The Chicago Plan and New Deal Banking Reform-Ronnie J. Phillips 2016-09-16 This work presents a comprehensive history and evaluation of the role of the 100 percent reserve plan in the banking legislation of the New Deal reform era from its inception in 1933 to its re-emergence in the current financial reform debate in the US.

The Chicago Plan Revisited-Mr.Jaromir Benes 2012-08-01 At the height of the Great Depression a number of leading U.S. economists advanced a proposal for monetary reform that became known as the Chicago Plan. It envisaged the separation of the monetary and credit functions of the banking system, by requiring 100% reserve backing for deposits. Irving Fisher (1936) claimed the following advantages for this plan: (1) Much better control of a major source of business cycle fluctuations, sudden increases and contractions of bank credit and of the supply of bank-created money. (2) Complete elimination of bank runs. (3) Dramatic reduction of the (net) public debt. (4) Dramatic reduction of private debt, as money creation no longer requires simultaneous debt creation. We study these claims by embedding a comprehensive and carefully calibrated model of the banking system in a DSGE model of the U.S. economy. We find support for all four of Fisher's claims. Furthermore, output gains approach 10 percent, and steady state inflation can drop to zero without posing problems for the conduct of monetary policy.

The Plan of Chicago-Carl Smith 2009-08-01 Arguably the most influential document in the history of urban planning, Daniel Burnham's 1909 Plan of Chicago, coauthored by Edward Bennett and produced in collaboration with the Commercial Club of Chicago, proposed many of the city's most distinctive features, including its lakefront parks and roadways, the Magnificent Mile, and Navy Pier. Carl Smith's fascinating history reveals the Plan's central role in shaping the ways people envision the cityscape and urban life itself. Smith's concise and accessible narrative begins with a survey of Chicago's stunning rise from a tiny frontier settlement to the nation's second-largest city. He then offers an illuminating exploration of the Plan's creation and reveals how it embodies the renowned architect's belief that cities can and must be remade for the better. The Plan defined the City Beautiful movement and was the first comprehensive attempt to reimagine a major American city. Smith points out the ways the Plan continues to influence debates, even a century after its publication, about how to create a vibrant and habitable urban environment. Richly illustrated and incisively written, his insightful book will be indispensable to our understanding of Chicago, Daniel Burnham, and the emergence of the modern city.

Planning Chicago-D. Bradford Hunt 2019-03-14 In this volume the authors tell the real stories of the planners, politicians, and everyday people who shaped contemporary Chicago, starting in 1958, early in the Richard J. Daley era. Over the ensuing decades, planning did much to develop the Loop, protect Chicago's famous lakefront, and encourage industrial growth and neighborhood development in the face of national trends that savaged other cities. But planning also failed some of Chicago's communities and did too little for others. The Second City is no longer defined by its past and its myths but by the nature of its emerging postindustrial future. This volume looks beyond Burnham's giant shadow to see the sprawl and scramble of a city always on the make. This isn't the way other history books tell the story. But it's the Chicago way.

Chicago Metropolis 2020-Elmer W. Johnson 2001 Discusses the plan for Chicago in the twenty-first century that covers all aspects of urban life, including education, suburban sprawl, transportation, and economic segregation.

The Chicago Plan & New Deal Banking Reform-Ronnie J. Phillips 1995 This work presents a comprehensive history and evaluation of the role of the 100 percent reserve plan in the banking legislation of the New Deal reform era from its inception in 1933 to its re-emergence in the current financial reform debate in the US.

Burnham of Chicago-Thomas S. Hines 2008-12-15 2009 marks the centennial of the influential Plan of Chicago. Designed by Daniel H. Burnham, coauthored by Edward Bennett and produced in collaboration with the Commercial Club of Chicago, the forward-thinking plan proposed many of the city's most distinctive features, including its lakefront parks and roadways, the Magnificent Mile, and Navy Pier. As a result, by the time he died in 1912, Burnham was one of the most famous architects in America as well as an internationally renowned city planner. Thomas S. Hines's book is at once both a biography of Burnham and a vivid portrait of the birth and growth of an American city. In commemoration of the historic anniversary of Burnham's Plan, this edition of Burnham of Chicago includes a new introduction by American history scholar, Neil Harris. "Indeed, the book as a whole is a model of the balanced portrait, sure of Burnham's importance but always conscious of his failings."—Paul Goldberger, New York Times Book Review "In every sense this is the definitive biography."—Harry Weese, Chicago Tribune "Professor Hines has written what may prove to be an epoch-making book in the study of American civilization."—Reyner Banham, Times Literary Supplement

