

# The Child Clinicians Report Writing Handbook

The Child Clinician's Report-Writing Handbook, Second Edition- Ellen Braaten 2019-09-18 Now revised and updated, this indispensable tool streamlines the process of conducting child and adolescent assessments and producing high-quality reports. In a convenient large-size format, the book is filled with interview questions and reproducible forms for collecting pertinent information from children, parents, and teachers; wording to describe more than 100 commonly used tests; and menus of terms and phrases for each section of a report. Formats and writing tips are provided for diagnostic, personality, and neuropsychological reports; treatment plans; progress notes; and more. Other user-friendly features include lists of medications and abbreviations and recommended print and online resources for professionals and parents. Purchasers get access to a Web page where they can download and print the reproducible materials. New to This Edition \*Revised throughout for DSM-5 and ICD-10-CM. \*Includes the most current test batteries and rating scales. \*Updated resources for professionals and parents. \*Reproducible materials now available online.

The Child Clinician's Report-writing Handbook- Ellen Braaten 2007-02-08 "What an incredible resource Braaten has written what is clearly the most comprehensive child assessment handbook available. This indispensable book carefully walks the clinician through the entire assessment process and covers all conceivable areas of inquiry. This is an essential guide for the beginning practitioner and one that is sure to become a mainstay on every child clinicians bookshelf." --Lee A. RosÉn, PhD, Colorado State University

Neuropsychological Report Writing-Jacobus Donders 2016-02-03

All neuropsychologists need to know how to produce evidence-based reports. This book brings together experts to provide an in-depth guide to high-quality report writing in a range of contexts, including evaluations of older adults, psychiatric patients, those with complex medical conditions, schoolchildren, and others. It reviews the fundamental elements of a clinical neuropsychological report and shows how to tailor findings, conclusions, and recommendations to particular audiences, such as referring physicians, school professionals, and legal decision makers. Of special utility, every chapter features excerpts of sample reports, including examples of strong and poor documentation of the same material.

Essentials of Assessment Report Writing-W. Joel Schneider  
2018-08-24 The bestselling guide to reporting writing, updated and reworked for today's practice Essentials of Assessment Report Writing offers effective solutions to the creation of reader-friendly, yet targeted, psychological, and educational assessment reports. Parents, clinicians, clients, and other readers need more than test-by-test descriptions—they need an accessible analysis of the entire situation to determine their next steps. This book provides clear guidance for busy practitioners seeking ways to improve their report writing skills. With a focus on current practice, this new second edition covers DSM-5 updates and the latest assessment instruments including the WJ IV, WISC-V, WAIS-IV, KTEA-3, and the CAS2. New discussion includes advice on tailoring the report to the audience, and annotated case reports provide illustrative models of effective report styles, interpretation, and analysis. Key concepts are highlighted for quick reference throughout, and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field, in both content and style; there is no definitive "standard," but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide

high-quality, accessible reports. Integrate assessment results to provide a person-centered report Identify and navigate critical decision points in the interpretive process Write efficiently yet effectively while enhancing the reader's experience Provide an accurate, informative, and readable assessment report Incorporate practical recommendations to address the referral concerns Expertly-conducted assessments should culminate with a carefully constructed analysis that provides direction via clear communication. Because this report will be used to inform treatment, intervention, and ultimately, the client's quality of life—it is critical that it provides clear, informative guidance in a way that readers can understand. Essentials of Assessment Report Writing provides comprehensive guidelines for navigating through the report writing process.

Clinician's Thesaurus, 8th Edition-Edward L. Zuckerman  
2019-04-16 Hundreds of thousands of students and early-career professionals have relied on this authoritative report-writing tool, now updated for DSM-5/ICD-10-CM and newer types of evaluations. In a convenient large-size format with lay-flat binding, the book covers nearly all areas of concern addressed in intakes, evaluations, treatment plans, progress notes, and closing summaries. The user seeking the right wording for a clinical document can skim and select from thousands of technical terms, behavioral descriptors, and standard statements. Also provided are interview questions for almost every symptomatic behavior, a huge collection of mental status questions, a reproducible Mental Status Evaluation summary form, and links to hundreds of Internet resources. The periodically updated companion website offers all the URLs from the book, the reproducible forms, and a handy reference on current psychiatric medications. New to This Edition \*A list of all psychiatric ICD-10 diagnoses (all of the codes in DSM-5, plus many more), including Z codes essential to a comprehensive biopsychosocial evaluation. \*Sample evaluation report keyed to the book's chapters. \*Sections on additional

clinical issues: intimate partner violence, gender identity, human trafficking, recovery-oriented language, and more. \*Many more Internet links, including a wide variety of screening and assessment tools. See also *The Paper Office for the Digital Age, Fifth Edition*, by Edward L. Zuckerman and Keely Kolmes, which provides the essential record-keeping and risk-reduction tools that every psychotherapy practice needs.

