The Challenge of Our Hope-Waclaw Hryniewicz 2007

Visions of the Past-Robert A. Rosenstone 1998-08-04 Can filmed history measure up to written history? What happens to history when it is recorded in images, rather than words? Can images convey ideas and information that lie beyond words? Taking on these timely questions, Robert Rosenstone pioneers a new direction in the relationship between history and film. Rosenstone moves beyond traditional approaches, which examine the history of film as art and industry, or view films as texts reflecting their specific cultural contexts. This essay collection makes a radical venture into the investigation of a new concern: how a visual medium, subject to the conventions of drama and fiction, might be used as a serious vehicle for thinking about our relationship with the past. Rosenstone looks at history films in a way that forces us to reconceptualize what we mean by "history." He explores the innovative strategies of films made in Africa, Latin America, Germany, and other parts of the world. He journeys into the history of film in a wide range of cultures, and expertly traces the contours of the postmodern historical film. In essays on specific films, including Reds, JFK, and Sans Soleil, he considers such issues as the relationship between fact and film and the documentary as visionary truth. Theorists have for some time been calling our attention to the epistemological and literary limitations of traditional history. The first sustained defense of film as a way of thinking historically, this book takes us beyond those limitations.

Gandhi and anarchy: the struggle for Indian home rule which was started with the inauguration of the Indian National Congress has many difficulties to encounter, has strong and powerful opponents and has received many checks. But its strongest opponent is Mr. Gandhi and perhaps the most severe check it has received is the adoption by the national congress at his instance in Calcutta and Nagpur of the so called Non-Violent Non-co-operation.

The Challenge of Change: Dealing with the Legacy of the Modern Movement-D. van den Heuvel 2008-09-11 Conservation of architecture - and the conversation of Modern architecture in particular - has assumed new challenges. Rather than attempting to return a Modern building to its resumed original state, the challenge of these proceedings is to revalue the essence of the manifold manifestations of Modern architecture and redefine its meanings in a rapidly changing world of digital revolution, worldwide mobility and environmental awareness. This volume aims to provide a variety of platforms for the exchange of ideas and experience. A large, international group of architects, historians, scholars, preservationists and other parties involved in the processes of preserving, renovating and transforming Modern buildings has been invited to investigate the paradox of the Modern monument, and to reflect on the manifold dilemmas of change and continuity. The general theme is elaborated through five sub-themes. The sub-theme 'Change and Continuity' addresses the tensions between change and continuity from a historical-theoretical perspective. 'Restructuring Cities and Landscapes' focuses on the larger scale of city and landscape, while 'Shifts in Programme and Flexibility' draws attention to the scale of the building or building complex, and questions limits of re-use and flexibility. The fourth sub-theme deals with education and the fifth sub-theme 'Progress, Technology and Sustainability' considers specific issues of techniques and materials.

The Challenge of Teaching-Gretchen Geng 2016-10-11 This book presents thirty-one accounts by final-year pre-service teachers, providing guidance and insights for less advanced teacher education students, and illustrating the use of life history and narrative stories as methods for pre-service teachers to explore educational issues in classroom practice. This life-history approach identifies those political, economic, and social forces that have impinged on the individual at different points in their life and contributed to the process of changing their identities. These stories are not written by established specialists in the areas they deal with, but instead by novice teachers at the beginning of their paths towards mastering the intricacies of teaching and learning in school settings. As such the book provides a mentoring framework and a means of helping pre-service teachers share their valuable experiences and insights into aspects such as how to manage practicum requirements. It helps establish a supportive relationship among pre-service teachers, providing them with access to valuable peer experiences. In addition it helps pre-service teachers make sense of their own practicum experiences and reflect on their own beliefs and professional judgement to develop their approaches and solve problems in their own classroom practice.

The Challenge of Change-Martina S. Horner 2013-03-08 This book is a compilation and update of a group of provocative papers presented at the Radcliffe College invitational conference, "Perspectives on the Patterns of an Era: Family, Work, and Education." A scholarly event saluting Radcliffe's centenary, the conference examined a range of indicators of social change, particularly as they relate to women in America in the last two decades. The program was interdisciplinary, bringing together scholars from economics, history, psychology, sociol ogy, and psychiatry. Each conference participant was asked to explore, theoretically and empirically, the lessons of our social history and, as much as possible, to separate myth from reality with regard to recent changes in patterns of family life, work, and education. Particular emphasis was given to the examination of the rapid changes-or what have been assumed to be the rapid changes-of the last two decades. In addition, participants ana lyzed the perceived and actual costs and benefits associated with chang ing lifestyles, for women and men as individuals and for society as a whole. Finally, they considered the implications of their findings for the future and identified areas for further research.

Futuring Our Past-Espin, Orlando 2014-04-10 The Catholic understanding of Tradition is not just about the preservation of ancient practices or customs; it is the process by which the faith is handed on (""traditioned"") from one generation to another. The essays in this volume, by scholars from a wide range of disciplines, center on two questions: How is the Christian tradition ""traditioned"" among Latino/as? And what impact does this ""traditioning"" have on the Tradition?

Futuring Our Past is the first volume in a new Orbis series, published in cooperation with the Center for the Study of Latino/a Catholicism at the University of San Diego.

