Play Therapy Treatment Planning and Interventions-Kevin John O'Connor 2012-10-31
Play Therapy: Treatment Planning and Interventions: The Ecosystemic Model and Workbook, 2e, provides key information on one of the most rapidly developing and growing areas of therapy. Ecosystemic play therapy is a dynamic integrated therapeutic model for addressing the mental health needs of children and their families. The book is designed to help play therapists develop specific treatment goals and focused treatment plans as now required by many regulating agencies and third-party payers. Treatment planning is based on a comprehensive case conceptualization that is developmentally organized, strength-based, and grounded in an ecosystemic context of multiple interacting systems. The text presents guidelines for interviewing clients and families as well as pretreatment assessments and data gathering for ecosystemic case conceptualization. The therapist's theoretical model, expertise, and context are considered. The book includes descriptions of actual play therapy activities organized by social-emotional developmental levels of the children. Any preparation the therapist may need to complete before the session is identified, as is the

outcome the therapist may expect. Each activity description ends with a suggestion about how the therapist might follow up on the content and experience in future sessions. The activity descriptions are practical and geared to the child. Case examples and completed sections of the workbook are provided. It provides the therapist with an easy-to-use format for recording critical case information, specific treatment goals, and the overall treatment plan. Workbook templates can be downloaded and adapted for the therapist's professional practice. Presents a comprehensive theory of play therapy Clearly relates the theoretical model to interventions Provides examples of the application of both the theory and the intervention model to specific cases Describes actual play therapy activities Workbook format provides a means of obtaining comprehensive intake and assessment data Case examples provided throughout

Person-Centered Recovery Planner for Adults with Serious Mental Illness-Catherine N. Dulmus 2013-08-05 “Both timely and critical for recovery-oriented practice, this book provides practitioners with the focused, essential knowledge and skills to be truly person-centered and recovery-oriented when supporting an individual’s recovery journey. Dulmus and Nisbet have provided the field with an overdue practical resource. Making the recovery planner’s best practice individual recovery plan format available on Website is brilliant, and every agency will want to incorporate it into its EMR.” —Linda Rosenberg, President/CEO National Council for Community Behavioral Healthcare, Washington, D.C. “This is a practical and useful tool for case managers and community support workers who are assisting people with serious mental illness toward recovery. Working in a person-centered fashion is what our consumers want and expect, but to date, there have been few published tools with practical value for frontline staff. This resource is timely and relevant.” —Michael F. Hogan, PhD Hogan Health Solutions, Delmar, New York; former NYS Commissioner of Mental Health and Chair of the President’s New Freedom Commission on Mental Health, 2002–2003 Proven guidance for creating effective person-centered plans that facilitate the recovery process for individuals with serious mental illness Recent national and international mental health policy is

promoting service delivery models that incorporate person-centered and recovery-oriented approaches, in which individuals are in the lead role, defining their own goals for their individualized recovery plans. *Person-Centered Recovery Planner for Adults with Serious Mental Illness* provides mental health practitioners with a useful resource to implement person-centered planning within a recovery framework when working with individuals with a serious mental illness. Providing a succinct overview of the historical roots, philosophy, and practice of person-centered recovery, *Person-Centered Recovery Planner for Adults with Serious Mental Illness* is organized around the three stages of recovery—Beginnings, Moving Forward, and Leaving Your Practitioner Behind—yet still allows both the individual and practitioner to revisit any of the three stages during the ebb and flow of an individual’s recovery journey. Sample recovery plans are included, covering the individual’s status, personal priorities, short-term objectives, and recovery steps, and are organized around common recovery goals including: Self-advocacy Family relationships Health and wellness Community involvement Stress management Relapse prevention Personal crisis planning Transportation Social relationships Meaningful activities Life skills A companion Website provides all of the plans found in the book in an easily customizable word-processing format. *Person-Centered Recovery Planner for Adults with Serious Mental Illness* assists practitioners in becoming effective person-centered facilitators and advocates for recovery that meaningfully supports individuals in achieving their hopes and dreams.