Personality Assessment-Robert P. Archer 2011-05-20 Personality Assessment provides an overview of the most popular self-report and performance-based personality assessment instruments. Designed with graduate-level clinical and counseling psychology programs in mind, the book serves as an instructional text for courses in objective or projective personality assessment. It provides coverage of eight of the most popular assessment instruments used in the United States—from authors key in creating, or developing the research base for these test instruments. The uniquely informed perspective of these leading researchers, as well as chapters on clinical interviewing, test feedback, and integrating test results into a comprehensive report, will offer students and clinicians a level of depth and complexity not available in other texts.

Psychological Report Writing Assistant-Gary Groth-Marnat 2013-10-08 Expert Report Writing Software—provides a step-by-step guide to writing clinically sound and rich psychological reports The Psychological Report Writing Assistant software is a highly interactive program that guides the report writer through all phases of writing a report that is comprehensive, includes integrated interpretation, uses everyday language, and answers the referral questions. Key features include: A composition screen with links to resources to facilitate report writing Sample reports with links to guidelines on how to write sections of the report A comprehensive menu of treatment recommendations Search function to identify problem phrases with suggestions for alternative wording Compatible with Microsoft® Windows

Blending the best of science with an appreciation for the art of doing clinical work, the accompanying guide: Describes six core qualities of an optimal psychological report Provides an overview of cognitive, neuropsychological, personality, psychoeducational, and forensic reports Offers guidelines for formatting and completing various sections of a report Discusses recommendations for treatment and for tailoring the report to the individual Includes instructions for navigating the software Filling the need for an easy-to-use, intuitive tool for organizing and writing relevant psychological reports, Psychological Report Writing Assistant will help you quickly and easily create thorough and complete psychological reports.

Clinical Assessment of Child and Adolescent Personality and Behavior-Paul J. Frick 2020-06-11 The fourth edition of this textbook offers a scientific and practical context within which to understand and conduct clinical assessments of children's and adolescent's personality and behavior. The new edition ensures that the content is relevant to diagnostic criteria for major forms of child and adolescent psychopathology in the 5th edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5). It provides updated information on specific tests and discusses advances in research that have occurred since the last edition that are relevant for assessing the most common forms of psychopathology shown by children and adolescents. The volume is unique in providing both the scientific and ethical basis to guide psychological testing, as well as providing practical advice for using specific tests and assessing specific forms of psychopathology. This new edition: Highlights how current trends in psychological classification, such as the DSM-5 and the Research Domain Criteria, should influence the clinical assessment of children and adolescents. Provides updates to professional standards that should guide test users. Discusses practical considerations in planning and conducting clinical assessments. Evaluates the most recent editions of common tests

used in the clinical assessment of child and adolescent personality and behavior. Provides an overview of how to screen for early signs of emotional and behavioral risk for mental problems in children and adolescents. Discusses practical methods for integrating assessment information collecting as part of a clinical assessment. Uses current research to guide clinical assessments of children with Attention-deficit/Hyperactivity Disorder, conduct problems, depression, anxiety, and autism spectrum disorder. Clinical Assessment of Child and Adolescent Personality and Behavior is a valuable updated resource for graduate students as well as veteran and beginning clinicians across disciplines, including school, clinical child, developmental, and educational psychology; psychiatry; counseling; and social work; as well as related disciplines that provide mental health and educational services to children and adolescents.

Writing Psychological Reports-Greg J. Wolber 2002 This new second edition brings the same refreshing matter-of-fact guidance that made the first edition so popular with both students and professionals. Although the suggested format for psychological evaluations remains essentially the same, the authors have updated and expanded several sections within that format to enhance the quality of the evaluation report. A new section, Notification of Purpose and Limits of Confidentiality, has been added and new material on background information and the use of collateral information has been included. New examples have been added to supplement and clarify the text and a new example of a full report is presented. The Recommendations section has also been modified to incorporate specific strengths and problem areas. This book offers a wealth of descriptive information, organizing questions, guidelines, and other strategic information to make your written report as clear, comprehensive, and error free as possible.