Aside from the editors, contributors include Bernard Cooke, Miguel H. Díaz, Michelle González, José R. Irizarry, Francisco Lozada, Jr., Daisy L. Machado, Nancy Pineda-Madrid, Gary Riebe-Estrella, Jean-Pierre Ruiz, and Theresa Torres.

How to Understand Language-Bernhard Weiss 2014-12-05 Why are philosophers, as opposed to, say, linguists and psychologists, puzzled by language? How should we attempt to shed philosophical light on the phenomenon of language? "How to Understand Language" frames its discussion by these two questions.

The book begins by thinking about the reasons that language is hard to understand from a philosophical point of view and, armed with the fruits of that discussion, begins searching for an approach to these questions. After finding fault with approaches based on philosophical analysis and on translation it undertakes an extended investigation of the programme of constructing a theory of meaning. Donald Davidson's advocacy of that approach becomes pivotal; though, the book endorses his broad approach, it argues strongly against the roles both of truth theory and of radical interpretation.

The Challenge of the Social and the Pressure of Practice-Martin Carrier 2008-01-01 Philosophers, sociologists, and historians of science offer a multidisciplinary view of the complex interrelationships of values in science and society, in both contemporary and historic contexts. They analyze the impact of commercialization and politicization on epistemic aspirations, and conversely, the ethical dilemmas raised by "practically relevant" science in today's society.

The Challenge for Business and Society-Stanley S. Litow 2018-06-06 A roadmap to improve corporate social responsibility The 2016 U.S. Presidential Campaign focused a good deal of attention on the role of corporations in society, from both sides of the aisle. In the lead up to the election, big companies were accused of profiteering, plundering the environment, and ignoring (even exacerbating) societal ills ranging from illiteracy and discrimination to obesity and opioid addiction. Income inequality was laid squarely at the feet of us companies. The Trump administration then moved swiftly to scrap fiscal, social, and environmental rules that purportedly hobble business, to redirect or shut down cabinet offices historically protecting the public good, and to roll back clean power, consumer protection, living wage, healthy eating initiatives and even basic public funding for public schools. To many eyes, and the lens of history, this may usher in a new era of cowboy capitalism with big companies, unfettered by regulation and encouraged by the presidential bully pulpit, free to go about the business of making money—no matter the consequences to consumers and the commonwealth. While this may please some companies in the short term, the long term consequences might result in just the opposite. And while the new administration promises to reduce "foreign aid" and the social safety net, Stanley S. Litow believes big companies will be motivated to step up their efforts to create jobs, reduce poverty, improve education and health, and address climate change issues — both domestically and around the world. For some leaders in the private sector this is not a matter of public relations or charity. It is integral to their corporate strategy—resulting in creating new markets, reducing risks, attracting and retaining top talent, and generating growth and realizing opportunities. Through case studies (many of which the author spearheaded at IBM), The Challenge for Business and Society provides clear guidance for companies to build their own corporate sustainability and social responsibility plans positively effecting their bottom lines producing real return on their investments. This book will help: • Create an effective corporate social responsibility and sustainability plan • Provide long-term bottom line benefit • Protect and enrich brand value • Recruit and retain top talent Perfect for CEOs, CFOs, Human Resource/Corporate Affairs executives, but also for government and not-for-profit leaders, this book helps you come up with a solid plan for giving back to society, producing real sustainable value.

Putting Your Past in Its Place-Stephen Viars 2011-01-01 Lives grind to a halt when people don't know how to relate to their past. Some believe "the past is nothing" and attempt to suppress the brokenness again and again. Others miss out on renewal and change by making the past more important than their present and future. Neither approach moves people toward healing or hope. Pastor and biblical counselor Stephen Viars introduces a third way to view one's personal history—by exploring the role of the past as God intended. Using Scripture to lead readers forward, Viars provides practical measures to understand the important place "the past" is given in Scripture replace guilt and despair with forgiveness and hope turn failures into stepping stones for growth This motivating, compassionate resource is for anyone ready to review and release the past so that God can transform their behaviors, relationships, and their ability to hope in a future.

Japan at Nature's Edge-Ian Jared Miller 2013-07-01 Japan at Nature's Edge is a timely collection of essays that explores the relationship between Japan's history, culture, and physical environment. It greatly expands the focus of previous work on Japanese modernization by examining Japan's role in global environmental transformation and how Japanese ideas have shaped bodies and landscapes over the centuries. The immediacy of Earth's environmental crisis, a predicament highlighted by Japan's March 2011 disaster, brings a sense of urgency to the study of Japan and its global connections. The work is an environmental history in the broadest sense of the term because it contains writing by environmental anthropologists, a legendary Japanese economist, and scholars of Japanese literature and culture. The editors have brought together an unparalleled assemblage of some of the finest scholars in the field who, rather than treat it in isolation or as a unique cultural community, seek to connect Japan to global environmental currents such as whaling, world fisheries, mountaineering and science, mining and industrial pollution, and relations with nonhuman animals. The contributors assert the importance of the environment in understanding Japan's history and propose a new balance between nature and culture, one weighted much more heavily on the side of natural legacies. This approach does not discount culture. Instead, it suggests that the Japanese experience of nature, like that of all human beings, is a complex and intimate negotiation between the physical and cultural worlds. Contributors: Daniel P.