Overcoming the Saving Slump-Annamaria Lusardi 2009-10-15 The great majority of working Americans are unprepared to face the difficult task of planning for retirement. In fact, the personal savings rate has been holding steady at zero for several years, down from 8 percent in the mid-1980s. Overcoming the Saving Slump explores the many challenges facing workers in the transition from a traditional defined benefit pension system to one that requires more individual responsibility, analyzing the considerable impediments to saving and evaluating financial literacy programs devised by employers and the government. Mapping the changing landscape of pensions and the rise of defined contribution plans, Annamaria Lusardi and others investigate new methods for stimulating saving and promoting financial education drawing on the experience of the United States as well as countries that have privatized their welfare systems, including Sweden and Chile. This timely volume pinpoints where human resources departments, the financial industry, and government officials have succeeded—or failed—in bridging the way to a new retirement system. As the workforce ages and more pensions disappear each second, Lusardi's findings will be invaluable for economists and anyone facing retirement.

The Insane Chicago Way-John Hagedorn 2015-08-19 Police, the press, and the public all see the kind of violence that besets the inner city today as irrational and basically about turf, revenge, or drugs. Renowned criminologist and expert on gangs, John Hagedorn here tells a very different and little-known story centered on the dramatic rise and fall of a Mafia-like Latino organization in Chicago called Spanish Growth & Development." Hagedorn's main informant is Sal Martino, 'an Italian Mafioso who became intimately involved with the In\$ane Family,' one of the factions of Spanish Growth & Development. Through Sal's first-hand account, Hagedorn shows that the violence was not a result of disorganized crime" but rather the outcome of SGD's prolonged demise. He gives us for the first time a detailed the history of SGDthe reasons for its creation, the uneasy alliances between gang families, the organization's reliance on bottom-up police corruption, and its ultimate collapse in a pool of blood at a 1999 peace" conference. Revealing the hidden and riveting stories of Chicago gangs' efforts to build structures ostensibly to reduce violence and to organize crime, of the integration of gang and mafia history, and of the central role of police corruption in Chicago's gangland,The In\$ane Chicago Way makes a powerful argument for the need to regard corruption as the bedrock of gang power. It dispels the notion that gang violence can be explained solely by ecological,

neighborhood-based processes and sheds light on the current gang situation in Chicago by laying bare its history while raising disturbing questions for researchers, policy-makers, and the public.

Blueprint for Disaster-D. Bradford Hunt 2009-08-01 Now considered a dysfunctional mess, Chicago's public housing projects once had long waiting lists of would-be residents hoping to leave the slums behind. So what went wrong? To answer this complicated question, D. Bradford Hunt traces public housing's history in Chicago from its New Deal roots through current mayor Richard M. Daley's Plan for Transformation. In the process, he chronicles the Chicago Housing Authority's own transformation from the city's most progressive government agency to its largest slumlord. Challenging explanations that attribute the projects' decline primarily to racial discrimination and real estate interests, Hunt argues that well-intentioned but misguided policy decisions—ranging from design choices to maintenance contracts—also paved the road to failure. Moreover, administrators who fully understood the potential drawbacks did not try to halt such deeply flawed projects as Cabrini-Green and the Robert Taylor Homes. These massive high-rise complexes housed unprecedented numbers of children but relatively few adults, engendering disorder that pushed out the working class and, consequently, the rents needed to maintain the buildings. The resulting combination of fiscal crisis, managerial incompetence, and social unrest plunged the CHA into a quagmire from which it is still struggling to emerge. *Blueprint for Disaster*, then, is an urgent reminder of the havoc poorly conceived policy can wreak on our most vulnerable citizens.