Clinician's Thesaurus, 7th Edition-Edward L. Zuckerman  
2012-03-12 This book has been replaced by Clinician's Thesaurus,

8th Edition, ISBN 978-1-4625-3880-5.

Essentials of Assessment Report Writing-Elizabeth O.

Lichtenberger 2012-06-12 Instructive guide to preparing informative and accurate assessment reports for a variety of individuals and settings Assessment reports are central to the diagnostic process and are used to inform parents, clients, and clinicians, among others, about academic problems, personality functioning, neuropsychological strengths and weaknesses, behavioral problems, and the like. Essentials of Assessment Report Writing provides handy, quick-reference information, using the popular Essentials format, for preparing effective assessment reports. This book is designed to help busy mental health professionals quickly acquire the knowledge and skills they need to write effective psychological assessment reports. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. This practical guide focuses on efficiently and effectively communicating referral and background information, appearance and behavioral observations, test results and interpretation, summary and diagnostic impressions, and treatment recommendations. The authors provide examples of both good and bad case report writing and highlight ethical issues and topics relevant to presenting feedback. Essentials of Assessment Report Writing is the only pocket reference illustrating how to prepare an effective assessment report.

Essentials of Assessment Report Writing-W. Joel Schneider 2018-09-19 The bestselling guide to reporting writing, updated and reworked for today's practice Essentials of Assessment Report Writing offers effective solutions to the creation of reader-friendly, yet targeted, psychological, and educational assessment reports. Parents, clinicians, clients, and other readers need more than test-by-test descriptions—they need an accessible analysis of the entire situation to determine their next steps. This book

provides clear guidance for busy practitioners seeking ways to improve their report writing skills. With a focus on current practice, this new second edition covers DSM-5 updates and the latest assessment instruments including the WJ IV, WISC-V, WAIS-IV, KTEA-3, and the CAS2. New discussion includes advice on tailoring the report to the audience, and annotated case reports provide illustrative models of effective report styles, interpretation, and analysis. Key concepts are highlighted for quick reference throughout, and end-of-chapter questions help reinforce understanding. Reporting styles vary widely within the field, in both content and style; there is no definitive "standard," but many reports fail to reflect best practices and therefore prove less than useful to the reader. This book provides expert guidance throughout the reporting process to help practitioners provide high-quality, accessible reports. Integrate assessment results to provide a person-centered report Identify and navigate critical decision points in the interpretive process Write efficiently yet effectively while enhancing the reader's experience Provide an accurate, informative, and readable assessment report Incorporate practical recommendations to address the referral concerns Expertly-conducted assessments should culminate with a carefully constructed analysis that provides direction via clear communication. Essentials of Assessment Report Writing provides comprehensive guidelines for navigating through the report writing process.

Writing Clinical Reports-Kenneth R. Hammond 1953

Psychological Assessment and Report Writing-Karen Goldfinger

2013-04-09 Outlining a step-by-step assessment model,

Psychological Assessment and Report Writing, Second Edition

covers five key topics central to psychological assessment:

understanding the context of a referral; determining what data is

needed to answer referral questions; gathering the data; integrating the data; and communicating the findings. Authors Karen Goldfinger and Andrew M. Pomerantz review each facet of psychological assessment and report writing—providing how-to instructions and alerting readers to a myriad of issues they must consider when conducting assessments in clinical, forensic, or educational environments. Filled with varied case examples that promote interest and meet instructional requirements, including one detailed case study that recurs throughout multiple chapters, the book uses sidebars and question and answer sections to encourage readers to consider their own case material and use critical thinking skills as they review each section of the model.

Principles of Forensic Report Writing-Michael Karson 2013 "In teaching forensic report writing to graduate students, we have been impressed with the available guides to writing specific kinds of reports. There are also some good summary articles on report writing and check-lists regarding what reports ought to cover. What we wanted, though, was a single volume that looked at report writing and reading as behaviors, informed by what we know about behavior, and that looked in-depth at the topic of applying general knowledge to particular situations. As is true for so many authors, this is the book we wish we'd read in graduate school. We offer these principles of forensic report writing as preparation for trainees, particularly those in Stages 1-3 of the developmental scheme described here, and also as reminders for professionals who have already written many reports"--Preface. (PsycINFO Database Record (c) 2013 APA, all rights reserved).

