

The Chinese Economy A Bibliography Of Works In English

China Bibliography-Harriet Thelma Zurndorfer 1995 This guide to bibliographical scholarship on China aims to summarize the contents of current reference publications on China from all disciplines and to show how they may be used in conjunction with the 'classical tools of sinology', e.g. "Tz'u-hai."

The Economy of Communist China-Chu-yuan Cheng 1971

The Economy of Communist China, 1949-1969-Chu-yüan Cheng 1971

Contemporary China-E. Stuart Kirby 1968

Bibliography of Modern China- 1951

The Economy of Mainland China, 1949-1963-Nai-ruenn Chen 1963

Bibliography of ASEAN-China Relations- 2006 Contains a list of titles in English covering relations between ASEAN and China. Titles cover topics such as bilateral relations, economic relations, finance and investment, the Greater Mekong Subregion, maritime issues and territorial disputes, socio-cultural issues, and trade relations.

Growing Out of the Plan-Barry Naughton 1996-09-30 This is a comprehensive study of China's economic reforms, from their beginnings at the end of 1978 through the completion of many of the initial reform measures during 1993. The features of Chinese reform that differ from the former USSR are highlighted.

China's Economic Reforms and Its International Economic Relations-Wenguo Cai 1993 SCOTT: From the John Holmes Library Collection.

An Annotated Bibliography of Selected Works about Republic of China-Karen Siu-chu Lee 1981

The Chinese Economy-Solomon Adler 2013-09-13 First published in 1957. This volume provides a broad survey of economic progress in China from 1949 to 1952 and covers the historical background, China's economic system, industrialisation and planning, the first Five Year Plan in industry, agriculture, transport, commerce and finance, education and health and foreign trade. The work is supplemented with an extensive bibliography, maps and statistical tables.

Economic Thought in Modern China-Margherita Zanasi 2020-04-30 Zanasi argues that notions of market and consumption linked to economic liberalism emerged earlier in China than in Europe.

Chinese Publications in the Collections of the National Agricultural Library- 1989

The Chinese Economy, second edition-Barry J. Naughton 2018-03-16 The new edition of a comprehensive overview of the modern Chinese economy, revised to reflect the end of the "miracle growth" period. This comprehensive overview of the modern Chinese economy by a noted expert on China's economic development offers a quality and breadth of coverage not found in any other English-language text. In The Chinese Economy, Barry Naughton provides both a broadly focused introduction to China's economy since 1949 and original insights based on his own extensive research. This second edition has been thoroughly revised to reflect a decade of developments in China's economy, notably the end of the period of "miracle growth" and the multiple transitions it now confronts—demographic, technological, macroeconomic, and institutional. Coverage of macroeconomic and financial policy has been significantly expanded. After covering endowments, legacies, economic systems, and general issues of economic structure, labor, and living standards, the book examines specific economic sectors, including agriculture, industry, technology, and foreign trade and investment. It then treats financial, macroeconomic, and environmental issues. The book covers such topics as patterns of growth and development, including population growth and the one-child family policy; the rural and urban economies, including rural industrialization and urban technological development; incoming and outgoing foreign investment; and environmental quality and the sustainability of growth. The book will be an essential resource for students, teachers, scholars, business practitioners, and policymakers. It is suitable for classroom use for undergraduate or graduate courses.

Oxford Bibliographies-

An Introduction to the Chinese Economy-Rongxing Guo 2011-04-06 This comprehensive overview of the modern Chinese economy by a noted expert from China offers a quality and breadth of coverage. In this book, the author provides an introduction to China's economy since 1949 and original insights based on his own extensive research. The book sets out to analyze and compare the operational mechanisms of the Chinese economy between the pre- and post-reform periods and through national, regional and local dimensions. Both positive and negative consequences of the Chinese economic transformation have been clarified. A multiregional comparison of the Chinese economy is conducted in terms of natural and human resources, institutional evolution, as well as economic and social performances. At last, some key issues relating to the inherent operational mechanisms of and the dynamic patterns of the Chinese economy are also discussed.

An Economic History of China-Richard von Glahn 2016-03-10 The first comprehensive study of China's economic development across 3,000 years of history to be published in English.

The Political Economy of Competition Law in China-Wendy Ng 2017-12-31 The Political Economy of Competition Law in China provides a unique, multifaceted perspective of China's anti-monopoly law.

Quarterly Bulletin of Chinese Bibliography- 1937

Market in State-Yongnian Zheng 2018-09-06 Uses the framework of 'market in state', to argue that the Chinese economy is state-centered, dominated by political principles over economic principles.

