A Monastic Landscape-Dr Breda Lynch 2010-11-05 This publication is primarily a study of the various aspects of the use and situation of the land held by the Cistercian order in medieval Leinster. A number of key topics form the central elements of this study. These include an examination of the physical landscape into which the Cistercian order settled and the changes that occurred within that landscape during the later medieval era. The book examines whether the location of the monasteries indicated any underlying nuances or if the monks were happy to settle wherever they were given land. The involvement of the Cistercian order in the agricultural and economic life of Leinster is also examined. A breakdown of the acreage and land type that the monasteries possessed is presented and, in the final section the state of the monasteries immediately prior to the dissolution of the religious houses in the period 1536-41 is determined. With regard to this final section the areas of interest are in relation to the physical remains of the monasteries, the productivity or otherwise of the associated lands, the organisation and location of that land and the general attitude of the Cistercian monks at that particular time in history. There are many different areas of study that were examined. These include the identification of the lands, the land type and trends or differences in this type when compared with other parts of the country. The organisation of the land and the uses of it in relation to the monastery are an essential aspect of the work and is possible to identify economic and social change by discussing the uses of that land. The identification of granges and grange buildings was not originally intended as part of this work, however, research has allowed some evidence to emerge in relation to these buildings and is included. In relation to the approach, a short chapter outlining the origins of monasticism and the emergence of the Cistercian Order is included. A brief outline of the governing rules of the Cistercians is included in chapter one as is a short discussion on the spread of the order up to its arrival in Ireland. The second chapter is merely intended to give an idea of the pattern of the distribution of the Cistercian monasteries in Ireland. Most of the information is in table form giving the monastery, its location, date of foundation and founder. From this a number of observations are be made. The principal area of study is Leinster, therefore chapter three deals with this territory, discussing its boundaries, both internal and external and the kingdoms that made up medieval Leinster. The fact that the monasteries of Leinster were situated in very well defined territories means that, although the study is of Leinster as a whole, these smaller, somewhat independent units were still an important element in both the landscape and the social framework of the period. As such, it was necessary to ensure that each of these units was represented in any category of study. The location of the monasteries is the focus of the second portion of chapter three. Both the natural and man-made features of the landscape are examined here. The proximity of road and route ways to the monasteries has been mapped and discussed and any trends or patterns commented upon. Chapter four deals with the monastic complex and the associated features. It discusses the way in which the monastery and its lands were organised and the reasons for this. This chapter deals more with the day-to-day requirements of the monks and indicates how both the land and the buildings within the complex were equally important and key elements in the functioning of the monasteries. Following from chapter four, and keeping earlier comments in mind, the next portion of the work deals with other land that particular monasteries may have held at any time from foundation up to the time when the extents of the monastic possessions were drawn up. Instead of looking

The Cistercians in Wales-David Robinson (M.A., Ph. D.) 2006 This book is a comprehensive study of the churches and monastic buildings constructed by the Cistercian order in Wales. It covers fourteen abbeys situated across the principality and its borders, recognised by the Cistercians of the later Middle Ages as their 'province of Wales'. Welsh Cistercians have been comparatively well served by their historians, their buildings, however, have attracted far less scholarly attention. David Robinson's work will correct this imbalance, and represents the first attempt in modern times to assess and understand the above and below ground remains of this highly significant group of abbeys. The first part of the book is a survey of the available evidence, both of upstanding remains and excavated foundations, for all the known Cistercian buildings in Wales. This forms the basis for an analysis of their architectural characteristics and the identification of several distinct phases of growth and change. The book concludes with a gazetteer of the fourteen Cistercian abbeys which are the subject of the study, consisting of a comprehensive account of the archaeology and architecture of each site. The whole work is accompanied by newly commissioned plans, drawings and photographs.

Charter, Customs, and Constitutions of the Cistercians-Thomas Merton 2015-06-09 As master of novices for ten years (1955–1965) at the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton was responsible for the spiritual formation of young men preparing for monastic profession. In this volume, three related sets of Merton’s conferences on ancient and contemporary documents governing the lives of the monks are published for the first time:
• on the Carta Caritatis, or Charter of Charity, the foundational document of the Order of Cîteaux
• on the Consuetudines, the twelfth-century collection of customs and regulations of the Order
• on the twentieth-century Constitutions of the Order, the basic rules by which Merton and his students actually lived at the time
These conferences form an essential part of the overall picture of Cistercian monastic life that Merton provided as part of his project of “initiation into the monastic tradition” that is evident in the broad variety of courses that he put together and taught over the period of his mastership. As Abbot John Eudes Bamberger, ocso, himself a former student of Merton, notes in his preface to this volume, “The texts presented in this present book eventually gave rise to the Cistercian way of spiritual living that continues to contribute to the Church’s witness in this new millennium. This publication is a witness to the process of transformation that ensures the continuity of the Catholic monastic tradition that witnesses to the God who, as Saint Augustine observed is ‘ever old and ever new.’”

The Art and Architecture of the Cistercians in Northern England, C. 1300-1540-Michael Carter 2019 The Cistercian abbeys of northern England provide some of the finest monastic remains in all of Europe, and much has been written on their twelfth- and thirteenth-century architecture. The present study is the first in-depth analysis of the art and architecture of these northern houses and nunneries in the late Middle Ages, and questions many long-held opinions about the Order's perceived decline during the period c.1300-1540. Extensive building works were conducted between the fourteenth and sixteenth centuries at well-known abbeys such as Byland, Fountains, Kirkstall, and Rievaulx, and also at lesser-known houses including Calder and Holm Cultram, and at many convents of Cistercian nuns. This study examines the motives of Cistercian patrons and the extent to which the Order continued to enjoy the benefaction of lay society. Featuring over a hundred illustrations and eight colour plates, this book demonstrates that the Cistercians remained at the forefront of late medieval artistic developments, and also shows how the Order expressed its identity in its visual and material cultures until the end of the Middle Ages.