Language Disorders from Infancy Through Adolescence-Rhea Paul 2007-01-01 This text provides students with the information needed to properly assess childhood language disorders and decide appropriate treatments. The book covers language development from birth to adolescence.

Bright Kids Who Can't Keep Up-Ellen Braaten 2014-07-18 A book filled with vivid stories and examples, explains what low cognitive

processing speed in children actually is and provides practical tools for parents of children ages 5 to 18 to help their kids perform better in school, keep pace with friends and family and maintain a healthy self-esteem. Simultaneous. Hardcover available.

High-Impact Assessment Reports for Children and Adolescents-Robert Lichtenstein 2019-02-14 Assessment provides rich opportunities for understanding the needs of children and adolescents, yet reports are often hard for parents, teachers, and other consumers to comprehend and utilize. This book provides step-by-step guidelines for creating psychoeducational and psychological reports that communicate findings clearly, promote collaboration, and maximize impact. Effective practices for written and oral reporting are presented, including what assessment data to emphasize, how to organize reports and convey test results, and how to craft useful recommendations. In a large-size format with lay-flat binding for easy photocopying, the book includes sample reports, training exercises, and reproducible templates, rubrics, and forms. Purchasers get access to a Web page where they can download and print the reproducible materials. This book is in The Guilford Practical Intervention in the Schools Series, edited by T. Chris Riley-Tillman.

Psychoeducational Assessment and Report Writing-Stefan C. Dombrowski 2014-11-10 This textbook provides in-depth instruction for conducting psychoeducational assessments of children in grades K-12 and conveying results through detailed, well-written reports. It takes readers step by step through the assessment process - collecting data, writing reports, and communicating conclusions - for students with conditions spanning the range of IDEA classifications such as autism, learning disabilities, emotional disturbances, and conditions covered by Section 504. The book offers not only a broad understanding of assessment and communication skills, but also

of the ethical, legal, cultural, and professional considerations that come with psychoeducational evaluation. And its sample reports model clear, well-organized results accessible to parents and caregivers as well as teachers and colleagues. Key areas of coverage include: • Assessment basics: the testing environment and protocols, interviewing, and observation. • Report writing section by section, from reason for referral to summary and recommendations. • Guidelines for oral reporting, with case examples. • Special issues in psychoeducational assessment and report writing. • Sample psychoeducational reports using this framework. Psychoeducational Assessment and Report Writing is an essential text for graduate students, researchers, professors, and professionals in child and school psychology; assessment, testing, and evaluation; social work; and psychological methods/evaluation.

The Clinical Assessment of Children and Adolescents-Steven R. Smith 2015-09-07 This book highlights assessment techniques, issues, and procedures that appeal to practicing clinicians. Rather than a comprehensive Handbook of various tests and measures, The Clinical Assessment of Children and Adolescents is a practitioner-friendly text that provides guidance for test selection, interpretation, and application. With topics ranging from personality assessment to behavioral assessment to the assessment of depression and thought disorder, the leaders in the field of child and adolescent measurement outline selection and interpretation of measures in a manner that is most relevant to clinicians and graduate students. Each chapter makes use of extensive case material in order to highlight issues of applicability.

Handbook of Speech-language Pathology and Audiology- 1988  
Straight Talk about Psychological Testing for Kids-Ellen Braaten 2003-11-26 Braaten and Felopulos describe how the evaluation process occurs in children, including the role (if any) that testing plays in diagnosing and devising treatment plans for dyslexia,

ADHD, math and reading disorders, autism and Asperger syndrome, depression, anxiety, and other conditions.

The Handbook of Child and Adolescent Clinical Psychology-Alan Carr 2015-12-24 The third edition of the hugely successful Handbook of Child and Adolescent Clinical Psychology incorporates important advances in the field to provide a reliable and accessible resource for clinical psychologists. Beginning with a set of general conceptual frameworks for practice, the book gives specific guidance on the management of problems commonly encountered in clinical work with children and adolescents drawing on the best practice in the fields of clinical psychology and family therapy. In six sections thorough and comprehensive coverage of the following areas is provided:

Frameworks for practice  
Problems of infancy and early childhood  
Problems of middle childhood  
Problems of adolescence  
Child abuse  
Adjustment to major life transitions

