Urban Anthropology came to grow as a distinctive area of study in Anthropology in recent times. It is a subset of anthropology concerned with issues of urbanization, poverty, urban space, social relations, and neoliberalism. The field has become consolidated in the 1960s and 1970s. Although some anthropologists studied ethnic populations in urban settings since the beginning of this century ...

Please request an appointment

U-M LSA U-M College of LSA - University of Michigan

The cell height and topographic features from the x-scan in the absence of surfactant yielded a cell diameter and height of 50 μm and 10 μm , respectively. Permeability parameters for the cell membranes or boundaries were then introduced into the simulation model. The simulated x-scan data was then fitted with the experimental data at the same fixed height. Because the permeability changed ...

Coronavirus entry into host cells is an important determinant of viral infectivity and pathogenesis (13, 14). It is also a major target for host immune surveillance and human intervention strategies (15, 16). To enter host cells, coronaviruses first bind to a cell surface receptor for viral attachment, subsequently enter endosomes, and eventually fuse viral and lysosomal membranes (13, 14) (Fig ...