The Cistercians in Medieval Art-James France 1998 This fully illustrated work tells the remarkable story of the Cistercian Order through its art: illuminated manuscripts, paintings, stained glass, carvings and sculpture, gathered from throughout Europe, Britain, and Scandinavia. It reveals how the Cistercians shaped the religious, cultural and economic unity of medieval Europe and shows the continuity of cistercian practice across the centuries.

The Cistercian World-Pauline Matarasso 1993 Founded in 1098 in Citeaux, France, the Cistercian Order sought a return to strict asceticism and a life of poverty. By the end of the 12th century, there were 530 Cistercian abbeys in Europe, and the abbot St. Bernard had become one of the most influential writers of the period. This book contains his letters, sermons, and other works, as well as biographies of other Cistercians.

The Second Crusade and the Cistercians-M. Gervers 2016-04-30 No subject in medieval history is changing as rapidly as crusade studies. Even so, the Second Crusade has been oddly neglected. The present volume is the first ever to have been devoted to it in English and one of the few which has appeared in any language. Particular attention is paid to the key role played by St.Bernard and the Cistercians in this crusade and their relations with the Military Orders. An interdisciplinary approach is taken, incorporating history, art and music. The Volume contains unparalleled bibliography, listing over 700 primary and secondary sources.

A Monastic Landscape-Breda Lynch 2022-01-17 This book offers a fascinating insight into some of the majestic ruins that dot the Irish landscape. These Cistercian monasteries were repositories of prayer, learning, physical labour, exquisite stone structure and so much more. This text explores the monasteries, monastic estates and their management but, crucially, for the first time in many cases lists the lands associated with many of the Cistercian monasteries in the east and southeast of Ireland. This publication is not intended as a full history of the Order in medieval Ireland; rather it is compiled to provide a sound basis for the others to continue exploring this wonderful aspect of Irish history. Included is a convenient guide for visitors to Ireland. Listed are the most extensive remains, how to get there and what to see; a must have for any trip to Ireland.

Handmaid of the Lord-Armand-Jean de Rancé 2021-10-25 In this book, David N. Bell explores what Cistercian writers and preachers have said about Mary from the time of the founding fathers of the Order to Armand-Jean de Rancé, who introduced the Cistercian Strict Observance and who died in 1700. This work is divided into three parts. The first part presents some selective background material on Mary that is necessary for understanding where the Cistercian writers are coming from and the sources and ideas they are using. The next eight chapters, the second part of the book, examine the Marian ideas of Cistercian writers from Bernard of Clairvaux to a number of visionaries, both male and female, who take us to the very end of the thirteenth century. There is then a gap of more than three centuries—the reasons are given at the end of chapter 12—before we arrive at the birth of Armand-Jean de Rancé in 1626. The final chapters—part 3 of the book—summarize the life of Rancé, examine the place of Mary at La Trappe, and present annotated translations of Rancé’s five conferences for three Marian feasts: the Nativity of Mary, the Annunciation, and the Assumption.

Separate But Equal-James France 2012 The institution of the lay brotherhood was not original to the Cistercians, but they developed it to its fullest extent. Although lay, the conversi were under the same vows as monks and represented a new form of religious life. While monks were bound to the recitation of the Divine Office, the lay brothers were dedicated to a life of toil and acted as the monks' auxiliaries. Their contribution to the spiritual and material life of the Cistercian Order was immense. By consideration of tales from the exemplum literature, evidence from general chapter statutes, and information on the architectural provisions made for the lay brothers in the abbey and on the outlying granges, this book puts flesh on the bare bones of a life directed by their own Usages. The book is richly illustrated with images from manuscripts, stained glass, and architectural sculpture.

The Cambridge Companion to the Cistercian Order-Mette Birkedal Bruun 2013 Covering the whole history of the order, but focusing overwhelmingly on the medieval period, this companion offers an accessible synthesis of current scholarship on the Cistercian order. After a preliminary section tracing the history of the order, and in particular its rapid expansion throughout medieval Europe, topics are addressed such as the order's structures and institutions, the material world they inhabited and constructed, including agriculture, art and architecture, and the spiritual and intellectual world of the order, in particular its founder, Bernard of Clairvaux. Themes of withdrawal and engagement with the world run throughout the book, but are not seen as mutually exclusive, nor as representing "ideals and reality".

The Cistercians in Yorkshire (Classic Reprint)-J. S. Fletcher 2015-07-18 Excerpt from The Cistercians in Yorkshire I have no intention of disarming criticism when I say that in the following pages there is no offering either of scholarship or of the results of original research. What is here attempted is to give a plain account, for the benefit of the average reader, of the rise of the Cistercian Order, and of its establishment in Yorkshire; of the fortunes of the eight Yorkshire houses in poverty and in power; of the causes and events which led to their suppression; and of their actual fate in 1535-1540. I have relied throughout on the authorities referred to in an appended list: all are readily available to those who desire a more intimate and detailed acquaintance with the subject.