Thoroughly updated throughout, each chapter dealing with specific clinical problems includes cases examples and detailed discussion of diagnosis, classification, epidemiology and clinical features. New material includes the latest advances in: child and adolescent clinical psychology; developmental psychology and developmental psychopathology; assessment and treatment programmes. This book is invaluable as both a reference work for experienced practitioners and as an up-to-date, evidence-based practice manual for clinical psychologists in training. The Handbook of Child and Adolescent Clinical Psychology is one of a set of 3 books published by Routledge which includes The Handbook of Adult Clinical Psychology: An Evidence Based Practice Approach, Second Edition (Edited by Carr & McNulty) and The Handbook of Intellectual Disability and Clinical Psychology Practice (Edited by Alan Carr, Christine Linehan, Gary O'Reilly, Patricia Noonan Walsh and John McEvoy).

The Child Molester-George W. Barnard 1989 Discussion of developmental factors relating to sexual deviancy, diagnostic

techniques, treatment procedures, a model residential treatment program. Presents a lengthy interview with a child molester, legal and ethical issues for the therapist of child molesters, and the forensic evaluation process. Annotation copyrighted by Book News, Inc., Portland, OR

Neuropsychological Report Writing-Jacobus Donders 2016-01-12

All neuropsychologists need to know how to produce evidence-based reports. This book brings together experts to provide an in-depth guide to high-quality report writing in a range of contexts, including evaluations of older adults, psychiatric patients, those with complex medical conditions, schoolchildren, and others. It reviews the fundamental elements of a clinical neuropsychological report and shows how to tailor findings, conclusions, and recommendations to particular audiences, such as referring physicians, school professionals, and legal decision makers. Of special utility, every chapter features excerpts of sample reports, including examples of strong and poor documentation of the same material.

Report Writing for Speech-language Pathologists-Grace Middleton 1992

Report Writing in Psychology and Psychiatry-Jack T. Huber 1961

How to Find Mental Health Care for Your Child-Ellen Braaten

2011 Parents whose children struggle with anxiety, depression, learning disorders, and attention problems must ask tough questions. Does my child need medication? How do I get the right diagnosis? How do I find the most competent therapist? What should I expect from treatment? Finding sound answers to those questions is the first step parents need to take to help their children understand, manage, and overcome their problems.

Handbook of Clinical Interviewing With Children-Michel Hersen

2007-08-08 The Handbook of Clinical interviewing with Children presents a combination of theory and practice plus concern with diagnostic entities for readers who work, or one day will work, with children (and their parents and teachers) in clinical settings.

The SAGE Encyclopedia of Intellectual and Developmental Disorders- Ellen Braaten 2018-01-29 According to the CDC “about one in six, or about 15%, of children aged 3 through 17 years have one or more developmental disabilities,” such as ADHD, autism spectrum disorders, cerebral palsy, intellectual disability, and learning disability. Intellectual disorders are characterized by significant limitations in both intellectual functioning and in adaptive behavior, which covers many everyday social and practical skills, impacting learning, reasoning, problem solving, and other cognitive processes. These disabilities originate before the age of 18 and continue across the life span. Developmental disorders are chronic disabilities that can be cognitive or physical or both. The disabilities appear before the age of 22 and are likely to progress across the lifespan. Some developmental disorders are largely physical issues, such as cerebral palsy or epilepsy. Some individuals may have a disorder that includes a physical and intellectual disability; for example, Down syndrome or fetal alcohol syndrome. Intellectual and developmental disorders are significant and growing issues that are studied across a number of disciplines. The SAGE Encyclopedia of Intellectual and Developmental Disorders is aimed at students interested in psychology, counseling, education, social work, psychiatry, health sciences, and more. This encyclopedia will provide an in-depth look at a wide range of disorders, alongside interventions, the latest research translated for an undergraduate audience, historical context, and assessment tools for higher-level students. We will take a truly interdisciplinary approach by also covering sociocultural viewpoints, policy implications, educational applications, ethical issues, and more.

Reporting in Counselling and Psychotherapy- Linda Papadopoulos 2003 Using clinical examples to guide the reader, and a detailed analysis of case study and process report writing, this unique hands-on guide will show how to present clear, concise and properly presented reports.