Old (Chicago) School, New Century-Scott Burns 2015 James Buchanan had long been a champion of the early Chicago school's emphasis on the essential role institutions play in framing the market process. In his post-2009 analysis, Buchanan used this "Old Chicago School" approach to argue that the Great Recession fundamentally represented not a market failure, per say, but a "constitutional failure." In particular, he echoed his Old Chicago mentors like Frank Knight and Henry Simons in arguing that it, like all previous financial crises, was primarily a failure of the rules governing our existing monetary-financial institutions. In this paper, I connect the dots in Buchanan's post-2009 analysis of the Great Recession and his reaffirmation of the need for "constitutional money" to his Old Chicago mentor's strikingly similar calls for a radical restructuring of the monetary-financial system in the Chicago Plan of the 1930s. Though Buchanan's 21st century resurrection of these ideas has yet to conjure up the academic support of his predecessors, their core proposal calling for an end to fractional reserve banking has experienced a strong revival since 2009.

Plans of Chicago-Robert Samuel Roche 2009 With exquisite illustrations, including full-color reproductions of Jules Guerin's famous watercolours, as well as original drawings by Aric Lasher, this title is the first in a series by a nonprofit foundation on Chicago architecture and urbanism. Its practical, viable proposals for city living chart a path for Chicago's future.

Plan of Chicago-Daniel Hudson Burnham 2017-09-12 Excerpt from *Plan of Chicago: Prepared Under the Direction of the Commercial Club, During the Years MCMVI, MCMVII, and MCMVIII* It should be understood, however, that such radical changes as are proposed herein cannot possibly be realized immediately. Indeed, the aim has been to anticipate the needs of the future as well as to provide for the necessities of the present: in short, to direct the development of the city towards an end that must seem ideal, but is practical. Therefore it is quite possible that when particular portions of the plan shall be taken up for execution, wider knowledge, longer' experience, or a change in local conditions may suggest a better solution; but, on the other hand. Planning as Persuasive Storytelling-James A. Throgmorton 1996-07 "Planning as Persuasive Storytelling is a revealing look at the world of political conflict surrounding the Commonwealth Edison Company's ambitious nuclear power plant construction program in northern Illinois during the 1980s. Examining the clash between the utility, consumer groups, community-based groups, the Illinois Commerce Commission, and the City of Chicago, Throgmorton argues that planning can best be thought of as a form of persuasive storytelling. A planner's task is to write future-oriented texts that employ language and figures of speech designed to construct constituencies that the planner's vision is both desirable and feasible. Though seeking to persuade, the planner must also remain open to transformation through honest engagement with contending stories. Juxtaposing stories about efforts to construct Chicago's electric future, *Planning as Persuasive Storytelling* suggests a shift in how we think about planning. In order to account for the fragmented and conflicted nature of contemporary American life and politics, that shift would be away from "science" and the "experts" and toward persuasive storytelling by diverse authors"--P. Wealth, Virtual Wealth and Debt-Frederick Soddy 2018-01-17 By the Nobel prize-winning chemist Frederick Soddy on monetary policy and society and the role of energy in economic systems. Soddy criticized the focus on monetary flows in economics, arguing that real wealth was derived from the use of energy to transform materials into physical goods and services. Soddy's economic writings were largely ignored in his time, but would later be applied to the development of ecological economics in the late 20th century

The Economic Thought of Henry Calvert Simons-G.R. Steele 2018-01-19 Drawing on years of research, Gerald Steele delves into the diverse ideas of Henry Simons, a neglected economist whose work in the 1930s on monetary and financial instability is extremely relevant to today's debates about commercial bank credit, the interdependence of fiscal and monetary policy, and financial regulation. Steele describes the emergence of the first Chicago school of economics and its distinctive difference to the School subsequently associated with the Monetarism of Milton Friedman, and shows how Simons provides the basis for what is now referred to as 'the fiscal theory of the price level' and how this differs from the monetarist attempt to control prices by controlling the supply of broad money. This book will be of interest to advanced students and researchers of the history of economic thought, economic history, macroeconomics and banking and finance.

