than any of the truly European empires, a more successful record in quelling rebellion and the rise of national settlement, and the development and maintenance of more effective lines of communication between the centre and outlying lands. The chapters in this book were each written by a specialist in Ottoman history, and in combination they trace the steps by which the empire built on its fourteenth-century beginnings to the high point of its European power. The emphasis throughout is on the internal history of the empire and its relations with non-European states as

well as with Europe; it is no longer possible or desirable to write merely from the point of view of the Western powers.

The Cambridge History of Islam 4 Volume Set-P. M. Holt 1978-09-07 The aim of these volumes is to present the history of Islam as a cultural whole. It is hoped that in a single concise work the reader will be able to follow all the main threads: political, theological, philosophical, economic, scientific, military, artistic. But The Cambridge history of Islam is not a repository of facts, names and dates; it is not intended primarily for reference, but as a book for continuous reading. The editors believe that, while it will not be despised by the expert orientalist, it will be useful to students in other fields of history, and particularly to university students of oriental subjects, and will also appeal to those who read history for intellectual pleasure. -- From Preface Volume 1A (page ix).