A Bibliographical Guide to Japanese Research on the Chinese Economy (1958-1970)-William P. J. Hall 1972 This bibliography has been published in the hope that it will serve as a guide for non-Japanese speaking scholars of China's economy who wish to make use of the large volume of research done on the Chinese economy by Japanese scholars.

Area Bibliography of China-Richard T. Wang 1997 A combination of scholarly, commercial, and popular interests has generated a large quantity of literature on every aspect of Chinese life during the past two decades.

This bibliography reflects these combined interests; it is broken up into sections by subject headings, and cross-references refer the researcher to related topics.

The Cultural Revolution in China-James C.F. Wang 2018-09-18 The Cultural Revolution in China generated a cascade of commentaries and interpretations on the development and meaning of the upheaval. Many students and researchers have found it difficult to locate and identify literature on the period. This bibliography, first published in 1976, corrects this situation. It lists all books, monographs and journal articles in English on the Cultural Revolution, each annotated to show its relevance – a vital reference source.

Bibliography of Asian Studies and Languages-Pauline Haldane 1990

Development Centre Studies Chinese Economic Performance in the Long Run-Maddison Angus 1998-09-25 The study provides a major reassessment of the scale and scope of China's resurgence over the past half century, employing quantitative measurement techniques which are standard practice in OECD countries, but which have not hitherto been available for China.

The Ethnic Chinese and Economic Development in Vietnam-Tran Khanh 1993 Economic reforms in Vietnam have allowed its ethnic Chinese citizens to prosper, but growing Chinese economic strength harbours the seeds of political problems. The topic is also meshed with the larger concern of Sino-Vietnamese relations, which in the best of times can be coloured by a suspicion which goes back centuries. In the worst of times, as in 1978/79, both sides were engaged in open warfare. To understand the current situation, this book delves into the origins of Chinese settlement in Vietnam, tracking the flow of history through the major events which have shaped the Chinese mercantile community and made it what it is today. The most significant feature of this work is that it draws on Western, Russian, and Vietnamese sources, as well as the writer's own familiarity with the actual situation on the ground.

Printing and Book Culture in Late Imperial China-Cynthia J. Brokaw 2005-03-07 Despite the importance of books and the written word in Chinese society, the history of the book in China is a topic that has been little explored. This pioneering volume of essays, written by historians, art historians, and literary scholars, introduces the major issues in the social and cultural history of the book in late imperial China. Informed by many insights from the rich literature on the history of the Western book, these essays investigate the relationship between the manuscript and print culture; the emergence of urban and rural publishing centers; the expanding audience for books; the development of niche markets and specialized publishing of fiction, drama, non-Han texts, and genealogies; and more.

Americans and Chinese-Kwang-Ching Liu 1963 Research guide to American-Chinese relations during the 150 years after 1784.

The Dragon from the Mountains-Matthew McCartney 2021-09-30 Utilising the contemporary China-Pakistan relationship, economic theory and history, this book evaluates if China can spark Pakistan's growth.

The Chinese Economy-Robert Goehrlert 1995

China's Economic Revolution-Alexander Eckstein 1977-05-27 Professor Eckstein's book is a study of China's efforts to achieve rapid modernization of its economy within a socialist framework. Eckstein begins with an examination of economic development in pre-Communist China, specifically focusing on the resources and liabilities inherited by the new regime in 1949 and their effects on development policies. He then analyses the economic objectives of the Communist leadership - narrowing income disparities, maintaining full employment without inflation, and achieving rapid industrialization - and argues that the implementation of these goals required a potent ideology capable of providing a strong faith and motivational force for the mass mobilization of resources. In discussing the methods used by the government to achieve its aims, Eckstein makes a thorough evaluation of China's general framework for economic planning, particularly in regard to the distribution and pricing of farm products and the allocation of resources in the industrial sector. The author also evaluates the radical institutional changes in property relations and in economic organization in the People's Republic of China.

China's Long March Toward Rule of Law-Randall Peerenboom 2002-09-26 China has enjoyed considerable economic growth in recent years in spite of an immature, albeit rapidly developing, legal system, a system whose nature, evolution and path of development have been poorly understood by scholars. Drawing on his legal and business experience in China as well as his academic background in the field, Peerenboom provides a detailed analysis of China's legal reforms. He argues that China is in transition from rule by law to a version of rule of law, though most likely not a liberal democratic version as found in economically advanced countries in the West. Maintaining that law plays a key role in China's economic growth, Peerenboom assesses reform proposals and makes his own recommendations. In addition to students and scholars of Chinese law, political science, sociology and economics, this will interest business professionals, policy advisors, and governmental and non-governmental agencies as well as comparative legal scholars and philosophers.