A Great Leap Forward-Randall Wray 2020-01-17 *A Great Leap Forward: Heterodox Economic Policy for the 21st Century* investigates economic policy from a heterodox and progressive perspective. Author Randall Wray uses relatively short chapters arranged around several macroeconomic policy themes to present an integrated survey of progressive policy on topics of interest today that are likely to remain topics of interest for many years. Rejects neoclassical orthodoxy as the appropriate tool for understanding 21st century economic and social life Considers subjects such as innovation and technological progress Explores public institutions, global trade, and financial regulation

Judy Chicago-Judy Chicago 2019 As the first major monograph on the feminist artist Judy Chicago in nineteen years, this fully illustrated volume provides fresh perspectives by leading scholars. Many people know her famed *The Dinner Party*, installed as the centerpiece of the Sackler Center for Feminist Art at the Brooklyn Museum, but few know her other prescient bodies of work - on sex, birth, death, violence, the natural world, and more. Featuring her newest work, *The End*, as well as major examples from throughout her career, this fascinating, elegantly designed book offers a new examination of Chicago's wide-ranging artistic expression and powerful voice. The book is published on the occasion of the artist's eightieth birthday and an exhibition of new work at the National Museum of Women in the Arts, as well as the announcement of the Judy Chicago online archival portal. Contents: Acknowledgements; Who's Afraid of Judy Chigago?; In Conversation with Judy Chicago; Through Minimalist to Feminist; 'To Tell of Touch, to Touch by Telling': The Erotics of *The Dinner Party*; Gestures of Liberation: Smoke and Firework Performances, 1968-1974 Of Woman Born; Metamorphosis as Stasis in *PowerPlay* and the Holocaust Project; Two Tales of Herstoric Proportion; *The End*: A Meditation on Death and Extinction; Chronology; Selected Bibliography; Index. Published to accompany the exhibition *Judy Chicago: The End* which will be on view at the National Museum of Women in the Arts from September 2019 to January 2020. AUTHOR: Judy Chicago is an artist, writer, educator, and humanist whose work and life are models for an enlarged definition of art, an expanded role for the artist, and women's right to freedom

of expression. SELLING POINTS: \* Published to accompany a major exhibition of new work at the National Museum of Women in the Arts (September 2019-January 2020) \* The first major monograph on the artist in nineteen years \* The book focuses on key works and redefines her contributions to art history through new essays, an interview, and art and documentary images \* Judy Chicago was named one of Time magazine's 100 most influential people in 2018 240 colour images

No Small Plans-Gabrielle H. Lyon 2017 The Chicago Architecture Foundation's No Small Plans is a graphic novel that follows the neighborhood adventures of teens in Chicago's past, present and future as they wrestle with designing the city they want, need and deserve. The novel will be published in July 2017. It was inspired by the 1911 Wacker's Manual textbook that taught Chicago's young people about Daniel Burnham's 1909 Plan of Chicago. Over the next three years, CAF will work to give free copies of the novel to 30,000 teens and catalyze conversations in Chicago Public Schools and Chicago Public Libraries about what makes a good neighborhood.

The Red Atlas-John Davies 2017-10-17 From 1950 to 1990, the Soviet Army conducted a global topographic mapping program, creating large-scale maps for much of the world that included a diversity of detail that would have supported a full range of military planning. For big cities like New York, DC, and London to towns like Pontiac, MI and Galveston, TX, the Soviets gathered enough information to create street-level maps. What they chose to include on these maps can seem obvious like locations of factories and ports, or more surprising, such as building heights, road widths, and bridge capacities. Some of the detail suggests early satellite technology, while other specifics, like detailed depictions of depths and channels around rivers and harbors, could only have been gained by actual Soviet feet on the ground. The Red Atlas includes over 350 extracts from these Cold War maps, exploring their provenance and cartographic techniques as well as what they can tell us about their makers and the Soviet initiatives that were going on all around us.

