

so-call "Collateralized Debt Obligations" - they actually sold this stuff to the American public and investors. Guess what? In 2008 the house of cards collapsed. Hillary Clinton is a "New World Order" proponent, and as such she has done major damage to Middle East stability and the safety of Israel. A war is more likely under her than anyone. New World Order people are looking for a one-world government and leader. That idea is as old as the Greek philosophers, and just as wrong. When you put absolute power in the hands of one person, that's a guarantee of corruption. Instead of deregulating and drawing on Alaska's oil, which would make America energy independent, Hillary Clinton relies on failed old-school policies to conquer and control Middle East oil. She has released billions to Iran, which they are using against us - they are the #1 terror state in the world. Obamacare will devastate the medical community. The USA has the highest debt level of any nation in the world. Under Clinton it will be astronomically higher. Hillary will raise taxes as never before, and run to the bankers for money. I won't spend time on her track record - Donald Trump has done that. We need to go into survivalist mode from a standpoint of major investment diversification, and right now.

Crash Proof-Peter D. Schiff 2007-02-26 The economic tipping point for the United States is no longer theoretical. It is a reality today. The country has gone from the world's largest creditor to its greatest debtor; the value of the dollar is sinking; domestic manufacturing is winding down - and these trends don't seem to be slowing. Peter Schiff casts a sharp, clear-sighted eye on these factors and explains what the possible effects may be and how investors can protect themselves. For more than a decade, Schiff has not only observed the U.S. economy, but also helped his clients reposition their portfolios to reflect his outlook. What he sees is a nation facing an economic storm brought on by growing federal, personal, and corporate debt, too-little savings, a declining dollar, and lack of domestic manufacturing. Crash-Proof is an informed and informative warning of a looming period marked by sizeable tax hikes, loss of retirement benefits, double digit inflation, even - as happened recently in Argentina - the possible collapse of the middle class. However, Schiff does have a survival plan that can provide the protection that readers will need in the coming years.

The Dollar and the Approaching Collapse of the United States and of the World Economies-Gustave G. De Albertis 1984-07

The Approaching Value Collapse of the U.S. Dollar & the Need for Financial International Integration- 1977*

Regal Dollar, a Ten Year History-William B. Z. Vukson 2004-01 As inflation became less prominent in the 1990s the stature of the US dollar rose replacing the traditional role of gold as a historical store of value. The collapse of the Cold War and the new geo-political realities of the new decade of the 1990s, elevated the dollar as the sole reserve currency and an unparalleled choice among investors during times of financial and economic crisis. While Europe began to mount a serious challenge to the global status of the dollar through the launch of the "Euro" it was the relationship with the Japanese yen that brought more questions than answers throughout the decade. This book presents a concise "living history" of the economic and financial life of the United States of America during one of the most revolutionary decades in modern memory (1990-2000).

The Collapse of America-Anthony Townsend 2008-06 America is falling, and may not be here without change, as we know it, in our life time, just as the U.S.S.R. suddenly fell in the 1990's, ruining that Super Power and ending the cold war, with hundreds of thousands of refugees having to flee Russia. With reports of human meat being sold as the currency [rubble] became worthless, as the U.S.S.R broke up into 15 independent States, unexpectedly, shocking the world. Indicative of the fact that it will happen to America, as banks made sub-prime loans to rape the housing industry and consumers with credit cards. And the manufacturing base being traded bit by bit, liquidating assets for cash, selling out the U.S. Preparing for the collapse of the U.S dollar, and the fall of the U.S. With the U.S. borrowing billions to fund tax cuts for the rich. Are we truly living in the last days of America, as a Super Power? All States without exception, have come to an end, as a historical norm. America is not mentioned in any Jewish, Christian, or Islamic, scriptures. Thus, it will not be here as we know it, in the end. But this is not a religious writing. Oil is only the first commodity to be affected with housing, money, food, loans and soon jobs following. Like China, and the EU, we need to stop the hoarding of so much money in the hands of so few. The gold standard is not the bases for our money since 1975. Meaning that paper and plastic have no intrinsic worth. If history repeats itself, and it does, we may have multiple civil wars, with Hawaii declaring independence in April as a protest over how the economy has been managed. With each State having its own National guard, and gangs and militia's, and KKK, armed to the teeth, we will start to hear phrases like who will pay for this and that debt. With maybe as many as ten different presidents, as the U.S. brakes up. Rumors of war.

We, the people, must demand a marshal plan for America, and not Europe, Japan, S. Korea, etc., and now maybe Iraq. All of us in America need to have access to the money we need, at low or no cost to save America, and optimize the multiplier effect: but it has to be spent in the U.S., to make America strong. Thus, we need to stop the banks and utility companies, etc. from hoarding. It is insanity to have multibillionaires, as they cannot spend these sums. We can re-order the economy or others will do it for us. This book will attempt to answer the question on how to stop such a fall, into a dark age. And instead have cooperation, and justice between all men and countries; Stopping this horrible cycle of systematic retardation of Mankind. America is the last best hope for Mankind, as America has polluted and consumed too much of this planet's resources becoming the Super Power it is, to have a new emerging Super Power, doing the same.

The Global Currency Power of the US Dollar-Anthony Elson 2021-09-15 This book explains how the US dollar serves as the primary reserve currency for the international financial system and assesses its prospects for the future. The book provides an analysis of the main factors that have given rise to the global currency power of the dollar and the key benefits that have accrued to both the United States and other countries from this arrangement. It then considers the growing costs that can be associated with the dollar-centered reserve system and the prospects for the medium-term in terms of its potential threats to global financial stability. In the light of these considerations, the book examines three alternative currency arrangements that could address some or all of the defects associated with the global currency power of the dollar. These include a shift to a multi-reserve currency system, an enhancement of the IMF's role as an international lender of last resort and provider of global "safe" assets, and the introduction of central bank digital currencies. "A cogent, persuasive and timely look at the dollar's power." Kirkus Reviews