Eastern Europe Bibliography- 1993 A selective work that documents the formative impact of the region's earlier history. Includes reference aids and bibliographies, general and descriptive histories of the land, peoples, and economies, and works depicting intellectual and cultural life.

How China Escaped Shock Therapy-Isabella M. Weber 2021-05-27 China has become deeply integrated into the world economy. Yet, gradual marketization has facilitated the country's rise without leading to its wholesale assimilation to global neoliberalism. This book uncovers the fierce contest about economic reforms that shaped China's path. In the first post-Mao decade, China's reformers were sharply divided. They agreed that China had to reform its economic system and move toward more marketization—but struggled over how to go about it. Should China destroy the core of the socialist system through shock therapy, or should it use the institutions of the planned economy as market creators? With hindsight, the historical record proves the high stakes behind the question: China embarked on an economic expansion commonly described as unprecedented in scope and pace, whereas Russia's economy collapsed under shock therapy. Based on extensive research, including interviews with key Chinese and international participants and World Bank officials as well as insights gleaned from unpublished documents, the book charts the debate that ultimately enabled China to follow a path to gradual reindustrialization. Beyond shedding light on the crossroads of the 1980s, it reveals the intellectual foundations of state-market relations in reform-era China through a *longue durée* lens. Overall, the book delivers an original perspective on China's economic model and its continuing contestations from within and from without.

Bibliography of Malaysian Demography-Swee-Hock Saw 2005 Bibliography of Malaysian Demography contains the most comprehensive and up-to-date list of 1,379 titles covering various aspects of the demography of Malaysia. The titles have been classified into twenty-one sections dealing with the more important topics such as census reports, population laws, internal migration, urbanization, ethnic composition, nuptiality, fertility, labour force, family planning, population problems, population ageing, and future population trends. Within each section, the titles have been arranged according to the alphabetical order of the author's name, and also included is an author index. The book is an indispensable source for researchers interested in the demography of Malaysia.

How China is Reshaping the Global Economy-Rhys Jenkins 2018-11-08 China's growing economic involvement in Sub-Saharan Africa and Latin America has been a source of major controversy. The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South-South cooperation. Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites. They also point to negative socio-economic, political, and environmental consequences. How China is Reshaping the Global Economy: Development Impacts in Africa and Latin-America throws more light on these controversies through a comparative study of China's impact on the two regions. It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia. How China is Reshaping the Global Economy looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing, commodity markets, the international presence of Chinese companies, and financial glows. It examines the different forms of Chinese economic involvement in Sub-Saharan Africa and Latin America, the main drivers, and economic, social, political, and environmental consequences. It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China.

The Chinese in Hawaii-Nancy Foon Young 1973

From Asian to Global Financial Crisis-Andrew Sheng 2009-05-16 This is a unique insider account of the new world of unfettered finance. The author, an Asian regulator, examines how old mindsets, market fundamentalism, loose monetary policy, carry trade, lax supervision, greed, cronyism, and financial engineering caused both the Asian crisis of the late 1990s and the global crisis of 2008-9. This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down. The study's main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated. The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change.

States and Social Revolutions-Theda Skocpol 2015-09-29 State structures, international forces, and class relations: Theda Skocpol shows how all three combine to explain the origins and accomplishments of social-revolutionary transformations. Social revolutions have been rare but undeniably of enormous importance in modern world history. States and Social Revolutions provides a new frame of reference for analyzing the causes, the conflicts, and the outcomes of such revolutions. It develops a rigorous, comparative historical analysis of three major cases: the French Revolution of 1787 through the early 1800s, the Russian Revolution of 1917 through the 1930s, and the Chinese Revolution of 1911 through the 1960s. Believing that existing theories of revolution, both Marxist and non-Marxist, are inadequate to explain the actual historical patterns of revolutions, Skocpol urges us to adopt fresh perspectives. Above all, she maintains that states conceived as administrative and coercive organizations potentially autonomous from class controls and interests must be made central to explanations of revolutions.

A Bibliography of Chinese Language Materials on the People's Communes-Wei-i Ma 1982 A comprehensive culling of information from some 137 Chinese journals on the topic of the commune, the most important administrative and planning unit in post-1949 China