Introduction to Planning History in the United States-Donald A. Krueckeberg 2018-01-16 This book is an introduction to the history of the city planning profession in the United States, from its roots in the middle of the nineteenth century to the present day. The work examines important questions of American planning history. Why did city planning develop in the manner it did? What did it set out to achieve and how have those goals changed? Where did planning thrive and who were its leaders? What have been the most important ideas in planning and what is their relation to thought and social development? By answering these questions, this book provides a general understanding for further study of the extensive literature of planning and urban history. Donald A. Krueckeberg divides this work into three historical periods: an initial period of independent but gradually converging concepts of a planned city; a second period of national organization, experimentation, and development; and a third period of implementation of planning ideas in nearly all levels and areas of urban policymaking. Krueckeberg begins with revealing the origins of modern planning in the movements for sanitary reform, civic art and beautification, classical revival in civic design, and neighborhood settlements and housing reform. A second section covers the institutionalization of the profession; the rise of zoning and comprehensive planning; influential figures of the period; and the new communities program of the New Deal. The book contains case studies and focuses on the role of the planner and the effectiveness of the profession. Krueckeberg concludes with a bibliography of planning history in the United States.

The Shock Doctrine-Naomi Klein 2014-10-02 Around the world in Britain, the United States, Asia and the Middle East, there are people with power who are cashing in on chaos; exploiting bloodshed and catastrophe to brutally remake our world in their image. They are the shock doctors. Thrilling and revelatory, The Shock Doctrine cracks open the secret history of our era. Exposing these global profiteers, Naomi Klein discovered information and connections that shocked even her about how comprehensively the shock doctors' beliefs now dominate our world - and how this domination has been achieved. Raking in billions out of the tsunami, plundering Russia, exploiting Iraq - this is the chilling tale of how a few are making a killing while more are getting killed.

Integrating the Inner City-Robert J. Chaskin 2015-11-13 The Chicago Housing Authority's Plan for Transformation repudiated the city's large-scale housing projects and the paradigm that produced them. The Plan seeks to normalize public housing and its tenants, eliminating physical, social, and economic barriers among populations that have long been segregated from one another. But is the Plan an ambitious example of urban regeneration or a not-so-veiled effort at gentrification? Is it resulting in integration or displacement? What kinds of communities are emerging from it? Chaskin and Joseph's book is the most thorough examination of the Plan to date. Drawing on five years of field research, in-depth interviews, and data, Chaskin and Joseph examine the actors, strategies, and processes involved in the Plan. Most important, they illuminate the Plan's limitations which has implications for urban regeneration strategies nationwide."

Domestic and Multinational Banking-Rae Weston 2012-05-25 This book examines the fundamental nature of banking in the economy of the 1970s and 80s, arguing that banking cannot be properly understood unless it is regarded as the retailing of financial services. In analysing the nature of banking the book demonstrates how banking might operate without regulatory constraints; surveys the patterns of regulatory constraint in a wide range of economies; analysis the effects of these various forms of constraint on the operation of a previously unregulated bank; examines the move to multinational banking; explores risks peculiar to multinational banking, whilst providing a diagrammatic illustration of those risks. When originally published this was one of the first books to treat banking from both a theoretical and empirical perspective and is unique in reviewing the case of a completely unregulated commercial bank and following the progression of banking through to the multinational stage.

The University of Chicago-John W. Boyer 2015-09-23 One of the most influential institutions of higher learning in the world, the University of Chicago has a powerful and distinct identity, and its name is synonymous with intellectual rigour. John W. Boyer presents a fascinating narrative of a legendary academic community, one that brings to light the nature of its academic culture and curricula, the experience of its students, its engagement with Chicago's civic community, and the conditions that have enabled the University to survive and sustain itself through decades of change.

Chicago Apartments-Neil Harris 2020-07-15 The Chicago lakefront is one of America's urban wonders. The ribbon of high-rise luxury apartment buildings along the Lake Michigan shore has few, if any, rivals nationwide for sustained architectural significance. This historic confluence of site, money, style, and development lies at the heart of the updated edition of Neil Harris's Chicago Apartments: A Century and Beyond of Lakefront Luxury. The book features more than one hundred buildings, stretching from south to north and across more than a century, each with its own special combination of design choice, floor plans, and background story. Harris, with the assistance of Teri J. Edelstein, proves to be an affable and knowledgeable tour guide, guiding us through dozens of buildings, detailing a host of inimitable development histories, design choices, floor plans, and more along the way. Of particular note are recent structures on the Chicago River and south of the Loop that are proposing new definitions of comfort and extravagance. Featuring nearly 350 stunning images and a foreword by renowned Chicago author Sara Paretsky, this new edition of Chicago Apartments offers a wide-ranging look inside some of the Windy City's most magnificent abodes.

