This revolutionary approach combines the expertise of an animal behaviorist, a companion parrot consultant and a veterinarian who use "family therapy techniques" -- such as learning to respect the bird's boundaries and viewing sibling rivalry in a broad, environmental context -- to help you change the mischievous behavior of domesticated birds, including: • Biting or aggression • Screaming • Sibling/bird rivalry • Jealousy toward its human flock members, and • Feather plucking With additional chapters on choosing the right species for your family, breeding behavior and the appropriate medical care for your bird, Birds off the Perch is the only guide you'll need to keep your pet birds healthy and happy.

Political Alternation in the Azores, Madeira and the Canary Islands-Teresa Ruel 2020-09-30 "In this innovative study, Dr Ruel explores why political alternation—a bedrock of democratic functioning—has been largely absent in three under-studied regions in Portugal and Spain. Focusing on Madeira, the Azores and the Canary Islands, this book explains how party competition, intra-party democracy and regional economic performance have contributed to political party stasis since the return of democracy in the mid-1970s." —Paul M. Heywood, Sir Francis Hill Professor of European Politics seconded 0.5 FTE to Global Integrity, Washington DC (2018-21), Faculty of Social Science, University of Nottingham, UK This book is about political alternation. It's about parties and politicians. It's about power and resources employed to secure longevity in power over time at Azores, Madeira and the Canary Islands. This book explores the phenomenon of political alternation through an in-depth contextual understanding of the path of regional historical legacies at democratization and decentralization processes started in the 1970s; the institutional architectures and the scope of regional authority endowed in those regions; the specific dynamics of regional politics; and the constellation of political parties and actors and the regional elections results, as well as contextual factors that might explain why some political parties have better performances than other at regional elections. Throughout comparative lessons Ruel seeks to highlight the range of factors that affect regional electoral dynamics and outcomes and to develop a comprehensive understanding of the drivers of long-standing incumbency (Azores and Canary Islands) or the absence of political alternation (Madeira) within regional democracies.

Animal Acoustic Communication-Steven L. Hopp 2012-12-06 The last decades have brought a significant increase in research on acoustic communication in animals. Publication of scientific papers on both empirical and theoretical aspects of this topic has greatly increased, and a new journal, Bioacoustics, is entirely devoted to such articles. Coupled with this proliferation of work is a recognition that many of the current issues are best approached with an interdisciplinary perspective, requiring technical and theoretical contributions from a number of areas of inquiry that have traditionally been separated. With the notable exception of a collection edited by Lewis (1983), there have been few volumes predominately focused on technical issues in comparative bioacoustics to follow up the early works edited by Lanyon and Tavolga (1960) and Busnel (1963). It was the tremendous growth of expertise concerning this topic in particular that provided the initial impetus to organize this volume, which attempts to present fundamental information from both theoretical and applied aspects of current bioacoustics research. While a completely comprehensive review would be impractical, this volume offers a basic treatment of a wide variety of topics aimed at providing a conceptual framework within which researchers can address their own questions. Each presentation is designed to be useful to the broadest possible spectrum of researchers, including both those currently working in any of the many and diverse disciplines of bioacoustics, and others that may be new to such studies.