Handbook of Clinical Psychology in Medical Settings-Jerry J. Sweet 1991-04-30 For two decades, I have been responding to questions about the nature of health psychology and how it differs from medical psychology, behavioral medicine, and clinical psychology. From the beginning, I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology. I have repeatedly used an analogy to Newell and Simon's "General Problem Solver" program of the late 1950s and early 1960s, which had two major functional parts, in addition to the "executive" component. One was the "problem-solving core" (the procedural competence); the other was the representation of the "problem environment." In the analogy, the concepts, knowledge, and techniques of psychology constitute the core competence; the health system in all its complexity is the problem environment. A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system. Quite apparently, there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system. I hesitate to refer to them as areas of specialization, as the man who gave health psychology its formal definition, Joseph Matarazzo, has said that there are no specialties in psychology (cited in the editors' preface to this book).

Play Diagnosis and Assessment-Charles Schaefer 1991-04-08 Provides comprehensive coverage of the most up-to-date developments in the assessment and diagnosis of children through play. Included are a large assortment of scales and techniques currently in use or being developed. The articles offer both highly formalized scales with well-structured statistical data and more clinically-oriented techniques. Divided into six sections, it covers developmental and diagnostic play scales, parent-child interaction and peer interaction scales, projective play

techniques, and play therapy scales. Also included is an annotated bibliography of further reading at the end of each section. With over two dozen articles by researchers and practitioners, it offers an illuminating look at the current state of the art in play observation.

Clinical Assessment of Child and Adolescent Personality and Behavior-Paul J. Frick 2009-12-12 Psychologists offer an increasing variety of services to the public. Among these services, psychological assessment of personality and behavior continues to be a central activity. One main reason is that other mental health professionals often do not possess a high level of competence in this area. And when dealing with children and adolescents, psychological assessment seems to take on an even greater role. Therefore, it follows that comprehensive graduate-level instruction in assessment should be a high priority for educators of psychologists who will work with these youth. This textbook is organized into three sections, consistent with the authors' approach to teaching. Part I provides students with the psychological knowledge base necessary for modern assessment practice, including historical perspectives, measurement science, child psychopathology, ethical, legal, and cultural issues, and the basics of beginning the assessment process. Part II gives students a broad review of the specific assessment methods used by psychologists, accompanied by specific advice regarding the usage and strengths and weaknesses of each method. In Part III, we help students perform some of the most sophisticated of assessment practices: integrating and communicating assessment results and infusing assessment practice with knowledge of child development and psychopathology to assess some of the most common types of behavioral and emotional disorders in youth. A text focusing on assessment practices must be updated every four to six years to keep pace with advances in test development. For example, several of the major tests reviewed in the text, such as the Behavioral Assessment System for Children and the Child

Behavior Checklist, have undergone major revisions since the publication of the last edition making the current content outdated. Further, another major test, the Conners' Rating Scales, is undergoing substantial revisions that should be completed before publication of the next edition. Finally, the evidence for the validity of the tests and the recommendations for their appropriate use evolve as research accumulates and requires frequent updating to remain current. For example, there was a special issue of the *Journal of Clinical Child and Adolescent Psychology* published focusing on evidenced-based assessment of the major forms of childhood psychopathology that will need to be integrated into the chapters in Part 3. This latter point reflects an important trend in the field that should influence the marketing of the book. That is, there are several initiatives being started in all of the major areas of applied psychology (e.g., school, clinical, and counseling) to promote evidenced-based assessment practices. These initiatives have all emphasized the need to enhance the training of graduate students in this approach to assessment. This has been the orientation of this textbook from its first edition: that is, *Clinical Assessment of Child and Adolescent Personality and Behavior* has focused on using research to guide all recommendations for practice. The ability of the textbook to meet this training need should be an important focus of marketing the book to training programs across all areas of applied psychology.

American Book Publishing Record- 2007

Attachment Theory in Clinical Work with Children-David

Oppenheim 2011-03-03 Attachment research has tremendous

potential for helping clinicians understand what happens when

parent-child bonds are disrupted, and what can be done to help.

Yet there remains a large gap between theory and practice in this

area. This book reviews what is known about attachment and

translates it into practical guidelines for therapeutic work.

Leading scientist-practitioners present innovative strategies for

assessing and intervening in parent-child relationship problems; helping young children recover from maltreatment or trauma; and promoting healthy development in adoptive and foster families. Detailed case material in every chapter illustrates the applications of research-based concepts and tools in real-world clinical practice.

The Psychological Assessment of Children-James O. Palmer 1983