Making the Mission-Ocean Howell 2015-11-17 When and how does a neighborhood become a political actor? How does a collective identity take shape out of local politics? In his fantastically precise and well-illustrated study of the Mission District in San Francisco, Ocean Howell draws together the perspectives of formal and informal groups, as well as city officials and district residents, as they together work and occasionally fight to establish the bounds of "the public," "the public interest," and "what the neighborhood wants." Howell also articulates the development and nuances of Latino political power in the district, bringing out stories and context that have received little attention until now. In the process, he shows that national narratives about how cities grow and change are always insufficient; everything is always shaped by local actors and concerns.

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition-Kate L. Turabian 2013-04-09 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students

understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

Planning Matter-Robert A. Beauregard 2015-11-03 For a profession concerned overwhelmingly with the material world whether houses, offices, highways, streets, parks, or sewer systems urban planning has a poor understanding of materiality, perhaps because, as Robert Beauregard says, Plans erase what exists in order to propose what has been imagined. Too often planners position their work as fact-driven, purely administrative, and allegedly devoid of politics, or they fail to grapple adequately with the social and physical complexities of the real world. In this ambitious and provocative book Beauregard sets out to situate urban planning and its ways of knowing, being, and behaving within a new materialist framework that acknowledges the inevitable insufficiency of our representations of reality while also engaging more holistically with the world in all its diversity human and nonhuman actors alike."

Where Does Money Come From?-Josh Ryan-Collins 2014-01-31 Based on detailed research and consultation with experts, including the Bank of England, this book reviews theoretical and historical debates on the nature of money and banking and explains the role of the central bank, the Government and the European Union. Following a sell out first edition and reprint, this second edition includes new sections on Libor and quantitative easing in the UK and the sovereign debt crisis in Europe.

The Turnaway Study-Diana Greene Foster 2021-06 "A groundbreaking and illuminating look at the state of abortion access in America and the first long-term study of the consequences-emotional, physical, financial, professional, personal, and psychological-of receiving versus being denied an abortion on women's lives"--

Beyond Burnham-Joseph P. Schwieterman 2009 Beyond Burnham provides a fascinating account of a century of visionary planning for metropolitan Chicago. From Daniel Burnham and Edward Bennett's famed 1909 Plan of Chicago to the push for superhighways and airports to battles over urban sprawl, the book showcases an illustrated portrait of the big personalities and the "big plans" they espoused. The human face of planning appears in the interplay between public officials and citizen advocates. Powerful institutions--the Chicago Plan Commission and Regional Transportation Authority, among others--emerge to promote metropolitan goals. Some efforts succeed while others fail, but the work of planners lives on in efforts to shape new visions for the region's future.

Lakefront-Joseph D. Kearney 2021-05-15 How did Chicago, a city known for commerce, come to have such a splendid public waterfront—its most treasured asset? Lakefront reveals a story of social, political, and legal conflict in which private and public rights have clashed repeatedly over time, only to produce, as a kind of miracle, a generally happy ending. Joseph D. Kearney and Thomas W. Merrill study the lakefront's evolution from the middle of the nineteenth century to the twenty-first. Their findings have significance for understanding not only Chicago's history but also the law's part in determining the future of significant urban resources such as waterfronts. The Chicago lakefront is where the American public trust doctrine, holding certain public resources off limits to private development, was born. This book describes the circumstances that gave rise to the doctrine and its fluctuating importance over time, and reveals how it was resurrected in the later twentieth century to become the primary principle for mediating clashes between public and private lakefront rights. Lakefront compares the effectiveness of the public trust idea to other property doctrines, and assesses the role of the law as compared to more institutional developments, such as the emergence of sanitary commissions and park districts, in securing the protection of the lakefront for public uses. By charting its history, Kearney and Merrill demonstrate that the lakefront's current status is in part a product of individuals and events unique to Chicago. But technological changes, and a transformation in social values in favor of recreational and preservationist uses, also have been critical. Throughout, the law, while also in a state of continual change, has played at least a supporting role.
